

ADDITIONAL LICENSE RESTRICTIONS

For HP Inventory Management Software Starter Edition, HP Operations Orchestration, HP Server Automation, HP Storage Essentials Server Automation, HP Service Automation Visualizer, HP Service Automation Reporter and HP Network Automation

In addition to HP's standard terms and conditions (the "Agreement") the following license restrictions are applicable:

1. DEFINITIONS:

Capitalized terms not otherwise defined in this Additional License Restrictions document are defined in the Agreement.

"Agent" means that portion of the Software that manages and is required for each physical server, virtual server or container.

"ASA Managed Storage Element" means a storage element managed by Application Storage Automation that is imported in to Service Automation Reporter.

"Connector" means an integration element to a certain software, format or function through use of the HP Software Product.

"Device" means an addressable item including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device or printer that resides within the range defined for interrogation and asset tracking.

"Network Node" means a managed Device (module) that has its own configuration. Note: Network Devices and Nodes are not always the same thing. e.g., a switch (one network Device) may have three nodes: one switching card, one routing card and one backup routing card.

"Named User" means a specific individual authorized by Customer to access the Software regardless of whether they are actively using the Software.

"PA Device" means a Device, but specifically excluding Network Nodes.

"Reported Server Element" means an element under management by Service Automation that is imported into Service Automation Reporter.

"Reported Non-Server Element" means an element that is either under an NA Node or an Application Storage Automation Managed Storage element that is imported into Service Automation Reporter.

"SA Agent" means an Agent that is designed to interoperate with the Server Automation core.

"Server" means any designated computer system in which an instance or instances of the Software is installed.

"Shift User" means a user that has the right to use the product on each of three (3) shifts. It is the equivalent of one (1) shift worker regardless of shift, and supports three (3) specific individuals working non-overlapping shifts.

"Workflow Author User" means an administrator who is authorized to author and edit Process Automation workflows

"Universal Agent" means an Agent running on a single Windows, Linux, Unix or VMware ESX instance – physical or virtual – or a single Solaris 10 container.

"Virtual Machine(s)" or "VM(s)" means a computer(s) that does not physically exist but is simulated by another computer.

2. SOFTWARE SPECIFIC TERMS

Oracle for HP Server Automation Software

Oracle for HP Server Automation Software can only be used in conjunction with HP Server Automation Software. The Oracle Software can not be used stand alone.

3. GENERAL TERMS

If Licensee elects to move its data center operations to another facility, Licensee may use the Software simultaneously at the initial location and replacement location for as long as reasonably necessary (not to exceed six (6) months) to transition data centers, without additional license fees.

Licensee is licensed to use only those components/functions of the Software that are identified in a purchase order and paid for by Licensee.

HP Operations Orchestration Core for Integration Only is restricted to integration of HP Server Automation or HP Network Automation with ticketing or monitoring systems, and may not be used for alert/incident resolution automation or other broader Run Book Automation use cases.
