Product Lifecycle Status

End of Support Dates

Date: Aug 30, 2019
Version: 1812

Table of Contents

Introduction

This document lists the versions of Voltage SecureMail & SecureMail Cloud products that have an End of Support (EOS) date assigned.

The Voltage SecureMail & SecureMail Cloud products listed in this document are covered under the Micro Focus Data Security End User License Agreement (EULA). According to the terms of the EULA in effect at the time that you licensed the software, Micro Focus Security Voltage may discontinue support for specific versions of the software on the date that is 36 months from the date of GA (or subject to a shorter support period, depending upon your EULA). Once a software component version has reached its End of Support date, there will be no further code-level changes provided, including any fixes and updates. For customers with a current Maintenance and Support Agreement, Micro Focus may accept requests for technical support for Major and Minor versions for a period of time after End of Maintenance; however, Micro Focus does not provide software changes for those versions (e.g., fixes and updates). Additionally, Micro Focus Data Security (formerly Voltage) does not provide extended support beyond the End of Support (EOS) date. Self-help resources for EOS versions will continue to be available at the Micro Focus Data Security (https://support.voltage.com).

A Voltage SecureMail & SecureMail Cloud software version includes major and minor versions – defined by the numbers before and after the first decimal point – such as 3.0 and 3.1. Patch releases are sometimes issued; in these cases only the digits after the second decimal point are incremented in the software release – such as 3.3.1 being incremented to 3.3.2. Patches are not considered new software versions; they are supported as long as the parent version, whether major or minor, is still within its maintenance and support period. In some cases, the End of Support Date has been extended as set forth below.

Servers and Gateways

Voltage SecureMail Server

Version	General Availability (GA)	End of Maintenance
7.1	July 23, 2019	July 23, 2022

Voltage SecureMail FlagSecure Client*

Version	General Availability (GA)	End of Maintenance
NOTE: Voltage SecureMail FlagSecure Client is no longer available as a separate product. Voltage SecureMail FlagSecure functionality is now included as a configuration option with Voltage SecureMail Encryption Client 5.1 and later versions.		
4.2	February 22, 2010	February 22, 2012
4.1	March 16, 2009	August 15, 2011

Mobile

Note : For Voltage SecureMail Mobile Apps, Supported Mobile App versions are represented by the current available version in the App Store at any time. Users who have already downloaded apps and who stay on the prior OS versions may continue to use the older applications, where available. Customers wrapping applications for internal enterprise use should use the app packaging for the current version available from the app stores, but may continue to use prior versions, if available. New features and maintenance items will be available in the current version in the App Store, not prior versions.
