Foreword

The InfraCenter for Workgroups software suite comes with the following applications:

- AssetCenter
- Connect-It
- Remote Control
- Desktop Administration Server
- Desktop Agents
- InfraCenter for Workgroups Web

For last-minute information that could not make it to the guides of these applications, refer to the **readme.txt** file, provided with each application.

The **readme.txt** files are located in the installation folder of each application.

1 | What's in these Release Notes?

CHAPTER

These Release Notes include information about:

- The available documentation.
- The compatibility matrix.
- The new functions of the version 4.3.0.
- The bugs corrected between the version 3.0.1 and the version 4.3.0.
- Peregrine Systems contact details for further assistance.

2 | Documentation

CHAPTER

Besides this document, InfraCenter for Workgroups 4.3.0 also comes with the following guides:

- InfraCenter for Workgroups **Introduction** guide.
- AssetCenter guides.
- Connect-It guides.
- Remote Control guides.

In most cases, these documents are available in the following formats:

- A compiled, online format called **chm**, which can be accessed directly from the applications.
- An Adobe Acrobat format. To maximize your viewing potential, we recommend that you download the Acrobat Reader version 5.x software, available at no cost from the following address:
<http://www.adobe.com/products/acrobat/readermain.html>.

The documents are also available and can be downloaded from the Peregrine Systems support site: <http://support.peregrine.com>.

You will need the current login and password to access this page.

You can also order a print version of these documents from your usual Peregrine Systems contact.

3 | Compatibility matrix

CHAPTER

The compatibility matrix of InfraCenter for Workgroups 4.3.0 is available on the Peregrine Systems customer support site, at the following address:

<http://support.peregrine.com>.

You will need the current login and password to access this page.

4 | Appearance of the new functions

CHAPTER

The contents of the InfraCenter for Workgroups application have been modified in the following ways:

- The remote scans using AssetCenter are no longer specifically dependent on the integration of AssetCenter with InfraTools Desktop Discovery and Remote Control.

AssetCenter henceforth uses the **Desktop Administration** module, and calls on the Desktop Administration Server server as well as the Desktop Agents agents.

The scan is executed using the deployment workflows (which are different from the standard AssetCenter workflows).

These deployment workflows can choose which tool to use: InfraTools Desktop Discovery or Desktop Inventory, for example.

These new functions and their implementations are described in the AssetCenter **Desktop Administration** guide.

- The Remote Control agent is henceforth part of the Desktop Agents application.

To learn about the new functional modifications of a given application, consult its release notes.

5 | Table of fixed defects

CHAPTER

To learn about the bugs corrected in any of the InfraCenter for Workgroups applications, consult the release notes corresponding to each application.

6 | Contact details for further assistance

CHAPTER

For further information and assistance with this release of InfraCenter for Workgroups, please contact Peregrine Systems' Customer Support at <http://support.peregrine.com>.

You will need the current login and password to access this page.
