Additional License Authorizations

For HPE Security Atalla software products

Products and suites covered

PRODUCTS	E-LTU OR E-MEDIA AVAILABLE [*]	NON-PRODUCTION USE CATEGORY [**]
Bloombase StoreSafe	Yes	N/A
HPE Atalla Network Security Processor (previously called HP Atalla Network Security Processor)	Yes[***]	N/A
HPE Atalla Secure Configuration Assistant (previously called HP Atalla Secure Configuration Assistant)	No	N/A
HPE Data Security Boxcar (previously called HP Boxcar)	Yes	Class 3
HPE Enterprise Secure Key Manager (previously called HP Enterprise Secure Key Manager)	Yes	N/A
HPE Network Security Processor Enhanced (previously called HP Network Security Processor Enhanced)	Yes	Class 3

[*] Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

[**] Non-production use rights, if any, can be found at **hpe.com/software/SWlicensing**.

[***] Only applicable to HPE Atalla Network Security Processor Variant software.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
AKB	means Atalla Key Block which is a key management system.
Appliance *or* **Appl**	means an Instance of software loaded and pre-configured on a Server.
Application	means any software program that performs specific functional tasks other than the operation of the software system upon which the software program runs.
Application Server	means software that executes business or application logic that is made available to a web server for processing requests. Application Servers are typically J2EE application servers or .Net application servers.
Application User	means a single User authorized to use the functionality of the licensed software as integrated with a single unique Application.
Business Application	means a class of cloud applications that helps the enterprise run their business and business operations (e.g., HR, Supply Chain etc.)
Client	means any applications or systems which provide functionality separate from that of the software and/or Appliance while providing for the facility to connect to and interact with the software and/or Appliance.
Client Class	means any ESKM Applications or systems as defined by its value basis for the customer environment by tier level (A – I).
Cluster	means a group of servers or other resources that act like a single system and enable high availability and in some cases, load balancing and parallel processing.

TERM	DEFINITION
Core	means a single computing component processing unit which reads and executes instructions to perform specific actions as part of a CPU.
CPU	means a system in a single integrated circuit package with one or more discrete processing Cores.
E-LTU *and* **E-Media**	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
IBE	means Identity Based Encryption; simplifying key management based on identity for encryption.
Implementation	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
Instance	means each implementation of the application installed on a Server.
IT Application	means software that provides a specified set of functions to support an information technology infrastructure, for example antivirus, indexing, search, or archiving. Each application may run on one or more Servers or Clients
LTU	means License To Use.
Mailbox	means one Microsoft Exchange mailbox, or enabled email address.
MFK	means Master File Key which is the root cryptographic key.
Non-Stop System	means an HPE high-end server.
NSP	means Network Security Processor.
Platform	means software that provides a base level of functionality to the User, upon which additional functionality may be added.
Platform User	means a single User authorized to use the applicable licensed Platform, to which multiple Applications may integrate.
Protected Data	means data which has had granular permissions applied to individual users or groups providing assignment of rights such as view, edit, print, copy or save , etc., and enforced via an information rights management system with encryption technology such as Microsoft Active Directory Rights Management Services (Microsoft AD RMS)
Server *or* **Svr**	means any designated computer system in which an Instance or Instances of the software is installed.
Term License to Use *or* **Term LTU**	means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month (1M), One Year (1Y), Three Year (3Y), etc. Term LTU's are not perpetual licenses.
Term Support	means a fixed period support offering that is only valid during the time period of the associated Term LTU.
User	means a user whose Use is restricted to the type of software that is being licensed.
User Pack	means a predetermined number of Users.
Variant	means legacy key wrapping technology software for NSP Appliance
Virtual Appliance	means Virtual Machine image designed to run on a virtualization platform (e.g., VirtualBox, Xen, VMware Workstation, Parallels Workstation).
Virtual Machine(s) *or* **VM(s)**	means a computer that does not physically exist but is simulated by another computer.

Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

Bloombase StoreSafe
Bloombase StoreSafe is licensed per CPU Core across all Virtual Appliance Instances deployed.

HPE Data Security Boxcar (previously called HP Boxcar)
HPE Data Security Boxcar is licensed per CPU for Non-Stop Systems for the purpose of managing multiple NSP systems.

HPE Enterprise Secure Key Manager (previously called HP Enterprise Secure Key Manager)
HPE Enterprise Secure Key Manager (ESKM) is licensed by Appliance and per ESKM Client Class for Applications and systems (i.e: Storage, Tape Library, SAN Switch, Nonstop VLE, etc). A separate license is required for each Client accessing the ESKM Cluster.

HPE Atalla Network Security Processor (Hardware Security Module – HSM, previously called HP Atalla Network Security Processor)
HPE Atalla Network Security Processor is licensed by Appliance for either AKB or Variant.

HPE Network Security Processor Enhanced is licensed by Appliance for either AKB or Variant.

HPE Atalla Network Security Processor One Master File Key (MFK) is licensed by Appliance for AKB only.

HPE Atalla Additional Function is licensed by Appliance for either AKB or Variant.

HPE Atalla Custom Command is licensed by Appliance for either AKB or Variant.

HPE Atalla Remote Key Support is licensed by Appliance for AKB only.

HPE NSP Ax160 Enhanced AKB IBE is licensed as part of a HPE SecureData solution that is deploying HPE Atalla NSP.
