

This Additional License Authorizations document ("ALA") set forth the applicable License Options and additional specific software license terms that govern the authorized use of the software products specified below, and are part of the applicable agreement (i.e., Micro Focus End User License Agreement; and/or any separate agreement that grants Licensee a license to such products (e.g., Customer Portfolio Terms or other Master Agreement; and/or Quotation) (the "Applicable Agreement"). Capitalized terms used but not defined herein shall have the meanings set forth in the Applicable Agreement.

## **Products and suites covered**

Products	E-LTU or E-Media available*	Non-production software class **	Term License Non-production software class (if available)
Asset Manager	Yes	Class 1	Class 3
Connect-It	Yes	Class 1	Class 3
Propel	Yes	Class 1	Class 3
Release Control	Yes	Class 1	Class 3
ServiceCenter Automation	Yes	Class 1	Class 3
Service Desk	Yes	Class 1	Class 3
Service Manager	Yes	Class 1	Class 3

Suites	E-LTU or E-Media available <sup>*</sup>	Non-production software class **	Term License Non-production software class (if available)
Asset Manager Enterprise Suite	Yes	Class 1	Class 3
Asset Management X Unit	Yes	Class 1	Class 3

Software Asset Management Suite	Yes	Class 1	Class 3
Software Asset Management Unit	Yes	Class 1	Class 3

\* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

\*\* Additional licenses solely for non-production use, may be available as specified in the Non-Production Licensing Guide found at <u>software.microfocus.com/legal/software-licensing</u> depending on the non-production software class specified above. Any such nonproduction licenses will be subject to the Non-Production Licensing Guide and the applicable License Option terms and conditions set forth in this ALA.

# Definitions

\_

Term	Definition
Casual Named User	Means a Named User that may occasionally access APIs, create and view requests, update only the requests the user created, view portals, and run/view reports.
Cloud Management	Means the capability of using the cloud management module and functionality within SMAX. Cloud management allows customers to deploy, manage and govern cloud service to both public and private clouds.
Concurrent User	Means the software is licensed by the amount of users that simultaneously Use the software. The software can be installed on any number of computers provided that the actual usage of the software does not exceed the number of licenses purchased.
Connect-It Database Device License	Means the right to expose data in one database to another database when the originating database is licensed by number of Devices. One license is required for each 100 managed Devices.
Connect-It Server License	Means the right to use the respective Connector without Connect-It Device License, Connect-It User License or Instance restrictions.
Connect-It User License	Means one Named User or Floating User or Concurrent User in an AssetCenter or Asset Manager Instance or one Named User or Floating User or Concurrent User in a ServiceCenter or Service Manager Instance or one Named User or Concurrent User in a Service Desk Instance in any Scenario with a respective Connector.
Connector	Means an integration element to a certain software, format or function through the use of the Micro Focus and non-Micro Focus software product.
Device	Means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device, workstation, mobile device, Server, network devices, storage devices or printer that resides within the range defined for interrogation and asset tracking.
E-LTU and E-Media	Means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Employee Self-Service User	Means a specific individual authorized by your IT department to directly submit a self-service or knowledge request using the self- service interface.
Enterprise Use	Means Unlimited use as specified in the software specific license terms below.
Floating Users	Means the maximum number of individuals out of a total user population, authorized by you to access the software at a given point in time.
Foundation	Means a single Instance of the core or primary components of a software application which enable its basic functionality, and without which the additional modules available for the application are unable to operate. Foundation software may be installed on one or multiple servers, depending on the specific architecture required to enable the functioning of the single Instance.
Implementation	Means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
Instance	Means each implementation of the application installed on a Server.
Interval Billing	Means periodic billing associated with the Subscription.
LTU	Means License To Use.
Managed Configuration Item (CI)	Means a component of an IT Infrastructure, including a documentary item such as a Service Level Agreement or a Request for Change which is (or is to be) under the control of Configuration and therefore subject to formal change control.
Managed Data Repository	Means a repository of data that can be a third party product or custom built and provides data about managed resources (for example, computer systems, application software, and buildings), process artifacts (for example, incident records and request for change forms), and the relationships between them.

-

Term	Definition
Managed User for SaaS	Means any user of a SaaS subscription or cloud product that is managed by Software Asset Management (SAM).
Mapped Service	Means a configuration topology model of a business application or a business service that creates a map using entry points (e.g. URL, IP Address, Host Name, etc.). The map represents a business service for internal or external users of an organization or other business applications and services and is made up of components, including other services, applications, middleware, security software, storage gear network devices, other supporting IT infrastructure, and the relationships between these components. A business service could represent an infrastructure service (e.g. a web-service used by other application for security, or authentication), or an end-user service (e.g. a mobile banking application, or an internal payroll application).
Named User	Means a specific individual authorized by you to access the software regardless of whether they are actively using the software.
Node	Means a specific Node that is further defined in the Software Specific Terms below.
Operating System Instance <i>or</i> OS Instance	Means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones, within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
SaaS	Means Software as a Service which is a service which allows access to the software, support and related professional services, as described in an order document, datasheet or a Statement of Work (SOW).
SAM Unit	Means a license metric for Software Asset Management (SAM). Units purchased by customer can be exchanged within SAM for use against a Device or a Managed User for SaaS.
Scenario	Means configuration sets within Connect-It that define data exchanges between multiple endpoints, using a Connector to each endpoint.
Server	Means any designated computer system in which an Instance or Instances of the software is installed.
Subscription	Means an offering which includes a license and support for the time period of the subscription and includes Interval Billing.
Suite	Means two or more software products combined into a single license offering or a single software product which includes two or more licenses. The specific software products included in a Suite are specified in the software specific license terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product, except where specified in the specific Suite software specific license terms below.
Tenant	A tenant is a fully functioning instance of SMAX running inside a SMAX deployment farm. Tenants are only available in the Service Management Automation X solution. A SMAX deployment farm can have multiple self-contained tenants.
Term License to Use <i>or</i> Term LTU	Means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month (1M), One Year (1Y) etc. Term LTU's are not perpetual licenses.
Term Support	Means a fixed period support offering that is only valid during the time period of the associated Term LTU.
Unit	Means a license metric for Service Management Automation X (SMAX) or Asset Management X (AMX). Units purchased by customer may be exchanged within the SMAX tool for SMA Named User or Concurrent User or AMX Named User or Concurrent User at the specified exchange rate.
Unlimited	Means without restrictions in terms of number of systems, devices or media, depending on the context.
Use	Means to install, store, load, execute and display one copy of the software.

For Service Management Automation software products

Term	Definition
Virtual Machine(s) <i>or</i> VM(s)	Means a computer that does not physically exist but is simulated by another computer.

## Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

#### Asset Manager 5.20 and later releases

Administration of the Asset Manager Procurement Self-Service Catalog is limited to five (5) Named Users of Service Manager Foundation for the sole purpose of administration of this functionality. Authorized Service Manager administration functions include:

- Management of operator profiles
- Synchronization of reference data to/from Asset Manager
- Back-office management of the Self-Service Catalog
- Support of Casual Named User client sessions initiated from Asset Manager
- Automated submission of Self-Service Catalog Requests to Asset Manager
- Enables Asset Manager Casual Named Users access to Service Manager's Self-Service Catalog and shopping cart functionality through the Asset Manager web client. Self-service access is limited by the quantity of Asset Manager Casual Named Users licensed by you.

Asset Manager Software Asset Management Enterprise Use license provides the ability to Use as many Concurrent Users and Named Users as necessary for the Software Asset Management module in the limits of the number of users licensed for the Portfolio functionality.

Each Casual Named User will have the ability to log into Asset Manager but use of the software is restricted to the following activities:

- View assets
- View requested items for the licensed individual or the licensed users defined workgroup
- View and update tickets in AC/AM helpdesk
- View employees, departments, locations and tax tables
- View workflows as they apply to the licensed user (such as tasks and phases)
- Review departmental budgets and cost centers
- Approve and view requests
- Submit requests

Asset Manager includes a reporting solution license for SAP Crystal Reports and, for Asset Manager 9.30 forward, for SAP BusinessObjects Enterprise. Customers who have valid licenses for Asset Manager are authorized to download and install one Instance of SAP Crystal Reports Server, as well as the number of copies of SAP Crystal Reports Dashboard Design needed for the activity of the applicative developers supporting the Asset Manager implementation. SAP Crystal Reports and SAP BusinessObjects Enterprise can only be used for reporting on the licensed Instances of Asset Manager (including production and development Instances). The maximum number of users accessing SAP Crystal Reports Server must not exceed the

maximum number of users authorized in the license for Asset Manager (number of Named Users + number of Concurrent Users + number of Casual Named Users). These users must be licensed for Asset Manager and authenticated in the Asset Manager software.

#### **Connect-It**

You shall not be limited to the number of Instances of the software licensed provided you do not exceed the number of Connect-It Database Device Licenses or Connect-It user licenses required in each Scenario. For example, a Scenario exposing 700 Devices through UCMDB, Universal Discovery or DDM Inventory to a non-Micro Focus product requires 7 Connect-It Device licenses. Furthermore, an Connect-It Connector being used where there is one Instance of Asset Manager with a total of 20 Named Users and Concurrent Users, one Instance of Service Manager with a total of 80 Named Users and Concurrent Users and one Instance of Project and Portfolio Manager with a total of 50 Named Users, requires 150 Connect-It User Licenses for each licensed Connect-It Connector.

For Service Management Automation X (SMAX), if Unit license metric is not applied, count all Named Users and Floating Users Connect-It licenses from all installations of SMAX; if Unit license metric is applied, the number of Connect-It user license equals to the number of Unit from all installations of SMAX. For example, if Unit license metric is not applied to SMAX, a Connect-It Connector being used where there is one Instance of SMAX with a total of 80 Named Users and Concurrent Users, requires 80 Connect-It User Licenses for each licensed Connect-It Connector. If Unit license metric is applied to SMAX, a Connect-It Connector being used where there is one instance of SMAX with a total of 80 units, requires 80 Connect-It User Licenses for each licensed Connect-It Connector.

There are no restrictions on the number of data sources a specific Connect-It Connector can integrate with provided you do not exceed the number of Connect-It Database Device licenses or Connect-It User Licenses required in each Scenario. There are no Instance or user restrictions on Connect-It Server Licenses.

#### Propel

Propel Portal is licensed by Named User and by Concurrent User. A Named User license may not be transferred from one individual to another unless the original Named User no longer requires, and is no longer permitted to access.

Propel Service Exchange is licensed by Foundation. A Foundation license allows installation of Service Exchange on multiple Servers or Instances.

Propel Service Exchange Non Micro Focus Connector is licensed based on per production Connector. Propel Service Exchange Non Micro Focus Connector is limited to connection with Propel Service Exchange Foundation.

#### ServiceCenter SOAP API SDK

You shall not have the right to use the SOAP API SDK to replicate any existing Micro Focus software or to circumvent licensing usage of such software.

#### Service Desk Concurrent User Capacity Expansion, Service Desk Named User Capacity Expansion

Service Desk Capacity Expansion (CE) products are intended for use by you who require additional Service Desk capacity to their existing Service Desk installations, after the official end of sales date of June 30, 2011. Service Desk CE Licenses have additional use restrictions which include: License for the Service Desk CE product are for capacity increase only and can only be used with the Service Desk physical system which has been licensed by customer previously.

#### **Service Manager**

Service Manager requires a Server license and a Foundation Named User or Concurrent User license.

ServiceCenter SOAP API SDK is included with the Service Manager Foundation license.

The following Service Manager Modules licenses are available as separate licenses and can only be used with an Service Manager Server license:

Module / Add-on	Licensing Metric (Each license metric requires a separate license)
Service Manager Helpdesk	Licensed by Named User or Concurrent User
Service Knowledge Management *	Licensed by Employee Self-Service User or Named User or Concurrent User
Service Manager Request Management	Licensed by Named User or Concurrent User
Service Manager Service Level Management	Licensed by Named User or Concurrent User
Service Manager Service Catalog *	Licensed by Employee Self-Service User or Named User or Concurrent User
Service Manager Smart Analytics	Licensed by Named User or Concurrent User

\* Includes Self Service Ticketing functionality which allows your employees to open, monitor, update and close Self-Service tickets. Employee Self Service Users are limited when accessing the Self-Service Ticketing functionality and are only authorized to access the ITIL Service Desk functions within Service Manager. Employee Self-Service Users cannot open an incident or change or request directly from Self-Service Ticketing.

From Service Manager 9.41 Codeless version, Smart Analyics license includes Smart Ticket and Hot Topic Analytics functionalities. For the Service Manager versions lower than 9.41 or Service Manager 9.41 Classic, Smart Analytics license includes Smart Ticket, Hot Topic Analytics and Smart Search functionalities. The number of Named User and Concurrent User LTUs for Service Manager Smart Analytics needs an exact match at all times with the corresponding number of Named User and Concurrent User LTUs for Service Manager Helpdesk. For Service Manager Smart Analytics, the number of LTUs shall be counted as the number of Named Users or Concurrent Users of Service Manager Helpdesk deriving value through the Smart Analytics module, including when data is imported or exported between Service Manager systems.

## **Suites**

Asset Manager and Asset Manager Enterprise Suite, Change Management Suite, IT Service Performance Suite, Release Control, Service Manager and Service Manager Enterprise Suite Concurrent User licenses listed in this paragraph previously were called Floating User licenses.

Service Management Automation Express and Premium licenses may not be used in the same Tenant. If the Premium license is used (Named, Concurrent, or Units) then all licenses for that system must be Premium.

Service Management Automation (SMA) Suite offers a license metric of Units. The purchase of SMA Express Edition Units or SMA Premium Edition Units entitles customer to activate the corresponding user licenses, as described below, in accordance with the current exchange rate. The SMA Express Units may only be used to activate SMA Express Edition users while the SMA Premium Units may only be used to activate SMA Premium Units may only be used to activate SMA Premium Units may only be used with SMAX product.

SMAX offers Cloud Management through a separately licensed product that is not included in the Service Management Automation Suite licenses. To be entitled to Cloud Management, a separate Hybrid Cloud Management X (HCMX) license is required.

Asset Management X (AMX) offers a license metric of Units. The purchase of AMX Units entitles customer to activate Asset Management X user licenses, as described below, in accordance with the current exchange rate.

Software Asset Management (SAM) offers a license metric of Units. SAM can only be purchased for customers with active AMX or SMAX Premium licenses. The purchase of SAM Units entitles customer to activate Software Asset Management Device or Managed User for SaaS licenses, as described below, in accordance with the current exchange rate.

Asset Management X and Service Management Automation Express or Premium may not be used in the same tenant. If customer needs both Express and AMX licenses on same tenant they will need to purchase Service Management Automation Premium licenses for the entire tenant capacity.

Suite	Offering includes	Additional terms (if any)

## **Additional license terms**

	Term
A.	Software contains software and associated specifications licensed from third parties that are confidential to, and trade secrets of, such parties. You will not take any action other than to Use it as authorized under the agreement as part of the software products and will not disclose it to third parties.
В.	You shall install and use the software as authorized in the applicable agreement only as a complete product and may not use portions of such software on a standalone basis separate from the complete software unless expressly authorized in the Supporting Material, specifications or an applicable agreement.
