

Data Protector

10.03

Released in March 2018

Data Protector automates high performance backup and recovery, from disk or tape, over unlimited distances, to ensure 24x7 business continuity, and seamless integration with third-party storage solutions. Data Protector delivers innovation and performance at a much lower cost than competitive solutions, while offering flexibility and scalability. Data Protector is both easy to deploy and use. It provides a simple installation method, automated routine tasks, and centralized licensing facility that reduces costs and data center complexity.

Data Protector provides:

- Scalable and highly flexible architecture
- Mixed environment support
- Easy central administration
- High performance backup and easy restore
- Data and control communication security
- High availability support
- Automated or unattended operation
- Monitoring, reporting, and notification
- Service management
- Integration with online database applications
