HP Data Protector 7.0
Network Attached Storage (NAS) Support Matrix

Version: 3.3   Date: March 2014

Network Attached Storage (NAS) solutions, in general, are specialized file-serving devices that support heterogeneous files in a high-capacity storage solution on Ethernet based networks. NAS solutions also provide specific features to simplify the tasks and reduce the resources associated with data storage and management. The objective of NAS technology is to simplify manageability and improve data access to clients and applications. A NAS solution will generally provide network accessible storage to a mix of clients and servers running different operating systems.

Data Protector has comprehensive support for NAS devices. Data Protector supports NAS devices either by using its native agents, which makes it the most efficient backup and recovery application with these devices or by using its NDMP Agent which uses industry standard NDMP protocol.

Various Data Protector components are supported on Windows based HP NAS devices. Data Protector agents can be remotely or locally installed on these devices. The documentation for various Data Protector Windows agents applies to the supported Data Protector components on NAS devices.

The following table presents details of the NAS devices supported by Data Protector native agents:

NAS applications supported by Data Protector native agent					
NAS Type[1]	**Data Protector Component**				
	Cell Manager	**Installation Server**	**Disk Agent**	**Media Agent**	**Cluster**
NAS 500s	supported	supported	supported	supported	supported
NAS 1200s	supported	supported	supported	supported	n/a
NAS 1500s	supported	supported	supported	supported	supported
NAS 2000s	supported	supported	supported	supported	supported
NAS 4000s	supported	supported	supported	supported	supported
NAS 8000s	supported	supported	supported	supported	supported
NAS 9000s	supported	supported	supported	supported	supported

[1]   For supported devices, please see the *HP Data Protector* 7.00 *Device Support Matrix*. Only those devices that are supported by the respective NAS device and are also listed in *HP Data Protector* 7.00 *Device Support Matrix* are supported.

[2]   Includes support for all sub-models, for example, Ext. SATA Model, Ext. SCSI Model, SAN Storage Model and so on

Data Protector also supports NAS applications based on the industry standard NDMP protocol. There is a special NDMP Media Agent in Data Protector, that addresses the special backup and recovery needs of these NDMP based NAS applications. However, please note that Data Protector AES Encryption and key management features are not available for NDMP Media Agent.

The following table presents details of the NAS devices supported by Data Protector via NDMP protocol:

NAS applications supported by DP via NDMP protocol[7]		
Vendor	**Version**	**Features**
HP	X9000, X9300, X9320 X9720	• NDMP v4 • Dump • Direct Access Restore (DAR & DDAR) • SAN & direct attached devices [1] • Device/Library sharing for SAN attached devices
EMC	EMC Celerra 5.6, 6.0	• NDMP v3 & v4 • Dump & NVB (VBB) • Direct Access Restore (DAR & DDAR) • SAN & direct attached devices [1] • Device/Library sharing for SAN attached devices
EMC	EMC VNX File 7.0, 7.1	• NDMP v3 & v4 • Dump & NVB (VBB) • Direct Access Restore (DAR & DDAR) • SAN & direct attached devices [1] • Device/Library sharing for SAN attached devices
NetApp	ONTAP pre 7.3.x [2]	• NDMP v3 & v4 • Dump • Direct Access Restore (DAR & DDAR) • SAN & direct attached devices [1] • Device/Library sharing for SAN attached devices
NetApp	ONTAP 7.3.x[4], 8.0.x[4] (7 Mode), 8.1.x[5] (7 Mode),, 8.2.x[5] (7 Mode), GX 10.0.3	• NDMP v3 & v4 • Dump & SMTape • Direct Access Restore (DAR & DDAR) • SAN & direct attached devices [1] • Device/Library sharing for SAN attached devices
Hitachi	Hitachi NAS platform 6.x, 7.x, 8.x, 10.x and 11	• NDMP v3 & v4 • Dump • Direct Access Restore (DAR) • SAN & direct attached devices [1] • Device/Library sharing for SAN attached devices
IBM	System Storage N3300 Model A10[3], ONTAP 7.3.2	• NDMP v3 & v4 • Dump & SMTape • Direct Access Restore (DAR & DDAR) • SAN & direct attached devices [1] • Device/Library sharing for SAN attached devices
Oracle	Oracle Sun ZFSSA 7000 Series[3]	• NDMP v4 • Dump • Direct Access Restore (DAR & DDAR) • SAN & direct attached devices [1] • Device/Library sharing for SAN attached devices

[1]   For supported devices, please see the device support matrices of the respective NAS vendors. Only those devices which are supported by the respective NAS vendors and are also listed as supported in the *HP Data Protector* 7.00 *Device Support Matrix* are supported.

2	Due to the supportability issues, Data Protector only supports the following sub versions of ONTAP 7.0.1: For ONTAP 7.0.1.R1 Stream – 7.0.1R1P7D7 and for ONTAP 7.0.1.1 Stream – 7.0.1.1D4. No such restrictions apply for ONTAP versions 7.0.5, 7.1.x or 7.2.x
3	This device should be configured as NetApp.
4	NDMP Media Copy is supported on Linux and Windows clients only.
5	DAR is not supported.

HP Data Protector NDMP Agent supported Platforms
HP-UX 11.11 (PA-RISC)
HP-UX 11.23, 11.31 (PA-RISC, Itanium)
Solaris (SPARC) 9, 10
Windows XP, Windows Vista (32-bit)
Windows Vista (64-bit) (x64)
Windows Server 2003, Windows Server 2008 (32-bit)
Windows Server 2003 (64-bit) (Itanium, x64)
Windows Server 2008 (64-bit) (x64)
Windows Server 2008 R2 (64-bit) (x64)[1]
Redhat Enterprise Linux 5.x, 6.0, 6.1, 6.2, 6.3 (32-bit)
SUSE Linux Enterprise Server 10, 11 (32-bit)
Redhat Enterprise Linux 5.x, 6.0, 6.1, 6.2, 6.3, 6.4 (64-bit) (x64)
SUSE Linux Enterprise Server 10, 11 (64-bit) (x64)

HP Data Protector NDMP Agent support for StoreOnce Deduplication
Windows Server 2008 (64-bit) (x64)
Windows Server 2008 R2 (64-bit) (x64)

7	NDMP 3-way backup and restore are not supported.

The supported operating system "Windows Server 2003" includes support for all editions of Windows Server 2003 and Windows Server 2003 R2 including Windows Unified Data Storage Server where applicable.

HP Data Protector NDMP Media Agent can be used as a gateway for StoreOnce deduplication targets on following platforms:
