

Additional License Authorizations

For HPE Cloud Center and HPE Helion Cloud Suite software products

Products and suites covered

PRODUCTS	E-LTU OR E-MEDIA AVAILABLE ¹	NON-PRODUCTION USE CATEGORY ²
HPE Cloud Service Automation (previously called HP Cloud Service Automation)	Yes	Class 1
HPE Codar (previously called HP Codar)	Yes	Class 1 or 3 ^{****}
HPE Enterprise Maps (previously called HP Enterprise Maps)	Yes	Class 1
HPE Operations Orchestration (previously called HP Operations Orchestration)	Yes	Class 1
HPE Operations Orchestration Content for SAP Process Automation (previously called HP Operations Orchestration Content for SAP Process Automation)	Yes	Class 1

SUITES	E-LTU OR E-MEDIA AVAILABLE ¹	NON-PRODUCTION USE CATEGORY ²
HPE Cloud and Automation Suite Express Edition (previously called HP Cloud and Automation Suite Express Edition)	Yes	Class 1
HPE Cloud and Automation Suite Premium Edition (previously called HP Cloud and Automation Suite Premium Edition)	Yes	Class 1
HPE Cloud and Automation Suite Ultimate Edition (previously called HP Cloud and Automation Suite Ultimate Edition)	Yes	Class 1
HPE Cloud Orchestration Suite Express Edition	Yes	Class 1 ^{***}
HPE Cloud Orchestration Suite Premium Edition	Yes	Class 1 ^{***}
HPE CloudSystem Enterprise Starter Suite (previously called HP CloudSystem Enterprise Starter Suite)	Yes	Class 1
HPE CloudSystem Enterprise Add-on Platform Applications and Analytics Suite (previously called HP CloudSystem Enterprise Add-on Platform Applications and Analytics Suite)	Yes	Class 1
HPE Helion Cloud Suite Express Edition	Yes	Class 3
HPE Helion Cloud Suite Premium Edition	Yes	Class 3
HPE Helion Cloud Suite Ultimate Edition	Yes	Class 3
HPE Hybrid Cloud Management Suite Express Edition	Yes	Class 1
HPE Hybrid Cloud Management Suite Premium Edition	Yes	Class 1
HPE Hybrid Cloud Management Suite Ultimate Edition	Yes	Class 1

* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

** Non-production use rights, if any, can be found at software.microfocus.com/about/software-licensing.

*** Determined by individual component product's Non-Production classification.

**** See software specific license terms.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
Administrative User	means a specific individual authorized to execute the workflow.
Agent	means that portion of the software that manages and is required for each physical server, virtual server or container.
Application Model	means software solution designed to help users perform specific tasks. Examples of Application Models include portals, financial management systems, retail POS software, human and customer relationship management software etc. The Application Model can consist of one more individual programs including Databases, Application Servers and the infrastructure on which the platform and application run. Every Application Model can have multiple versions which don't add to the Application Model count.
Application Server	means software that can be deployed standalone or clustered and has the sole purpose of acting as a container that hosts and executes one or more applications. Application Servers are typically J2EE application servers or .Net application servers.
Client	means any application or systems which provide functionality separate from that of the Software while providing for the facility to connect to and interact with the Software.
Cloud Content	means HPE IT Executive Scorecard Cloud Content Acceleration Pack (CAP). Cloud CAP provides a set of items (Dashboard pages, Scorecards, Contexts, KPIs, and more) that automatically gathers information from across your cloud deployment to build key performance indicators (KPIs), metrics, pages and show back information related to Cloud provisioning issues.
Concurrent User or CC User	means the software is licensed by the amount of users that simultaneously Use the software at any one point in time. The software can be installed on any number of computers, provided that the actual usage of the software does not exceed the number of licenses purchased.
Connector	means an integration element to a certain software, Device format or function through use of the HPE software.
Content Pack	means the pre-packaged programs, utilities and data included with the application.
Core	means the server side component of software. Is typically complemented by an Agent component.
Database	means application data including table structure, stored procedures, and other functionality that runs on a Database Instance.
Database Instance	means a software application that has the sole purpose of acting as a container that hosts and executes one or more Databases <ul style="list-style-type: none"> • For Microsoft SQL Server, Database Instance is one SQL Server Service with its own port, logins and set of system and user Databases. • For an Oracle database, Database Instance is one SID (Oracle system ID) in a database environment, including the RDBMS software, table structure, stored procedures and other functionality. For Oracle RAC, each Instance referencing a database environment is a Database Instance. • For DB2 databases, Database Instance is one DB2 Database Instance as identified by a DB2 Instance with its User, TCP/IP service port on a given system. • For Sybase and Informix Server, Database Instance is one Server (SAP Sybase Adaptive Server) with its own login, Dataserver port and set of system and user Databases.
Device or Dev	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device or printer that resides within the range defined for interrogation and asset tracking.
E-LTU and E-Media	means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on Your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Foundation or Foundation Server	means the server side component of software that is required in order to get an operational Implementation as specified in the software specific license terms below.
Implementation	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
Instance	means each Implementation of the application installed on a Server.
LTU	means License To Use.
Named User or Nmd User	means a specific individual authorized by you to access the software regardless of whether they are actively using the software.

TERM	DEFINITION
Node	means a specific Node that is further defined in the Software Specific Terms below.
Operating System Instance or OS Inst or OSI	means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
Points	means the numerical tracking system representing the total number of metrics you are authorized to execute.
SAP Instance	means a standalone SAP basis unit which provides services used by clients connected to the SAP system. Among these services are the message server and the enqueue server, which run only on the single SAP Central Instance.
Server	means any designated computer system in which an Instance or Instances of the software is installed.
Shift User	means a user that has the right to use the product on each of three(3) shifts, It is the equivalent of one(1) shift worker regardless of shift and supports three(3) specific individuals working non-overlapping shifts.
Suite	means two or more software products combined into a single license offering or a single software product which includes two or more licenses. The specific software products included in a Suite are specified in the software specific license terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product, except where specified in the specific Suite software specific license terms below.
Term License to Use or Term LTU	means a software License To Use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month (1M) , One Year (1Y) etc. Term LTU's are not perpetual licenses.
Term Support	means a fixed period support offering that is only valid during the time period of the associated Term LTU.
Unit	means a rationalized unit of licensing that provides entitlement to multiple metrics in a pre-defined ratio. This licensing Unit enables a customer to purchase entitlement as Units and apply it to any of the underlying metrics defined by the Unit. See software specific license terms for the definition of Unit for products and suites that are licensed by Unit.
Unlimited or Unl	means without restrictions in terms of number of systems, Devices or media, depending on the context.
User	means a user whose Use is restricted to the type of software that is being licensed.
Virtual Machine(s) or VM(s)	means a computer that does not physically exist but is simulated by another computer.
Workflow Author Named User	means a specific administrator who is authorized to create and edit process automation workflows.

Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

HPE Cloud Service Automation (previously called HP Cloud Service Automation)

HPE Cloud Service Automation is licensed by a pack of 10 Operating System Instances. HPE Cloud Service Automation 10 OS Instance pack includes a limited HPE Universal CMDB (UCMDB) Foundation license which provides the right to use the UCMDB Server, the Data Flow Probe infrastructure, the UCMDB Admin UI, and the UCMDB Browser only in conjunction with HPE Cloud Service Automation. The rights to use Universal Discovery, Configuration Manager, and UCMDB adapters for third-party repositories must be licensed separately.

HPE Codar (previously called HP Codar)

HPE Codar is licensed by a pack of 10 Operating System Instances. When HPE Codar is used with HPE Cloud Service Automation, the number of OS Instance licenses must be the same. The HPE Codar 10 OS Instance Pack version 2 license introduced in April 2017 is classified as Non-Production Use Category Class 1, the HPE Codar 10 OS Instance Pack license is classified as Non-Production Use Category Class 3.

HPE Enterprise Maps (previously called HP Enterprise Maps)

HPE Enterprise Maps is licensed by Named User, Concurrent User and Connector. This Connector license authorizes bi-directional integration.

HPE Operations Orchestration (previously called HP Operations Orchestration)

HPE Operations Orchestration is licensed by Node. The license includes the Core Server, central Server, remote access Server, entire standard content library, all 3rd party integration components and Unlimited users and administrators/authors.

- For HPE Operations Orchestration Server and Storage Node (previously called HPE Operations Orchestration Enterprise Orchestrated Node) the Node can represent OS Instances on a physical Device or a Virtual Machine, a physical Device hosting multiple VMs where there are multiple OS Instances, and storage arrays
- For HPE Operations Orchestration Network Node (previously called HPE Operations Orchestration Network Orchestrated Node) the Node can represent network Devices such as a switch, router or hub
- For HPE Operations Orchestration Edge Device Node the Node can represent end user Devices such as Clients, laptops/desktops, handhelds, smart Devices, and SOHO Devices such as low cost WiFi routers, switches, cable boxes
- For HPE Operations Orchestration Virtual Machine 10 Node (previously called HPE Operations Orchestration CloudFlex 10 Orchestrated Node) each Node represents a Virtual Machine.

HPE Operations Orchestration Platform is only licensed to customers who purchased HPE Operations Orchestration Platform prior to September 1, 2011. HPE Operation Orchestration Platform license includes the Core Server, central Server, remote access Server, entire standard content library and all 3rd party integration components. HPE Operations Orchestration Platform allows software architecture independent of the number of Core Servers and can be installed on any number of computers, provided that the actual usage of the software does not exceed the number of licenses purchased as per the Device tier package.

HPE Operations Orchestration Platform for Integration Only is only licensed to customers who purchased HPE Operations Orchestration Platform for Integration Only prior to September 1, 2011. HPE Operations Orchestration Platform for Integration Only license is restricted to integration of HPE Server Automation or HPE Network Automation with ticketing or monitoring systems, and may not be used for alert/incident resolution automation or other broader Run Book Automation use cases.

HPE Operations Orchestration Content for SAP Process Automation (previously called HP Operations Orchestration Content for SAP Process Automation and HP Operations Orchestration SAP Process Automation) is licensed per 5 SAP Instances.

HPE Cloud Center Suite and HPE Helion Cloud Suite offerings

SUITE	OFFERING INCLUDES	ADDITIONAL TERMS (IF ANY)
HPE Cloud and Automation Suite Express Edition 10 OS Instance Pack (previously called HP Cloud and Automation Suite Express Edition 10 OS Instance Pack)	<ul style="list-style-type: none"> • 1 HPE Cloud Service Automation 10 OS Instance Pack • 10 HPE Operations Orchestration Server and Storage Node • 1 HPE IT Executive Scorecard Casual Named User • 1 HPE IT Executive Scorecard Named User 	<ul style="list-style-type: none"> • N/A. • Includes Virtual Machines and customer may combine the licenses – not to exceed 10 total. • For use only with Cloud Content. • For use only with Cloud Content. Additional purchases of this Suite will not include additional HPE IT Executive Scorecard Named Users. Entitlement is limited to 1 Named User per Implementation of HPE CloudSystem Enterprise Add-on Platform Applications and Analytics Suite.
HPE Cloud and Automation Suite Premium Edition 10 OS Instance Pack (previously called HP Cloud and Automation Suite Premium Edition 10 OS Instance Pack and before that HP Cloud Service Automation Enterprise Suite 10 OS Instance Pack)	<ul style="list-style-type: none"> • 1 HPE Cloud Service Automation 10 OS Instance Pack • 10 HPE Server Automation Ultimate Edition OS Instance • 10 HPE Operations Orchestration Server and Storage Node • 1 HPE IT Executive Scorecard Casual Named User • 1 HPE IT Executive Scorecard Named User 	<ul style="list-style-type: none"> • N/A. • Excluding Multi-Master and Service Automation Visualizer functionality. • Includes Virtual Machines and customer may combine the licenses – not to exceed 10 total. • For use only with Cloud Content. • For use only with Cloud Content. Additional purchases of this Suite will not include additional HPE IT Executive Scorecard Named Users. Entitlement is limited to 1 Named User per Implementation of HPE CloudSystem Enterprise Add-on Platform Applications and Analytics Suite.

SUITE	OFFERING INCLUDES	ADDITIONAL TERMS (IF ANY)
HPE Cloud and Automation Suite Ultimate Edition 10 OS Instance Pack (previously called HP Cloud and Automation Suite Ultimate Edition 10 OS Instance Pack)	<ul style="list-style-type: none"> • 1 HPE Cloud Service Automation 10 OS Instance Pack • 10 HPE Server Automation Ultimate Edition OS Instance • 10 HPE Operations Orchestration Server and Storage Node • 1 HPE Database & Middleware Automation Database Module for Database Instance • 1 HPE IT Executive Scorecard Casual Named User • 1 HPE IT Executive Scorecard Named User 	<ul style="list-style-type: none"> • N/A. • Full Multi-Master and Service Automation Visualizer functionality. • Includes Virtual Machines and customer may combine the licenses – not to exceed 10 total. • N/A. • For use only with Cloud Content. • For use only with Cloud Content. Additional purchases of this Suite will not include additional HPE IT Executive Scorecard Named Users. Entitlement is limited to 1 Named User per Implementation of HPE CloudSystem Enterprise Add-on Platform Applications and Analytics Suite.
HPE Cloud Orchestration Suite Express Edition 10 OS Instance Pack	<ul style="list-style-type: none"> • 1 HPE Cloud Service Automation 10 OS Instance Pack • 10 HPE Operations Orchestration Server and Storage Node • 1 HPE IT Business Analytics Named User • 10 HPE Virtualization Performance Viewer / HPE Cloud Optimizer OS Instance • 1 HPE Enterprise Maps Named User • 10 HPE Operations Analytics Express Edition Operations Analytics Node • 1 HPE Universal CMDB Foundation 	<ul style="list-style-type: none"> • N/A • N/A • For use only with Cloud Analytics Content, also includes 1 Power Named User per Order. • N/A • Limited to Cloud Assessment feature. • N/A • Includes one limited HPE Universal CMDB (UCMDB) Foundation license per order, which provides the right to use the UCMDB Server, the Data Flow Probe infrastructure, the UCMDB Admin UI, and the UCMDB Browser only in conjunction with HPE Cloud Orchestration Suite. The rights to use Universal Discovery, Configuration Manager, and UCMDB adapters for third-party repositories must be licensed separately.

SUITE	OFFERING INCLUDES	ADDITIONAL TERMS (IF ANY)
HPE Cloud Orchestration Suite Premium Edition 10 OS Instance Pack	<ul style="list-style-type: none"> • 1 HPE Cloud Service Automation 10 OS Instance Pack • 10 HPE Operations Orchestration Server and Storage Node • 1 HPE IT Business Analytics Named User • 10 HPE Virtualization Performance Viewer / HPE Cloud Optimizer OS Instance • 1 HPE Enterprise Maps Named User • 10 HPE Operations Analytics Premium Edition Operations Analytics Node • 1 HPE Universal CMDB Foundation • 1 HPE Data Center Automation Suite Premium Edition 10 OS Instance Pack • 1 HPE Operations Bridge Premium Edition Suite 10 Node Pack Node • 10 HPE Operations Bridge System Collector OS Instance 	<ul style="list-style-type: none"> • N/A • N/A • For use only with Cloud Analytics Content, also includes 1 Power Named User per Order. • N/A • Limited to Cloud Transformation feature. • N/A • Includes one limited HPE Universal CMDB (UCMDB) Foundation license per order, which provides the right to use the UCMDB Server, the Data Flow Probe infrastructure, the UCMDB Admin UI, and the UCMDB Browser only in conjunction with HPE Cloud Orchestration Suite. The rights to use Universal Discovery, Configuration Manager, and UCMDB adapters for third-party repositories must be licensed separately. • Includes: <ul style="list-style-type: none"> ○ 10 HPE Data Center Virtual Appliance OS Instance ○ 10 HPE IT Operations Compliance Premium Edition OS Instance ○ 1 HPE Database and Middleware Automation Premium Edition OS Instance ○ 1 HPE Network Automation Premium Edition Node • Includes: <ul style="list-style-type: none"> ○ 1 HPE Operations Manager i Event Management Foundation 10 Pack Operations Bridge Nodes ○ 1 HPE Monitoring Automation for Composite Applications 10 Pack Operations Bridge Nodes ○ 1 HPE Operations Bridge Reporter Standard Edition 10 Pack Operations Bridge Nodes • N/A
