Additional License Authorizations

For Identity and Access Management software products

Products covered

These are the products covered under this ALA. If your product is not listed below please refer to the end user license agreement (EULA) included with that product.

Products	E-LTU or E-Media available *	Non-production use category **
Identity Intelligence	Yes	Class 4

* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

** Non-production use rights, if any, can be found at software.microfocus.com/legal/software-licensing.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
Database	Means application data including table structure, stored procedures, and other functionality.
Deployment	Means the software Implementation plus the installation of associated, licensed software that is part of the Identity Intelligence solution.
E-LTU and E-Media	Means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on Your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Implementation	Means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
Instance	Means each Implementation of the application installed on a Server.
LTU	Means License To Use.
Patches	Means any updates to the software, including but not limited to hotfixes, patch updates, service packs, and major or minor revisions.
Server	Means any designated computer system in which an Instance or Instances of the software is installed.
Suite	Means two or more software products combined into a single license offering or a single software product which includes two or more licenses. The specific software products included in a Suite are specified in the Software Specific License Terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product, except where specified in the specific Suite software specific license terms below.
Use	Means to install, store, load, execute and display one copy of the software.

Additional License Authorizations

For Identity and Access Management software products

Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document and not covered in this section do not have software specific license terms.

Identity Intelligence (IDI)

Identity Intelligence is an analytics and reporting tool that enables Identity Manager (IDM) and Identity Governance (IG) users to analyze data collected by IDM and IG. IDI requires a valid license to IDM or IG and includes a limited use license for other Micro Focus product components as described below. IDI technical support and access to Patches requires a current maintenance agreement for either IDM or IG.

Micro Focus ArcSight SmartConnectors

Micro Focus ArcSight SmartConnectors are designed to retrieve data from Servers or other various sources in customer environments, normalize that data, and forward it to another product. The SmartConnector license included with Identity Intelligence entitles customers to ingest data only for Identity Intelligence data sources and forward it to other components in the Identity Intelligence Deployment. Ingesting data from or forwarding data to any product other than Identity Intelligence requires a separate license.

Transformation Hub

Transformation Hub provides an enterprise message delivery bus, raw data normalization, enrichment, and transformation capabilities for data from various sources. Identity Intelligence includes a license to use Transformation Hub to process only data intended for or used by Identity Intelligence. The right to use the Transformation Hub for other purposes requires a separate license.

Vertica

Vertica is a Database that stores data for Identity Intelligence. Storage of any data other than that of Identity Intelligence requires separate purchases of the appropriate Vertica licenses.

ArcSight Management Center

ArcSight Management Center (ArcMC) Software is a centralized security management center that manages deployments of components such as ArcSight SmartConnector and Transformation Hub through a single interface. Identity Intelligence includes a license that entitles customers to use ArcMC to manage only Instances of Micro Focus ArcSight SmartConnectors and the Transformation Hub included in the Identity Intelligence Deployment.

Additional license terms

Term
