

# Network Automation

2018.05

Released in June 2018

---

Network Automation (NA) provides an enterprise class solution that tracks and regulates configuration and software changes across routers, switches, firewalls, load balancers, and wireless access points. NA provides visibility into network changes, enabling an IT staff to identify and correct trends that could lead to problems, while mitigating compliance issues, security hazards, and disaster recovery risks.

For more information about NA, see <https://software.microfocus.com/en-us/products/network-automation/overview>.

## Documentation

You can access the complete documentation on the [Software Documentation Portal](#).

## Send documentation feedback

If you have comments on the NA documentation, contact us at [docs.feedback@microfocus.com](mailto:docs.feedback@microfocus.com).
