Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:

<https://softwaresupport.hpe.com>.

This site requires that you register for an HPE Passport and sign in. To register for an HPE Passport ID, go to

<https://softwaresupport.hpe.com> and click **Register**.

Support

Visit the HPE Software Support Online web site at: <https://softwaresupport.hpe.com>

This web site provides contact information and details about the products, services, and support that HPE Software offers.

HPE Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests

- Download software patches
- Manage support contracts
- Look up HPE support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HPE Passport user and sign in. Many also require a support contract. To register for an HPE Passport ID, go to: <https://softwaresupport.hpe.com> and click **Register**.

To find more information about access levels, go to: <https://softwaresupport.hpe.com/web/softwaresupport/access-levels>.

HPE Software Solutions & Integrations and Best Practices

Visit **HPE Software Solutions Now** at <https://softwaresupport.hpe.com/km/KM01702710> to explore how the products in the HPE Software catalog work together, exchange information, and solve business needs.

Visit **Hewlett Packard Enterprise Self-Solve Knowledge Search** at <https://softwaresupport.hpe.com/group/softwaresupport> to access a wide variety of best practice documents and materials.

Contents

- HPE Project and Portfolio Management Center 1
- Chapter 1: Overview 5
- Chapter 2: Installation Notes 6
- Chapter 3: Fixes 7
- Send Us Feedback12

Chapter 1: Overview

This document is an overview of the changes made to Project and Portfolio Management Center (PPM Center) for version 9.41.0001. It contains important information that is not included in the manuals. You can find information about the following in this document:

- "Installation Notes" on page 6
- "Fixes"

Software and Hardware Requirements

For information about the installation requirements and compatibility with other products, see the *System Requirements and Compatibility Matrix* for PPM Center version 9.41. The support matrix may be updated between releases, and so is only available at the HP Support web site:

<https://softwaresupport.hpe.com>

Protecting Your Deployment from Security Vulnerabilities

Make sure you take necessary precautions to protect your PPM Center deployment from general security vulnerabilities, especially those related to Web server and related infrastructure vulnerabilities. Patch and configure your Web server's operating system and DNX servers to prevent malicious attacks that could put your organization and data at risk. You can take such steps as disabling unused ports or enabling SSL in your environment. Consult your Web server vendor for the latest patches to prevent harmful attacks such as cross-site scripting.

Chapter 2: Installation Notes

Note:

- PPM Center 9.41 is required before you apply 9.41.0001.
- PPM recommends you back up your customized files including scripts before applying PPM Center 9.41.0001.

To install PPM Center version 9.41.0001:

1. Back up your database.
2. Back up your customized data.
3. Stop the PPM Server. The Service Pack cannot be installed on an active server.
4. Copy the Service Pack file `ppm-941-patch0001.jar` to the `<PPM_Home>` directory. This is the directory where the PPM Server is installed.
5. Change to the `<PPM_Home>/bin` directory.
6. Start the installation using the following command:

```
sh ./kDeploy.sh -i patch0001
```
7. Follow the on-screen instructions to complete the installation.
8. Start the PPM Server.

Chapter 3: Fixes

PPM 9.41.0001 includes the following defect fixes.

Costing

CR	Problem	Resolution
QCCR1L63932	The FX Rates Update Service does not update the actuals of any project after a rate is changed.	The FX Rates Update Service updates the actuals of all projects after a rate is changed.
QCCR1L64452	In the project overview page, the View Financial Summary button In the Project Cost portlet is not working.	In the project overview page, the View Financial Summary button In the Project Cost portlet works as expected.

Demand Management

CR	Problem	Solution
QCCR1L49581	Fail to use web services to update financial summary forecast lines user data if the validation of a user data field is validated by SQL that includes tokens.	You can use web services to update financial summary forecast lines user data when the validation of a user data fields is validated by SQL that includes the following token: <ul style="list-style-type: none">• [FS.FINANCIAL SUMMARY ID]• [FS.FORECAST_ACTUAL_ID]• [SYS.USER_ID]• Tokens of other fields in the same user data.
QCCR1L63849	When you save a search, the total number of the search results will be saved too. The next time you run the search, the saved total number does not include new records that meet your search criteria.	PPM will not save the total number of records of saved search. Instead, it will recalculate the total number every time you run the saved search.

QCCR1L64317	When you add a request (the child) as reference to another request (the parent), and the child request is of a request type that has a bigger batch number than the parent request, you will get an error: "java.lang.IndexOutOfBoundsException".	You are now able to add a request as reference to another request no matter what is the batch number of the child request type.
-------------	---	---

Deployment Management

CR	Problem	Solution
QCCR1L64108	Unable to migrate work plan templates in the clustered environment using kMigrator.sh.	Using kMigrator.sh, you can migrate Work plan templates in the clustered environment successfully.
QCCR1L64348	The following error occurs when you manually run the sqlplus command of the Package History Report: -bash: syntax error near unexpected token `('	If you encounter the error when running the sqlplus command of a report, add the following to the server.conf file: ADD_QUOTES_FOR_DB_CONNECTION = true This will automatically adds single quotes outside the command description.

Integrations

CR	Problem	Solution
QCCR1L63997	When you connect to PPM from the Microsoft Project plug-in using SSO, the login form shows the "About HP Project and Portfolio Management Center" page. If you close the form manually, the "Invalid Username/Password" error appears.	You can connect to PPM from the Microsoft Project plug-in using SSO successfully.
QCCR1L64106	Creating a QC/ALM defect does not create a PPM request successfully. The PPM request stays in Not Submitted Status and cannot be submitted manually.	Creating a QC/ALM defect creates a PPM request successfully.
QCCR1L64135	When you add external predecessors for a task, the task should not be included in the task search result.	When you add external predecessors for a task, the task is excluded from the task search result.

QCCR1L64249	When you connect to PPM from the Microsoft Project plug-in using SSO, the invalid user password error appears even when your password is correct.	When your connection information is correct, you can successfully connect to PPM from the Microsoft Project plug-in using SSO.
QCCR1L64260	When you access PPM with SiteMinder authentication, dashboard pages cannot be displayed properly on multiple nodes.	When you access PPM with SiteMinder authentication, dashboard pages are displayed properly on all nodes.

Platform

CR	Problem	Resolution
QCCR1L59970	The patch information is not clear in the About HPE Project and Portfolio Management Center page.	The patch information is available in the About HPE Project and Portfolio Management Center page.
QCCR1L63952	When you export a request search result to Excel, the multi-select field values are separated with "#@#".	When you export a request search result to Excel, the multi-select field values are separated with semicolons.
QCCR1L64052	When you use Firefox to access the User Management Console, the page crashes.	The User Management Console is displayed as expected when you access it using Firefox.
QCCR1L64318	When you use Internet Explorer to access PPM, the resource <code>/itg/web/knta/global/images/favicon-whiteonred.ico</code> causes session timeout.	PPM makes <code>/itg/web/knta/global/images/favicon-whiteonred.ico</code> a static resource which does not cause session timeout.
QCCR1L64462	In an auto-complete field with pages of records, records should not be selected automatically when you turn to any page.	In an auto-complete field with pages of records, records are not selected automatically when you turn to any page.

Program Management

CR	Problem	Solution
----	---------	----------

QCCR1L64105	You cannot clear filters for the scope changes table in the program overview page.	You can now clear filters for the scope changes table in the program overview page.
QCCR1L64122	Program start date and finish date vary in different time zones.	<p>To fix this issue, PPM changes the date format of scheduled start date and scheduled finish date of lifecycle entities. Program start date and finish date are the same in different time zones.</p> <p>Note: If you use the function <code>FetchProgramContent.do</code> in your customized code, you should contact HPE Support for how to change the date format of scheduled start date and scheduled finish date of lifecycle entities.</p>

Project Management

CR	Problem	Solution
QCCR1L64123	The Data Entry Error window pops up when you assign resources to a task using the Edit > Assignment option.	There will be no exception when you assign resources to a task using the Edit > Assignment option.
QCCR1L64366	The following error occurs when you run web services to update actual or forecast lines in financial summary: <code>org.apache.axis2.AxisFault: The expense type Capital is invalid, costs are not being capitalized.</code>	The error no longer occurs when you run web services to update actual or forecast lines in financial summary.

Time Management

CR	Problem	Solution
----	---------	----------

QCCR1L49980	When you submit a time sheet and it gets automatically approved, you then rework a time sheet line which makes the time sheet violate the policy "Minimum hours allowed per Time Sheet", the time sheet should not get approved automatically.	An error message will be displayed when you rework a time sheet line that causes policy violation.
QCCR1L64510	Suppose you add a task to a time sheet, and the task is then closed by the project manager. If you continue logging time against the task, saving the time sheet reopens the task and updates the percent complete value.	You can still log time against a task that is closed after being added into a time sheet, however, the time logged does not change the task percent complete value.
QCCR1L64541	In time sheets, the option "Tab key goes to next: Item Day" does not work in IE 11 in some clients.	In time sheets, the option "Tab key goes to next: Item Day" works as expected in IE 11 in all clients.
