

# Data Protector Management Pack for SCOM

10.50

Released in August 2019

---

Micro Focus Data Protector is an enterprise-grade backup and disaster recovery solution for large, complex, and heterogeneous IT environments. Built on an adaptive architecture that combines security and analytics, it enables customers to meet their continuity needs reliably and cost-effectively. Data Protector includes advanced monitoring and reporting capability to help identify, analyze, and offer recommendations for backup and recovery solutions to support the goals and strategies of businesses.

Data Protector Management Pack is an availability and performance management solution that extends the end-to-end service monitoring capabilities of Microsoft System Center Operations Manager (SCOM) to include the Data Protector infrastructure. It fully integrates topology, health, and performance data into the Microsoft System Center Operations Manager console.

For more information on Data Protector, see <https://software.microfocus.com/products/data-protector-backup-recovery-software/overview>.
