## Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
Device <i>or</i> Dev	Means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, end user, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
E-LTU and E-Media	Means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on Licensee's purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Implementation	Means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
Instance	Means each Implementation of the application installed on a Server.
Internal Use	Means access and Use of the software for purposes of supporting your internal operations or functions.
Logfiles <i>or</i> Logs	Means a file that records either events or messages that occur in an operating system or other software.
LTU	Means License To Use.
Operating System Instance <i>or</i> OS Instance	Means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones, within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
Operations Management Node <i>or</i> OM Node	Means the equivalent of one OS Instance or ten Devices in a network.
Server	Means any designated computer system in which an Instance or Instances of the software is installed.
Use	Means to install, store, load, execute and display one copy of the software.
