Server Automation 7.84 Managed Server Support

December 2010

© Copyright 2000-2010 Hewlett-Packard Development Company, L.P.

Doc Version: V2.5

This matrix does not contain all configuration and resource requirements. Please refer to the appropriate SA 7.8x documentation for more information.

OS Vendor	Managed Platform	Versions Supported	Architecture	Local File System ²	Virtualization/ Partition Support ³	Agent	OS Provisioning	Patching ¹	Locale	Added in Release (SR if Blank)	Notes
-----------	------------------	--------------------	--------------	--------------------------------	--	-------	-----------------	-----------------------	--------	--------------------------------	-------

¹ "Basic": simple patch remediation, but may not have full metadata (dependencies, supercedence, etc). "Extended" includes metadata support (dependencies, supercedence, etc.). "Full": includes integrated patch import from vendor. "N": no patching support is available

² SAN is supported on all managed server platforms.

³ Virtualization Support column always implies direct on hardware as well as any stated virtualization technology for the OS listed.

⁴ SA 7.8 supports only 'Windows Server 2008 Hyper-V' , the integrated component (i.e. installed Role) of Windows Server 2008

⁵ Supported on Integrity VM servers only.

⁶ Virtuozzo Containers 4.0 is introduced in SA 7.81, supported on x86_32 and x86_64 platforms only

⁷ HyperV Support for SuSE Linux Enterprise Server 10 is introduced in SA 7.81

⁸ Guest-domain Solaris LDOMs are supported for server management, but without virtualization management and OS provisioning. The solution at this point does not have any support for creating, starting or stopping LDOMs.

⁹ OS Provisioning support was added in SA 7.83

¹⁰ Simplified Chinese locale support was added in SA 7.83

¹¹ Vendor-integrated Solaris Patching on Solaris 10 was added in SA 7.82

¹² When installing SLES on PPC architectures, consoles may not work after the operating system loads during the boot process. Therefore, when provisioning or reprovisioning a server with SUSE Enterprise Linux on PPC architectures, you could lose console access to the server being provisioned.

¹³ Simplified Chinese locale support is added in SA 7.84

¹⁴ Traditional Chinese locale support is added in SA 7.84

¹⁵ Hypervisor support for Hyper-V 2008 R2 is added in SA 7.84

¹⁶ Hypervisor support for Hyper-V 2008 R2 is added in SA 7.84 for SP1 and SP2 only

¹⁷ Hypervisor support for Hyper-V 2008 R2 is added in SA 7.84 for Advanced Server and Server only

¹⁸ ESX 4.0 U1 and ESXi 4.0 U1 support is added in SA 7.84

¹⁹ As of SA 7.84, Windows Server 2008 R2 is listed as a separate platform, instead of Windows Server 2008.

Linux Note 1: RHEL 3 requires Update 3

Solaris Note 1: Requires Patches: SUNWadmc, SUNWcsl, SUNWcslr (if available for the version), SUNWcsu, SUNWesu, SUNWlibms, SUNlibmsr (if available for the version), SUNWswmt

Windows Note 1: Patching requires MSXML 3.0 (or later), IE 6.0 (or later), Windows Installer 3.1, Automatic Update service set to manual or automatic, locale set to English, Japanese, or Korean.

Discovered Software is not supported on IA 64bit servers (please see QC88891 for more details).

Custom Extensions, Code Deployment and Rollback (CDR), Configuration Tracking, and DOS-Based OS Provisioning are deprecated in SA 7.80

Server Automation 7.8x Core Server Support

December 2010

© Copyright 2000-2010 Hewlett-Packard Development Company, L.P.

Doc Version: V2.5

This matrix does not contain all configuration and resource requirements. Please refer to the appropriate SA 7.8x documentation for more information.

OS Vendor	Core Platform	Versions Supported	Architecture	Locale	Local File System	Virtualization Support ¹	Added in Release (SR if Blank)	Notes
-----------	---------------	--------------------	--------------	--------	-------------------	-------------------------------------	--------------------------------	-------

¹ Virtualization Support column always implies direct on hardware as well as any stated virtualization technology for the OS listed.

² This requires Veritas Storage Foundation Basic 5.0 MP3 RP2 or later.

³ vxfs file system support is added in 7.81 for RHEL 4 AS U8 only. This requires Veritas Storage Foundation Basic 5.0 MP3 RP2 or later.

⁴ Core support for ESX 4.0 U1 and ESXi 4.0 U1 is added in SA 7.84.

⁵ Core support for RHEL 5 Advanced Platform is supported as of SA 7.84.

⁶ Veritas filesystem support is added in SA 7.84

Platform Notes

Note 1 - Please see this OS under the Managed Server Support Matrix. Core servers require SA agents and the same caveats from managed servers apply to core servers as well.

Note 2 - SA Core servers may not be installed in Solaris Local Zones and Solaris Local Zones may not be installed on a Server where an SA Core is installed.

General Notes

IPMP (IP Multi-Pathing) and NIC bonding are supported on core and satellite servers in SA 7.83.

SAN Support (MPIO) was added in SA 7.83

Server Automation 7.8x Core Database Support
