

Additional License Authorizations

For HPE SOA Center software products

Products and suites covered

PRODUCTS	E-LTU OR E-MEDIA AVAILABLE [*]	NON-PRODUCTION USE CATEGORY ^{**}
HPE Systinet Express Edition (previously called HP Systinet Express Edition)	Yes	Class 2
HPE Systinet Premium Edition (previously called HP Systinet Premium Edition)	Yes	Class 2

^{*} Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

^{**} Non-production use rights, if any, can be found at software.microfocus.com/about/software-licensing.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
Agent	means that portion of the software that manages and is required for each physical server, virtual server or container.
Cold Standby System	means a standby non-production system which is NOT up and running. If the production system breaks down, or needs to be taken out of service, you are required to switch on and start the Cold Standby System in order to take over for the production system.
Concurrent User or CC User	means the software is licensed by the amount of users that simultaneously use the software at any one point in time.
Connection	means an application actively communicating through an established and authenticated communication session.
Connector	means Connection to a certain software, Device format or function through use of the HPE software.
CPU	means a system that contains a single processing unit with a single integrated circuit package with a single discrete processing core.
Development System	means a non-production development system which has a software product installed and is to be used for developing software product add-on applications.
Development and Test System	means a Development System and a Test System.
Device or Dev	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device or printer that resides within the range defined for interrogation and asset tracking.
E-LTU and E-Media	means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Foundation	means a single Instance of the core or primary components of a software application which enable its basic functionality, and without which the additional modules available for the application are unable to operate. Foundation software may be installed on one or multiple servers, depending on the specific architecture required to enable the functioning of the single Instance.
Hot Standby System	means a non-production system which is up and running, ready to take over from the production system if the production system breaks down or needs to be taken out of service.
Instance	means each implementation of the application installed on a server.

TERM	DEFINITION
LTU	means License To Use.
Managed Data Repository or MDR	means a repository of data that provides data about managed resources (for example, application software, application interfaces, and processes) and the relationships between them.
Named User or Nmd User or NU	means a specific individual authorized by licensee to access the software regardless of whether they are actively using the Software.
Non-Production or NP	means internal use which is limited to use on Development and Test Systems and Hot and/or Cold Standby Systems.
Operating System Instance or OS Instance or OSI	means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones, within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
Test System	means a non-production test system which has a software product installed and is being used for a) software product migration testing; or b) software product pre-production staging.
Unlimited or Unl	means without restrictions in terms of number of systems, devices or media, depending on the context.
User	means a user whose use is restricted to the type of software that is being licensed.

Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

HPE Systinet Express Edition (previously called HP Systinet Express Edition)

HPE Systinet Express Edition is licensed by Managed Data Repository and requires either a Named User or Concurrent User license. HPE Systinet Express Edition includes Repository Management and one HPE SOA Registry OSI license. Additional HPE SOA Registry OSI licenses can be purchased separately.

HPE Systinet Express Edition Non-Production is licensed by Managed Data Repository and Unlimited Concurrent Users. HPE Systinet Express Edition Non-Production only includes Repository Management.

HPE Systinet Premium Edition (previously called HP Systinet Premium Edition)

HPE Systinet Premium Edition is licensed by Managed Data Repository. HPE Systinet Premium Edition includes Repository Management, Lifecycle Management, Policy Management, Contract Management and one HPE SOA Registry OSI license. Additional HPE SOA Registry OSI licenses can be purchased separately.

HPE Systinet Premium Edition Non-Production is licensed by Managed Data Repository and Unlimited Concurrent Users. HPE Systinet Premium Edition Non-Production includes Repository Management, Lifecycle Management, Policy Management and Contract Management.

HPE Systinet per RGIF Connector (previously called HP Systinet per RGIF Connector)

HPE Systinet per RGIF Connector is licensed by Connector limited to manage one Device through the RGIF compliant interface.
