- [Legal Notices](#)

In This Version

- This version includes Radia Proxy Server version 2.1 for Windows and UNIX. UNIX supported platforms include: AIX, HP-UX, Linux and Solaris.

Installation Notes

- General requirements and instructions for installing the Proxy Server are documented in the *Installation and Configuration Guide of the HP-OpenView Proxy Server Using Radia (Proxy Server Guide)*. This guide is available from HP technical support site and on the Radia 4.1 Publications CD.
- If you are upgrading an existing Proxy Server, refer to the *Upgrade Procedures* PDF available in the \migrate folder of the \extended_infrastructure\proxy_server\ directory of the Radia 4.1 Infrastructure CD.

Enhancements and Fixes

This version includes several enhancements that improve Proxy Server features and performance, as listed below.

- Includes new integration with the HP-OpenView Multicast Server Using Radia (Multicast Server). A Proxy Server's static cache can now serve as the data source for a co-located Multicast Server. For more information, refer to the documentation for the Multicast Server.
- Includes added support for HTTPS checkpoint restart.
- For Windows, includes updates for the latest Radia 4.0.1 Windows components that are embedded in the Proxy Server.
- For UNIX, includes updates for the latest Radia 4.1 UNIX components that are embedded in the Proxy Server.
- For UNIX, includes the following new platform support:
 - Solaris operating system Version 2.5.1 or above, x86 platform.
 - Red Hat Enterprise Linux Version 2.1 or above.
 - SUSE LINUX Enterprise Server Version 8 or 9.
- For UNIX, includes support for secure routing using HTTPS.

Known Problems, Limitations, and Workarounds

There are no known problems in the current software release.

Support

Please visit the HP OpenView web site at: <http://www.managementsoftware.hp.com/>

This web site provides contact information and details about the products, services, and support that HP OpenView offers. You can also go directly to the support web site at:

<http://support.openview.hp.com/>

HP OpenView online software support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valuable support customer, you can benefit by being able to:

- Search for knowledge documents of interest
- Submit and track progress on support cases
- Manage a support contract
- Look up HP support contacts
- Review information about available services
- Enter discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and log in. Many also require an active support contract.

To find more information about support access levels, go to the following URL:

http://support.openview.hp.com/access_level.jsp

To register for an HP Passport ID, go to the following URL:

<https://passport2.hp.com/hpp/newuser.do>

To view release notes and other documentation:

- 1 Click using hp software--> product manuals.

The **product manuals search** window opens. It is located at:

http://ovweb.external.hp.com/lpe/doc_serv/

- 2 In the select product list, click **Radia**.
- 3 In the select version list, click **4.1**.
- 4 In the **OS** list, click **UNIX** or **Windows**.
- 5 To start the search, click **Open** or **Download**.

To view files in PDF format (*.pdf), Adobe Acrobat Reader must be installed on your system. To download Adobe Acrobat Reader, go to the following URL:
