HP QuickTest Professional 11.00 Product Availability Matrix Appendix

Note: The information in the QuickTest Professional Product Availability Matrix is up-to-date at the time of its release. Refer to the http://www.hp.com/go/qtp_sysreq page for a link to the most updated version of this document.

This appendix provides supplemental information about the environments listed below.

- "HP Product Integrations" on page 2
- ".NET Add-in" on page 2
- "Delphi Add-in" on page 3
- "Oracle Add-in" on page 3
- "Add-in for SAP Solutions" on page 3
- "PowerBuilder Add-in" on page 3
- "Siebel Add-in" on page 3
- "Standard Windows Applications" on page 4
- "Terminal Emulator Add-in" on page 4
- "Visual Basic Add-in" on page 4
- "Web Add-in" on page 4
- "Web Services Add-in" on page 4

HP Product Integrations

For improved performance when running test sets remotely from the Quality Center or ALM Test Lab module, ensure that you are using the latest Quality Center or ALM patch.

.NET Add-in

- ▶ The QuickTest Professional .NET Add-in supports testing WPF controls inherited directly or indirectly from the **System.Windows.Controls.Control** class regardless of which language was used to create the application (for example, VisualBasic.NET, C#, and so forth), as well as third-party WPF controls that are inherited from the **System.Windows.Controls.Control** class and implement automation interfaces when the WPF Add-in is loaded.
- ▶ The QuickTest Professional .NET Add-in supports:
 - ▶ Testing standard .NET Windows Forms controls from the **System.Windows.Forms** library.
 - ▶ Testing third-party .NET Windows Forms controls that are inherited from **System.Windows.Forms.Control** class.
- ▶ In addition to the controls listed in the *HP QuickTest Professional 11.00 Product Availability Matrix*, custom-built QuickTest Professional support for a variety of Infragistics .NET Windows Forms controls is provided out-of-the-box by Infragistics TestAdvantage. For more information, refer to: <http://www.infragistics.com/dotnet/testadvantageoverview.aspx#Overview>
- ▶ To view the full type name of a .NET Windows Forms object in your application, view the **SwfTypeName** identification property in the Object Spy.

You can also view a list of the base types of a selected object by running a statement using the following syntax:

```
MsgBox SwfTestObj(descr).GetROProperty("SwfTypeNames")
```

where *SwfTestObj(descr)* is the test object you want to check.

Running this statement causes a message box to open displaying the actual class at the top of the list and the base classes below it.

Delphi Add-in

- ▶ InfoPower objects are not supported for Delphi 2005.
- ▶ Support is provided only for Delphi 7 applications that are implemented using the native Delphi memory manager or the ShareMem memory manager.

Oracle Add-in

The Oracle Forms and Oracle E-Business suite toolkits are supported only when working with Oracle JInitiator or Oracle Forms using the Sun Plug-in.

Add-in for SAP Solutions

- ▶ CRM 2007 is supported only for controls that support test mode enhancements. Requires SAP notes: 1147166, 1066565, and 1002944. Later SAP notes related to test mode enhancements are not supported.
- ▶ It is not recommended to work with other Web-based add-ins when the QuickTest Professional Add-in for SAP solutions is loaded. The Add-in for SAP solutions modifies certain Web configuration settings that may affect other add-ins or applications.
- ▶ The SAP patch levels mentioned in the *HP QuickTest Professional 11.00 Product Availability Matrix* are the minimum supported levels. Except where otherwise indicated, later patch levels may be supported. If you want to test your SAP application using a later patch, contact HP Software Support to ensure that the QuickTest Professional Add-in for SAP solutions is compatible with your patch version.

PowerBuilder Add-in

Support for PowerBuilder 12.5 requires the QTPPB_00034 - Support for PowerBuilder 12.5 Applications patch.

Siebel Add-in

Siebel 7.7.x and later is supported only when the Siebel Test Automation module is installed and enabled. For information on installing and configuring Siebel Test Automation, refer to the *Testing Siebel eBusiness Applications Guide*, provided with your Siebel installation.

Standard Windows Applications

QuickTest Professional supports testing on applications based on Win32 API and MFC. QuickTest Professional does not support testing on 64-bit applications.

Terminal Emulator Add-in

If you are using a newer version of one of the emulators listed in the *HP QuickTest Professional 11.00 Product Availability Matrix*, or your emulator version is different from one listed in a minor version number only, select the nearest preconfigured version in the Terminal Emulator Configuration Wizard. It is likely that the QuickTest Professional Terminal Emulator Add-in will work successfully with your emulator.

The QuickTest Professional Terminal Emulator Add-in can also be used with most other terminal emulators. You can define the exact configuration settings that you need using the Terminal Emulator Configuration Wizard.

For more information, see the *HP QuickTest Professional Add-ins Guide*.

Visual Basic Add-in

- ▶ Note that Visual Basic .NET applications are supported by the QuickTest Professional .NET Add-in.

Web Add-in

- ▶ Recording on Google Chrome browsers is not supported. If you need to record your Google Chrome Web-based application, record the application in Internet Explorer and manually adjust the object's properties after recording.

Web Services Add-in

A supported version of WS-I Interoperability Testing Tools is required for validating WSDL interoperability
