## Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:

**<http://h20230.www2.hp.com/selfsolve/manuals>**

This site requires that you register for an HP Passport and sign in. To register for an HP Passport ID, go to:

**<http://h20229.www2.hp.com/passport-registration.html>**

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

## Support

Visit the HP Software Support Online web site at:

**<http://www.hp.com/go/hpsoftwaresupport>**

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

**<http://h20229.www2.hp.com/passport-registration.html>**

To find more information about access levels, go to:

**[http://h20230.www2.hp.com/new\\_access\\_levels.jsp](http://h20230.www2.hp.com/new_access_levels.jsp)**

## Installation and Configuration

# Chapter 1

---

## Overview

This chapter includes:

<b>Components</b> .....	<b>9</b>
<b>Identify Your Environment</b> .....	<b>10</b>
<b>Support Matrix</b> .....	<b>11</b>

## Components

HP Universal CMDB Configuration Manager is a joint release of several components:

- **HP Universal CMDB foundation**

HP Universal CMDB foundation (UCMDB foundation) is a configuration management database (CMDB) for enterprise IT organizations to document, store, and manage business service definitions and associated infrastructure relationships.

UCMDB foundation implements a data model, data flow management, and data modeling capabilities, and also provides impact analysis, change tracking, and reporting capabilities in order to transform CMDB data into comprehensible, actionable information that helps answer critical questions and solve business problems.

- **HP Universal CMDB Configuration Manager**

HP Universal CMDB Configuration Manager (Configuration Manager) introduces new policy-based topology and inventory configuration governance. Created specifically for configuration managers and configuration owners, it allows these users to perform thorough analysis in addition to the CI data and topology content available in or through UCMDB. Configuration Manager provides configuration managers and owners the required tools for easily setting up both topology and inventory configuration policies, as well as automatically determining their level of compliance to organizational standards.

Configuration Manager is deployed as an additional Tomcat-based server. It communicates with the UCMDB server using the extensive UCMDB SDK.

- **HP Discovery and Dependency Mapping Advanced Edition**

HP Discovery and Dependency Mapping Advanced Edition (DDMA) software, with rich and constantly updated content, is UCMDB's preferred method for acquiring and maintaining the IT
