Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:

<http://h20230.www2.hp.com/selfsolve/manuals>

This site requires that you register for an HP Passport and sign in. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

Support

Visit the HP Software Support Online web site at:

<http://www.hp.com/go/hpsoftwaresupport>

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

To find more information about access levels, go to:

http://h20230.www2.hp.com/new_access_levels.jsp

Hardware and Software Requirements

This section provides a list of the hardware and software required to successfully run Executive Scorecard.

"Hardware Requirements " below

"Software Requirements " on page 9

"Database Driver Requirements" on page 9

"Client Workstation Requirements" on page 10

"Transparent Technology and Virtualization Support" on page 12

Hardware Requirements

Although you can install all components on a single server, the typical configuration is a distributed environment where each networked server hosts a specific component.

Third-party components, such as databases and operating systems, are supported at the minor level, unless a different minimum level is specified. Future maintenance and patch releases (including fix packs or service packs) on the same minor release are expected to be supported, unless a conflict specific to that release arises.

The following table describes the recommended hardware requirements for the various Executive Scorecard components. If you are deploying a consolidated environment, ensure that the server meets the combined total minimum space requirements.

Note:

- The following requirements apply to both VMWare environments or physical machines.
- The servers listed below are the servers used in 9.31.
- Recommended: allow for 40 GB of free disk space in each server if you plan on copying the installation files to the server during the installation.

Server	Server	Recommended Requirements
SAP BusinessObjects Enterprise Server	RAM	8GB
	Free disk space	16GB
	Processor	Dual core (2 CPUs)
	Available Ports	<ul style="list-style-type: none"> port for the Central Management Console (CMC): 8080 port for the Central Management Server (CMS): 6400 port for the Server Intelligence Agent (SIA): 8080
Data Warehouse Server	RAM	8GB
	Free disk space	16GB
	Processor	Quad core (4 CPUs)
	Available Ports	<ul style="list-style-type: none"> ports: 10001 to 10010, 11020, 11021, and 28080. http default port: 80. You can select non default HTTP and HTTPS ports during post install https default port: 443. You can select non default HTTP and HTTPS ports during post install
Executive Scorecard Server	RAM	4GB
	Free disk space	16GB
	Processor	Dual core (2 CPUs)
	Available Ports	<ul style="list-style-type: none"> ports: 10001 to 10010, 11020, and 11021 http default port: 80. You can select non default HTTP and HTTPS ports during post install https default port: 443. You can select non default HTTP and HTTPS ports during post install

Note: Additional ports are:

- MS SQL server listener default port: 1433.
- Tomcat listener default port: 8080.

Software Requirements

The following describe the software requirements for the Executive Scorecard components:

Server	Installed Applications	Operating System
Executive Scorecard server	IT Executive Scorecard 9.30	Microsoft Windows Server 2008 R2 Enterprise Edition
RDBMS server	Microsoft SQL Server 2008 R2 Enterprise Edition with SP1 Microsoft SQL Server 2008 Enterprise Edition with SP2	RDBMS compatible
Data Warehouse Server	Microsoft .NET Framework 3.5	N/A
	Microsoft® SQL Server® 2008 R2 Native Client x64 package and the Microsoft® SQL Server® 2008 R2 Command Line Utilities x64 package	Microsoft Windows Server 2008 R2 Enterprise Edition
	Microsoft Excel 2007	N/A
SAP® BusinessObjects server	SAP® BusinessObjects Enterprise XI 3.1 SP3	Microsoft Windows Server 2008 R2 Enterprise Edition
SAP BusinessObjects Data Services	Version 12.2.3.2	

Tip: All component systems must be joined to the same Windows server domain.

Database Driver Requirements

Make sure that you consult the RDBMS vendor documentation for installation requirements and platform/operating system compatibility for server and client installations. The following table describes the RDBMS drivers required on different servers for HP Executive Scorecard to run successfully.

Product	Server	Supported Drivers (Client)
Microsoft SQL Server 2008	Application	Microsoft SQL Server JDBC driver 2.0.1803 (sqljdbc_2.0\enu\sqljdbc.jar)

Client Workstation Requirements

Make sure that you consult the software vendor documentation for installation requirements and platform/operating system compatibility for server and client installations. The following table describes the software required for users to access the Executive Scorecard application successfully.

Product	Comments
Operating system	Recommended: 64 bit OS
Adobe Flash Player 10.3.x and higher	Enables users to view dashboards, view or edit Allocation Rules, and use the Cost Explorer. Free download available from the Adobe web site: www.adobe.com
Adobe® Reader® version 9 and above	Enables users to read the documentation in PDF format.
SAP® BusinessObjects Xcelsius 2008 SP3 or SP5	Enables users to modify reports. Xcelsius requires installation of Microsoft Excel 2003 or 2007. For a complete list of Xcelsius 2008 SP3 or SP5 supported platforms, see the Xcelsius 2008 Service Pack 3 – Supported Platforms and Xcelsius 2008 Service Pack 5 – Supported Platforms documentation.

Product	Comments
<p>Internet Explorer 8, 9.0</p> <p>or</p> <p>Google Chrome</p>	<p>Browser</p> <p>Note:</p> <ul style="list-style-type: none"> The Compatibility View mode is not supported in IE9. To turn off the Compatibility View mode, do one of the following: (1) Click  (blue icon) in the toolbar (the page reloads with the compatibility mode off). (2) Click Tools > Compatibility View Settings, select the listed webpage address that you want to turn off Compatibility View for, and click/tap on the Remove, then click Close. In some versions of the Chrome web browser, the Online Help displays correctly when it is viewed from a web server (via http) but does not display correctly when viewed locally (saved on your computer). This is caused by a security policy in Chrome. If you want to check your WebHelp output locally in Chrome, start Chrome with this policy disabled: (1) Close all instances of Chrome. (2) Click the Windows Start Icon > Run. (3) In the Open: field, enter: chrome --allow-file-access-from-files --disable-web-security (4) Click OK. For Internet Explorer 8: <ul style="list-style-type: none"> Access to relevant movies through the movies page is not available. You can access the movie files directly on the XS server at: <pre data-bbox="609 1144 1299 1207"><Installation directory>\agora\glassfish\ glassfish\domains\BTOA\applications\fnrdwar\static\Movies.</pre> An mp4 player is required to view the movies. Internet Explorer 8 does not provide an optimum performance for Executive Scorecard and is not recommended.
<p>JRE (Java Runtime Environment)</p>	<p>Version 1.6x and higher (not mandatory)</p>
<p>RAM</p>	<p>2GB minimum</p> <p>4GB recommended</p>
<p>Screen Resolution</p>	<p>1280 x 1024 minimum</p>
<p>Browser Zoom Level</p>	<p>It is recommended that you set your browser Zoom Level to 100%.</p> <p>A Zoom level higher than 100% might result in some of the components not displaying properly in the Dashboard.</p>

Product	Comments
Browser Settings	It is recommended that you reset the browser settings to the default settings.

Transparent Technology and Virtualization Support

HP supports Executive Scorecard running on operating systems and databases on particular platforms, not specific hardware and software configurations. HP supports Executive Scorecard customers who run HP software products on supported operating systems and databases, irrespective of whether they are running transparent or virtualization solutions in their environment. HP does not support these transparent or virtualization technologies directly. Since the providers of these technologies support a set of certified operating systems and hardware, the customer and the providers of these technologies will be responsible for any interactions or issues that arise at the hardware or operating system layer as a result of their use.

HP will not require customers to re-create and troubleshoot every issue in a non-transparent environment; however, HP does reserve the right to request that its customers diagnose certain issues in a native certified operating system environment without the transparent technology. HP will only make this request when there is reason to believe that the environment is a contributing factor to the reported issue.

While Executive Scorecard is expected to function properly with these transparent technologies in place, there may be performance implications, which can invalidate HP's typical sizing and recommendations. Analysis must be performed within the context of the specific application to be hosted in a virtual environment to minimize potential resource overload, which can have significant impact on performance and scalability, particularly under peak load.

Supported Data Sources

HP Executive Scorecard is compatible with the following software products.

You can find the latest Support Matrix for this product that lists all software and hardware requirements at this location: [HP Support matrices](#) or at the [HP Software Product Manual Site \(http://h20230.www2.hp.com/selfsolve/manuals\)](#).

Note: Most of the support areas require that you register as an HP Passport user and sign in. Many also require an active support contract. To find more information about support access levels, go to [Access levels](#).

To register for an HP Passport ID, go to [HP Passport Registration](#).

Product	Versions	Supported Databases
Alternate Source	N/A	Microsoft Excel 2003 or 2007
HP Application Lifecycle Management (ALM)	11 SP2	All supported database servers
HP Asset Manager (AM)	9.30, 5.2x, 5.10	Only sources based on Oracle & SQL-Server are supported.
HP Business Service Management (BSM)	9.20, 9.10, 9.01 including Patch #12 (available in the installation DVD in the BSM_901_Patch_12 directory)	All supported database servers
HP Data Protector (DP)	6.22, 6.2, 6.11, 6.1	All supported database servers
HP Insight Control (IC)	7.1.0	All supported database servers
HP Network Automation (NA)	9.10	All supported database servers
HP Network Node Manager (NNM)	9.10	All supported database servers
HP Operation Orchestration (OO)	9.0 and up	All supported database servers

Support Matrix

Product	Versions	Supported Databases
HP Project and Portfolio Management (PPM)	9.20, 9.10, 8.00	All supported database servers
HP Server Automation (SA)	9.0x	All supported database servers
HP Storage Essentials (SE)	9.5.1 with hotfix: 1868_hotfix.zip	Only sources based on Oracle 11g are supported
HP Service Manager (SM)	9.30, 9.2x, 7.11	Only sources based on Oracle & SQL-Server are supported.
HP Universal Configuration Management Database (uCMDB)	10.00, 9.05, 9.04, 9.03, 9.02	All supported database servers

Note: The Data Source Management UI does not display all the currently supported data source versions (the complete list is displayed above).

If you want to specify the latest supported version of your data source (according to the Support Matrix), use the highest supported version listed in the <Data Source version> field in the Data Source Wizard page for your specific data source.

Internationalization and Localization

Internationalization

Executive Scorecard is I18N-compliant and can be installed on any Operating System locale. However, it is not UNICODE-compliant and the server supports a single locale and single character set at a time, as set by the Operating System and the environment you are using. Using the English character set is always supported in addition to the character set in the local Operating System. For example, if you install Executive Scorecard in a Japanese environment, you can use the English character set as well as the Japanese character set.

Localization

The user interface of HP Executive Scorecard has been extended to support multiple languages. This version includes translated sources. The application supports multi-language user face (MLU) where different users can view the same Executive Scorecard application from different client machines with their own language settings. You can switch the language displayed in the application user interface by switching the Internet Browser language settings.

These languages are:

- English
- Brazilian Portuguese
- French
- Spanish
- German
- Japanese
- Dutch
- Italian
- Russian
- Simplified Chinese
- Korean
