This matrix does not contain all configuration and resource requirements. For more information, download the Server Automation 7.88 Release Notes from HP Software Support Online.

## Warranty

The only warranties for HP products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

| OS Vendor | Managed Platform <sup>1</sup> | Versions Supported | Architecture | Agent | OS Provisioning | Patching <sup>3</sup> | Locale | Added in Release (SR if Blank) | Notes |
|-----------|-------------------------------|--------------------|--------------|-------|-----------------|-----------------------|--------|--------------------------------|-------|
|-----------|-------------------------------|--------------------|--------------|-------|-----------------|-----------------------|--------|--------------------------------|-------|

<sup>3</sup> "Basic": simple patch remediation, but may not have full metadata (dependencies, supercedence, etc). "Extended" includes metadata support (dependencies, supercedence, etc.) "Full": includes integrated patch import from vendor "N": no patching support is available

<sup>4</sup> HP is announcing the deprecation of the HP SA agent for this platform. Although HP SA will currently continue to support this platform, it should be noted that HP SA will stop supporting this version in an upcoming major or minor release.

<sup>5</sup> Guest-domain Solaris LDOMs are supported for server management, but without virtualization management and OS provisioning. The solution at this point does not have any support for creating, starting or stopping LDOMs.

<sup>6</sup> Vendor-integrated Solaris Patching on Solaris was added in SA 7.82

<sup>7</sup> OS Provisioning support was added in SA 7.83

<sup>8</sup> Simplified Chinese locale support was added in SA 7.83

<sup>9</sup> When installing SLES on PPC architectures, consoles may not work after the operating system loads during the boot process. Therefore, when provisioning or reprovisioning a server with SUSE Enterprise Linux on PPC architectures, you could lose console access to the server being provisioned.

<sup>10</sup> Support added in 7.84

<sup>11</sup> Simplified Chinese locale support is added in SA 7.84

<sup>12</sup> Traditional Chinese locale support is added in SA 7.84, for only x86\_32 on Windows Server 2008

<sup>13</sup> As of SA 7.84, Windows Server 2008 R2 is listed as a separate platform, instead of Windows Server 2008.

<sup>14</sup> Traditional Chinese locale support added in SA 7.85, for only x86\_64 on Windows Server 2008 R2

<sup>15</sup> Traditional Chinese locale support added in SA 7.85, for only x86\_64 on Windows Server 2003

<sup>16</sup> Traditional Chinese locale support added in SA 7.85, for only x86\_32 on Windows Server 2003 R2

<sup>17</sup> Discovered Software is not supported on IA\_64 servers (please see QC88891 for more details).

<sup>18</sup> Discovered Software is not supported on POWER-PC Architecture (please see QC104855 for more details).

<sup>19</sup> Discovered Software has not been tested on zSeries platforms and is not supported.

## Warranty

The only warranties for HP products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

| OS Vendor | Managed Platform <sup>1</sup> | Versions Supported | Architecture | Agent | OS Provisioning | Patching <sup>3</sup> | Locale | Added in Release (SR if Blank) | Notes |
|-----------|-------------------------------|--------------------|--------------|-------|-----------------|-----------------------|--------|--------------------------------|-------|
|-----------|-------------------------------|--------------------|--------------|-------|-----------------|-----------------------|--------|--------------------------------|-------|

<sup>20</sup> Discovered Software has not been tested on RHEL 6, Oracle Linux 6, CentOS 6, Citrix XenServer and AIX 7.1 platforms and is not supported.

<sup>21</sup> Japanese locale support added in SA 7.87, for only x86\_64 on Windows 2008 R2 SP1

<sup>22</sup> Citrix supports network boot only for Windows guests; therefore, only Windows OS provisioning is supported for XenServer guest VMs.

<sup>23</sup> Oracle Enterprise Linux patch import functionality is added in SA 7.87

**Linux Note 1:** RHEL 3 requires Update 3

**Solaris Note 1:** Requires Patches: SUNWadm, SUNWcsl, SUNWcslr (if available for the version), SUNWcsu, SUNWesu, SUNWlibms, SUNlibmsr (if available for the version), SUNWswmt

**Windows Note 1:** Patching requires MSXML 3.0 (or later), IE 6.0 (or later), Windows Installer 3.1, Windows Update/Automatic Update should be set to Never Check for Updates/Turn off Automatic Updates.

Custom Extensions, Code Deployment and Rollback (CDR), Configuration Tracking, and DOS-Based OS Provisioning are deprecated in SA 7.80

<sup>1</sup> The Virtualization Support column lists the supported virtualization container technologies (VM guests or partitions) with the specified Core Platform.

<sup>2</sup> This requires Veritas Storage Foundation Basic 5.0 MP3 RP2 or later.

<sup>4</sup> Core support for ESX 4.0 U1 and ESXi 4.0 U1 is added in SA 7.84.

<sup>5</sup> Core support for RHEL 5 Advanced Platform is supported as of SA 7.84.

<sup>6</sup> Veritas filesystem support is added in SA 7.84

<sup>7</sup> HP is announcing the deprecation of this platform for Core Servers. Although HP SA will currently continue to support this platform, it should be noted that HP SA will stop supporting this version in an upcoming major or minor release.

## Warranty

The only warranties for HP products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

| OS Vendor | Core Platform | Versions Supported | Architecture | Locale | Local File System | Virtualization Support <sup>1</sup> | Added in Release (SR if Blank) | Notes |
|-----------|---------------|--------------------|--------------|--------|-------------------|-------------------------------------|--------------------------------|-------|
|-----------|---------------|--------------------|--------------|--------|-------------------|-------------------------------------|--------------------------------|-------|

## Platform Notes

Note 1 - Please see this OS under the Managed Server Support Matrix. Core servers require SA agents and the same caveats from managed servers apply to core servers as well.

Note 2 - SA Core servers may not be installed in Solaris Local Zones and Solaris Local Zones may not be installed on a Server where an SA Core is installed.

## General Notes

Antivirus software is not supported on SA cores. Please see QC 57187 for more details.

IPMP (IP Multi-Pathing) and NIC bonding are supported on core and satellite servers in SA 7.83.

SAN Support (MPIO) was added in SA 7.83

|-----------|-------------------------------------------------------------|--------------------|--------------|--------|------------------------|--------------------------------------------------------------------------------------------------------------------------|--------------------------------|---------------------|
| Red Hat   | RHEL 5 base server<br>RHEL 5 Advanced Platform <sup>3</sup> | U2-U3              | x86_64       | EN, JA | ext3,vxfs <sup>1</sup> | ESX Server 3.0<br>ESX Server 3.5<br>ESXi Server 3.5<br>ESX Server 4.0 U1 <sup>2</sup><br>ESXi Server 4.0 U1 <sup>2</sup> |                                | See platform note 1 |

<sup>\*</sup> The Virtualization Support column lists the supported virtualization container technologies (VM guests or partitions) with the specified Satellite Platform.

<sup>1</sup> This requires Veritas Storage Foundation Basic 5.0 MP3 RP2 or later.

<sup>2</sup> Satellite support for ESX 4.0 U1 and ESXi 4.0 U1 is added in SA 7.84.

<sup>3</sup> Satellite support for RHEL 5 Advanced Platform is supported as of SA 7.84.

<sup>4</sup> HP is announcing the deprecation of this platform for Core Servers. Although HP SA will currently continue to support this platform, it should be noted that HP SA will stop supporting this version in an upcoming major or minor release.

## Platform Notes

Note 1 - Please see this OS under the Managed Server Support Matrix. Core servers require SA agents and the same caveats from managed servers apply to core servers as well.

## General Notes

Antivirus software is not supported on SA cores. Please see QC 57187 for more details.

IPMP (IP Multi-Pathing) and NIC bonding are supported on core and satellite servers in 7.83.
