

HP Network Node Manager i Software

How to Access *Using the NNMi Web Services SDK*
(NNMi Developer License Required)

Release 9.1x Patch 3

Network Node Manager i Software (NNMi) provides web-service based integration through a robust set of APIs. To assist you with using these APIs, the *Using the NNMi Web Service SDK* whitepaper describes the following:

- The NNMi web service APIs provided
- How to use the most popular web services examples in the NNMi jmx-console
- How to develop a custom web service client to invoke the NNMi web services

These web-based services and the associated *Using the NNMi Web Services SDK* whitepaper are available when you purchase the NNMi Developer's License. Contact your HP Representative for a copy of this document.
