Introduction

The product hierarchy reflects how software products and appliances are grouped into Portfolios, Centers and Product Lines.

The product hierarchy is being updated once a year. This document provides an overview of the hierarchy for software and appliance products as it will be effective as of November 2018, for products covered on [MySupport](#). The product hierarchy is defined by Product Group for the Application Delivery Management, Information Management and Governance, IT Operations Management, Security and Vertica products.
