# Additional License Authorizations

For HPE Automation Center and HPE Data Center Automation Suite software products

## Products and suites covered

PRODUCTS	E-LTU OR E-MEDIA AVAILABLE *	NON-PRODUCTION USE CATEGORY **
HPE Data Center Automation Appliance Express Edition (previously called HP Data Center Automation Appliance Express Edition)	Yes	Class 1
HPE Data Center Automation Appliance Premium Edition (previously called HP Data Center Automation Appliance Premium Edition)	Yes	Class 1
HPE Database and Middleware Automation Express Edition (previously called HP Database and Middleware Automation Express Edition)	Yes	Class 1
HPE Database and Middleware Automation Premium Edition (previously called HP Database and Middleware Automation Premium Edition)	Yes	Class 1
HPE Database and Middleware Automation Ultimate Edition (previously called HP Database and Middleware Automation Ultimate Edition and HP Database and Middleware Automation)	Yes	Class 1
HPE IT Operations Compliance Premium Edition (previously called HP IT Operations Compliance Premium Edition)	Yes	Class 1
HPE IT Operations Compliance Ultimate Edition (previously called HP IT Operations Compliance Ultimate Edition)	Yes	Class 1
HPE Server Automation (previously called HP Server Automation)	Yes	Class 1
HPE Service Automation Visualizer (previously called HP Service Automation Visualizer)	Yes	Class 1
SUITES	E-LTU OR E-MEDIA AVAILABLE *	NON-PRODUCTION USE CATEGORY **
HPE Data Center Automation Suite Express Edition	Yes	Class 1
HPE Data Center Automation Suite Premium Edition	Yes	Class 1
HPE Data Center Automation Suite Ultimate Edition	Yes	Class 1

\* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

\*\* Non-production use rights, if any, can be found at [software.microfocus.com/about/software-licensing](https://software.microfocus.com/about/software-licensing).

## Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
<b>Application Deployment Manager / Application Release Management</b>	means the tasks and processes associated with moving an application from development, through testing to production.
<b>Application Instance or ApplInstance</b>	<p>means a monitored environment running an instance of an application</p> <ul style="list-style-type: none"> <li>For .NET based application, ApplInstance is one windows process that runs .net (one worker processes).</li> <li>For Citrix, ApplInstance is any monitored XenApp, XenServer, XenDesktop, Web Interface, License Server, Provisioning Services, or Secure Gateway hosted on one hostname.</li> <li>For DB2 databases, an ApplInstance is one DB2 Database Instance as identified by a DB2 Instance User on a given system. For EMC Documentum, ApplInstance is any monitored Content Server, Index Server, xPlore Indexing Server, Web Based Applications (WebTop, DA, DAM), Web Content Publishing Services (SCS, IDS), Distributed Content Services (BOCS, DMS), or Content Transformation Services (DTS, ADTS) hosted on one hostname.</li> <li>For Java based applications, ApplInstance is one JVM.</li> <li>For Microsoft® Enterprise Servers (e.g., Exchange, Active Directory, Office Communications Server, Sharepoint, Biztalk, ISA etc.) ApplInstance is any monitored installation of any of the Servers.</li> <li>For Microsoft SQL Server, ApplInstance is one SQL Server service with its own port, logins and set of system and user Databases.</li> <li>For an Oracle database, ApplInstance is one SID (Oracle system ID) in a database environment, including the RDBMS software, table structure, stored procedures and other functionality.</li> <li>For PeopleTools servers, an ApplInstance is one of Application Server, Batch Server (Process Scheduler), Database Server, Web Server.</li> <li>For SAP Netweaver ABAP stack, ApplInstance is one Dialog or Central Instance. For Netweaver Java stack, ApplInstance is one JVM. Technically, for SAP Netweaver ApplInstance is the unique combination of the hostname, System ID of the SAP system and System Number of the SAP system (two-digit numeric value) to identify an Instance.</li> <li>For Siebel, ApplInstance is one Database Instance, one application server or one web server. For Siebel CRM, ApplInstance is any monitored Siebel application server, Gateway name server, web server with Web Server Extension, Siebel Analytics, or Oracle Business Intelligence services hosted on one hostname.</li> <li>For Sybase and Informix Server, ApplInstance is one Server with its own logins and set of system and user Databases.</li> <li>For Tuxedo servers, ApplInstance is one Tuxedo Instance.</li> <li>For Web Application Servers, ApplInstance is one Server that runs on a Java Virtual Machine (JVM) and has its own configuration.</li> <li>For WebSphere, WebLogic and JBoss Application Servers, an ApplInstance is one JVM that can be deployed standalone or clustered, and hosts and executes Java EE applications. For WMQ ApplInstance is one MQ Queue Manager instance.</li> <li>For CICS and IMS applications, ApplInstance is one CICS/IMS region that the monitored application (or part of it) is being hosted in.</li> </ul>
<b>Application Server</b>	means software that can be deployed standalone or clustered and has the sole purpose of acting as a container that hosts and executes one or more applications. Application Servers are typically J2EE application servers or .Net application servers.
<b>Compliance Management</b>	means the process of proactively establishing and applying compliance policies including patch levels and configuration standards.
<b>Connector or Conn</b>	means an integration element to a certain software, format or function through use of the HPE software product.
<b>Core</b>	means the server side component of software. Is typically complemented by an Agent component.
<b>Database</b>	means application data including table structure, stored procedures, and other functionality that runs on a Database Instance.
<b>Database Instance</b>	<p>means a software application that has the sole purpose of acting as a container that hosts and executes one or more Databases</p> <ul style="list-style-type: none"> <li>For Microsoft SQL Server, Database Instance is one SQL Server Service with its own port, logins and set of system and user Databases.</li> <li>For an Oracle database, Database Instance is one SID (Oracle system ID) in a database environment, including the RDBMS software, table structure, stored procedures and other functionality. For Oracle RAC, each Instance referencing a database environment is a Database Instance.</li> <li>For DB2 databases, Database Instance is one DB2 Database Instance as identified by a DB2 Instance with its User, TCP/IP service port on a given system.</li> <li>For Sybase and Informix Server, Database Instance is one Server (SAP Sybase Adaptive Server) with its own login, Dataserver port and set of system and user Databases.</li> </ul>
<b>Device or Dev</b>	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device or printer that resides within the range defined for interrogation and asset tracking.
<b>E-LTU and E-Media</b>	means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on Your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.

TERM	DEFINITION
<b>Implementation</b>	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
<b>Instance</b>	means each Implementation of the application installed on a Server.
<b>Internal Use</b>	means access and Use of the software for purposes of supporting your internal operations or functions.
<b>LTU</b>	means License To Use.
<b>Managed Entity or Mgd Enti</b>	means an addressable entity such as an operating system, middleware Instance, Database or application as specified in the software specific license terms below .
<b>Network Node</b>	means a managed Device (module) that has its own configuration. Note: Network Devices and Nodes are not always the same thing e.g. a switch (One Network Device) may have three nodes: one switching card, one routing card and one backup routing card.
<b>Operating System Instance or OS Inst or OSI</b>	means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
<b>Patching and Provisioning</b>	means the act of applying patches to servers and the process of provisioning software such as operating systems, middleware etc. to physical or Virtual Machines.
<b>Points</b>	means the numerical tracking system representing the total number of metrics you are authorized to execute.
<b>Reported Server Element</b>	means an element under management by Service Automation that is imported into or HPE BSA Essentials.
<b>Reported Non-Server Element</b>	means an element that is either under a Network Automation node or an Application Storage Automation Managed Storage element that is imported into or HPE BSA Essentials.
<b>SA Agent</b>	means an Agent that is designed to interoperate with the Server Automation Core.
<b>Satellite</b>	means gateway software that interoperates with a standard Core or a Non-Production Core.
<b>Server</b>	means any designated computer system in which an Instance or Instances of the software is installed.
<b>Solution Pack or SolPk</b>	means software that is imported into HPE Database and Middleware Automation that provides specific pre-packaged automation capabilities.
<b>Suite</b>	means two or more software products combined into a single license offering or a single software product which includes two or more licenses. The specific software products included in a Suite are specified in the Software Specific License Terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product, except where specified in the specific Suite software specific license terms below.
<b>Term License to Use or Term LTU</b>	means a software License To Use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month( 1M) , One Year(1Y) etc. Term LTU's are not perpetual licenses.
<b>Term Support</b>	means a fixed period support offering that is only valid during the time period of the associated Term LTU.
<b>Unit</b>	means a rationalized unit of licensing that provides entitlement to multiple metrics in a pre-defined ratio. This licensing Unit enables a customer to purchase entitlement as Units and apply it to any of the underlying metrics defined by the Unit. See software specific license terms for the definition of Unit for products and suites that are licensed by Unit.
<b>Universal Agent</b>	means an Agent running on a single Operating System Instance.
<b>Unlimited</b>	means without restrictions in terms of number of systems, devices or media, depending on the context.
<b>Use</b>	means to install, store, load, execute and display one copy of the software.
<b>User</b>	means a user whose Use is restricted to the type of software that is being licensed.
<b>Virtual Appliance</b>	means a Virtual Machine image designed to run on a virtualization platform (e.g., VirtualBox, Xen, VMware vCenter, Workstation, Parallels Workstation).
<b>Virtual Machine(s) or VM(s)</b>	means a computer that does not physically exist but is simulated by another computer.

## Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

### **HPE Data Center Automation Appliance Express Edition (previously called HP Data Center Automation Appliance Express Edition)**

HPE Data Center Automation Appliance (DCAA) Express Edition is a Virtual Appliance licensed up to 750 Operating System Instances. Each Operating System instance entitles you to 1 HPE Server Automation OS Instance and 1 HPE Operations Orchestration Server and Storage Node. For HPE Operations Orchestration Server and Storage Node (previously called HPE Operations Orchestration Enterprise Orchestrated Node) the Node can represent OS Instances on a physical Device, a Virtual Machine, and storage arrays.

The HPE DCAA Express Edition license does not include Audit & Compliance, management of Solaris servers, Multi-Master, Service Automation Visualizer (SAV) Server Automation functionality or High Availability & clustering Operations Orchestration functionality. An HPE DCAA Express Edition license only includes entitlement to these HPE Operations Orchestration content packs: HPE OO Community, Base, HPE Server Automation, Operating Systems and HPE Solutions content packs. An HPE DCAA Express Edition license does not include use of hybrid cloud management, cloud brokering capabilities, cloud analytics or integration with HPE Codar. Resource provider support in HPE DCAA 1.0 is restricted to the HPE Server Automation module available as part of HPE DCAA Express Edition.

### **HPE Data Center Automation Appliance Premium Edition (previously called HP Data Center Automation Appliance Premium Edition)**

HPE Data Center Automation Appliance (DCAA) Premium Edition is a Virtual Appliance licensed up to 3,000 Operating System Instances. Each Operating System instance entitles you to 1 HPE Server Automation OS Instance and 1 HPE Operations Orchestration Server and Storage Node. For HPE Operations Orchestration Server and Storage Node (previously called HPE Operations Orchestration Enterprise Orchestrated Node) the Node can represent OS Instances on a physical Device, a Virtual Machine, and storage arrays.

The HPE DCAA Premium Edition license does not include use of the Multi-Master and Service Automation Visualizer (SAV) Server Automation functionality or High Availability & clustering Operations Orchestration functionality. An HPE DCAA Premium Edition license only includes entitlement to these HPE Operations Orchestration content packs: HPE OO Community, Base, HPE Server Automation, Operating Systems, Business Applications, HPE Solutions, IT Operations and Virtualization content packs. An HPE DCAA Premium Edition license does not include use of hybrid cloud management, cloud brokering capabilities, cloud analytics or integration with HPE Codar. Resource provider support in HPE DCAA 1.0 is restricted to the HPE Server Automation module available as part of HPE DCAA Premium Edition.

### **HPE Database and Middleware Automation Express Edition (previously called HP Database and Middleware Automation Express Edition)**

HPE Database and Middleware Automation Express Edition is licensed by Operating System Instance and there is:

- A limit of 10 Database Instances allowed per OS Instance license, with each Database Instance authorized to host an Unlimited number of Databases.
- A limit of 10 Application Instances allowed per OS Instance license.

Every target OS Instance requires a license of HPE Database and Middleware Automation Express Edition, and a license of either HPE Operations Orchestration Enterprise O-Node or HPE Operations Orchestration CloudFlex O-Node, regardless of whether executing HPE or non-HPE workflow content.

### **HPE Database and Middleware Automation Premium Edition (previously called HP Database and Middleware Automation Express Edition)**

HPE Database and Middleware Automation Premium Edition is licensed by Operating System Instance and there is:

- A limit of 10 Database Instances allowed per OS Instance license, with each Database Instance authorized to host an Unlimited number of Databases.
- A limit of 10 Application Instances allowed per OS Instance license.

Every target OS Instance requires a license of HPE Database and Middleware Automation Premium Edition, and a license of either HPE Operations Orchestration Enterprise O-Node or HPE Operations Orchestration CloudFlex O-Node, regardless of whether executing HPE or non-HPE workflow content.

**HPE Database and Middleware Automation Ultimate Edition (previously called HP Database and Middleware Automation Ultimate Edition and HP Database and Middleware Automation)**

HPE Database and Middleware Automation Ultimate Edition is licensed as follows.

- The HPE Database and Middleware Automation Database Module is licensed by Operating System Instance and there is a limit of 10 Database Instances allowed per OS Instance license, with each Database Instance authorized to host an Unlimited number of Databases.
- The HPE Database and Middleware Automation Application Server Module is licensed by Operating System Instance and there is a limit of 10 Application Instances allowed per OS Instance license.

Every target OS Instance requires a license of HPE Database and Middleware Automation Database Module or HPE Database and Middleware Automation Application Server Module regardless of whether executing HPE or non-HPE workflow content.

HPE Database & Middleware Automation licensed per OS Instance is only licensed to customers who purchased such licenses between June 1, 2015 and December 1, 2015:

- HPE Database and Middleware Automation includes HPE Database and Middleware Automation Express Edition capabilities, and as such, is subject to the licensing requirements of HPE Database and Middleware Automation Express Edition, defined above, for target OS instances running Database and Middleware Automation Express Edition content.
- HPE Database and Middleware Automation includes HPE Database and Middleware Automation Express Edition capabilities, and as such, is subject to the licensing requirements of HPE Database and Middleware Automation Express Edition defined above for target OS Instances running HPE Database and Middleware Automation Express Edition content.

HPE Database and Middleware Automation licensed per Database Instance and Application Instance is only licensed to customers who purchased such licenses between December 1, 2013 and May 1, 2014:

- The Database Module is licenses by Database Instance
- The Application Server Module is licensed by Application Instance.

HPE Database and Middleware Automation licensed per OS Instance is only licensed to customers who purchased such licenses between September 1, 2012 and December 1, 2013:

- For the Database Solution Pack a Managed Entity is defined as an Operating System Instance.
- For the Application Server Solution Pack a Managed Entity is defined as an Operating System Instance.

HPE Database and Middleware Automation licensed per Solution Pack and per Managed Entity is only licensed to customers who purchased such licenses prior to September 1, 2012:

- For the Database Provisioning Solution Pack and the Application Server Provisioning Solution Pack a Managed Entity is defined as an Operating System Instance.
- For the Advanced Database Provisioning Solution Pack and the Advanced Database Patching Solution Pack, a Managed Entity is defined as a Database Instance.
- For the Database Compliance Solution Pack, a Managed Entity is defined as a Database Instance.
- For the Database Release Management Solution Pack, a Managed Entity is defined as a Database.
- For the Application Server Release Management Solution Pack, a Managed Entity is defined as an Application Server.

**HPE IT Operations Compliance Premium Edition, HPE IT Operations Compliance Ultimate Edition (previously called HP IT Operations Compliance Premium Edition, HP IT Operations Compliance Ultimate Edition)**

HPE IT Operations Compliance Premium Edition and HPE IT Operations Compliance Ultimate Edition are licensed by Operating System Instance.

**HPE Server Automation (previously called HP Server Automation)**

HPE Server Automation includes a license to HPE Operations Bridge Reporter. Until December 20, 2015, HPE Server Automation 10.10 and higher included a license of HPE Automation Insight; older versions of HPE Server Automation included a license of HPE BSA Essentials. Customers who have previously installed HPE Automation Insight or HPE BSA Essentials may continue to use those products. These HPE Operations Bridge Reporter, HPE Automation Insight and HPE BSA Essentials licenses can only be used in conjunction with HPE Server Automation. HPE Server Automation Enterprise Plus, Enterprise Edition and Starter Editions require an Oracle database; the license to run Oracle is not included with HPE Server Automation. Customers are expected to purchase their license directly from Oracle or to Use an existing license.

**HPE Server Automation Premium Edition (previously called HP Server Automation Standard)** is licensed by Operating System Instance and can be used in environments with up to 3,000 Operating System Instances for the purpose of Provisioning, Patching, Software Management and Compliance. HPE Server Automation Premium Edition does not include Multi-Master, Satellite and Service Automation Visualizer (SAV) functionality.

**HPE Server Automation Ultimate Edition (previously called HP Server Automation Enterprise Plus)** is licensed by Operating System Instance. Multi-Master, Satellite and Service Automation Visualizer (SAV) functionality are included in HPE Server Automation Ultimate Edition and are licensed by OS Instance and are limited to Use with the same HPE Server Automation Ultimate Edition OS Instance license that it was originally licensed with. In addition, Multi-Master, Satellite and Service Automation Visualizer functionality that is included in HPE Server Automation Ultimate Edition is also licensed to Use with previously purchased licenses of the stand-alone versions of HPE Server Automation Multi-Master or HPE Server Automation Satellite or HPE Server Automation Visualizer. The HPE Server Automation Ultimate Edition version included in the HPE Cloud and Automation Suite Premium Edition does not include the Multi-Master and Service Automation Visualizer functionality as described in this paragraph.

**HPE Server Automation Enterprise Edition** is only licensed per OS Instance to customers who purchased HPE Server Automation Enterprise Edition prior to September 1, 2011.

**HPE Server Automation Starter Edition for Compliance Management** is only licensed to customers who purchased HPE Server Automation Starter Edition for Compliance Management prior to September 1, 2011. HPE Server Automation Starter Edition for Compliance Management is an entry level HPE Server Automation package which can be used in environments with up to 1000 Operating System Instances for the purpose of Compliance Management. Users are not entitled to perform Provisioning functions. Customers are entitled to Use other basic features such as global shell, baseline, and security features.

**HPE Server Automation Starter Edition for Patching and Provisioning** is licensed by Operating System Instance and is an entry level HPE Server Automation package which can be used in environments with up to 1000 Operating System Instances for the purpose of Patching and Provisioning including operating systems and applications. Customers are entitled to Use other basic features such as global shell, baseline, and security features. HPE Server Automation Starter Edition for Patching and Provisioning is only licensed to customers who purchased HPE Server Automation Starter Edition for Patching and Provisioning prior to June 1, 2013.

**HPE Application Deployment Manager (previously called HP Server Automation Starter Edition for Application Deployment Manager and HP Server Automation Starter Edition for Application Release Manager)**

HPE Application Deployment Manager is only licensed to customers who purchased HPE Application Deployment Manager prior to September 1, 2011. HPE Application Deployment Manager is a HPE Server Automation edition with limited HPE Operations Orchestration bundling which can be used for the purpose of Application Deployment Management. Administrative Users are entitled to Use the lowest tier of HEP Operations Orchestration, which is limited to 150 Devices, 1 Concurrent User and 1 Workflow Author User licenses.

## HPE Automation Center Suite and HPE Data Center Automation Suite offerings

SUITE	OFFERING INCLUDES	ADDITIONAL TERMS (IF ANY)
<b>HPE Data Center Automation Suite Express Edition 10 OS Instance Pack *</b>	<ul style="list-style-type: none"> <li>1 HPE Data Center Automation Virtual Appliance, includes the following as embedded components of the Virtual Appliance that may represent OS Instances on a physical Device, a Virtual Machine or a storage array:               <ul style="list-style-type: none"> <li>10 HPE Server Automation OS Instance</li> <li>10 HPE Operations Orchestration Server &amp; Storage Node</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Management of up to 1,000 OSI's per Virtual Appliance.</li> <li>Does not include use of HPE Data Center Automation Virtual Appliance Operations Portal cloud brokering, multi-tenancy, cloud analytics capabilities.</li> <li>Resource provider support in the HPE Data Center Automation Virtual Appliance Operations Portal excludes the use of public cloud and Helion Openstack resource providers.</li> <li>Does not include the use of Audit &amp; Compliance, management of Solaris servers, Multi-Master, Service Automation Visualizer or High Availability functionality as a part of the HPE Server Automation component.</li> <li>Does not include the use of HPE Operations Orchestration clustering functionality.</li> </ul>
<b>HPE Data Center Automation Suite Premium Edition 10 OS Instance Pack *</b>	<ul style="list-style-type: none"> <li>1 HPE Data Center Automation Virtual Appliance, includes the following as embedded components of the Virtual Appliance that may represent OS Instances on a physical Device, a Virtual Machine or a storage array:               <ul style="list-style-type: none"> <li>10 HPE Server Automation OS Instance</li> <li>10 HPE Operations Orchestration Server &amp; Storage Node</li> </ul>               and including the following as embedded components of the Virtual Appliance:               <ul style="list-style-type: none"> <li>10 HPE IT Operations Compliance Premium Edition OS Instance</li> </ul> </li> <li>1 HPE Database and Middleware Automation Premium Edition OS Instance</li> <li>1 HPE Network Automation Premium Edition Node</li> </ul>	<ul style="list-style-type: none"> <li>Management of up to 5,000 OSI's per Virtual Appliance along with entitlements to HPE Database and Middleware Automation Premium Edition and HPE Network Automation Premium Edition.</li> <li>Does not include use of HPE Data Center Automation Virtual Appliance Operations Portal cloud brokering, multi-tenancy, cloud analytics capabilities.</li> <li>Resource provider support in the HPE Data Center Automation Virtual Appliance Operations Portal excludes the use of public cloud and Helion Openstack resource providers.</li> <li>Does not include the use of Multi-Master, Service Automation Visualizer or High Availability functionality as a part of the HPE Server Automation component.</li> <li>Does not include the use of HPE Operations Orchestration clustering functionality.</li> </ul>
<b>HPE Data Center Automation Suite Ultimate Edition 10 OS Instance Pack *</b>	<ul style="list-style-type: none"> <li>1 HPE Data Center Automation Virtual Appliance, includes the following as embedded components of the Virtual Appliance that may represent OS Instances on a physical Device, a Virtual Machine or a storage array:               <ul style="list-style-type: none"> <li>10 HPE Server Automation Ultimate Edition OS Instance</li> <li>10 HPE Operations Orchestration Server &amp; Storage Node</li> </ul>               and including the following as embedded components of the Virtual Appliance:               <ul style="list-style-type: none"> <li>10 HPE IT Operations Compliance Ultimate Edition OS Instance</li> </ul> </li> <li>1 HPE Database and Middleware Automation Ultimate Edition OS Instance</li> <li>1 HPE Network Automation Ultimate Edition Node</li> </ul>	

SUITE	OFFERING INCLUDES	ADDITIONAL TERMS (IF ANY)
<b>HPE Data Center Automation Suite Express Edition 1 Unit *</b>	<ul style="list-style-type: none"> <li>1 Unit equals 1 Server OS Instance or 2 Database / Middleware OS Instances: <ul style="list-style-type: none"> <li>Server, Database and Middleware provisioning management capabilities</li> <li>Operations Orchestration on a physical Device, a Virtual Machine or a storage array</li> <li>Infrastructure Reporting</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Includes a license to HPE Operations Bridge Reporter Standard.</li> <li>Requires an Oracle database; the license to run Oracle is not included. Customers are expected to purchase their license directly from Oracle or to Use an existing license.</li> <li>Does not include the use of Patching, Audit &amp; Compliance or Advanced Analytics functionality. Server patches can be initially deployed via OS Build plans.</li> <li>HPE Service Automation Visualizer not supported.</li> <li>Does not include support for clustered databases &amp; middleware instances.</li> <li>The bundled HPE Operations Orchestration within the HPE DCA Suite (Unit based) can be used through invocation only from DCA suite components. This usage is restricted to infrastructure use cases within the context of Server, Database &amp; Middleware Application lifecycle management use cases (Provisioning, Patching &amp; Compliance related) and does include HPE Operations Orchestration Content Packs for infrastructure &amp; middleware lifecycle management.</li> </ul>
<b>HPE Data Center Automation Suite Premium Edition 1 Unit *</b>	<ul style="list-style-type: none"> <li>1 Unit equals 1 Server OS Instance or 2 Database / Middleware OS Instances: <ul style="list-style-type: none"> <li>Server, Database and Middleware provisioning, patching, audit and compliance capabilities</li> <li>Operations Orchestration on a physical Device, a Virtual Machine or a storage array</li> <li>Infrastructure Reporting</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Includes a license to HPE Operations Bridge Reporter Standard.</li> <li>Includes Security &amp; Compliance Content.</li> <li>Requires an Oracle database; the license to run Oracle is not included. Customers are expected to purchase their license directly from Oracle or to Use an existing license.</li> <li>Does not include the use of Advanced Analytics functionality.</li> <li>HPE Service Automation Visualizer not supported.</li> <li>The bundled HPE Operations Orchestration within the HPE DCA Suite (Unit based) can be used through invocation only from DCA suite components. This usage is restricted to infrastructure use cases within the context of Server, Database &amp; Middleware Application lifecycle management use cases (Provisioning, Patching &amp; Compliance related) and does include HPE Operations Orchestration Content Packs for infrastructure &amp; middleware lifecycle management.</li> </ul>

SUITE	OFFERING INCLUDES	ADDITIONAL TERMS (IF ANY)
<b>HPE Data Center Automation Suite Ultimate Edition 1 Unit *</b>	<ul style="list-style-type: none"> <li>1 Unit equals 1 Server OS Instance or 2 Database / Middleware OS Instances: <ul style="list-style-type: none"> <li>Server, Database and Middleware provisioning, patching, audit and compliance capabilities</li> <li>Operations Orchestration on a physical Device, a Virtual Machine or a storage array</li> <li>Infrastructure Reporting</li> </ul> </li> <li>Advanced Analytics via Cloud Optimizer</li> </ul>	<ul style="list-style-type: none"> <li>Includes a license to HPE Operations Bridge Reporter Standard.</li> <li>Includes Security &amp; Compliance Content.</li> <li>Requires an Oracle database; the license to run Oracle is not included.
