Additional License Authorizations
HPE Communication & Media Solutions (CMS) software products

Table of Contents

Product use authorizations

Most HPE Software products have product use authorizations that are governed by Additional License Authorizations (previously called Additional License Restrictions). HPE delivers the Additional License Authorizations (ALA) document(s) electronically; the documents are available from Software Support Online through the **Contracts & Licensing** page. This document provides you with an overview of and links to the ALA document applicable to a product.

To download an ALA document, you need to sign in to Software Support Online with your HPE Passport account.

Communication & Media Solutions (CMS) software products

The next table lists the currently active Additional License Authorizations documents by CMS software product. By clicking on the Document ID, the document will be downloaded from Software Support Online.

HPE Operations Support System (OSS)	Additional License Authorizations
Assurance	5200-0670, March 2016
Fulfillment	5200-0671, April 2016

API Management	5900-0685, July 2015
Network Applications	5900-0653, July 2014

Previous versions of Additional License Authorizations documents

The above listed Additional License Authorizations are the ones that apply to new purchases from the date the ALA document was published. The version that applies to the date of a previous purchase was delivered along with the license certificate or right-to-use certificate for the purchased license(s). Effective April 2009, ALA documents are published on Software Support Online. When a new ALA document is being published, the replaced ALA document can be found through the Self-solve advanced knowledge search. Enter *ALA* or *ALR* as a keyword to search on and select document type *Manuals.* Then click on *Search* to look for documents with Additional License Authorizations. You can either search these for all products or for a specific product, as long as you also select *All Versions* and *All Operating Systems.*
