Getting Started with Mercury IT Governance Center Reports

In This Chapter:

- *Introduction to Mercury IT Governance Center Reports*
 - *Report Categories*
- *Related Information*

Introduction to Mercury IT Governance Center Reports

Mercury IT Governance Center provides a predefined set of reports that allow you to view (in a Web browser) the current status of your Mercury IT Governance Center data.

Within Mercury IT Governance Center, the term “report” has multiple meanings based on its context.

- You can create and submit a “report” that is actually a query.
- In response to this query, Mercury IT Governance Center provides a “report” that is actually the result of the query.

To submit and view report queries you must have the System: Submit Reports access grant. Additionally, submitting and viewing report results may be further limited by your:

- Product licenses
- Security group assignments

When you prepare to submit a report, you are presented with a set of filter fields from which you can specify the criteria for the report. The resulting report shows only the data that matches the criteria. [Chapter 2, *Running Reports*, on page 19](#) describes how to create and submit report queries, as well as how to access and view the results. [Chapter 8, *Report Types*, on page 175](#) provides information about report types, the mechanism you can use to create reports tailored to meet your business needs.

The majority of the Mercury IT Governance Center reports are submitted and viewed from the standard interface. Another type of report in Mercury IT Governance Center (not discussed in this document) are server reports, which gather administrative diagnostics and are submitted and viewed from the Mercury IT Governance Workbench. For information about server reports, see the *System Administration Guide and Reference*.

Report Categories

The following report categories are provided in Mercury IT Governance Center™ and include the Mercury-supplied reports. Any reports created for your company should also be found in these categories.

- **Administrative.** These reports focus on administrative tasks and are available to users with a variety of licenses (depending on the report) and are detailed in [Chapter 3, Administrative Reports, on page 37](#).

Also included in this category are reports related to the Mercury Open Interface. For more information about these reports, see the *Open Interface Guide and Reference*.

- **Deployment Management.** These reports are available to users with Mercury Deployment Management™ application license and are detailed in [Chapter 4, Deployment Management Reports, on page 79](#).
- **Demand Management.** These reports are available to users with a Mercury Demand Management™ application license and are detailed in [Chapter 5, Demand Management Reports, on page 119](#).
- **Financial Management.** Mercury Financial Management™ reports are available to users with different licenses (depending on the report). These reports appear in multiple categories and are described in [Chapter 6, Project Management Reports, on page 155](#).
- **Portfolio Management.** No Mercury-supplied reports are provided for Mercury Portfolio Management™. However, this category is provided as a place to organize for your company's portfolio management reports.
- **Program Management.** No reports are supplied for Mercury Program Management™ and the category is provided for your convenience.
- **Project Management.** These reports are available to users with a Mercury Project Management™ application license and are detailed in [Chapter 6, Project Management Reports, on page 155](#).
- **Resource Management.** Mercury Resource Management™ reports are available to users with different licenses (depending on the report). These reports appear in multiple categories and are described in [Chapter 3, Administrative Reports, on page 37](#) and [Chapter 7, Time Management Reports, on page 161](#).
- **Time Management.** These reports are available to users with a Mercury Time Management™ application license and are detailed in [Chapter 7, Time Management Reports, on page 161](#).

- **Extension.** These reports are available to users with the appropriate Mercury Deployment Management Extension license.

Extension-related reports are included in the relevant Extension documentation.

Related Information

This document presumes a basic working knowledge of Mercury IT Governance Center usage and application configuration.

The following documents include information related to Mercury IT Governance Center reports:

- *Security Model Guide and Reference*
- *Mercury-Supplied Entities Guide* (includes brief descriptions, licensing information, and access grants for all Mercury IT Governance Center reports)

Chapter
2
Running Reports

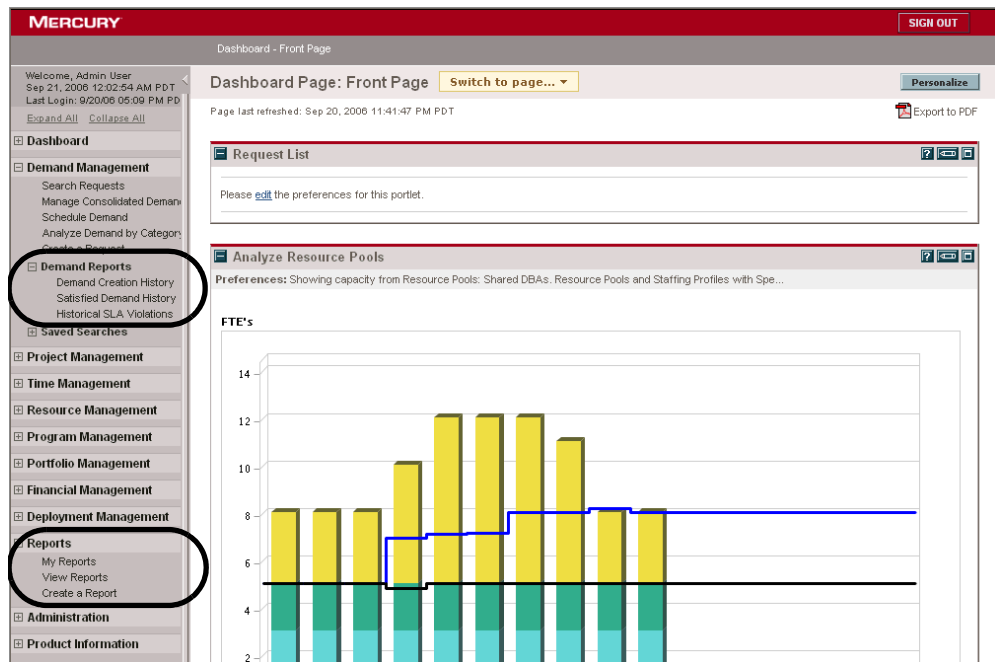

In This Chapter:

- *The Reports Menu*
 - *Submitting Reports*
 - *Viewing Previously Submitted Report Results*
 - *Using My Reports*
 - *Using View Reports*
 - *Viewing and Cancelling Running Reports*
 - *Reports That Can Be Cancelled*
 - *Deleting Report Results*
-

The Reports Menu

Use the **Reports** menu in the standard interface (shown in *Figure 2-1*) to submit and view reports. Note that three of the Mercury Demand Management reports are also available from the **Demand Management** menu.

Figure 2-1. Reports menu in the standard interface

Note

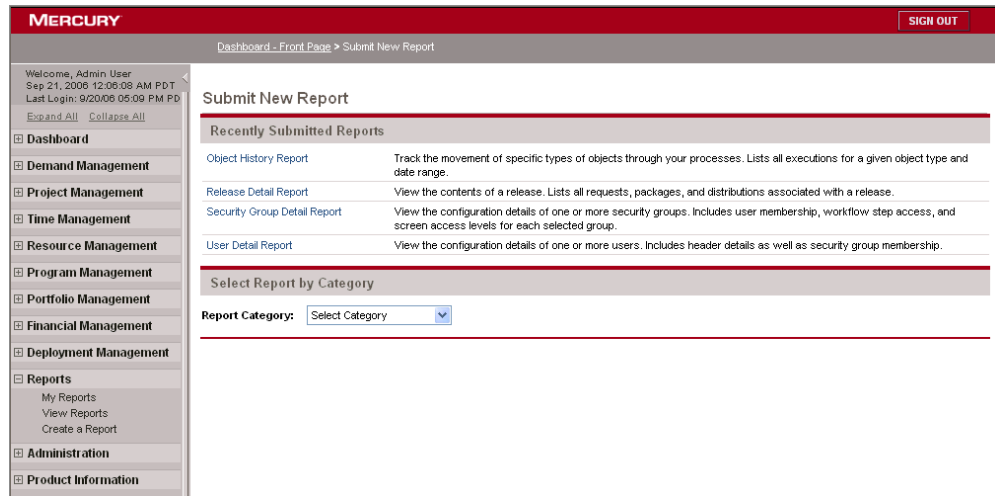

For information about submitting and running Mercury IT Governance Server reports in the Workbench interface, see the *System Administration Guide and Reference*.

Submitting Reports

To submit a report:

1. Log on to Mercury IT Governance Center.
2. From the menu bar, select **Reports > Create a Report**.

The Submit New Report page opens.

3. Select the report to be submitted:

- From the **Recently Submitted Reports** section:
 - Click the link for the desired report.
- From the **Select Report by Category** section:
 - i. For **Report Category**, select the appropriate category.
 - ii. Click the link for the desired report.

You have access to only those report categories for which you are licensed. In addition, the list of available reports might be further restricted by security settings on individual report types. For more information about report security, see the *Security Model Guide and Reference*.

Once a report is selected, the Submit Report: <Report Name> window opens. This window is sometimes termed the “report submission page.”

Advanced Notifications

| Send When | Description | Recipients |
|-----------|-------------|------------|
| | | |

The Submit Report: *<Report Name>* window has the following sections:

- **Report Parameters.** This section contains the set of filter fields relevant to the selected report.
- **Scheduling.** This section allows you to choose whether to run the report immediately, schedule it for a later time, or automatically run the report on a periodic basis. It also allows you to request that an email be sent to selected users when the report is finished.
- **Advanced Notifications.** This section allows you to send notifications when the report completes, fails, or either results.

Each report has its own set of fields. For information about report fields, see the description in:

- The relevant chapter in this document (for example, to find information about Mercury Deployment Management reports, see [Chapter 4, *Deployment Management Reports*, on page 79](#))
 - The appropriate Mercury Deployment Management Extension document (for example, to find out information about a PeopleSoft-related report, see the *Mercury Deployment Management Extension for PeopleSoft Enterprise Guide*)
4. Type or change information in the fields to define the report results you want.
 5. To run the report at a later time, on a periodic basis, or provide a brief notification once the report is finished, expand the **Scheduling** section, then follow the steps for the task you want to accomplish.
 - To run the report (once) at a later time:
 - i. Select **Run Report On**.
 - ii. Provide a valid date (using the field to the right of **Run Report On**).
 - To run the report on a periodic basis:
 - i. Select **Run Report On**.
 - ii. Provide the date when you want the report first run (using the field to the right of **Run Report On**).
 - iii. Select **Repeat Every**.
 - iv. Provide the frequency and the date when you want the report run last (using the three fields to the right of **Repeat Every**).
 - To include a brief notification:
 - i. Select **Send email to**.
 - ii. Provide the user IDs of the users who should receive the notification (using the field to the right of **Send email to**).

6. To add a notification that has more comprehensive features than those available with **Send email to**:
 - a. Expand the **Advanced Notifications** section.
 - b. Click **Add a Notification**.

The Edit Advanced Notifications window opens.

The screenshot shows the 'Edit Advanced Notifications' window. At the top, there's a red header with 'MERCURY' and a 'Close Window' button. Below the header, the title 'Edit Advanced Notifications' is displayed. There are 'Add' and 'Cancel' buttons. The 'Description' field is empty. Under 'Send when Report', both 'Completes' and 'Fails' are checked. The 'Recipients' section has a table with columns 'Send', 'Type', and 'Recipient'. Below the table, there are 'Send', 'From', and 'Reply To' fields, each with a dropdown menu and an 'Add' button. The 'Messages' section includes a 'Notification Template' dropdown set to 'Standard HTML Message (HTML)', a 'Subject' field with a placeholder '[RP.REPORT_TYPE_NAME] [RP.STATUS] on [RP.LAST_UPDATE_DATE]', and a 'Message' field containing HTML code. Below the 'Message' field is an 'HTML Preview' button. At the bottom, there are 'Add' and 'Cancel' buttons.

- c. Provide relevant information in this window.
- d. Click **Add**.

The Edit Advanced Notifications window closes.

7. Click **Submit**.

- For reports that are run immediately:
 - a. The Submit Report window opens. The status is refreshed until the report is complete.

The completed report is displayed in a separate window.

| Step # | Step Name | Status | Acted On By | Acted On |
|--------|--------------------|--------------------------|--|---------------------------------|
| 1 | Review Request | Review Request (Timeout) | workflow_timeout_service workflow_timeout_service | September 22, 2004 09:58 AM PDT |
| 2 | Request Assigned | | | |
| 3 | Request Analysis | | | |
| 4 | Create Package | | | |
| 5 | Requestor Sign-off | | | |
| 6 | Close (Immediate) | | | |

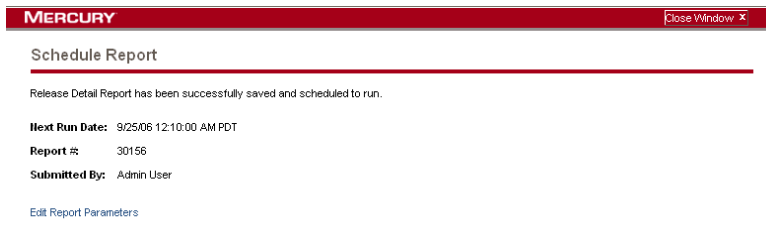

- b. (Optional) To print the completed report, click **Print**.

Tip

The print feature is not available for all reports. If a given report does not have a **Print** button, use your browser's print facility.

- For reports that are scheduled to run at a later time:
 - a. The Schedule Report window opens.

- b. The report results, or its status, can be accessed from the **Recently Submitted Reports** section of your My Reports page. See *Viewing Previously Submitted Report Results* for details.

Viewing Previously Submitted Report Results

You can view the results (or status) of previously submitted reports by selecting one of two menu items:

- **My Reports**
- **View Reports**

Using My Reports

To view the results of previously submitted reports using the **My Reports** menu:

1. Log on to Mercury IT Governance Center.
2. From the menu bar, select **Reports > My Reports**.

The My Reports page appears. This page lists the results of the reports you submitted in the **Search Results: Reports** section as well as provides additional search functionality in the **Search for Reports** section.

The screenshot shows the MERCURY web application interface. The top navigation bar includes the MERCURY logo and a 'SIGN OUT' button. The breadcrumb trail reads 'Dashboard - Front Page > Submit New Report > My Reports'. The user is logged in as 'Admin User' on 'Sep 21, 2006 12:11:34 AM PDT'. The left sidebar contains a navigation menu with categories like Dashboard, Demand Management, Project Management, Time Management, Resource Management, Program Management, Portfolio Management, Financial Management, Deployment Management, Reports, Administration, and Product Information. The main content area is titled 'Search Reports' and features a search bar with a 'Go' button. Below the search bar is a table of search results for reports. The table has columns for Report #, Report Type, Status, Created By, and Run Date. There are four reports listed, with the first three being completed and the last one scheduled. Below the table are buttons for 'Check All', 'Clear All', and 'Delete'. Further down, there are search filters for Report Type, Report #, Created By, Repeating, and Status. There are also options to filter by 'All Reports', 'Scheduled Reports', and 'Previous Reports'. At the bottom, there are options for 'Sort By' (Run Date) and 'Maximum Results Per Page' (50). A 'Search' button is located at the bottom right of the search filters section.

| Report # | Report Type | Status | Created By | Run Date |
|--------------------------------|---|-----------------|------------|-------------------------|
| <input type="checkbox"/> 30030 | User Detail Report (Submission Details) | Completed (Log) | Admin User | 7/31/06 12:06:49 AM PDT |
| <input type="checkbox"/> 30031 | Security Group Detail Report (Submission Details) | Completed (Log) | Admin User | 7/31/06 12:07:58 AM PDT |
| <input type="checkbox"/> 30150 | Object History Report (Submission Details) | Completed (Log) | Admin User | 9/20/06 02:09:20 PM PDT |
| <input type="checkbox"/> 30156 | Release Detail Report (Submission Details) | Scheduled | Admin User | 9/25/06 12:10:00 AM PDT |

3. To view the report results, either:

- Click the link of the desired report in the **Report #** column.
- Provide the number associated with the desired report in **View Report #** field and click **Go**.

The report results are displayed in a new window in your Web browser.

Using View Reports

To view the results of previously submitted reports using the **View Reports** menu:

1. Log on to Mercury IT Governance Center.
2. From the menu bar, select **Reports > View Reports**.

The View Reports page appears.

The screenshot shows the Mercury application interface. At the top, there is a red header with the Mercury logo and a 'SIGN OUT' button. Below the header, a breadcrumb trail reads 'Dashboard - Front Page > Submit New Report > View Reports'. On the left, a navigation menu lists various management categories: Dashboard, Demand Management, Project Management, Time Management, Resource Management, Program Management, Portfolio Management, Financial Management, Deployment Management, Reports (with sub-items: My Reports, View Reports, Create a Report), Administration, and Product Information. The main content area is titled 'View Reports' and contains a search form. The form includes a 'View Report #' field with a 'Go' button. Below this is a 'Search for Reports' section with several filters: 'Report Type:' (text input), 'Report #' (text input), 'Created By:' (text input), and 'Repeating:' (dropdown menu set to 'ALL'). A 'Status:' section has four checked checkboxes: 'Completed', 'Failed', 'Running', and 'Scheduled'. There are three radio button options: 'All Reports' (selected), 'Scheduled Reports', and 'Previous Reports'. Under 'Scheduled Reports', there are three options: 'All Scheduled Reports', 'Scheduled to run within the next [] Day(s)', and 'Scheduled to run From: [] To: []'. Under 'Previous Reports', there are three options: 'All Previous Reports', 'Run within the last [] Day(s)', and 'Run From: [] To: []'. At the bottom of the search form, there is a 'Sort By:' dropdown set to 'Run Date', radio buttons for 'Ascending' (selected) and 'Descending', and a 'Maximum Results Per Page:' field set to '50'. A 'Search' button is located at the bottom right of the form.

3. In the **Search for Reports** section, provide the search criteria in the appropriate fields.
4. Click **Search**.

The View Reports page is updated to display the search results.

Viewing and Cancelling Running Reports

To access the View Running Reports page, you must have the Administrator License and the Sys Admin: Server Tools: Execute Admin Tools access grant.

To view, and optionally cancel, a running report:

1. Log in to Mercury IT Governance Center.
2. From the menu bar, select **Administration > Report Execution > View Running Reports**.

The View Running Reports page appears.

The **Report Details** section identifies reports that are running and waiting to be run, and also provides some information about these reports.

The fields for the View Running Reports page are described in the following table:

| Field Name | Description |
|-------------------------------|--|
| Summary section | |
| Currently Running | Provides the number of reports currently running. |
| Waiting to Run | Provides the number of reports that have been submitted and are waiting to run. Note that these are not the reports scheduled to be run—these are reports that are not running due to the current load on the system. These reports will automatically run when current reports complete. |
| Report Details section | |
| Report # | Lists the report ID. |
| Report Type | Lists the name of the report. |
| Launched By | Provides the full name of the user who submitted the report. |

| Field Name | Description |
|---------------|---|
| Launched Time | Provides the timestamp when the report was submitted. |
| Running | Indicates whether the report is running (Yes) or waiting (No). |
| Server | Provides the name of the server running the report. |
| Session ID | Identifies Oracle database session ID for the session used by the report to query data. |
| Process ID | Provides the Oracle database process ID for the process used by the report. |
| Cancel | <p>Cancels a report that is currently running or waiting to be run.</p> <p>Available only for the reports listed in Reports That Can Be Cancelled on page 33.</p> |

- To cancel a report, click the associated **Cancel** button for that report.

Once the report submission has been cancelled, the page refreshes and the cancelled report is no longer displayed in the list.

Note

Reports that do not use the `ksc_run_jsp_report` special command are subject to some limitations and cannot be cancelled in the View Running Reports page. Reports that can be cancelled are listed in [Reports That Can Be Cancelled](#).

Reports That Can Be Cancelled

The following reports can be cancelled:

- Contact Detail Report
- Import Users
- Notification History Report
- Project Cost Breakdown
- Project Cost Details
- Request Detail (Filter by Custom Fields) Report
- Request Detail Report
- Request History Report
- Request Quick View

- Request Summary (Filter by Custom Fields Report)
- Request Type Detail Report
- Time Sheet Details
- Time Sheet Summary
- User Detail Report

Deleting Report Results

It is conceivable that, over time, report results become outdated and are no longer useful.

To delete unwanted report results:

1. Log on to Mercury IT Governance Center.
2. From the menu bar, select **Reports > My Reports**.

The My Reports page appears. The results of the reports you submitted are found in the **Search Results: Reports** section.

 - *Workflow Statistics Report*
-

Note

Users must have the System: Submit Report access grant to view or submit any report.

Contact Synchronization Report

This report provides an interface for checking whether Mercury Demand Management contacts are properly defined. This report can detect all Mercury IT Governance Center users with no corresponding contact record and then create a contact record for them. This report also searches for and corrects discrepancies between the contact and Mercury IT Governance Center user information within the system.

The Contact Synchronization report can be used to locate and correct the following problems:

- Users without a contact
- Users with multiple contacts
- Contacts associated to nonexistent usernames
- Contacts with the same first and last names as a Mercury IT Governance Center user, but are not associated with that user
- Enabled contacts that have disabled users
- Enabled users that have disabled contacts
- Associated user and contact pairs that have different data in common fields (such as a different first name)

The Contact Synchronization report corrects the above discrepancies in the following ways:

- Creates contacts for users which have none
- Updates contact names and email addresses that are out of sync with their user records

This report is restricted to users having a Configuration license and belonging to one or more of the following security groups:

- ITG Administrator
- ITG All Access Grants
- ITG Billing Approver
- ITG Cost Manager
- ITG Demand Management Administrator
- ITG Demand Manager
- ITG Deployment Management Administrator
- ITG Program Manager
- ITG Project Manager
- ITG Resource Manager
- ITG Service Security Group
- ITG Team Manager
- ITG Time Administrator
- ITG Time Manager
- ITG User
- ITG User Admin

Note

This report also appears in the Resource category.

Table 3-1. Contact Synchronization report field descriptions

| Field Name | Description |
|-----------------|--|
| Create Contacts | <p>Indicate whether or not to create contacts for users without an associated contact. Note that some of these contacts may need to be manually associated with users.</p> <p>Choices include:</p> <ul style="list-style-type: none"> ■ Yes. To create new contact records. ■ No. To review the results of the report without creating any contacts. <p>Mercury recommends running this report using No to verify the correct processing of the section detailing contacts having the same first and last names as a user. If no manual updates are needed, then run the report using Yes.</p> |
| Update Contacts | <p>Indicate whether or not to create or update contacts for users associated with a contact whose name, email, or enabled status is out of date.</p> <p>Choices include:</p> <ul style="list-style-type: none"> ■ Yes. To update the contact records. ■ No. To review the results of the report without updating any contacts. <p>Mercury recommends running this report using No to verify the correct processing of the section detailing associated user and contact pairs that have different data in common fields. If no manual updates are needed, then run the report using Yes.</p> |
| Driver | <p>Select how the records should be synchronized.</p> <p>Choices include:</p> <ul style="list-style-type: none"> ■ User. Based on the user record. ■ Contact. Based on the contact record. ■ Last Update Date. Based on the most recently updated record. |

Data Source Detail Report

This report displays the configuration details of one or more data sources. The report details all filter fields, displayed columns, query, and used by for each data source.

This report is restricted to users having a Configuration license.

Figure 3-2. Data Source Detail report fields

Table 3-2. Data Source Detail report field descriptions

| Field Name (*Required) | Description |
|------------------------|---|
| Data Source From | Select the starting data source. The report will include only data sources whose name is equal to or greater than this value. Choices are limited to those data sources available on your Mercury IT Governance Center instance. |
| Data Source To | Select the ending data source. The report will include only data sources whose name is equal to or less than this value. Choices are limited to those data sources available on your Mercury IT Governance Center instance. |
| *Show Columns | Indicate whether or not to show columns and their details. |
| *Show Filter Fields | Indicate whether or not to show filter fields. |
| *Show Full Query | Indicate whether or not to show the full query. |
| *Show Used By | Indicate whether or not to list the portlets that rely on these data sources. |

Environment Comparison Report

This report helps audit environment definitions when different environments (for example, development and production) are similar to each other.

Use this report to compare the definitions of two Mercury IT Governance Center environments for any significant differences. The report queries every major field in each environment and, if different from that same field in the other environment, lists the different values. The Environment Comparison report also compares the applications tied to each environment.

This report is restricted to users having a Deployment Management license.

Figure 3-3. Environment Comparison report fields

Table 3-3. Environment Comparison report field descriptions

| Field Name (*Required) | Description |
|------------------------|--|
| *Environment 1 | Select the first environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Environment 2 | Select the second environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |

Environment Detail Report

This report lists:

- The detailed definitions of a given environment or group of environments
- The major attributes of the environments
- Attributes of the applications tied to the environments

Encrypted information (for example, database or operation system passwords) is not displayed. Use this report as a way to textually audit the environment definition.

This report is restricted to users having a Deployment Management license.

Figure 3-4. Environment Detail report fields

| Field Name (*Required) | Description |
|----------------------------|---|
| *Environment From | Select the starting environment. The report will include only environments whose name is equal to or greater than this value. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Environment To | Select the ending environment. The report will include only environments whose name is equal to or less than this value. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Show User Data | Indicate whether or not to show the custom user data fields. |
| *Show Mainframe Parameters | Indicate whether or not to show associated applications. |

Environment Group Detail Report

This report contains detailed information about the specified environment groups. Users can specify a range of environment groups using the Environment Group From and Environment Group To fields. The report output includes:

- Header information on an environment group
- Constituent Environments of the environment group
- Applications defined for the environment group.

This report is restricted to users having a Deployment Management license and belonging to one or more of the following security groups:

- ITG 6.0 Upgrade Workbench Access
- ITG Administrator
- ITG All Access Grants
- ITG Billing Approver
- ITG Cost Manager
- ITG Demand Management Administrator
- ITG Demand Manager
- ITG Deployment Management Administrator
- ITG Program Manager
- ITG Project Manager
- ITG Resource Manager
- ITG Service Security Group
- ITG Team Manager
- ITG Time Administrator
- ITG Time Manager
- ITG User
- ITG User Admin
- PFM - Finance Review Board

- PFM - IT Steering Committee
- PFM - Standards Committee

Figure 3-5. Environment Group Detail report fields

Import Requests Report

This report runs the Request Open Interface. It validates and loads request data from the Request Open Interface tables into the standard Mercury Demand Management data model.

This report is restricted to users having a Configuration license.

For More Information

For more information about this report, see the *Open Interface Guide and Reference*.

Import Users Report

This report runs the User Open Interface. It imports and validates data from the user interface tables or an LDAP server into the Mercury IT Governance Center user data model.

This report is restricted to users having a User Administration license.

For More Information

For more information about this report, see the *Open Interface Guide and Reference*.

Lookup Types Report

This report provides information about one or more lookups.

This report is restricted to users having a Configuration license.

Figure 3-6. Lookup Types report fields

Table 3-6. Lookup Types report field descriptions

| Field Name | Description |
|------------------|---|
| Lookup Type From | Select the starting lookup type. The report will include only lookup types whose name is equal to or greater than this value. Choices are limited to those lookup types available on your Mercury IT Governance Center instance. |
| Lookup Type To | Select the ending lookup type. The report will include only lookup types whose name is equal to or less than this value. Choices are limited to those lookup types available on your Mercury IT Governance Center instance. |

Notification History Report

This report provides information about notifications that have been sent or are pending. It contains information like:

- Notification date
- Entity type
- Subject of the notification
- Sent and reminder flags

This report is restricted to users having a Configuration license.

Figure 3-7. Notification History report fields

Table 3-7. Notification History report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|----------------------------|---|
| Trigger Date From | Select the starting date. The report will include only notifications triggered on or after this date. |
| Trigger Date To | Select the ending date. The report will include only notifications triggered on or before this date. |
| *Unsent Notifications Only | Indicate whether or not to show only unsent notifications. |
| Sent on Date From | Select the starting date. The report will include only notifications sent on or after this date. |
| Sent on Date To | Select the ending date. The report will include only notifications sent on or before this date. |

Table 3-7. Notification History report field descriptions (page 2 of 2)

| For a Specific Parent | Select a parent entity. Choices are limited to those entities available on your Mercury IT Governance Center instance. |
| Workflow | Select a workflow. Choices are limited to those workflows available on your Mercury IT Governance Center instance. |
| Workflow Step | Select a particular workflow step associated with Workflow . |
| Email Subject Line Contains | Specify the email subject line. Type any alphanumeric string (up to 200 characters in length). |
| Sent to Email Address | Specify the email address. Type any alphanumeric string (up to 200 characters in length). |
| Sent to User | Specify the user. Choices are limited to users available on your Mercury IT Governance Center instance. |
| Report Title | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |

Object Type Detail Report

This report lists all parameters and commands associated with a given object type. In addition to auditing object types, use this report as a good tool for debugging problems associated with entering information or migrating a package line of a specific object type.

You can use this report to audit the description of an object type or a group of object types.

Tip

This report is also useful when debugging problems associated with entering information or migrating a package line of a specific object type.

This report is restricted to users having a Configuration license.

Figure 3-8. Object Type Detail report fields

Table 3-8. Object Type Detail report field descriptions (page 1 of 2)

| *Show Commands | Indicate whether or not to show the commands and command steps. |
| *Expand Special Commands | Indicate whether or not to expand user-defined special commands. |

Overview Section Detail Report

This report provides information about a portlet or range of portlets. It lists the portlet's columns, as well as the SQL query used by the portlet to retrieve data from the system. The portlet's filter fields and security configuration can also be listed.

This report is restricted to users having a Configuration license.

Figure 3-9. Overview Section Detail report fields

| Portlet Definitions | Select one or more portlets. Choices are limited to those portlet definitions available on your Mercury IT Governance Center instance. |
| Report Title | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |

RCS Check In Report

This is the template of a report used to check files into the RCS repository (if the RCS file management system is being used).

This report is restricted to users having a Deployment Management license.

Figure 3-11. RCS Check In report fields

Table 3-11. RCS Check In report field descriptions

| Field Name (*Required) | Description |
|------------------------|--|
| *Application | Select an associated application. Choices are limited to those applications available on your Mercury IT Governance Center instance. |
| Sub Path | Select a check-in path. Choices are: <ul style="list-style-type: none"> ■ forms ■ bin ■ srw ■ scripts ■ sql ■ plsql |
| *File Name | Specify the name of the file. Type any alphanumeric string (up to 40 characters in length). |
| Version Label | Specify the version label of the file. Type any alphanumeric string (up to 40 characters in length). |
| *Change Description | Specify the description of the change made to the file. Type any alphanumeric string (up to 200 characters in length). |

RCS Check Out Report

This is the template of a report used to check files out of the RCS repository (if the RCS file management system is being used).

This report is restricted to users having a Deployment Management license.

Figure 3-12. RCS Check Out report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button in the top right. The form contains the following fields:

- *Application:** A text input field with a list icon on the right.
- Path:** A dropdown menu.
- *File Name:** A text input field.
- Version Label / Revision #:** A text input field.
- Lock?:** Radio buttons for "Yes" (selected) and "No".
- Read-Only?:** Radio buttons for "Yes" and "No" (selected).

Table 3-12. RCS Check Out report field descriptions

| Field Name (*Required) | Description |
|----------------------------|---|
| *Application | Select an associated application. Choices are limited to those applications available on your Mercury IT Governance Center instance. |
| Path | Select a check-out path. Choices are: <ul style="list-style-type: none"> ■ forms ■ bin ■ srw ■ scripts ■ sql ■ plsql |
| *File Name | Specify the name of the file. Type any alphanumeric string (up to 40 characters in length). |
| Version Label / Revision # | Specify the version label of the file. Type any alphanumeric string (up to 40 characters in length). |
| Lock | Indicate whether or not to lock the checked out file. |
| Read-Only | Indicate whether or not the checked out file should be read-only. |

Report Type Detail Report

This report provides information about report type definitions. Use the report to see the parameters and parameter details for each report type, as well as the exact commands used to run the report.

This report is restricted to users having a Configuration license.

Figure 3-13. Report Type Detail report fields

Table 3-13. Report Type Detail report field descriptions

| Field Name (*Required) | Description |
|--------------------------|---|
| Report From | Select the starting report type. The report will include only report types whose name is equal to or greater than this value. Choices are limited to those report types available on your Mercury IT Governance Center instance. |
| Report To | Select the ending report type. The report will include only report types whose name is equal to or less than this value. Choices are limited to those report types available on your Mercury IT Governance Center instance. |
| *Show Parameters | Indicate whether or not to show the parameters and validations. |
| *Show Commands | Indicate whether or not to show the commands and command steps. |
| *Expand Special Commands | Indicate whether or not to expand user-defined special commands. |
| *Show Security | Indicate whether or not to show the security groups. |

Request Header Type Detail Report

This report lists detailed definitional information for request header types. You can use this report to audit request header definition, as well as to help debug problems with requests using a given request header type.

This report also displays information about field filters that have been selected for the **Assigned To**, **Assigned To Group**, and **Contacts** fields.

This report details information about one or more request header types.

Tip

This report is also useful when debugging problems with requests using a given request header type.

This report is restricted to users having a Configuration license.

Figure 3-14. Request Header Type Detail report fields

Table 3-14. Request Header Type Detail report field descriptions

| Field Name (*Required) | Description |
|--------------------------|---|
| Request Header Type From | Select the starting request header type. The report will include only request header types whose name is equal to or greater than this value. Choices are limited to those request header types available on your Mercury IT Governance Center instance. |
| Request Header Type To | Select the ending request header type. The report will include only request header types whose name is equal to or less than this value. Choices are limited to those request header types available on your Mercury IT Governance Center instance. |
| *Show Filters | Indicate whether or not to show information about field filters. |

Request Type Detail Report

This report lists detailed definitional information for request types. This report displays:

- All custom fields for the request type
- All requests statuses that the request type can have
- Any commands the request type would have
- Which security groups are allowed to create requests of a specific request type
- Which workflows can be used in a specific request type

Use this report to audit the definitional information, as well as help debug any problems with requests of a given request type.

Tip

The report is also useful when debugging problems with requests of a given request type.

This report is restricted to users having a Configuration license.

Figure 3-15. Request Type Detail report fields

The screenshot shows the 'Report Parameters' form for the Request Type Detail report. The form includes the following fields and options:

- Request Type From:** A text input field with a dropdown arrow.
- Request Type To:** A text input field with a dropdown arrow.
- Show Fields:** Radio buttons for Yes (selected) and No.
- Show Statuses:** Radio buttons for Yes and No (selected).
- Show Rules:** Radio buttons for Yes (selected) and No.
- Show Commands:** Radio buttons for Yes and No (selected).
- Show Status Dependencies:** Radio buttons for Yes and No (selected).
- Expand Special Commands?:** Radio buttons for Yes and No.
- Show Workflows:** Radio buttons for Yes and No (selected).
- Show User Access:** Radio buttons for Yes and No (selected).
- Show Help Content?:** Radio buttons for Yes and No.
- Show Default Display Columns:** Radio buttons for Yes and No.

Table 3-15. Request Type Detail report field descriptions

| Field Name (*Required) | Description |
|-------------------------------|--|
| Request Type From | Select the starting request type. The report will include only request types whose name is equal to or greater than this value. Choices are limited to those request types available on your Mercury IT Governance Center instance. |
| Request Type To | Select the ending request type. The report will include only request types whose name is equal to or less than this value. Choices are limited to those request types available on your Mercury IT Governance Center instance. |
| *Show Fields | Indicate whether or not to show the fields and validations. |
| *Show Statuses | Indicate whether or not to show the linked requests statuses. |
| *Show Rules | Indicate whether or not to show the default rules. |
| *Show Commands | Indicate whether or not to show the commands and command steps. |
| *Show Status Dependencies | Indicate whether or not to show the status dependencies. |
| *Expand Special Commands | Indicate whether or not to expand user-defined special commands. |
| *Show Workflows | Indicate whether or not to show the workflows that can be selected for this request type. |
| *Show User Access | Indicate whether or not to show the detailed security access rules. |
| *Show Help Content | Indicate whether or not to show the help content. |
| *Show Default Display Columns | Indicate whether or not to show the columns specified to display in request listing portlets. |

Run Field Security Denormalization Report

This report runs field level security-related denormalization tasks for particular entities.

This report is restricted to users having a Configuration license.

Figure 3-16. Run Field Security Denormalization report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form contains the following fields:

- Request Type:** A text input field with a list icon on the right.
- Request Header Type:** A text input field with a list icon on the right.
- User Data Context:** A dropdown menu.
- Contact:** A text input field with a list icon on the right.
- Entity State:** A dropdown menu currently showing "Active".

Table 3-16. Run Field Security Denormalization report field descriptions

| Field Name (*Required) | Description |
|------------------------|---|
| Request Type | Select a request type. Choices are limited to those request types available on your Mercury IT Governance Center instance. |
| Request Header Type | Select a request header type. Choices are limited to those request header types available on your Mercury IT Governance Center instance. |
| User Data Context | Select a user data context. Choices are limited to the user data available on your Mercury IT Governance Center instance. |
| Contact | Select a contact. Choices are limited to those contacts available on your Mercury IT Governance Center instance. |
| *Entity State | Select a state. Choices include: <ul style="list-style-type: none"> ■ Active ■ All ■ Closed |

Run ITG Organization Unit Interface Report

This report runs the Organization Unit Open Interface. It validates and imports data from the organization unit interface tables or an LDAP server into the standard Mercury IT Governance Center organization data model.

This report is restricted to users having a User Administration license.

For More Information

For more information about this report, see the *Open Interface Guide and Reference*.

Run ITG Package Interface Report

This report validates and loads package data from the package open interface tables into the standard Mercury Deployment Management data model.

This report is restricted to users having a Configuration license.

For More Information

For more information about this report, see the *Open Interface Guide and Reference*.

Run Workflow Transaction Interface Report

This report validates and runs workflow transactions based on data in the workflow open interface tables.

Use this report to start process steps from outside the Mercury IT Governance Center end-user screens.

This report is restricted to users having a Configuration license.

For More Information

For more information about this report, see the *Open Interface Guide and Reference*.

SOX - Security Change Report

This report provides the history of security changes.

This report can be submitted and viewed by all users having the System: Submit Report access grant.

Figure 3-17. SOX - Security Change report fields

Table 3-17. SOX - Security Change report field descriptions

| Field Name | Description |
|------------------------------------|--|
| User Name | Select one or more user names. Choices are limited to users of your Mercury IT Governance Center instance. |
| Security Group | Select one or more security groups. Choices are limited to those security groups available on your Mercury IT Governance Center instance. |
| From | Select the starting date. The report will include only changes that occurred on or after this date. |
| To | Select the ending date. The report will include only changes that occurred on or before this date. |
| Show User Security Group Changes | Indicate whether or not to show changes to security groups. |
| Show Security Access Grant Changes | Indicate whether or not to show changes to access grants. |

SOX - Security Validation Report

This report lists users with multiple roles through security groups linked to workflow steps.

This report can be submitted and viewed by all users having the System: Submit Report access grant.

Figure 3-18. SOX - Security Validation report fields

Table 3-18. SOX - Security Validation report field descriptions

| Field Name (*Required) | Described |
|------------------------|--|
| *Workflow | Select a workflow. |
| *Workflow Steps | Select one or more workflow steps associated with Workflow . |
| *Order By | Select the sort criteria. Choices include: <ul style="list-style-type: none"> ■ Step User Name ■ Step Name ■ Security Group Name |

Security Group Detail Report

This report lists definitional information for one or more security groups. This report lists:

- Which users belong to the group
- What workflow steps the security group has access to
- Other information such as what screens the users in the security group will have update access to
- Which transactional entities (requests, packages, projects, or tasks) can use a security group's information in its search fields
- Which request types that members of a designated security group are allowed to create.

This report is restricted to users having a User Administration license.

Figure 3-19. Security Group Detail report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form contains the following fields and options:

- Security Group From:** A text input field with a search icon on the right.
- Security Group To:** A text input field with a search icon on the right.
- User Name:** A text input field with a search icon on the right.
- Workflow Name:** A text input field with a search icon on the right.
- Show Workflow Steps?** Radio buttons for Yes and No, with No selected.
- Show Users?** Radio buttons for Yes and No, with Yes selected.
- Show Attributes:** Radio buttons for Yes and No, with No selected.
- Show User Data** Radio buttons for Yes and No, with No selected.

Table 3-19. Security Group Detail report field descriptions

| Field Name (*Required) | Description |
|------------------------|---|
| Security Group From | <p>Select the starting security group. The report will include only security groups whose name is equal to or greater than this value.</p> <p>Choices are limited to those security groups available on your Mercury IT Governance Center instance.</p> |
| Security Group To | <p>Select the ending security group. The report will include only security groups whose name is equal to or less than this value.</p> <p>Choices are limited to those security groups available on your Mercury IT Governance Center instance.</p> |
| User Name | <p>Select a user name.</p> <p>Choices are limited to users of your Mercury IT Governance Center instance.</p> |
| Workflow Name | <p>Select a workflow.</p> <p>Choices are limited to those workflows available on your Mercury IT Governance Center instance.</p> |
| *Show Workflow Steps | <p>Indicate whether or not to show all the workflow steps.</p> |
| *Show Users | <p>Indicate whether or not to show all users in the security group.</p> |
| *Show Attributes | <p>Indicate whether or not to show entity types that can use this security group's information in its search fields.</p> |
| *Show User Data | <p>Indicate whether or not to show user data custom fields.</p> |

Special Command Detail Report

This report provides details for a command (special command) or a range of commands.

This report can be submitted and viewed by all users having the System: Submit Report access grant.

Figure 3-20. Special Command Detail report fields

Table 3-20. Special Command Detail report field descriptions

| Field Name (*Required) | Description |
|------------------------|---|
| Special Command From | Select the starting special command. The report will include only special commands whose name is equal to or greater than this value. Choices are limited to those special commands available on your Mercury IT Governance Center instance. |
| Special Command To | Select the ending special command. The report will include only special commands whose name is equal to or less than this value. Choices are limited to those special commands available on your Mercury IT Governance Center instance. |
| *Show References | Indicate whether or not to show entities that refer to the special commands. |

Synchronize Meta Layer Report

This report assesses or synchronizes the RML (Reporting Meta Layer).

This report is restricted to users having a Configuration license.

Figure 3-21. Synchronize Meta Layer report fields

Table 3-21. Synchronize Meta Layer report field descriptions

| Field Name (*Required) | Description |
|------------------------|--|
| *Action | Select an action. Choices are limited to actions available on your Mercury IT Governance Center instance. |
| *Scope | Select a scope. Choices include: <ul style="list-style-type: none"> ■ Entire Meta Layer. To include all of the RML. ■ Specific View. To limit the Action to a specific view. ■ Specific Template. To limit the Action to a specific template. |
| View Name | Select a Meta Layer view name. Choices are limited to those views available on your Mercury IT Governance Center instance. This field is enabled only if Specific View is selected in the Scope field. |
| Template File Name | Select a Meta Layer template name. Choices are limited to those templates available on your Mercury IT Governance Center instance. This field is enabled only if Specific Template is selected in the Scope field. |

User Data Detail Report

This report displays the definition of custom user data field (for example, fields on entities like packages, requests, workflows, and security groups). The report is grouped by entity and lists all the custom fields for each entity as well as the validations that the fields reference.

This report is restricted to users having a Configuration license.

Figure 3-22. User Data Detail report fields

Table 3-22. User Data Detail report field descriptions

| Field Name | Description |
|----------------|---|
| User Data From | Select the starting user data. The report will include only user data whose name is equal to or greater than this value. Choices are limited to user data available on your Mercury IT Governance Center instance. |
| User Data To | Select the ending user data. The report will include only user data whose name is equal to or less than this value. Choices are limited to user data available on your Mercury IT Governance Center instance. |

User Detail Report

This report lists the users who have been defined in the Mercury IT Governance Center system, as well as the security groups attached to each user.

Note

This report also appears in the Resource category.

This report is restricted to users having a User Administration license.

Figure 3-23. User Detail report fields

The screenshot shows a 'Report Parameters' form with the following fields and options:

- Last Name From:
- Last Name To:
- User:
- Security Group:
- Organization Unit:
- Show Cascading Members? Yes No
- Role:
- Product License:
- Access to Workflow:
- Include Disabled? Yes No
- Show Resource Information? Yes No
- Show Security? Yes No
- Show Org Units? Yes No
- Show User Data? Yes No
- Report Title:

Table 3-23. User Detail report field descriptions (page 1 of 2)

| Field Name | Description |
|---------------------------|--|
| Last Name From | Specify the starting last name. The report will include only users whose last name is equal to or greater than this value. Type any alphanumeric string (up to 200 characters in length). |
| Last Name To | Specify the ending last name. The report will include only users whose last name is equal to or less than this value. Type any alphanumeric string (up to 200 characters in length). |
| User | Select one or more user IDs. Choices are limited to users of your Mercury IT Governance Center instance. |
| Security Group | Select one or more security groups. Choices are limited to those security groups available on your Mercury IT Governance Center instance. |
| Organization Unit | Select one or more organization units. Choices are limited to those organization units available on your Mercury IT Governance Center instance. |
| Show Cascading Members | Indicate whether or not to show child organizations. |
| Role | Select one or more roles. Choices are limited to those roles available on your Mercury IT Governance Center instance. |
| Product License | Select one or more product licenses. Choices are limited to those licenses available on your Mercury IT Governance Center instance. |
| Access to Workflow | Select one or more workflows. Choices are limited to those workflows available on your Mercury IT Governance Center instance. |
| Include Disabled | Indicate whether or not to include disabled users. |
| Show Resource Information | Indicate whether or not to include additional resource information (for example, skills, capacity, or direct manager). |

Table 3-23. User Detail report field descriptions (page 2 of 2)

| Field Name | Description |
|----------------|---|
| Show Security | Indicate whether or not to show security group memberships. |
| Show Org Units | Indicate whether or not to show organization unit memberships. |
| Show User Data | Indicate whether or not to show the user data custom fields. |
| Report Title | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |

Validations Report

This report provides information about the various custom validations that have been entered into the system as well as those that are standard with Mercury IT Governance Center products.

This report is restricted to users having a Configuration license.

Figure 3-24. Validations report fields

The screenshot shows a 'Report Parameters' form with the following fields and options:

- Validation From:** A text input field with a dropdown arrow.
- Validation To:** A text input field with a dropdown arrow.
- *Show Validation Values:** Radio buttons for Yes (selected) and No.
- *Show Validation Commands?:** Radio buttons for Yes and No (selected).
- *Expand Special Commands?:** Radio buttons for Yes and No (selected).

Table 3-24. Validations report field descriptions

| Field Name (*Required) | Description |
|---------------------------|--|
| Validation From | Select the starting validation. The report will include only validations whose name is equal to or greater than this value. Choices are limited to those validations available on your Mercury IT Governance Center instance. |
| Validation To | Select the ending validation. The report will include only validations whose name is equal to or less than this value. Choices are limited to those validations available on your Mercury IT Governance Center instance. |
| *Show Validation Values | Indicate whether or not to show the values for those validations that rely on a list of values. |
| *Show Validation Commands | Indicate whether or not to show the values for those validations that rely on a list of command. |
| *Expand Special Commands | Indicate whether or not to expand the user-defined special commands for any validations using special commands. |

Workflow Detail Report

This report provides detailed configuration information about specific workflows or sets of workflows. Information includes all steps in the workflow, all transitions in and out of each workflow step, possible results of each step, and all notifications attached to the workflow.

Tip

Use this report both as an audit of the workflow business process definition, as well as a tool to analyze those business processes.

This report is restricted to users having a Configuration license.

Figure 3-25. Workflow Detail report fields

Table 3-25. Workflow Detail report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|------------------------|---|
| Workflow From | Select the starting workflow. The report will include only workflows whose name is equal to or greater than this value. Choices are limited to those workflows that are available on your Mercury IT Governance Center instance. |
| Workflow To | Select the ending workflow. The report will include only workflows whose name is equal to or less than this value. Choices are limited to those workflows that are available on your Mercury IT Governance Center instance. |
| *Show Valid Results | Indicate whether or not to show the valid result values for each workflow step. |

Table 3-25. Workflow Detail report field descriptions (page 2 of 2)

| Field Name (*Required) | Description |
|------------------------------|--|
| *Show Transitions | Indicate whether or not to show the transitions in and out of each workflow step. |
| *Show Security | Indicate whether or not to show the security groups that have access to act on each workflow step. |
| *Show Notifications | Indicate whether or not to show the notifications attached to each workflow step. |
| *Show User Data | Indicate whether or not to show the user data custom fields. |
| *Show Subworkflows | Indicate whether or not to show subworkflows. |
| *Show Workflow Step Commands | Indicate whether or not to show the workflow step commands if a step is a command execution step. |
| *Expand Special Commands | Indicate whether or not to expand user-defined special commands. |
| *Show Filters | Indicate whether or not to show information about field filtering for Deployment Management header fields. |

Workflow Statistics Report

Given a date range and a workflow (or a range of workflows), this report provides statistical information regarding workflow usage—for example:

- How many times the workflow was used compared to the total number of packages or requests
- Average, minimum, and maximum completion time for packages/ requests using this workflow within the date range
- For each workflow step, the percentage that the step is traversed of the total packages/requests within that workflow
- For each workflow step, the average, minimum, and maximum completion times
- For each workflow step, the breakdown of the results and transitions that lead out of the step

This report is restricted to users having a Configuration license.

Figure 3-26. Workflow Statistics report fields

The screenshot shows a 'Report Parameters' form with the following fields and options:

- *Txn Start Date:** A date input field with a calendar icon.
- *Txn End Date:** A date input field with a calendar icon.
- *Workflow Scope:** A dropdown menu.
- Workflow From:** A text input field with a list icon.
- Workflow To:** A text input field with a list icon.
- *Show Steps:** Radio buttons for Yes (selected) and No.
- *Show Transitions:** Radio buttons for Yes and No (selected).
- Restore Default:** A button in the top right corner.

Table 3-26. Workflow Statistics report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|------------------------|--|
| *Txn Start Date | Select the starting date. The report will include only transactions started on or after this date. |
| *Txn End Date | Select the ending date. The report will include only transactions started on or before this date. |
| *Workflow Scope | Select a scope. Choices are limited to the scope available on your Mercury IT Governance Center instance. |

Table 3-26. Workflow Statistics report field descriptions (page 2 of 2)

| Field Name (*Required) | Description |
|------------------------|--|
| Workflow From | <p>Select the starting workflow. The report will include only workflows whose name is equal to or greater than this value.</p> <p>Choices are limited to those workflows that are available on your Mercury IT Governance Center instance.</p> |
| Workflow To | <p>Select the ending workflow. The report will include only workflows whose name is equal to or less than this value.</p> <p>Choices are limited to those workflows that are available on your Mercury IT Governance Center instance.</p> |
| *Show Steps | Indicate whether or not to show the statistical analysis for individual workflow steps. |
| *Show Transitions | Indicate whether or not to show the statistical analysis of the transaction history for each workflow. |

Deployment Management Reports

In This Chapter:

- *Compare Custom Database Setup Report*
- *Compare Filesystem Environments Report*
- *Compare MS SQL Server 7 Environments Report*
- *Compare Oracle Environments Report*
- *Distribution Detail Report*
- *Environment Comparison by Objects Migrated Report*
- *Environments / Objects Detail Report*
- *Object History Report*
- *Objects / Environments Detail Report*
- *Package Change History Report*
- *Package Details Report*
- *Package History Report*
- *Package Impact Analysis Report*
- *Packages Pending Report*
- *Release Detail Report*
- *Release Notes Report*

Users must have the System: Submit Report access grant to view or submit any report.

Compare Custom Database Setup Report

This report compares database objects in two separate database schemas. Objects to be compared are defined in the tables `KENV_OBJECTS` and `KENV_OBJECT_ATTRIBUTES`. These tables include Mercury-supplied objects that compare two separate Mercury IT Governance Center entities across two IT Governance schemas:

- Commands (also called special commands)
- Object types
- Request header types
- Request types
- Security groups
- User data
- Validations
- Workflows
- Workflow step sources (in the execution and decision categories)

Custom comparison entities allow for the comparison of actual data within a database as well as within the data model. Custom entities can be generated for both Oracle and SQL Server.

A filter can be applied to each entities. You can view all the entities in the category along with their associated attributes, or only the entities and attributes that contain differences. In order to run the report, you must define an environment or application code for each schema.

This report is restricted to users having a Deployment Management license.

Figure 4-1. *Compare Custom Database Setup report fields*

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button. The form contains the following fields:

- Comparison Name: A text input field.
- Reference Environment: A dropdown menu.
- Compared Environment: A dropdown menu.
- Reference AppCode: A dropdown menu.
- Compared AppCode: A dropdown menu.
- Only Report Differences: Radio buttons for "Yes" and "No".
- Object 1: A dropdown menu.
- Object 1 Filter: A text input field.
- Object 2: A dropdown menu.
- Object 2 Filter: A text input field.
- Object 3: A dropdown menu.
- Object 3 Filter: A text input field.
- Object 4: A dropdown menu.
- Object 4 Filter: A text input field.
- Object 5: A dropdown menu.
- Object 5 Filter: A text input field.

Table 4-1. *Compare Custom Database Setup report field descriptions (page 1 of 2)*

| Field Name (*Required) | Description |
|------------------------|---|
| Comparison Name | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |
| *Reference Environment | Select the first environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Compared Environment | Select the second environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| Reference AppCode | Select the application code to be used to override the parameters for the reference environment. Choices are limited to those application codes available on your Mercury IT Governance Center instance. |
| Compared AppCode | Select the application code to be used to override the parameters for the compared environment. Choices are limited to those application codes available on your Mercury IT Governance Center instance. |

*Table 4-1. Compare Custom Database Setup report field descriptions
(page 2 of 2)*

| Field Name (*Required) | Description |
|-------------------------|--|
| Only Report Differences | Indicate whether or not to display only the differences between the two environments. |
| *Object 1 Object 2–5 | Select these objects. Choices are limited to those custom SQL Server or Oracle objects available on your Mercury IT Governance Center instance. |
| Object 1–5 Filter | Select these corresponding object values. Type any alphanumeric string (up to 200 characters in length). |

Compare Filesystem Environments Report

This report compares the files and file structures of two machines. In order to run this report, an environment or application code for each machine must be defined. The file system can be any for which an environment is defined; this means that a Windows file system can be compared with a UNIX file system, or the many types of UNIX can be compared with each other.

Some of the options available with this report provide the following capabilities:

- The base path can be overridden when the report is run.
- The user may choose to view all the files and directories, or only the ones which are different.
- The user may select any or all of the following comparisons to perform: Owner, Permissions, or Content.
- The user may opt to include or exclude certain file types and directory names.

This report is restricted to users having a Deployment Management license.

Figure 4-2. Compare Filesystem Environments report fields

The screenshot shows the 'Report Parameters' form with the following fields and options:

- Comparison Names:** A text input field.
- Reference Environment:** A text input field with a list icon.
- Reference AppCode:** A text input field with a list icon.
- Reference Tier:** A dropdown menu.
- Only Report Differences:** Radio buttons for Yes and No.
- Use Entered Base Paths:** Radio buttons for Yes and No.
- Reference Base Path:** A text input field.
- Compare Content:** Radio buttons for Yes and No.
- Compare Permissions:** Radio buttons for Yes and No.
- Directory Choice:** A dropdown menu set to 'Include All Except'.
- Directory 1-4:** Four text input fields.
- Compared Environment:** A text input field with a list icon.
- Compared AppCode:** A text input field with a list icon.
- Compared Tier:** A dropdown menu.
- Examine Subdirectories:** Radio buttons for Yes and No.
- Compared Base Path:** A text input field.
- Compare Owners:** Radio buttons for Yes and No.
- File Type Choice:** A dropdown menu set to 'Include All Except'.
- File Type 1-4:** Four text input fields.

Table 4-2. Compare Filesystem Environments report field descriptions
(page 1 of 2)

| Field Name (*Required) | Description |
|-------------------------|---|
| Comparison Name | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |
| *Reference Environment | Select the first environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Compared Environment | Select the second environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| Reference AppCode | Select the application code to be used to override the parameters for the reference environment. Choices are limited to those application codes available on your Mercury IT Governance Center instance. |
| Compared AppCode | Select the application code to be used to override the parameters for the compared environment. Choices are limited to those application codes available on your Mercury IT Governance Center instance. |
| *Reference Tier | Choices include: <ul style="list-style-type: none"> ■ Server ■ Client |
| *Compared Tier | Choices include: <ul style="list-style-type: none"> ■ Server ■ Client |
| Only Report Differences | Indicate whether or not to display only the differences between the two environments. |
| Use Entered Base Paths | Indicate whether or not to use the base paths specified in Reference Base Path and Compared Base Path . |
| Examine Subdirectories | Indicates whether or not subdirectories should be included. |

Table 4-2. Compare Filesystem Environments report field descriptions
(page 2 of 2)

| Field Name (*Required) | Description |
|------------------------|---|
| Reference Base Path | Specify the base path for the reference environment. Type any alphanumeric string (up to 200 characters in length). |
| Compared Base Path | Specify the base path for the compared environment. Type any alphanumeric string (up to 200 characters in length). |
| Compare Content | Indicate whether or not to compare the contents of each file. |
| Compare Owners | Indicate whether or not to compare the ownership of each file, including directories. |
| Compare Permissions | Indicate whether or not to compare the permissions of each file, including directories. |
| *Directory Choice | Select which directories to include. Choices include: <ul style="list-style-type: none"> ■ Include All Except. Include all directories except for those specified in Directory 1–4. ■ Exclude All Except. Exclude all directories except for those specified in Directory 1–4. |
| *File Type Choice | Select which file types to include. Choices include: <ul style="list-style-type: none"> ■ Include All Except. Include all file types except for those specified in File Type 1–4. ■ Exclude All Except. Exclude all file types except for those specified in File Type 1–4. |
| Directory 1–4 | Specify these directories associated with Directory Choice. Type any alphanumeric string (up to 200 characters in length). |
| File Type 1–4 | Specify these file types associated with File Type Choice. Type any alphanumeric string (up to 200 characters in length). |

Tip

For best results, define the base paths using absolute paths.

Compare MS SQL Server 7 Environments Report

This report compares the data model of two SQL Server Version 7 databases. The report can compare tables, views, procedures, and triggers. A unique filter can be specified for each category. Users is also given the option of viewing all the objects in the category along with their associated attributes, or only the objects and attributes which contain differences. In order to run the report, an environment or application code for each schema must be defined within Mercury IT Governance Center.

This report is restricted to users having a Deployment Management license.

Figure 4-3. Compare MS SQL Server 7 Environments report fields

Table 4-3. Compare Custom Database Setup report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|------------------------|--|
| Comparison Name | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |
| *Reference Environment | Select the first environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Compared Environment | Select the second environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |

*Table 4-3. Compare Custom Database Setup report field descriptions
(page 2 of 2)*

| Field Name (*Required) | Description |
|-------------------------|---|
| Reference AppCode | Select an application code to be used to override the parameters for the reference environment. Choices are limited to those application codes available on your Mercury IT Governance Center instance. |
| Compared AppCode | Select an application code to be used to override the parameters for the compared environment. Choices are limited to those application codes available on your Mercury IT Governance Center instance. |
| Only Report Differences | Indicate whether or not to show only the differences between the two environments. |
| Compare Tables | Indicate whether or not to compare tables. |
| Table Filter | Specify a table. Type any alphanumeric string (up to 200 characters in length). |
| Compare Views | Indicate whether or not to compare views. |
| View Filter | Specify a view. Type any alphanumeric string (up to 200 characters in length). |
| Compare Procedures | Indicate whether or not to compare procedures. |
| Procedure Filter | Specify a procedure. Type any alphanumeric string (up to 200 characters in length). |
| Compare Triggers | Indicate whether or not to compare triggers. |
| Trigger Filter | Specify a trigger. Type any alphanumeric string (up to 200 characters in length). |

Compare Oracle Environments Report

This report compares the data model of two Oracle schemas. Specifically, the report can compare:

- Functions
- Grants
- Indexes
- Packages
- Procedures
- Sequences
- Synonyms
- Tables
- Triggers
- Views

A unique filter can be specified for each category. Users are also given the option of viewing all objects in the category along with their associated attributes, or only the objects and attributes that contain differences. In order to run the report, an environment or application code for each schema must be defined in Mercury IT Governance Center.

This report is restricted to users having a Deployment Management license.

Figure 4-4. *Compare Oracle Environments report fields*

Table 4-4. *Compare Oracle Environments report field descriptions (page 1 of 3)*

| Field Name (*Required) | Description |
|------------------------|---|
| Comparison Name | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |
| *Reference Environment | Select the first environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Compared Environment | Select the second environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| Reference AppCode | Select the application code to be used to override the parameters for the reference environment. Choices are limited to those application codes available on your Mercury IT Governance Center instance. |

| Compare Triggers | Indicate whether or not to compare triggers. |
| Trigger Filter | Specify a trigger. Type any alphanumeric string (up to 200 characters in length). |
| Compare Synonyms | Indicate whether or not to compare synonyms. |
| Synonym Filter | Specify a synonym. Type any alphanumeric string (up to 200 characters in length). |
| Compare Grants | Indicate whether or not to compare grants. |
| Grant Filter | Specify a grant. Type any alphanumeric string (up to 200 characters in length). |

Distribution Detail Report

This report lists the contents and results of a distribution. It is useful in getting a high-level view of a distribution and analyzing the execution results.

Tip

This report is also useful when used to get a high-level view of a distribution as well as to analyze the execution results.

This report is restricted to users having a Deployment Management license.

Figure 4-5. Distribution Detail report fields

Table 4-5. Distribution Detail report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|------------------------|---|
| Distribution From | Select the starting distribution. The report will include only distributions whose name is equal to or greater than this value. Choices are limited to those distributions that are available on your Mercury IT Governance Center instance. |
| Distribution To | Select the ending distribution. The report will include only distributions whose name is equal to or less than this value. Choices are limited to those distributions that are available on your Mercury IT Governance Center instance. |
| Release | Select a release. Choices are limited to those product releases available on your Mercury IT Governance Center instance. |
| Transaction Date From | Select the starting date. The report will include only transactions started on or after this date. |

Table 4-5. Distribution Detail report field descriptions (page 2 of 2)

| Field Name (*Required) | Description |
|---------------------------------------|---|
| Transaction Date To | Select the ending date. The report will include only transactions started on or before this date. Type any valid date. |
| *Include Closed Distributions | Indicate whether or not to include closed distributions. |
| *Show Package level Subworkflow Steps | Indicate whether or not to show subworkflow steps at the package level. |
| *Order By | Select the sort criteria. Choices include: <ul style="list-style-type: none">■ Distribution Name■ Release |

Environment Comparison by Objects Migrated Report

Given two environments, this report looks at the history of all the objects migrated into each environment (using Mercury Deployment Management) and lists any differences. These differences include objects migrated into:

- One environment but not the other
- Both environments but at different times

This report uses an internal object inventory table for information on objects migrated to each environment. At the time of execution, the workflow engine uses the workflow definition to determine the environment an object is being migrated to and updates the object inventory table accordingly.

■ ■ Warning

The workflow engine will not recognize any cases where the destination environment is overwritten in the object command while it is being migrated.

■ ■ Tip

This report serves as a good mechanism to compare one environment versus the other, but only compares the environments based on the Deployment Management migrations into that environment. It does not make any comparisons at the file system or database levels.

This report is restricted to users having a Deployment Management license.

Figure 4-6. Environment Comparison by Objects Migrated report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form contains the following fields:

- "Environment Name 1:" followed by a text input field and a help icon.
- "Environment Name 2:" followed by a text input field and a help icon.
- "Object Type:" followed by a text input field and a help icon.
- "Specific Object:" followed by a text input field and a help icon.
- "Include Matches" with two radio buttons: "Yes" (unselected) and "No" (selected).

Table 4-6. Environment Comparison by Objects Migrated report field descriptions

| Field Name (*Required) | Description |
|------------------------|--|
| *Environment Name 1 | Select the first environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Environment Name 2 | Select the second environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| Object Type | Select an object type. Choices are limited to those objects available on your Mercury IT Governance Center instance. |
| Specific Object | Select an object. Choices are limited to those objects available on your Mercury IT Governance Center instance. |
| *Include Matches | Indicate whether or not in include matches. |

Environments / Objects Detail Report

This report lists objects that have been migrated into a given environment or set of environments. Use this report as an object inventory for newly migrated objects.

This report uses an internal object inventory table for information on objects migrated to each environment. At the time of execution, the workflow engine uses the workflow definition to determine the environment an object is being migrated to and updates the object inventory table accordingly.

Warning

The workflow engine will not recognize any cases where the destination environment is overwritten in the object command while it is being migrated.

Tip

This report is also useful when used to create an object inventory for newly migrated objects.

This report is restricted to users having a Deployment Management license.

Figure 4-7. Environments / Objects Detail report fields

The screenshot shows a web form titled 'Report Parameters' with a 'Restore Default' button. The form contains the following fields:

- Environment:** A text input field with a dropdown arrow icon.
- Object Type:** A text input field with a dropdown arrow icon.
- Migration Date From:** A date input field with a calendar icon.
- Migration Date To:** A date input field with a calendar icon.
- Include Prior Migrations:** A radio button group with 'Yes' and 'No' options. The 'No' option is selected.

Table 4-7. Environments / Objects Detail report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|------------------------|--|
| Environment | Select an environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| Object Type | Select an object type. Choices are limited to those object types available on your Mercury IT Governance Center instance. |

*Table 4-7. Environments / Objects Detail report field descriptions
(page 2 of 2)*

| Field Name (*Required) | Description |
|---------------------------|---|
| Migration Date From | Select the starting date. The report will include only migrations started on or after this date. |
| Migration Date To | Select the ending date. The report will include only migrations started on or before this date. |
| *Include Prior Migrations | Indicate whether or not to include objects that were migrated to the same environment more than once. |

Object History Report

This report provides a workflow step transaction history for packages. Use this report to view:

- All transactions matching the selection criteria
- All executions for a given object type and/or a given date range
- If the same object has been migrated/executed by multiple packages.

For migration steps, this report uses the workflow definitions to determine when a step occurred and to which environment it was migrated. It looks at completed execution type workflow steps and at the attached destination environment to report the object's final destination environment.

Warning

This report will not recognize any cases where the destination environment is overwritten in the object command while it is being migrated.

This report is restricted to users having a Deployment Management license.

Figure 4-8. Object History report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form contains the following fields and controls:

- Object Type:** A text input field with a list icon on the right.
- Object Name:** A text input field.
- Performed By:** A text input field with a user selection icon on the right.
- Transaction Date From:** A date input field with a calendar icon on the right.
- Transaction Date To:** A date input field with a calendar icon on the right.
- Dest. Environment:** A text input field with a list icon on the right.
- Execution Steps Only?** Radio buttons for "Yes" and "No", with "No" selected.
- Order By:** A dropdown menu.

Table 4-8. Object History report field descriptions

| Field Name (*Required) | Description |
|------------------------|---|
| Object Type | Select an object type. Choices are limited to those object types available on your Mercury IT Governance Center instance. |
| Object Name | Specify an object name. Type any alphanumeric string (up to 40 characters in length). |
| Performed By | Select a user. Choices are limited to users of your Mercury IT Governance Center instance. |
| Transaction Date From | Select the starting date. The report will include only transactions started on or after this date. |
| Transaction Date To | Select the ending date. The report will include only transactions started on or before this date. |
| Dest. Environment | Select a destination environment. Use this option to view all the deployment management activity for a specific environment. Choices are limited to those environments available on your Mercury IT Governance Center instance. |
| *Execute Steps Only | Indicate whether or not to show transactions for execution type workflow steps. |
| *Order By | Select the sort criteria. Choices include: <ul style="list-style-type: none"> ■ Transaction Date ■ Package Creation Date ■ Object Name |

Objects / Environments Detail Report

This report lists objects that have been migrated into a given environment or a set of environments, grouping the report output by object type name. Use this report as an object inventory for newly migrated objects.

This report uses an internal object inventory table for information on objects migrated to each environment. At time of execution, the workflow engine uses the workflow definition to determine the environment an object is being migrated to and updates the object inventory table accordingly.

Warning

The workflow engine will not recognize any cases where the destination environment is overwritten in the object command while it is being migrated.

Tip

This report is also useful when used to create an object inventory for newly migrated objects.

This report is restricted to users having a Deployment Management license.

Figure 4-9. Objects / Environments Detail report fields

The screenshot shows a web form titled 'Report Parameters' with a 'Restore Default' button in the top right. The form contains the following fields:

- Object Type:** A dropdown menu with a list icon on the right.
- Environment:** A dropdown menu with a list icon on the right.
- Migration Date From:** A date input field with a calendar icon on the right.
- Migration Date To:** A date input field with a calendar icon on the right.
- Include Prior Migrations:** A radio button group with 'Yes' and 'No' options. The 'No' option is selected.

| Migration Date To | Select the ending date. The report will include only migrations started on or before this date. |
| *Include Prior Migrations | Indicate whether or not to include objects that were migrated to the same environment more than once. |

Package Change History Report

This report audits the package changes and includes assignment information, line order, and line details for each selected package.

This report is restricted to users having a Deployment Management license.

Figure 4-10. Package Change History report

The screenshot shows a 'Report Parameters' form with the following fields and options:

- Package From: Text input field with a dropdown arrow.
- Package To: Text input field with a dropdown arrow.
- Package No. Contains: Text input field.
- Assigned User: Text input field with a user selection icon.
- Workflow: Text input field with a dropdown arrow.
- Creation Date From: Date input field with a calendar icon.
- Creation Date To: Date input field with a calendar icon.
- Show Package Change History: Radio buttons for Yes (selected) and No.
- Show Deleted Packages and Package Lines: Radio buttons for Yes and No (selected).

Table 4-10. Package Change History field descriptions

| Field Name (*Required) | Description |
|------------------------|--|
| Package From | Select the starting package. The report will include only packages whose name is equal to or greater than this value. Choices are limited to those packages that are available on your Mercury IT Governance Center instance. |
| Package To | Select the ending package. The report will include only packages whose name is equal to or less than this value. Choices are limited to those packages that are available on your Mercury IT Governance Center instance. |
| Package No. Contains | Specify a string that must be included in the package number. Type any alphanumeric string (up to 40 characters in length). |
| Assigned User | Select a user. Choices are limited to users of your Mercury IT Governance Center instance. |

Table 4-10. Package Change History field descriptions

| Field Name (*Required) | Description |
|--|--|
| Workflow | Select a workflow. Choices are limited to those workflow available on your Mercury IT Governance Center instance. |
| Creation Date From | Select the starting date. The report will include only packages created on or after this date. |
| Creation Date To | Select the ending date. The report will include only packages created on or before this date. |
| *Show Package Change History | Indicate whether or not to show the package change history. |
| *Show Deleted Packages and Package Lines | Indicate whether or not to show deleted packages and deleted package lines. |

Package Details Report

Returns details about a given package. Based on the selection criteria, this report lists:

- Individual packages and detailed data regarding each package
- Header information about the package such as package priority and description
- Detailed information such as package notes, package lines and their parameters
- Current workflow status for each package line on each selected package

This report is restricted to users having a Deployment Management license.

Figure 4-11. Package Details report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form is organized into two columns of input fields. The left column contains text input fields for "Package From:", "Package To:", "Package No. Contains:", "Requested By:", "Assigned To:", "Workflow:", "Package Group:", "Creation Date From:", and "Creation Date To:". Each of these fields has a small icon to its right. The right column contains radio button options for "Include Closed Packages:", "Show Line Statuses:", "Show Line Parameters:", "Show Notes:", "Show User Data:", "Show Full Header:", and "Show References:". Each option has "Yes" and "No" choices, with the "No" option selected for all of them.

| Field Name | Field Type | Default/Selected Value |
|--------------------------|---------------|------------------------|
| Package From: | Text Input | |
| Package To: | Text Input | |
| Package No. Contains: | Text Input | |
| Requested By: | Text Input | |
| Assigned To: | Text Input | |
| Workflow: | Text Input | |
| Package Group: | Text Input | |
| Creation Date From: | Text Input | |
| Creation Date To: | Text Input | |
| Include Closed Packages: | Radio Buttons | No |
| Show Line Statuses: | Radio Buttons | No |
| Show Line Parameters: | Radio Buttons | No |
| Show Notes: | Radio Buttons | No |
| Show User Data: | Radio Buttons | No |
| Show Full Header: | Radio Buttons | No |
| Show References: | Radio Buttons | No |

Table 4-11. *Package Details report field descriptions (page 1 of 2)*

| Field Name (*Required) | Description |
|--------------------------|--|
| Package From | Select the starting package. The report will include only packages whose name is equal to or greater than this value. Choices are limited to those packages that are available on your Mercury IT Governance Center instance. |
| Package To | Select the ending package. The report will include only packages whose name is equal to or less than this value. Choices are limited to those packages that are available on your Mercury IT Governance Center instance. |
| Package No. Contains | Specify a string that must be included in the package number. Type any alphanumeric string (up to 40 characters in length). |
| *Include Closed Packages | Indicate whether or not to include packages with an overall status of Cancelled, Closed [Success], Closed [Failure], and Closed [Mixed]. |
| Requested By | Select a user. Choices are limited to users of your Mercury IT Governance Center instance. |
| *Show Line Statuses | Indicate whether or not to show the workflow steps and current step status for each package line. |
| Assigned To | Select a user. Choices are limited to users of your Mercury IT Governance Center instance. |
| *Show Line Parameters | Indicate whether or not to show all the visible parameters for each package line. |
| Workflow | Select a workflow. Choices are limited to those workflow available on your Mercury IT Governance Center instance. |
| *Show Notes | Indicate whether or not to show the notes. |
| Package Group | Select a package group. Choices are limited to those package groups available on your Mercury IT Governance Center instance. |

Table 4-11. Package Details report field descriptions (page 2 of 2)

| Field Name (*Required) | Description |
|------------------------|--|
| *Show User Data | Indicate whether or not to show the user data custom fields. |
| Creation Date From | Select the starting date. The report will include only packages created on or after this date. |
| *Show Full Header | Indicate whether or not to show the full header. |
| Creation Date To | Select the ending date. The report will include only packages created on or before this date. |
| *Show References | Indicate whether or not to show associated references. |

Package History Report

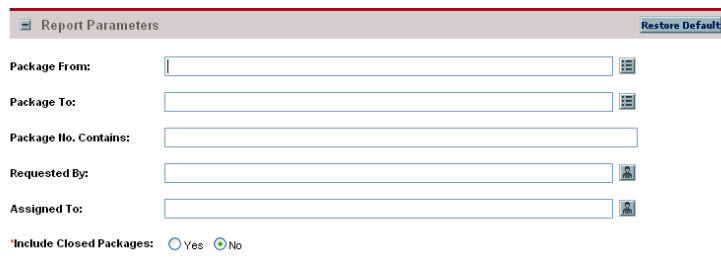

This report lists the complete workflow history for each selected package—for example:

- Each change in the status of each workflow step
- The date and time the status changed
- The person who caused the change
- The new status of that step

For example, a different entry will be displayed when a step became eligible versus when the step was completed and had a result. The report breaks down each package into its package lines and gives the workflow history separately for each line.

This report is restricted to users having a Deployment Management license.

Figure 4-12. Package History report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form contains the following fields:

- Package From:** A text input field with a search icon on the right.
- Package To:** A text input field with a search icon on the right.
- Package No. Contains:** A text input field.
- Requested By:** A text input field with a search icon on the right.
- Assigned To:** A text input field with a search icon on the right.
- Include Closed Packages:** A radio button group with "Yes" and "No" options. The "No" option is selected.

Package Impact Analysis Report

Use this report to analyze the impact of a given package based on the audit history stored in Mercury IT Governance Center. After listing summary information on the given package and package lines, the report lists three separate sections for analysis:

- Other packages that contain common objects with a given package
- Objects that have migrated alongside one or more of the objects being migrated on the given package but are not included in the given package
- These objects might be affected by the current object changes (if these objects were once tied to the objects being changed in the same package, there is probably a relationship between the objects).
- Recent migrations for each object in the package, showing where changes to the given objects have recently been deployed

This report is restricted to users having a Deployment Management license.

| Field Name (*Required) | Description |
|----------------------------|---|
| *Package | Select a package. Choices are limited to those packages available on your Mercury IT Governance Center instance. |
| Ignore Pkgs Created Before | Select a date. The report will include only the package if it was created on or after this date. |
| *Show Details | Indicate whether or not to list all the specific common objects between the queried packages and the given package. |

Packages Pending Report

Use this report as a worklist for pending work on packages. Based on the selection criteria, this report lists:

- Open packages with pending activity
- Details about each package
- Pending work for a group of users

Using this information, query the package using Mercury Deployment Management and perform the appropriate action(s).

This report is restricted to users having a Deployment Management license.

Figure 4-14. Packages Pending report fields

The screenshot shows a web interface for configuring report parameters. At the top, there is a tab labeled 'Report Parameters' and a 'Restore Default' button. Below this, there are several input fields and controls:

- Package From:** A text input field with a search icon.
- Package To:** A text input field with a search icon.
- Executable by User:** A text input field with a search icon.

Release Detail Report

This is a management report that lists all requests, packages, and distributions associated with a release.

Tip

This report is also useful when used to determine if everything that should be included with a release has been included, and whether or not there are proper dependencies.

This report is restricted to users having a Deployment Management license and belonging to the appropriate security group.

Table 4-15. Release Detail report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|--------------------------|---|
| Release From | Select the starting date. The report will include only releases whose name is equal to or greater than this value. Choices are limited to those releases that are available on your Mercury IT Governance Center instance. |
| *Show Distributions | Indicate whether or not to show distributions. |
| Release To | Select the ending date. The report will include only releases whose name is equal to or less than this value. Choices are limited to those releases that are available on your Mercury IT Governance Center instance. |
| *Show Packages | Indicate whether or not to show packages. |
| Release Contains | Select a release number. Type any alphanumeric string (up to 40 characters in length). |
| *Show Requests | Indicate whether or not to show requests. |
| Created By | Select a user. Choices are limited to users of your Mercury IT Governance Center instance. |
| *Show References | Indicate whether or not to show references. |
| Release Manager | Select a release manager. Choices are limited to users of your Mercury IT Governance Center instance. |
| *Show Notes | Indicate whether or not to show notes. |
| Release Team | Select a release team. Choices are limited to those release teams available on your Mercury IT Governance Center instance. |
| *Include Closed Releases | Indicate whether or not to show closed releases. |
| Package Group | Select a package group. Choices are limited to those package groups available on your Mercury IT Governance Center instance. |

Table 4-15. Release Detail report field descriptions (page 2 of 2)

| Field Name (*Required) | Description |
|--------------------------|--|
| Description | Specify a string that must be included in the description. Type any alphanumeric string (up to 200 characters in length). |
| Creation Date From | Select the starting date. The report will include only releases created on or after this date. |
| Creation Date To | Select the ending date. The report will include only releases created on or before this date. |
| Dist. Creation Date From | Select the starting date. The report will include only distributions created on or after this date. |
| Dist. Creation Date To | Select the ending date. The report will include only distributions created on or before this date. |

Release Notes Report

This report shows all of the requests and packages in a release as well as their associations. You can use this report to create a list of bugs fixed and patches applied within a specific release.

Tip

This report is also useful when used to create a list of bugs fixed and patches applied within a specific release.

This report is restricted to users having a Deployment Management license.

| Update Date From | Select the starting date. The report will include only releases updated on or after this date. |
| Update Date To | Select the ending date. The report will include only releases updated on or before this date. |
| *Include Closed Distributions | Indicate whether or not to show closed distributions. |

Chapter

5

Demand Management Reports

In This Chapter:

- *Contact Detail Report*
 - *Demand Creation History Report*
 - *Historical SLA Violations Report*
 - *Request Detail (Filter by Custom Fields) Report*
 - *Request Detail Report*
 - *Request History Report*
 - *Request Quick View Report*
 - *Request Summary (Filter by Custom Fields) Report*
 - *Request Summary Report*
 - *Satisfied Demand History Report*
-

Note

Users must have the System: Submit Report access grant to view or submit any report.

Contact Detail Report

This report is primarily a request manager tool. Use this report to query the contacts already entered in the Demand Management system that are available for entering and updating requests.

This report is restricted to users having a Demand Management license.

Figure 5-1. Contact Detail report parameters

The screenshot shows a web-based form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form contains the following fields:

- Last Name From:** An empty text input field.
- Last Name To:** An empty text input field.
- Full Name Contains:** An empty text input field.
- Email Contains:** An empty text input field.
- Company Name:** An empty text input field with a small grid icon to its right.
- Report Title:** A text input field containing the value "Contact Details".

Table 5-1. Contact Detail report field descriptions (page 1 of 2)

| Field Name | Description |
|--------------------|---|
| Last Name From | Specify the starting last name. The report will include only contacts whose last name is equal to or greater than this value. Type any alphanumeric string (up to 200 characters in length). |
| Last Name To | Specify the ending last name. The report will include only contacts whose last name is equal to or less than this value. Type any alphanumeric string (up to 200 characters in length). |
| Full Name Contains | Specify a string that must be included in the full name. Type any alphanumeric string (up to 200 characters in length). |

Table 5-1. Contact Detail report field descriptions (page 2 of 2)

| Field Name | Description |
|----------------|---|
| Email Contains | Specify a string that must be include in the email address. Type any alphanumeric string (up to 200 characters in length). |
| Company Name | Specify one or more companies. Choices are limited to those companies available on your Mercury IT Governance Center instance. |
| Report Title | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |

Demand Creation History Report

Use this report to show the history of demand creation for a specified demand set. Demand can be grouped by any of the demand set fields, and further filtered by specific values of those fields.

This report is restricted to users having a Demand Management license.

Figure 5-2. Demand Creation History report fields

Table 5-2. Demand Creation History report field descriptions (page 1 of 3)

| Field Name (*Required) | Description |
|------------------------|--|
| *Report Title | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |
| *Demand Set Name | Select a demand set. Choices are limited to those demand sets available on your Mercury IT Governance Center instance. |
| Request Type | Select one or more request types. Choices are limited to those request types available on your Mercury IT Governance Center instance. |
| Requestor Department | Select a department. Choices are limited to those departments available on your Mercury IT Governance Center instance. |

Table 5-2. Demand Creation History report field descriptions (page 2 of 3)

| Field Name (*Required) | Description |
|------------------------|---|
| Priority | Select a priority. Choices include: <ul style="list-style-type: none"> ■ Low ■ Normal ■ High ■ Critical |
| Assigned to Group | Select one or more security groups. Choices are limited to those security groups available on your Mercury IT Governance Center instance. |
| Demand Disposition | Select one or more dispositions. Choices include: <ul style="list-style-type: none"> ■ Satisfied ■ Backlog ■ New ■ Scheduled ■ Rejected |
| Application | Select one or more applications. Choices are limited to those applications available on your Mercury IT Governance Center instance. |
| *Demand Grouped By | The report will include only the demand set grouped by this demand field. Choices are limited to those demand fields available on your Mercury IT Governance Center instance. |
| *Period Type | Select a time period. Choices include: <ul style="list-style-type: none"> ■ Months ■ Weeks |

Table 5-2. Demand Creation History report field descriptions (page 3 of 3)

| Field Name (*Required) | Description |
|------------------------|--|
| *Past Periods | Specify the number of historic periods of Period Type . Type any integer (in the range of -150 to 150). |
| Demand Field 1–5 | Select these demand fields. Choices are limited to those demand fields available on your Mercury IT Governance Center instance. |
| Field Value 1–5 | Select these corresponding demand field values. Type any alphanumeric string (up to 40 characters in length). This value should exactly match the visible field. For Yes/No options, type Y for yes and N for no. |

Historical SLA Violations Report

Use this report to show the history of SLA violations for a specified demand set. Demand that has violated SLA can be grouped by any of the demand set fields, and further filtered by specific values of those fields.

This report is restricted to users having a Demand Management license.

Figure 5-3. Historical SLA Violations report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button. The form contains the following fields:

| Demand Field 1–5 | Specify these demand fields. Choices are limited to those demand fields available on your Mercury IT Governance Center instance. |
| Field Value 1–5 | Specify the corresponding demand field values. Type any alphanumeric string (up to 40 characters in length). This value should exactly match the visible field. For Yes/No options, type Y for yes and N for no. |

Request Detail (Filter by Custom Fields) Report

This report is similar to the Request Detail report except that requests can be filtered by values in custom fields. Once the request type is specified for the report, select up to four custom fields for that request type. Run the report for specific values for each of those fields.

This report is restricted to users having a Demand Management license.

Request Detail Report

This report provides information about requests using a number of selection criteria. For each request, the report displays:

- All notes attached to the request
- Current status of the request
- Listing of future steps
- All populated detail fields for the request
- Requests assigned to a user
- Requests ready for review
- All new requests that need to be tracked

This report is restricted to users having a Demand Management license.

Figure 5-5. Request Detail report fields

The screenshot shows the 'Report Parameters' form for the Request Detail report. The form is organized into two columns of fields. The left column includes search criteria such as Request Numbers, Request Type, Status, Assigned To, Created By, Department, Workflow, Contact, Creation Date From, Last Update Date From, Description Contains, and Report Title. The right column includes options for 'Include Closed Requests', Priority, Assigned To Group, Request Sub Type, Application, Request Group, Company Name, Creation Date To, Last Update Date To, Order By (set to Request Number), Show Detail Fields, Show Contents of Table Fields, Filter Notes (set to Show all notes), and Show References. At the bottom of each column, there are several 'Show' or 'Hide' options with radio buttons for Yes and No, such as 'Show Header Fields', 'Hide Prompts for Empty Fields', 'Show Field Audit History', 'Show Notes', and 'Show Status'.

Request History Report

This report lists the complete workflow and field change history for each selected Request. For each request, this report provides the following details on each change in the status of each workflow step:

- Date and time the status changed
- Person who caused the change
- New status of that step

For example, a different entry is displayed when a step became eligible versus when the step was completed and had a result. It is possible to see data changes for fields that have been configured to have transaction history auditing. Use this report for auditing the transaction history of individual requests.

This report is restricted to users having a Demand Management license.

Request Quick View Report

This report lists a quick summary of open and closed requests, breaking down the requests by priority. The report also shows the request activity for the current week (using a Sunday to Saturday week) such as requests opened and requests closed. The report can also show selected request information for each open request, allowing managers to view both a summary view on request activity and drill down into request details.

This report is restricted to users having a Demand Management license.

| Contact | Select one or more contacts. Choices are limited to those contacts available on your Mercury IT Governance Center instance. |
| Company Name | Select one or more companies. Choices are limited to those companies available on your Mercury IT Governance Center instance. |
| Creation Date From | Select the starting date. The report will include only those requests created on or after this date. |
| Creation Date To | Select the ending date. The report will include only those requests created on or before this date. |
| Last Update Date From | Select the starting date. The report will include only those requests updated on or after this date. |
| Last Update Date To | Select the ending date. The report will include only those requests updated on or before this date. |
| Description Contains | Specify the string that must be included in the description. Type any alphanumeric string (up to 200 characters in length). |
| Report Title | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |

Table 5-7. Request Quick View report field descriptions (page 3 of 3)

| Field Name (*Required) | Description |
|-----------------------------|---|
| *Order By | Select the sort criteria: Choices include: <ul style="list-style-type: none"> ■ Request Number ■ Created By ■ Creation Date ■ Priority ■ Request Type ■ Status ■ Description ■ Assigned User |
| *Show Details | Indicate whether or not to show details. |
| Show Summary | Indicate whether or not to show the summary. |
| *Columns to Display (8 max) | Select one to eight columns of information. Choices are limited to those columns available on your Mercury IT Governance Center instance. |

Request Summary (Filter by Custom Fields) Report

This report is similar to the Request Summary report except that requests can be filtered by values in custom fields. Once the request type is specified for the report, select up to four of the custom fields for that request type. Run the report for specific values for each of those fields.

This report is restricted to users having a Demand Management license.

| *Include Subtotals for First Group Column | Indicate whether or not to include subtotals for the first group. |

Request Summary Report

This report displays the total counts for groups of requests matching the selection criteria. Selected requests can be grouped in up to five categories. For example, a report can display the counts for requests in each department/assigned user combination or for each department/application/priority combination.

This report is restricted to users having a Demand Management license.

Satisfied Demand History Report

Use this report to show the history of demand that has been satisfied for a specified demand set. Demand can be grouped by any of the demand set fields, and further filtered by specific values of those fields.

This report is restricted to users having a Demand Management license.

Figure 5-10. Satisfied Demand History report fields

The screenshot shows a 'Report Parameters' form for the 'Satisfied Demand History' report. The form contains the following fields and controls:

- Report Title:** Text input field containing 'Satisfied Demand History'.
- Demand Set Name:** Text input field with a search icon.
- Request Type:** Text input field with a search icon.
- Priority:** Dropdown menu.
- Demand Disposition:** Text input field containing 'Satisfied' with a search icon.
- Demand Grouped By:** Text input field with a search icon.
- Period Type:** Dropdown menu set to 'Months'.
- Past Periods:** Text input field containing '3'.
- Requestor Department:** Dropdown menu.
- Assigned to Group:** Text input field with a search icon.
- Application:** Text input field with a search icon.
- Demand Field 1-5:** Five text input fields, each with a search icon.
- Field Value 1-5:** Five text input fields corresponding to the Demand Fields.

Project Management Reports

In This Chapter:

- *Baseline Comparison Report*
 - *Project Cost Breakdown Report*
 - *Project Cost Details Report*
-

Note

Users must have the System: Submit Report access grant to view or submit any report.

Baseline Comparison Report

This report compares a project’s schedule to a baseline or compares two baselines.

This report is restricted to users having a Project Management license.

Figure 6-1. Baseline Comparison report fields

The screenshot shows a web form titled "Report Parameters" with a "Restore Default" button. The form contains the following fields and options:

- *Project:** A dropdown menu.
- *Compare:** A dropdown menu.
- *To:** A dropdown menu.
- Show Only Changes:** Radio buttons for Yes and No (No is selected).
- Show Only Summary Tasks:** Radio buttons for Yes and No (No is selected).
- Show Start Date Changes:** Radio buttons for Yes and No (Yes is selected).
- Show Finish Date Changes:** Radio buttons for Yes and No (Yes is selected).
- Show Duration Changes:** Radio buttons for Yes and No (Yes is selected).
- Show Effort Changes:** Radio buttons for Yes and No (Yes is selected).
- Only Indicate Changes Larger Than(days):** A text input field.
- Show Cost Changes For:** A dropdown menu.
- Only Indicate Cost Changes Larger Than:** A text input field.
- Show Resource Changes:** Radio buttons for Yes and No (No is selected).
- Include Completed Tasks:** Radio buttons for Yes and No (No is selected).
- Include Cancelled Tasks:** Radio buttons for Yes and No (No is selected).

Table 6-1. Baseline Comparison report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|------------------------|--|
| *Project | Select a project. Choices are limited to those projects available on your Mercury IT Governance Center instance. |
| *Compare | Select a baseline or work plan from this project. Choices are limited to those work plans or baselines available on your Mercury IT Governance Center instance. |
| *To | Select another baseline or work plan from this project. Choices are limited to those projects or baselines available on your Mercury IT Governance Center instance. |

Table 6-1. Baseline Comparison report field descriptions (page 2 of 2)

| Field Name (*Required) | Description |
|--|--|
| Show Only Changes | Indicate whether or not to show changes only. Use this when you want to see only the differences between the entities. |
| Show Only Summary Tasks | Indicate whether or not to show summary tasks only. |
| Show Start Date Changes | Indicate whether or not to show changes in task start dates. |
| Show Finish Date Changes | Indicate whether or not to show changes in task finish dates. |
| Show Duration Changes | Indicate whether or not to show changes in task durations. |
| Show Effort Changes | Indicate whether or not to show changes in task effort. |
| Only Indicate Changes Later Than(days) | Specify the number of days that should be ignored. That is, changes smaller than the specified amount will not be shown. Type any integer (in the range of –999 to 9,999 and without a comma separator). |
| Show Cost Changes For | Select one or more cost categories. Choices include: <ul style="list-style-type: none"> ■ Planned Labor ■ Planned Non-Labor ■ Planned Cost ■ Planned Capital Cost ■ Planned Operating Cost |
| Only Indicate Cost Changes Larger Than | Specify the minimum cost changes to report upon. Type any integer (in the range of –999 to 9,999 and without a comma separator). |
| Show Resource Changes | Indicate whether or not to compare tasks having resource changes. |
| Include Completed Tasks | Indicate whether or not to compare tasks having Completed status. |
| Include Cancelled Tasks | Indicate whether or not to compare tasks having Cancelled status. |

Project Cost Breakdown Report

This report shows the costs for a project, and the activities with which the costs are associated. Totals include both labor and non-labor costs.

Note

This report also appears in the Financial Management category.

This report is restricted to users having a Project Management license.

Figure 6-2. Project Cost Breakdown report fields

Table 6-2. Project Cost Breakdown report field descriptions

| Field Name (*Required) | Description |
|------------------------|---|
| *Project | Select one or more projects. Choices are limited to those projects available on your Mercury IT Governance Center instance. |
| *Breakdown Period | Select a breakdown period. Choices include: <ul style="list-style-type: none"> ■ Project to Date. Costs are displayed for the entire project(s). ■ Month. Costs are displayed for month and year specified in Period. |
| Period | If reporting on costs for a specific month, select the month and year. Choices are limited to those periods available on your Mercury IT Governance Center instance. |
| Local Currency | Indicate whether or not the costs should be displayed in local currency or in the Mercury IT Governance Center system base currency. |

Project Cost Details Report

This report shows the cost details for select project work plans, grouped by labor and non-labor or operating categorizations.

Note

This report also appears in the Financial Management category.

This report is restricted to users having a Project Management license.

Chapter
7

Time Management Reports

In This Chapter:

- *Actual Time Summary Report*
 - *Delinquent Time Sheets*
 - *Time Sheet Details Report*
 - *Time Sheet Summary Report*
 - *Work Allocation Details Report*
-

Note

Users must have the System: Submit Report access grant to view or submit any report.

Actual Time Summary Report

This report summarizes actual time information entered in non-cancelled time sheets. Different parameters provide different views into the data—for example:

- The total time entered per resource for each time period
- The total time entered per project
- The total time entered in each given time period

This report is similar to the Time Sheet Summary Report, except it does not show work allocation budget information.

This report is restricted to users having a Time Management license.

Figure 7-1. Actual Time Summary report fields

The screenshot shows a web-based form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form contains the following fields and options:

- Group By:** A text input field with a search icon.
- Period Type:** A dropdown menu.
- Starting Time Period:** A text input field with a search icon.
- Ending Time Period:** A text input field with a search icon.
- Work Item Type:** A dropdown menu.
- Work Item Set:** A text input field with a search icon.
- Work Item:** A text input field with a search icon.
- Activity:** A text input field with a search icon.
- Charge Code:** A text input field with a search icon.
- Resource:** A text input field with a search icon.
- Resource Group:** A text input field with a search icon.
- Group Total At Least X Hours:** A text input field.
- Include Unreleased Time Sheets:** Radio buttons for "Yes" and "No", with "Yes" selected.
- Show Sub Totals:** Radio buttons for "Yes" and "No", with "No" selected.

Table 7-1. Actual Time Summary report field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|------------------------|--|
| *Group By | Select one or more grouping criteria. Choices include: <ul style="list-style-type: none"> ■ Work Item Type ■ Work Item Set ■ Work Item ■ Activity ■ Resource ■ Time Period ■ Charge Code ■ Time Sheet # |
| *Period Type | Select a time period. Choices are limited to those period types available on your Mercury IT Governance Center instance. |
| *Starting Time Period | Select the starting date. Choices are limited to those date ranges available on your Mercury IT Governance Center instance. |
| Resource | Select one or more resources. Choices are limited to those resources available on your Mercury IT Governance Center instance. |
| *Ending Time Period | Select the ending date. Choices are limited to those date ranges available on your Mercury IT Governance Center instance. |
| Resource Group | Select one or more resource groups. Choices are limited to those resource groups available on your Mercury IT Governance Center instance. |
| Work Item Type | Select a work item type. Choices include: <ul style="list-style-type: none"> ■ Request ■ Package ■ Task ■ Misc |
| Work Item Set | Select a work item set. Choices are limited to those work items sets available on your Mercury IT Governance Center instance. |

Table 7-1. Actual Time Summary report field descriptions (page 2 of 2)

| Field Name (*Required) | Description |
|--------------------------------|--|
| Group Total At Least <X> Hours | Specify the minimum total actual hours for which information should be grouped. Type any integer (in the range of -9,999,999,999 to 9,999,999,999 and without a comma separator). This allows you to filter for the areas with large time charges. |
| Work Item | Specify a work item. Choices are limited to those work items available on your Mercury IT Governance Center instance. |
| Include Unreleased Time Sheets | Indicate whether or not to show unreleased time sheets. |
| Activity | Select an activity. Choices are limited to those activities available on your Mercury IT Governance Center instance. |
| Charge Code | Select a charge code. Choices are limited to those charge codes available on your Mercury IT Governance Center instance. |
| Show Sub Totals | Indicate whether or not subtotals should be shown. |

Delinquent Time Sheets

This report lists the time sheets that are delinquent.

This report is restricted to users having a Time Management license.

Figure 7-2. Delinquent Time Sheets fields

Table 7-2. Delinquent Time Sheets field descriptions (page 1 of 2)

| Field Name (*Required) | Description |
|---|--|
| *Previous Time Periods to Show | Specify the number of previous time periods to show. Type any numeric value (between 0 and 12). |
| *Include Current Period | Indicate whether or not to include the current time period. |
| *Grace Period in Days (affects past periods only) | Specify the number of days to include in the grace period. Type any numeric value (between 0 and 31). |
| Resource | Select one or more resources. Choices are limited to those resources available on your Mercury IT Governance Center instance. |
| Direct Manager | Select a manager. Choices are limited to those managerial resources available on your Mercury IT Governance Center instance. |

Table 7-2. Delinquent Time Sheets field descriptions (page 2 of 2)

| Field Name (*Required) | Description |
|------------------------|---|
| Default Time Approver | Select a time approver. Choices are limited to those time approvers available on your Mercury IT Governance Center instance. |
| Organization Unit | Select an organization. Choices are limited to those organizations available on your Mercury IT Governance Center instance. |
| Time Sheet Status | Select a status. Choices are limited to those status codes available on your Mercury IT Governance Center instance. |
| Sort by | Select the sort criteria. Choices include: <ul style="list-style-type: none">■ Resource■ Period |

Time Sheet Details Report

This report summarizes multiple time sheets displays their details. The report displays the following information:

- Header information
- Daily time information
- Line information, for example, work item, actuals to date, charge code, activity information, and notes details

This report is restricted to users having a Time Management license.

Figure 7-3. Time Sheet Details report fields

| Include Cancelled | Indicate whether or not to include cancelled time sheets. |
| Resource Group | Select one or more resource groups. Choices are limited to those resource groups available on your Mercury IT Governance Center instance. |
| Status | Select a status. Choices are limited to those status codes available on your Mercury IT Governance Center instance. |
| Description Contains | Specify a description filter. Type any alphanumeric string (up to 200 characters in length). |
| Time Sheet # | Specify a time sheet number. Type any numeric value (between 0 and 999,999,999 and without a comma separator). |
| Report Title | Specify a unique name for the report. Type any alphanumeric string (up to 200 characters in length). |
| Order By | Select the sort criteria. Choices include: <ul style="list-style-type: none"> ■ Time Period, followed by Resource ■ Resource, followed by Time Period |
| Show Time Sheet Notes | Indicate whether or not to show the header notes. |
| Show Line Notes | Indicate whether or not to show the notes attached to each time sheet line. |
| Show Charge Codes | Indicate whether or not to show the charge codes. |
| Show Activity Details | Indicate whether or not to show activity details. |

Time Sheet Summary Report

This report summarizes time information entered in non-cancelled time sheets. Different parameters provide different views into the data, for example:

- The total time entered per resource for time period
- The total time entered per project versus the budget for that project
- The total time entered in each give time period

This report is similar to the Actual Time Summary report except that this report shows work allocation budget information.

This report is restricted to users having a Time Management license.

Figure 7-4. Time Sheet Summary report fields

The screenshot shows a web-based form titled "Report Parameters" with a "Restore Default" button in the top right corner. The form contains the following fields and controls:

- Group By:** A text input field with a list icon.
- Period Type:** A dropdown menu.
- Starting Time Period:** A text input field with a list icon.
- Ending Time Period:** A text input field with a list icon.
- Resource:** A text input field with a list icon.

|--------------------------------|--|
| Time Sheet # | Specify a time sheet number. Type any numeric value (between -999,999,999 and 999,999,999 and without a comma separator). |
| Work Item Set | Select a work item set. Choices are limited to those work items sets available on your Mercury IT Governance Center instance. |
| Include Closed Time Sheets | Indicate whether or not to include closed time sheets. |
| Work Item | Displays time sheets for a given set of work items (package, request, project, or task). |
| Include Unreleased Time Sheets | Indicate whether or not to include unreleased time sheets. |
| Activity | Select an activity. Choices are limited to those activities available on your Mercury IT Governance Center instance. |
| Charge Code | Select a charge code. Choices are limited to those charge codes available on your Mercury IT Governance Center instance. |

Work Allocation Details Report

This report shows much of the same information shown on the Work Allocation definition page. This includes the:

- Allocation work item information
- Budget and actuals to date
- Charge code allocations
- Resource restrictions

This report also returns hyperlinks allowing modification of the work allocation (the Edit Work Allocations access grant is required).

Note

This report also appears in the Resource category.

This report is restricted to users having a Time Management license.

A decorative graphic consisting of four colored squares (orange, teal, dark red, and a larger dark red square) and a large white number '8' on a dark red background. The word 'Chapter' is written above the '8' and 'Report Types' is written below it.

Chapter 8 Report Types

In This Chapter:

- *Overview of the Report Type Workbench*
 - *Using the Report Type Workbench*
 - *Logging On*
 - *Creating an Entirely New Report Type*
 - *Creating a New Report Type From an Existing Report Type*
 - *Modifying an Existing Report Type*
 - *Report Type Windows*
 - *General Information Fields*
 - *Fields Tab*
 - *Layout Tab*
 - *Commands Tab*
 - *Security Tab*
 - *Ownership Tab*
-

Overview of the Report Type Workbench

Use the Report Type Workbench to configure report types. Report types define the reports that are available from the Submit New Report page. The definitions include such features as:

- What categories list the report
- What fields are displayed on the report submission page, and how they are constructed and validated
- Who can access and submit the report, including any required licenses or access grants
- Who can modify the report type
- What commands are actually executed when the report is submitted

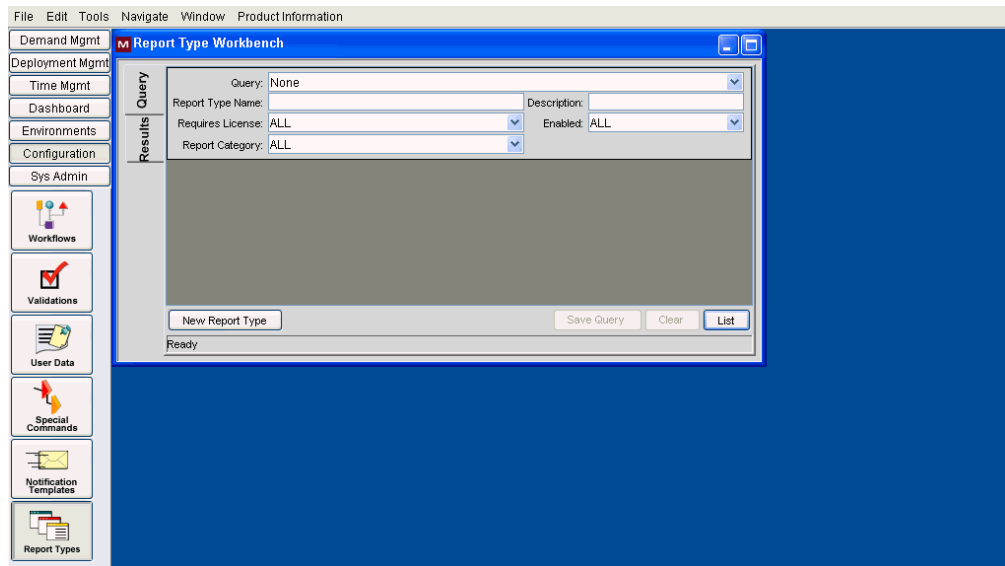

Do not change the name of the Baseline Comparison report. Doing so disables the **Compare Baselines** button on the View Baselines page (accessible from the Project Overview page).

Using the Report Type Workbench

Logging On

To access the Report Type Workbench:

1. Log on to Mercury IT Governance Center.
2. From the menu bar, select **Administration > Open Workbench**.
The Workbench opens.
3. From the shortcut bar, select **Configuration > Report Types**.
The Report Type Workbench opens.

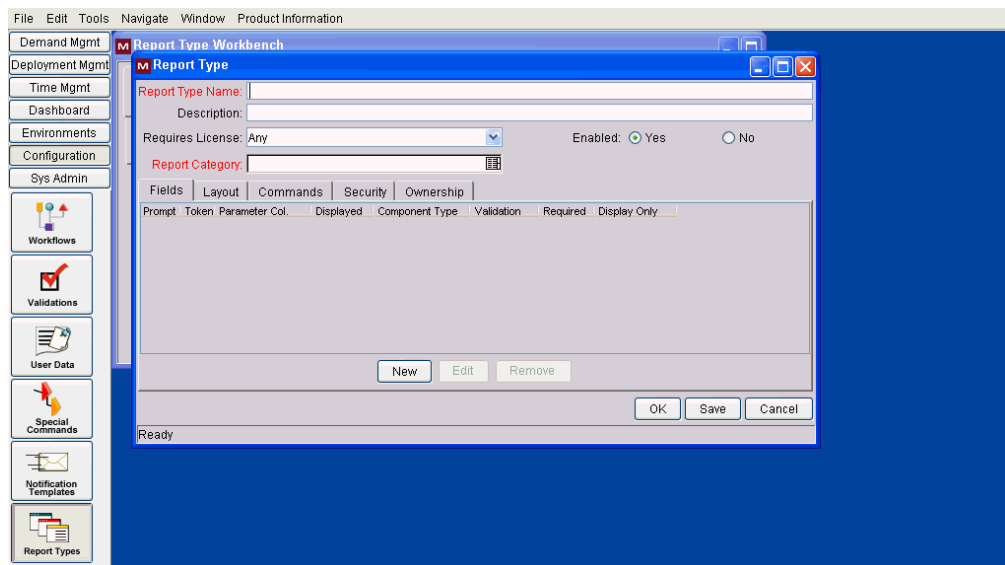

Creating an Entirely New Report Type

To define a new report type that is not based on any existing report type:

1. From the Report Type Workbench, click **New Report Type**.

The Report Type window opens.

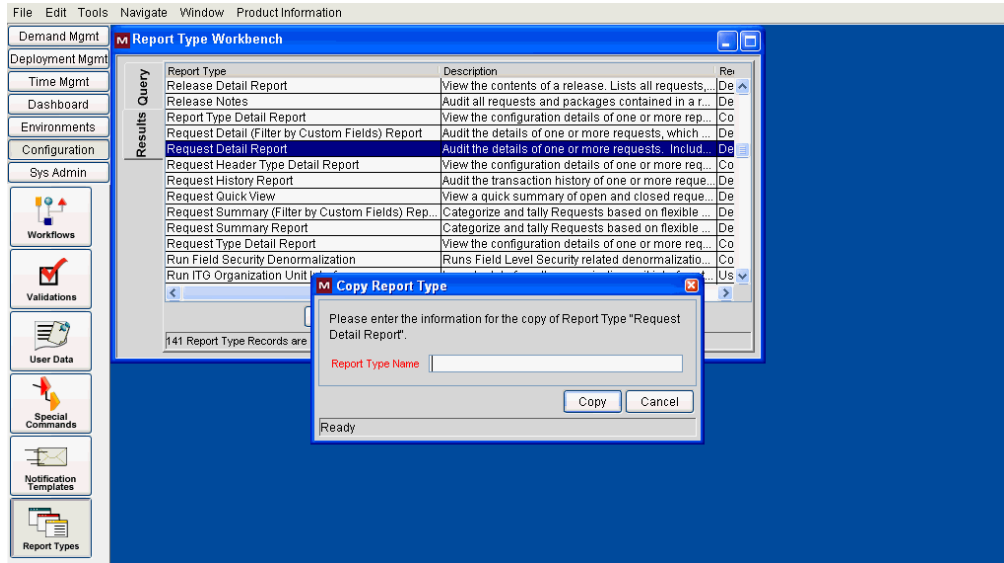

2. Configure the settings using the information provided in *Report Type Windows* on page 180.

Creating a New Report Type From an Existing Report Type

To use an existing report type as the basis of a new report type:

1. From the Report Type Workbench, select the existing report type.
2. Click **Copy**.

The Copy Report Type window opens.

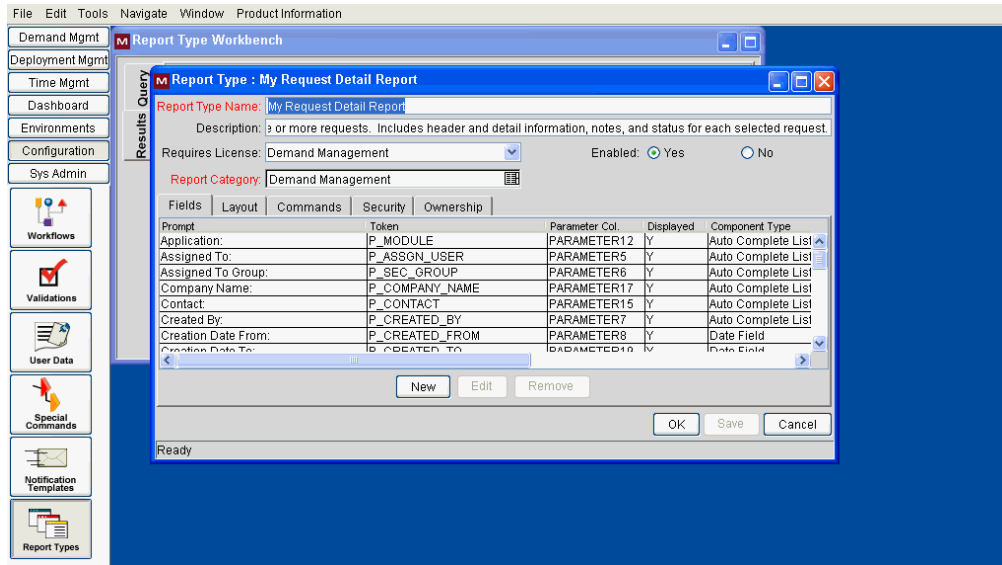

3. Type a **Report Type Name**.
4. Click **Copy** to continue. Otherwise, click **Cancel** to abort.

If you continued, the Question window appears.

5. Click **Yes** if you want to make modifications. Otherwise, click **No**.

If you continued, the Report Type: <Report> window opens.

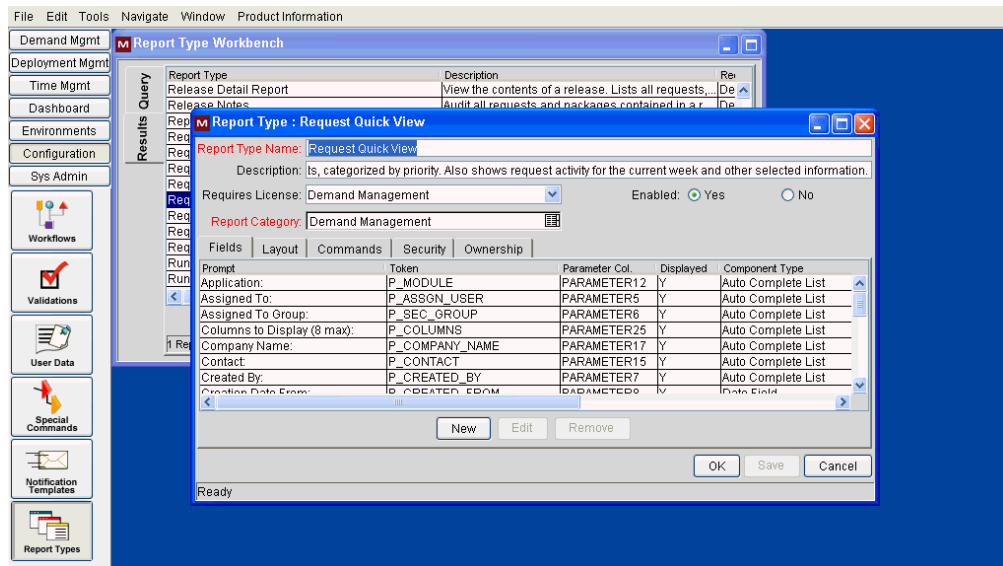

6. View or modify the settings using the information provided in *Report Type Windows* on page 180.

Modifying an Existing Report Type

To update an existing report type:

1. From the Report Type Workbench, select the desired report type.
2. Open the report type either by double-clicking the highlighted row or clicking **Open**.

The Report Type: <Report> window opens.

- View or modify the settings using the information provided in *Report Type Windows* on page 180.

Report Type Windows

The Report Type window and the Report Type: <Report> window are essentially the same—one lacks data and the other has data. Consequently, the information contained in the following sections applies to both windows and, for simplicity, these windows will be termed the Report Type window throughout the following sections.

The Report Type window is composed of:

- General information fields
- **Fields** tab
- **Layout** tab
- **Commands** tab
- **Security** tab
- **Ownership** tab

General Information Fields

The general information fields define the report identification information displayed in the Submit New Report page.

View or modify the general information fields for the given report type using the information described in *Table 8-1*.

Table 8-1. Report Type window general information fields descriptions

| Field Name | Description |
|------------------|--|
| Report Type Name | Specify a unique name of the report type. Type any alphanumeric string. |
| Description | Specify a brief description of the report type. Type any alphanumeric string. |
| Requires License | Select the product license that must be configured for users of this report. If no specific license is required, select Any . Choices are limited to licenses available on your Mercury IT Governance Center instance. |
| Enabled | Indicate whether or not the report type is available for use. |
| Report Category | Select the one (or more) categories that should include this report. Choices are limited to categories available on your Mercury IT Governance Center instance. |

Fields Tab

Report type “fields” define the filter fields displayed in the Submit Report: *<Report Name>* window.

Use the Fields tab to view and edit the fields for the given report type. Each field in a report type is represented by its own row on the **Fields** tab. Settings for each field are configured using the Field window (as shown in *Figure 8-2*). Select any existing field to modify its settings or click **New** to create a new field.

Figure 8-1. Report Type window Fields tab

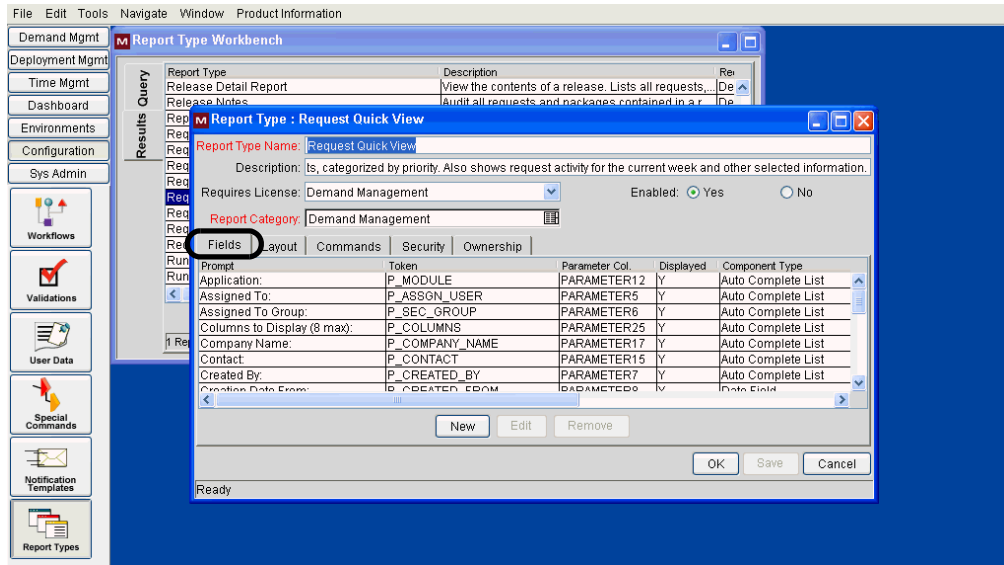

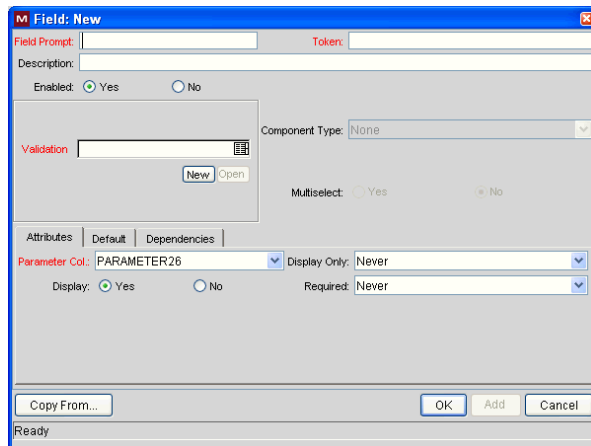

Figure 8-2. Field window

The Field window consists of the following:

- General information fields
- **Attributes** tab
- **Default** tab
- **Dependencies** tab

Field Window General Information

View or modify the general information fields using the information described in [Table 8-2](#).

Table 8-2. Field window general information field descriptions

| Field Name | Description |
|----------------|---|
| Field Prompt | Specify the prompt that is visible in Submit Report: <Report Name> window. Type any alphanumeric string. |
| Token | Specify the unique token that identifies this field. Type any string. Only uppercase letters, numbers, and underscore are permitted. |
| Description | Specify a brief description of the field. Type any alphanumeric string. |
| Enabled | Indicate whether or not the field is enabled. |
| Validation | Select the logic used to validate the user input. Choices are limited to validations available on your Mercury IT Governance Center instance. Click New to create a new validation or click Open to review the validation you selected. |
| Component Type | Select the visual characteristics of the field such as a drop-down list or free-form text field. Choices are limited to characteristics (defined in the corresponding validation) available on your Mercury IT Governance Center instance. |
| Multiselect | Indicate whether or not the field allows users to select more than one entry. This option is only valid for fields using the auto-complete component. |

Attributes Tab

View or modify each field on the **Attributes** tab as described in [Table 8-3](#).

Figure 8-3. Field window Attributes tab

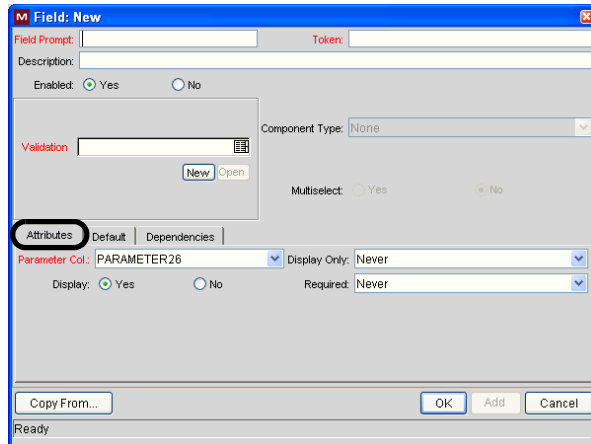

Table 8-3. Field window Attributes tab field descriptions (page 1 of 2)

| Field Name | Description |
|---------------|--|
| Parameter Col | Select the unique internal database table column for storing the value of this field. Choices are limited to 50 columns. |
| Display Only | Select whether the field can be updated or is read-only. Choices include: <ul style="list-style-type: none"> ■ Always. The field is only displayed and cannot be modified. (The field appears grayed-out similar to Component Type in Figure 8-3.) ■ Never. The value for the field can be modified. ■ Use Dependency Rules. Display of the field relies on the settings in the Dependencies tab. |
| Display | Indicate whether or not the field is visible is visible in Submit Report: <Report Name> window. |

Table 8-3. Field window Attributes tab field descriptions (page 2 of 2)

| Field Name | Description |
|------------|--|
| Required | <p>Select whether a value must be supplied for this field.</p> <p>Choices include:</p> <ul style="list-style-type: none"> ■ Always. A value for this field is always required. (An asterisk will precede the field prompt in the report as shown for Show Columns in Figure 3-2 on page 41.) ■ Never. A value for this field is optional. ■ Use Dependency Rules. Requiring a value for this field relies on the settings in the Dependencies tab. |

Default Tab

View or modify each field on the **Default** tab as described in [Table 8-4.](#)

Figure 8-4. Field window Default tab

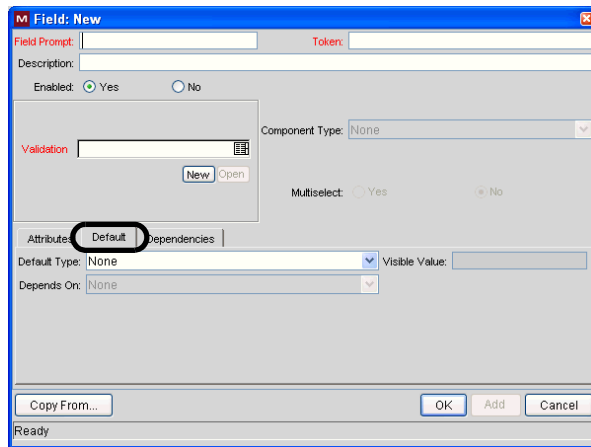

Table 8-4. Field window Default tab field descriptions

| Field Name | Description |
|---------------|--|
| Default Type | <p>Select the type of default value to use. Choices include:</p> <ul style="list-style-type: none"> ■ Constant. Specifies that the constant value provided in the Visible Value field should be displayed. ■ Parameter. Specifies that the dynamic value provided in the Depends On field should be displayed. ■ None. Specifies that no default value should be displayed. |
| Visible Value | <p>Specify the default value. This value should be what the user would typically enter in the field. If the report type field that you are defining is validated using a drop-down or an auto-complete list, this field displays only valid values. For example, if you have selected a drop-down list validation with possible values of High, Medium, or Low, you can specify a Visible Value of only High, Medium, or Low. This field is enabled only if Constant is chosen as the Default Type.</p> |
| Depends On | <p>Select the default value. This value should be what the user would typically enter in the field. Choices are limited to those tokens defined for this report type This field is enabled only if Parameter is chosen as the Default Type.</p> |

Dependencies Tab

View or modify each field on the **Default** tab as described in [Table 8-5](#).

Figure 8-5. Field window Dependencies tab

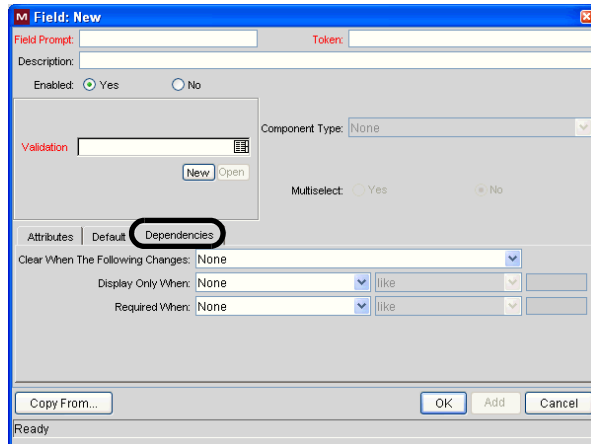

Table 8-5. Field window Dependencies tab field descriptions

| Field Name | Description |
|----------------------------------|--|
| Clear When The Following Changes | Select whether the current field is cleared when the specified field changes. Choices are limited to those field prompts defined for this report type or select None if the field should not be cleared. |
| Display Only When | Select whether the current field is editable only when certain criteria are satisfied. The criteria is specified using the two fields to the right. Choices are limited to those field prompts defined for this report type or select None if the field should not be cleared. This field is enabled only when Use Dependency Rules in the Display Only field on the Attributes tab is selected. |
| Required When | Select whether the current field is required when certain criteria are satisfied. The criteria is specified using the two fields to the right. Choices are limited to those field prompts defined for this report type or specify None if the field should not be cleared. This field is enabled only when Use Dependency Rules in the Required field on the Attributes tab is selected. |

Layout Tab

Use the **Layout** tab to specify the graphical presentation (visual layout) of the fields. This tab details the order of the fields, as well as some of their physical characteristics.

View or modify each field on the **Layout** tab as described in *Table 8-6*. Note that clicking **Preview** allows you to experiment with the organization and presentation of the fields.

Figure 8-6. Report Type window Layout tab

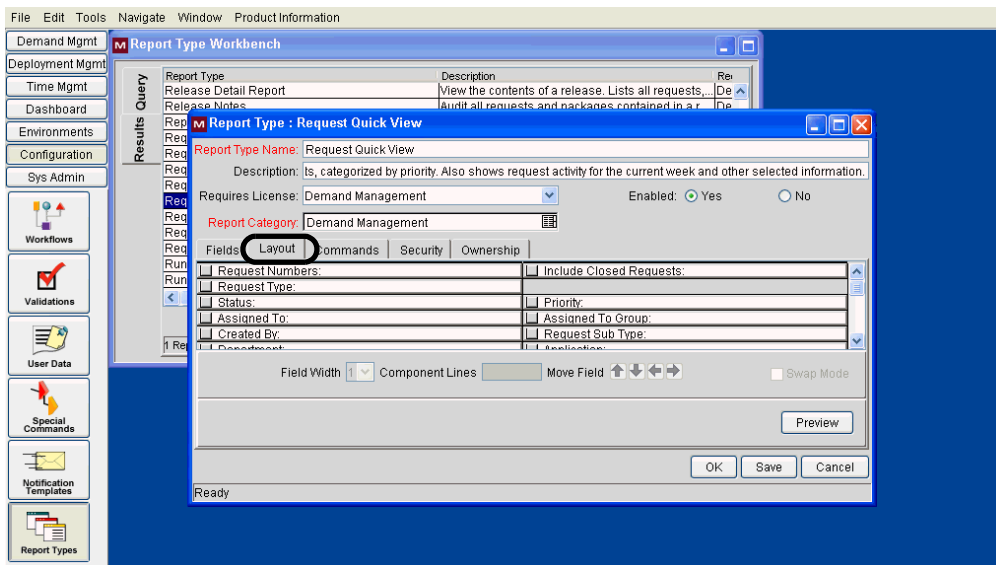

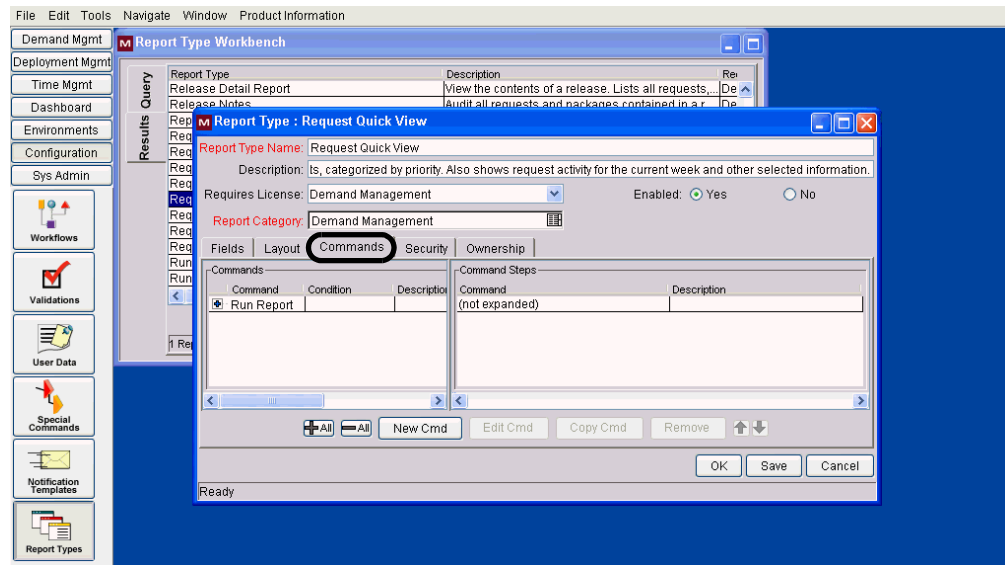

Table 8-6. Report Type window Layout tab field descriptions

| Field Name | Description |
|-----------------|---|
| Field Width | Select the width of the field (in columns). Note that if you select two columns, the rightmost columns contains a placeholder (▶▶▶) to indicate that it is in use. |
| Component Lines | |
| Move Field | Use the arrow buttons to modify the order of the fields. |
| Swap Mode | |

Commands Tab

Use the **Commands** tab to define the steps that must be executed for each report to run successfully. These commands tell Mercury IT Governance Center precisely which steps must be executed to generate the results for the given report type.

Figure 8-7. Report Type window Commands tab

Mercury IT Governance Center commands are designed to have a similar look and feel to the Unix operating system command structure. In fact, the specific parts of a command, the command steps, are often just command-line directives.

A report type can have many commands, and each command can have many command steps. A command may be viewed as a particular function for a report. For example, calling the `ksc_run_jsp_report` special command to call a report's JSP code, or running command-line `SQL*Plus` to call a database procedure. To perform these functions, a series of events needs to take place and these events are defined in the command steps.

On the **Commands** tab, select any existing command to modify its settings or click **New Cmd** to create a new command.

View, enter, or modify each field of the Edit Command (shown in [Figure 8-9](#)) or New Command window (shown in [Figure 8-8](#)) as described in [Table 8-7](#). (Similar to Report Type windows, the only difference in these two windows is whether they include data.)

Figure 8-8. New Command window

Figure 8-9. Edit Command window

Table 8-7. Command window field descriptions (page 1 of 2)

| Field Name | Description |
|------------|---|
| Command | Specify a brief name for the command. Type any alphanumeric string. |
| Condition | Specify the conditions that determine whether the command steps for the command are executed or not. See the <i>Commands, Tokens, and Validations Guide and Reference</i> for details on the types of conditions that can be used. |

Table 8-7. Command window field descriptions (page 2 of 2)

| Field Name | Description |
|-------------|---|
| Description | Specify a brief description of the command. Type any alphanumeric string. |
| Timeout(s) | Specify the amount of time (in seconds) the command will be allowed to run before its process is terminated. This mechanism allows commands that are hanging, or taking much more than the normal amount of time, to be aborted. |
| Enabled | Indicate whether or not the command is enabled for execution. |

Security Tab

Use the **Security** tab to control which users can create or view reports of this report type. Security can be established using one of the following options:

- Viewable by creator only
- Viewable by selected security groups
- Viewable by users with the System: Submit Reports access grant

View or modify each field on the Security tab as described in [Table 8-8](#).

Note

The report manager (any Mercury IT Governance Center user with the System: Edit All Reports access grant) has permission to override the security group settings.

Figure 8-10. Report Type window Security tab

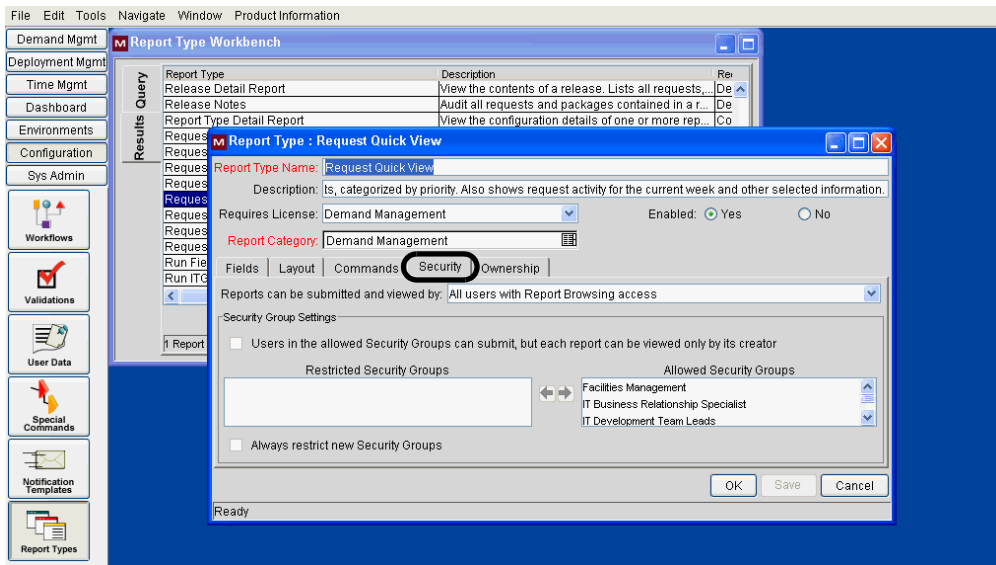

Table 8-8. Report Type window Security tab field descriptions

| Field Name | Description |
|---|---|
| Reports can be submitted and viewed by | <p>Select the users who can use this report. Choices include:</p> <ul style="list-style-type: none"> All users with Report Browsing access (meaning users with the System: Submit Reports access grant) <p>Only users in the allowed Security Groups</p> |
| <p>The following fields are enabled only when the value for Reports can be submitted and viewed by is set to Only users in the allowed Security Groups.</p> | |
| Users in the allowed Security Groups can submit, but each report can only be viewed by its creator | <p>Indicate whether the results of the report are can be viewed only by its creator.</p> |
| Restricted Security Groups | <p>Select the one (or more) security groups that are restricted from using this report type.</p> |
| Allowed Security Groups | <p>Select the one (or more) security groups that are allowed to use this report type.</p> |
| Always restrict new Security Groups | <p>Indicate whether any new security groups are automatically added to the list of Restricted Security Groups.</p> |

Ownership Tab

Members of ownership groups are the only users who have the right to edit, copy, or delete this report type.

Use the **Ownership** tab to view and edit ownership groups for the given report type. View or modify each field on the **Ownership** tab as described in [Table 8-9](#).

Tip

See the *Security Model Guide and Reference* for more information about setting ownership for a new or existing report type.

Figure 8-11. Report Type window Ownership tab

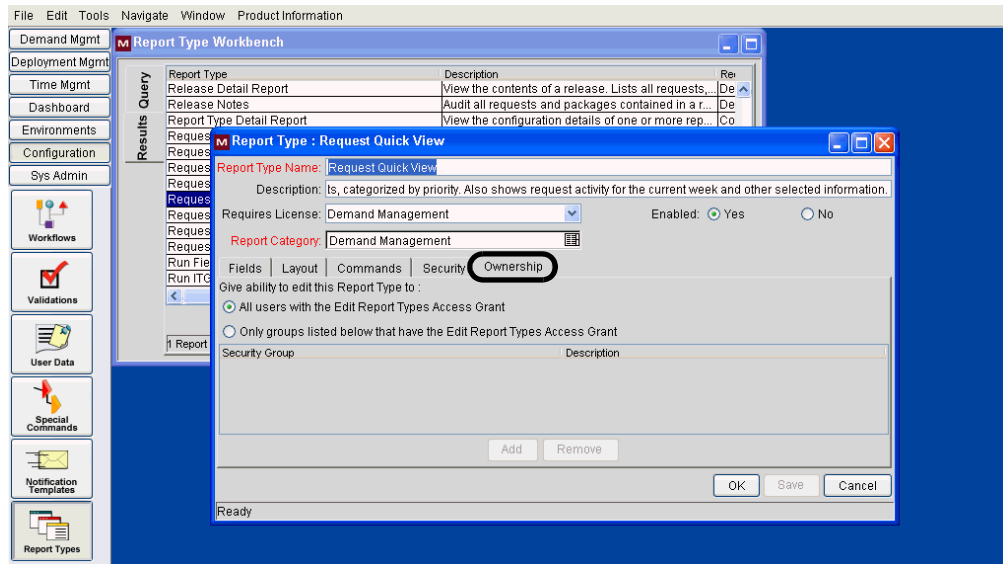

Table 8-9. Report Type window Ownership tab field descriptions

| Field Name | Description |
|--|--|
| Give ability to edit this Report Type to | <p>Indicate who should have the ability to copy, edit, or delete this report type.</p> <p>Choices include:</p> <ul style="list-style-type: none"> ■ All users with the Edit Report Types Access Grant. Enables all users with the Edit Report Type access grant. ■ Only Groups listed below that have the Edit Report Types Access Grant. Limits the users to members of the group listed in the panel below this field. Use the Add and Remove buttons to manage this list. |
