Desktop Inventory 8.0.2 Release Notes

Version 8.0.2 of Peregrine's Desktop Inventory is a maintenance release of the product.

These Release Notes have the following sections:

- [Compatibility](#)
- [Installation Information](#)
- [Corrections \(Since Desktop Inventory 8.0.1\)](#)
- [Documentation](#)
- [Further Assistance](#)

Compatibility

Compatibility Matrices

The compatibility matrix, including version details for servers, clients, and Peregrine products cross-compatibility is available on Peregrine's CenterPoint Web site:

<http://support.peregrine.com>

After logging in with your login and password:

- 1** Under **Search by Product**, select **Desktop Inventory**.

- 2 Under **Support Resources**, select **Compatibility Matrices**.
- 3 Follow the path for the Desktop Inventory version you require.

Using Peregrine Desktop Inventory with Peregrine Network Discovery

- This version of Desktop Inventory only works with PND 5.2.4.
- PND 5.2 or later is required for Aware mode to work. You cannot use PND 5.0 or 5.1 to automate PDI 8.0 or later versions.
- While PND 5.2 works with PDI versions 8.0 or later by default, it can be configured to use Scanners from PDI 7.3.1.

Further Information

You can find further information about using PDI with PND in the document entitled *Using Network Discovery with Desktop Inventory and Desktop Administration*.

Installation Information

Desktop Inventory and Enterprise Discovery

Desktop Inventory server components conflict with Enterprise Discovery server components and cannot co-exist on the same computer.

The client installation functions regardless of server components or client installations from other versions (of Enterprise Discovery or Desktop Inventory) already being present.

Earlier Versions of the Software

Desktop Inventory can co-exist with parts of previous versions of Desktop Inventory and InfraTools Desktop Discovery.

The server components cannot coexist and any previous versions of these must be uninstalled before new ones can be installed. Server components are XML Enricher and ApE Server.

Important: To migrate the contents of your ApE database to the new version, export it as a Read-only SAI prior to uninstalling the previous version of ApE.

Uninstall all previous versions of the server components before installing the latest versions. The installer will not allow a new version to be installed before the old ones have been removed.

All other components (Analysis Workbench, Scanner Generator, Viewer, etc.) can be installed in multiple versions.

MySQL

If MySQL is not installed on the machine, Desktop Inventory will install a version of MySQL when the ApE Server is installed. In this case, the installer will automatically create the necessary database and tables for the ApE Database.

If MySQL is already installed on the machine, Desktop Inventory will not install MySQL again. For security reasons it cannot automatically create the ApE Database and a script to do this must be run.

For further information on how to do this, refer to the *Application Encyclopedia User's Guide*.

Corrections (Since Desktop Inventory 8.0.1)

The following table contains corrected issues from the previous release of Desktop Inventory. For further updates see the Customer Support web site at <http://support.peregrine.com>.

SCR #	What's affected	Description
12825	Scanner Generator	The Scanner Generator in Aware mode now holds all settings.
12839	XML Enricher	Recognition filtering is now performed in the XML Enricher.
12857	Viewer	User Prompts for User fields 11 - 30 are now displayed in the Desktop Inventory Viewer.
12876	Scanners	Scanning Unix Directories with some named pipes no longer causes the scanner to hang.
12899	Win32 Scanner	Calculated asset fields (e.g. Registry Extract) work with NO-UI Win32 scanner.
12903	Win32 Scanner	An invalid character (%) in the PATH environment variable no longer causes the Win32 scanner to disappear.
12967	Win32 Scanner	Physical CPU count is no longer reported as 0 by the Win32 scanner.
12969	Win32 Scanner	DNS information is now being collected by the scanner in NT 4 systems.
12987	Solaris Scanner	Solaris scanner is no longer refilling when an option is unselected.
13032	Analysis Workbench	Analysis Workbench is no longer failing to save state when loading files with a four letter extension.
13326	Scan Files	There is no longer an error creating xml scan files in Japanese environment.
13429	Scanners	Remote Scanner now saves using HTTP save path.
13632	XML Enricher	Fixed a memory leak in XML Enricher.
13648	SAI Upgrade Wizard	Can now upgrade User.SAI to PDI 8.0.1 with SAI Upgrade Wizard.
13971	SAI Editor	Fixed an access violation in the SAI Editor.
14034	Win32 Scanner	Windows XP x64 is no longer detected as Windows 2003.
14035	Scanners	Rated CPU frequency was only detected for half of processors (when CPUs are hyperthread).
14036	Linux Scanner	hwCPUDescription field is not detected by the Linux scanner.
14088	Analysis Workbench	In the Analysis Workbench, when loading from a state image, "Not in SAI!" will appear for some applications.
14207	AIX Scanner	Power4 CPU is now recognized by the AIX scanner.

SCR #	What's affected	Description
14220	SAI Editor	Drivers are now filtered out by 'Filtering by extension'.
14422 and 14237	Scanners	CPU detection is amended so that newer models of Intel Pentium M, and AMD Athlon and Opteron CPUs are detected.
14460	Scanner Generator	Access Violation in Scanner Generator Scanner options page.
14468	SAI Editor	Access Violation when deleting from User SAI.
14527	SAI Editor	Merging applications may corrupt a User SAI.

Documentation

No documentation has been updated for this release.

For a complete list of current Desktop Inventory documentation, see the Documentation pages on the Peregrine Customer Support web site at <http://support.peregrine.com>.

Access to this web page requires a current login name and password.

You can download documentation PDF files and view them using Acrobat Reader, which is available on the Customer Support web site and through Adobe at <http://www.adobe.com>.

Further Assistance

For further information and assistance with this release or Desktop Inventory in general, contact Peregrine's Customer Support.

Peregrine's CenterPoint Web site

Contact information for local support offices is available through the main contacts shown below or through Peregrine's CenterPoint Web site:
<http://support.peregrine.com>

After logging in with your login and password:

- Select **General Information**, on the left.

Under **Customer Support References**, select **Support Contacts Worldwide**.

Corporate Headquarters
