5. Enterprise Applications

Oracle E-Business Suite

See [Integration Packs](#)

PeopleSoft Enterprise

See [Integration Packs](#)

Note: HP Database Archiving software must be installed on the same machine as the PeopleSoft Process Scheduler.

6. Integration Packs

HP Database Archiving software provides pre-built modules ('Integration Packs') for some of the Enterprise Applications. These Integration Packs allow for rapid implementation in environments running the Enterprise Applications, and address the most common high-growth areas in those applications.

Each Integration Pack supports a specific version of the supported Enterprise Application, as detailed in the tables below. If your version is not supported, please check with your HP Database Archiving software Product Marketing/Management representative: pre-built modules can be made available according to demand. Additionally, HP Information Management Professional Services Organization can deliver services-based solutions to address other areas with these Enterprise Applications, including custom tables.
