Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
Agent	Means that portion of the software that manages and is required for each physical server, virtual server or container.
Casual Named User or Csl Nmd User	Means a Named User that may occasionally access APIs, create and view requests, update only the requests the user created, view portals, and run/view reports.
Cloud Content	Means IT Executive Scorecard Cloud Content Acceleration Pack (CAP). Cloud CAP provides a set of items (Dashboard pages, Scorecards, Contexts, KPIs, and more) that automatically gathers information from across your cloud deployment to build key performance indicators (KPIs), metrics, pages and show back information related to Cloud provisioning issues.
Cold Standby System	Means a standby non-production system which is NOT up and running. If the production system breaks down, or needs to be taken out of service, you are required to switch on and start the Cold Standby System in order to take over for the production system.
Concurrent User or CC User	Means the software is licensed by the amount of users that simultaneously Use the software at any one point in time. The software can be installed on any number of computers, provided that the actual usage of the software does not exceed the number of licenses purchased.
Connector	Means an integration element to a certain software, Device format or function through use of the Micro Focus software.
Core	Means the server side component of software. Is typically complemented by an Agent component.
Database	Means application data including table structure, stored procedures, and other functionality that runs on a Database Instance.
Database Instance	Means a software application that has the sole purpose of acting as a container that hosts and executes one or more Databases <ul style="list-style-type: none"> ▪ For Microsoft SQL Server, Database Instance is one SQL Server Service with its own port, logins and set of system and user Databases. ▪ For an Oracle database, Database Instance is one SID (Oracle system ID) in a database environment, including the RDBMS software, table structure, stored procedures and other functionality. For Oracle RAC, each Instance referencing a database environment is a Database Instance.

Additional License Authorizations

For Hybrid Cloud Management software products

Term	Definition
	<ul style="list-style-type: none">▪ For DB2 databases, Database Instance is one DB2 Database Instance as identified by a DB2 Instance with its User, TCP/IP service port on a given system.▪ For Sybase and Informix Server, Database Instance is one Server (SAP Sybase Adaptive Server) with its own login, Dataserver port and set of system and user Databases.
Development System	Means a non-production development system which has a software product installed and is to be used for developing software product add-on applications.
Development and Test System	Means a Development System and a Test System.
Device or Dev	Means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device or printer that resides within the range defined for interrogation and asset tracking.
E-LTU and E-Media	Means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on Your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Foundation	Means a single Instance of the core or primary components of a software application which enable its basic functionality, and without which the additional modules available for the application are unable to operate. Foundation software may be installed on one or multiple servers, depending on the specific architecture required to enable the functioning of the single Instance.
Foundation Server	Means the server side component of software that is required in order to get an operational Implementation as specified in the software specific license terms below.
Implementation	Means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
Instance	Means each Implementation of the application installed on a Server.
LTU	Means License To Use.
Managed Data Repository or MDR	Means a repository of data that provides data about managed resources (for example, application software, application interfaces, and processes) and the relationships between them.
Named User or Nmd User	Means a specific individual authorized by you to access the software regardless of whether they are actively using the software.
Node	Means a specific Node that is further defined in the Software Specific Terms below.
Non-Production or NP	Means internal use which is limited to use on Development and Test Systems and Hot and/or Cold Standby Systems.
Operating System Instance or OS Inst or OSI	Means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
Project Server Workload License	Provides the right to migrate the Server Workload to a target computer system and where necessary back to the original designated source computer system within two years of purchase. A Project Server Workload License expires (i) once the Server Workload is moved to the target computer system or where necessary back to the original designated source computer system or (ii) within two years of purchase, whichever is earlier. Upon expiration of a Project Server Workload License, Licensee agrees to cease using the Licensed Software and to uninstall or destroy any unlicensed copies of such Licensed Software.
Server	Means any designated computer system in which an Instance or Instances of the software is installed.
Server Workload	The aggregation of all software and data residing on designated computer system.
Server Workload License	Provides the right to move or copy the Server Workload to a target Server. On migration cutover, the Server Workload License is reassigned to the Server Workload residing on the target Server.

Additional License Authorizations

For Hybrid Cloud Management software products

Term	Definition
Suite	Means two or more software products combined into a single license offering or a single software product which includes two or more licenses. The specific software products included in a Suite are specified in the software specific license terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product, except where specified in the specific Suite software specific license terms below.
Test System	Means a non-production test system which has a software product installed and is being used for a) software product migration testing; or b) software product pre-production staging.
Unit	Means a rationalized unit of licensing that provides entitlement to multiple metrics in a pre-defined ratio. This licensing Unit enables a customer to purchase entitlement as Units and apply it to any of the underlying metrics defined by the Unit. See software specific license terms for the definition of Unit for products and suites that are licensed by Unit.
Unlimited or Unl	Means without restrictions in terms of number of systems, Devices or media, depending on the context.
User	Means a user whose Use is restricted to the type of software that is being licensed.
Virtual Machine(s) or VM(s)	Means a computer that does not physically exist but is simulated by another computer.

Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

Cloud Service Automation (previously called HPE Cloud Service Automation)

Cloud Service Automation is licensed by a pack of 10 Operating System Instances. Cloud Service Automation 10 OS Instance pack includes a limited Universal CMDB (UCMDB) Foundation license which provides the right to use the UCMDB Server, the Data Flow Probe infrastructure, the UCMDB Admin UI, and the UCMDB Browser only in conjunction with Cloud Service Automation. The rights to use Universal Discovery, Configuration Manager, and UCMDB adapters for third-party repositories must be licensed separately.

Codar (previously called HPE Codar)

Codar is licensed by a pack of 10 Operating System Instances. When Codar is used with Cloud Service Automation, the number of OS Instance licenses must be the same. The Codar 10 OS Instance Pack version 2 license introduced in April 2017 is classified as Non-Production Use Category Class 1, the Codar 10 OS Instance Pack license is classified as Non-Production Use Category Class 3.

Enterprise Maps (previously called HPE Enterprise Maps)

Enterprise Maps is licensed by Named User, Concurrent User and Connector. This Connector license authorizes bi-directional integration.

Hybrid Cloud Management Express Edition Version 2 (previously called HPE Hybrid Cloud Management Express Edition Version 2)

Hybrid Cloud Management Express Edition Version 2 is licensed by Unit. One Unit equals:

- 1 Operating System Instance, or
- 5 Containers, or
- 5 Public Cloud Service Instances, or
- 10 Edge Devices / IoT Nodes

Additional License Authorizations

For Hybrid Cloud Management software products

There is no separate entitlement to specific components inside the Edition. Only specific capabilities provided by components in context of the Edition's use-cases are part of the entitlement.

Hybrid Cloud Management uses an internal Vertica data storage component with a limit of 20 TB for the sole use with Hybrid Cloud Management. An additional Vertica Expansion licenses is required for additional data capacity. End customer's third-party tools are permitted to access data stored in Vertica.

Hybrid Cloud Management X

Hybrid Cloud Management X is licensed by Unit. One Unit equals:

- 1 Operating System Instance, or
- 1 Storage Nodes, or
- 2 Network Nodes, or
- 5 Database service or Middleware service, or
- 5 Containers, or
- 8 edge Device / IoT Nodes

There is no separate entitlement to specific components inside the Product. Only specific capabilities provided by components in the context of the cloud management capabilities are part of the entitlement. Hybrid Cloud Management X (HCMX) includes the following capabilities and is licensed by HCMX 10 Unit Pack:

- Service portal
- Service design
- Service deployment automation using Operations Orchestration
- Cost governance and resource optimization
- Service catalog management
- Universal CMDB Foundation
- Service Asset and Configuration Management
- Studio – only for the out of the box provided workflows and entities
- Financial Management

Operations Orchestration that is bundled within HCMX can be used only through HCMX components and not as a standalone. This usage is restricted to cloud management capabilities. HCMX license includes entitlement to the Micro Focus supported Operations Orchestration content packs and capsules available under the Hybrid Cloud Management category in the ITOM Marketplace: <https://marketplace.microfocus.com/itom/category/hcm>.

HCMX Unit may only be provisioned and managed by HCMX components.

HCMX uses an internal Vertica data storage component with a limit of 20 TB. An additional Vertica Expansion license is required for additional data capacity. End customer's third-party tools are permitted to access data stored in Vertica.

Each Vertica Expansion Add-on license includes 5 TB of Vertica storage and permits ITOM suite license to divide the Add-on aggregate capacity as required within a single ITOM suite or ITOM product or across multiple ITOM products or across multiple ITOM products suites for a given Vertica cluster. The Vertica Expansion Add-on SKU for Micro Focus ITOM Products

Additional License Authorizations

For Hybrid Cloud Management software products

is only available for Vertica version 9.1 or higher. End-customer's third-party tools are permitted to access data stored in Vertica.

IT Business Analytics (previously called HPE IT Business Analytics, HP IT Executive Scorecard and HP Executive Scorecard)

IT Business Analytics is licensed by Casual Named User or by Named User. IT Business Analytics includes a license to Anywhere limited edition software. Use of the remote access capabilities of the Anywhere limited edition software is restricted to the IT Business Analytics software only and cannot be used with any other Micro Focus product or third party products.

Except for the IT Business Analytics without Business Objects licenses, IT Business Analytics includes a license to use SAP Web Intelligence and SAP Xcelsius Enterprise ("SAP Software"). Use of the SAP Software is limited solely to connecting to data, universes, and Web Intelligence reports containing IT management data defined by IT Business Analytics. The use of the SAP Software to connect to any content, report, or universe which contains any data other than that described above is strictly prohibited. Without limiting the generality of the foregoing, you may not use the SAP Software to connect to: any Business Objects™ universes other than the universes supplied with the IT Business Analytics or Web Intelligence reports containing any data not related to IT Business Analytics. When using the SAP Software you will be prompted to confirm in a user interface your compliance with this license requirement.

IT Business Analytics includes a license to use a Vertica Enterprise Edition Instance ("Vertica Instance"). Use of the Vertica Instance is limited solely to IT Business Analytics and cannot be used to integrate or host schemas for other software products.

PlateSpin Migrate

PlateSpin Migrate is licensed by Server Workload License and Project Server Workload License.

Systinet Express Edition (previously called HPE Systinet Express Edition)

Systinet Express Edition is licensed by Managed Data Repository and requires either a Named User or Concurrent User license. Systinet Express Edition includes Repository Management and one SOA Registry OSI license. Additional SOA Registry OSI licenses can be purchased separately.

Systinet Express Edition Non-Production is licensed by Managed Data Repository and Unlimited Concurrent Users. Systinet Express Edition Non-Production only includes Repository Management.

Systinet Premium Edition (previously called HPE Systinet Premium Edition)

Systinet Premium Edition is licensed by Managed Data Repository. Systinet Premium Edition includes Repository Management, Lifecycle Management, Policy Management, Contract Management and one SOA Registry OSI license. Additional SOA Registry OSI licenses can be purchased separately.

Systinet Premium Edition Non-Production is licensed by Managed Data Repository and Unlimited Concurrent Users. Systinet Premium Edition Non-Production includes Repository Management, Lifecycle Management, Policy Management and Contract Management.

Systinet per RGIF Connector (previously called HPE Systinet per RGIF Connector)

Systinet per RGIF Connector is licensed by Connector limited to manage one Device through the RGIF compliant interface.
