Foreword

PREFACE

AssetCenter 4.3.1 includes a large number of bug fixes.

For late-breaking information that could not make it to this document or inside the AssetCenter documentation, please refer to the **Readme.txt** file located in the AssetCenter installation folder.

1 | What's in these Release Notes?

CHAPTER

These Release Notes include:

- Notes on related documentation, including a compatibility matrix for AssetCenter.
- A partial list of new functionality added in versions 4.x.
- A detailed description of the configuration files of AssetCenter,
- A list of bugs corrected between the 4.0.0 version and the 4.3.1 version.
- Contact details for further assistance.

2 | Related documentation and compatibility matrix

CHAPTER

Related documentation

AssetCenter 4.3.1 is provided with the following documentation:

- Installation
- Concepts and implementation
- User Interface
- Core Tables
- Catalog
- Portfolio
- Contracts
- Procurement
- Financials
- Cable and Circuit
- Reconciliation
- Administration
- Advanced use
- Bar-code inventory

- Desktop Administration
- Differences between versions 3.x and 4.x
- Migration
- Programmer's Reference
- AssetCenter Web

The whole of this documentation is available in the following formats:

- Compiled on-line help in **chm** format, accessible directly from the application,
 - A version in Adobe Acrobat format. To view these files in the best possible conditions, we recommend downloading and installing Acrobat Reader version 5.x, which is freely available for download at the following address:
<http://www.adobe.com/products/acrobat/readstep2.html>
-

The manuals in Adobe Acrobat format are available in the **docs** folder, located at the root of the AssetCenter installation CD.

AssetCenter also offers:

- An on-line help on scripts and functions, the contents of which is similar to the **Programmer's Reference**. This on-line help is available in script builder windows only. You can access it by pressing **F1**.
- A module-by-module description of the physical data model. To consult it, open the file **PhysicalDataModels.pdf** located in the **doc\pdf** folder of the AssetCenter installation folder.
- An on-line help on the structure of the database. This help is not directly accessible from AssetCenter. To consult this, open the **dbstruct.chm** file located in the **doc\chm** folder of the AssetCenter installation folder.
- Contextual help for fields and links in the database. Go to a field or a link. You can either:
 - Press **Shift+F1**,
 - Right click the field and then select **Help on this field** from the contextual menu

Full documentation for AssetCenter 4.3.1 can also be downloaded from the Peregrine Systems support site, at the following address:

<http://support.peregrine.com>.

You will need the current login and password to access this page.

You can also order printed copies of the documentation through your Peregrine Systems sales representative.

Compatibility Matrix

A compatibility matrix, which identifies the hardware and software requirements for using AssetCenter 4.3.1, is also available on the Customer Support Web site at: <http://support.peregrine.com>

You will need the current login and password to access this page.

3 | Overview of new functionality

CHAPTER

The following list includes most new features in versions 4.x of AssetCenter (for full details, refer to the relevant documents provided with AssetCenter):

Version 4.3.1

- No notable changes to functionality in this version.

History - Version 4.3.0

- Multilingual implementation for AssetCenter clients. Refer to the **Administration** guide.
- Archival functionality for database records. Refer to the **Administration** guide.
- Extended management of licenses and software installations. Refer to the **Portfolio** guide.
- New data-reconciliation module. Refer to the **Reconciliation** guide.

- Ability to group records and create a virtual hierarchy. Refer to the **User interface** guide.
- Generic overflow mechanism. Refer to the **Administration** guide, section **Overflow tables**.
- Simplified migration process.
- Query wizard (QBE). Refer to the **User interface** guide, section **Query wizard (QBE)** and the **Advanced use** guide, section **Example of creating a query wizard (QBE)**.

History - Version 4.2.1

- **AssetCenter Web:** Certain menus and pages have been added or improved.
- **Management of AssetCenter database connections:** A distinction is now made between **system** connections and **user** connections.
- **Inheritance of features:** The list of cases in which inheritance is applied has been modified.

History - Version 4.2.0

- Optimized support for IBM DB2 UDB. For further information, refer to the compatibility matrix and the AssetCenter Installation guide.
- Support for Unix now extended to IBM AIX. For further information, refer to the compatibility matrix.
- The planner viewer. For further information, refer to the the AssetCenter User Interface guide.

History - Version 4.1.0

- Significant improvements to database editing functions: support of hierarchic tables, features, monetary fields, etc.
- Dedicated screens for certain portfolio items: computers, telephones, etc.
- Full migration support for a previous version of d'AssetCenter,
- Tool dedicated to migrating the database: Peregrine Script Analyzer.
- Unix support in non-graphic mode.

- Support of the following seven languages for the graphical interface and the documentation: English, French, German, Italian, Japanese, Polish and Spanish.
- Improvements to the chargeback module.
- The log viewer is now provided with AssetCenter.

History - Version 4.0.0

- Catalog management
- Extended management of portfolio items: Telephony, computers, etc.
- Database customization: Add new fields, links, etc.
- Customization of screens: Ability to create your own screens to manage specific information,
- Redesign of procurement cycle
- Functional rights: Ability to restrict access to the database according to your own custom functional groups. You can limit access to AssetCenter to a subset of functional areas by user.
- Chargeback functionality,
- In-depth budget management,
- Comprehensive cable management,
- AutoCAD integration,
- Full integration with other Peregrine Systems products: Remote Control, InfraTools Desktop Discovery, Get-Answers, etc.

4 | .ini files

CHAPTER

AssetCenter programs are associated with configuration files (.ini extension).

List of available .ini files

The following is a list of all available .ini files:

Table 4.1. .ini files

Program	.ini file	Description
AssetCenter am.exe	aamdisk43.ini	User display options. You can delete this file if you want to revert to the default screen display options.
	am.ini	AssetCenter options.
AssetCenter Database Administrator AmDb.exe	amdba.ini	AssetCenter Database Administrator options. User display options.

Program	.ini file	Description
AssetCenter Export amexp.exe	amexp.ini	AssetCenter Export options.
amexpl.exe	amexpl.ini	User display options.
AssetCenter Server amsrv.exe	amsrv.ini	AssetCenter Server options. User display options.
	amsrvcf.ini	Parameters for AssetCenter Server running as a web server
aamapi43.dll	aamapi43.ini	Program options.
All programs mentioned above	amdb.ini	List of database connections.

Location of .ini files

.ini files are located in:

- the **Documents and Settings** folder of the Windows user, except for the following files:
 - The **amsrvcf.ini** file is located in the **amsrv/bin** sub-folder of AssetCenter installation folder.
 - The **amdb.ini** file is located:
 - In Windows 2000:
 - 1 in the **Documents and Settings** folder of the user
 - 2 WINDOWS folder
 If this is empty, a file is created in the **Documents and Settings** folder of the user
 - In Windows XP:
 - 1 WINDOWS folder
 - 2 in the **Documents and Settings** folder of the user
 If this is empty, a file is created in the **Documents and Settings** folder of the user
 - In Windows NT 4:
 - 1 WINnt folder
- in the **WINDOWS** folder

Modification of .ini files

Entries in the **.ini** files can be modified:

- By the software: They are saved either when modifications are validated or when the user exits the application. If the user exits the application without using the **File/ Exit** command, modifications are not saved.
- And/ Or manually.

Whenever possible, we recommend modifying the **.ini** file entries using AssetCenter and its associated programs.

However, certain **.ini** file entries can only be created and modified manually.

Manual modifications of the **.ini** files are not trivial and should only be carried out only by knowledgeable users.

The following tables describe the **.ini** file entries you may wish to modify. Those entries can only be modified manually.

Those tables only describe a selection of **.ini** files entries. They are not meant to be exhaustive. The sections and entries not described in this document must not be modified manually.

Boolean entries are described either by "1" or "0". Alternatively, you can also use "True" or "False".

am.ini file entries

[OPTION] section

Table 4.2. [OPTION] section

Entry	Description
bSaveOptionOnExit	Set this entry to "0" if you do not want to save modified entries in the [option] section when you exit AssetCenter. By default, modifications are saved.
g_bAllowFlyCreate	Enables or disables the creation of linked records on the fly: <ul style="list-style-type: none"> • 0: Do not allow creation on-the-fly. • 1: Allow creation on-the-fly. Default value: 1.
CmdComboLines	Limits the number of lines displayed in the views and actions lists you can access via the toolbar.
CNtbkTabCfg.bShowFlyby	Displays ToolTips for tabs in detail screens: <ul style="list-style-type: none"> • 0: No. • 1: Yes.
KeyIniFileName	Specifies the path of the aamdsk43.ini file. <div style="border: 1px solid black; padding: 2px; width: fit-content;">KeyIniFileName=aamdsk43.ini</div> Example: AssetCenter uses a file, aamdsk43.dll , that may be located on a network drive. In this case, it is possible to configure this file as read-only and users will not be able to modify their configuration.
NewMailLastCheck	Time when the AssetCenter messages were last read. Unit: Seconds since the January 1, 1970 at 00:00.
opt_bAskForConcurrentModifications	This entry determines whether AssetCenter displays a confirmation dialog box or not when a user clicks the Modify button while another user is modifying the same record: <ul style="list-style-type: none"> • 1: Display a confirmation dialog box • 0: Do not display the confirmation dialog box and save the modifications automatically.
opt_bCommitDeletesOneByOne	This option is useful when deleting a set of records. If it is activated, AssetCenter erases one record after another (one transaction per record.) Otherwise AssetCenter erases the records in a single transaction. Default value: 0.

Entry	Description
opt_ImportCacheSize	When data is imported using reconciliation keys, this sets the value for the cache memory used to increase import performance. Unit: Number of records found. Default value: 100.
StartSunday	Sets the beginning of a week on Monday (StartSunday=0) or Sunday (StartSunday=1). This option is used with calendars.

[SQL] section

Table 4.3. [SQL] section

Entry	Description
OracleDLL	Sets the name of the Oracle DLL to load in order to dialog with Oracle.

amsrv.ini file entries

[OPTION] section

Table 4.4. [OPTION] section

Entry	Description
MaxRentPerTrans	This entry is used for the generation of rent values. It sets the maximum number of rent calculations per transaction. Default value: 200.
MaxMsgInList	Sets the number of displayed lines in the AssetCenter Server main window list. Default value: 5000.

Entry	Description
<p><Module>LastCheck</p> <p>Where <module> may be set to any of the following values: Alarms, CostCenter, HDAlarms, History, LostVal, Rent, Stats, Stock, TimeZone, UpdateToken, WkGroup, WkGroup <xxx>, WorkflowFinder</p>	<p>The lines suffixed with "LastCheck" correspond to the date of the last module execution. They allow the calculation of the next module execution when AssetCenter Server restarts. It may be useful to erase a line "WkGroup <xxx> LastCheck" (or the "WkGroupLastCheck" line) if an execution group <xxx> does no longer exist (or if a workflow scheme does not exist without an execution group) as the program will not do it automatically.</p>

amsrvcf.ini file entries

amsrvcf.ini file entries are self-described in the file created with the installation.

amexp.ini file entries

[OPTION] section

Table 4.5. [OPTION] section

Entry	Description
MaxOldDoc	Maximum number of previous documents displayed in the File menu.

amdb.ini file entries

You may have to modify the following entries for each section describing an AssetCenter connection:

Table 4.6. amdb.ini file entries

Entry	Description
AmApiDll	Sets the path to the aamapi43.dll API DLL for AssetCenter. This entry is useful with Connect-It and OAA.
FetchingArraySize	Number of lines to retrieve by packets when executing SQL orders. Default value: 80.
OdbcLockingTime	For a Microsoft SQL Server or a Sybase SQL Anywhere database, sets time for a record to be considered as locked by an other user. Unit: Seconds. Default value: 60. Warning: If the value is too low, the import process may be interrupted when run on an overloaded server.
OldStyleCatalog	With an Oracle database, this entry enables you to force the use of the "Tab" view instead of the default "All_Catalog" view. This entry can be set to one of two values: <ul style="list-style-type: none"> • 1: "Tab" use • 0: "All-Catalog" use
PostConnectSql	Indicates which SQL string to use after a database connection. Example of use: To open a SQL Anywhere 5.0 database with a SQL Anywhere 5.5 runtime, you have to add the following line: <code>PostConnectSql=SET OPTION NON_KEYWORDS='LOGIN'</code> At the end of each section describing a database earlier to version 3.0.

5 Summary of corrected bugs

CHAPTER

The following table summarizes the bugs corrected in AssetCenter 4.3.1.

This table contains the following columns:

- Bug number. If you know the bug's number (or the number of the new function) that you want to find, you can quickly identify it that way using this table.
- Description. A brief description of the bug or new function.

Version 4.3.1 (current version)

Bug number	Description
AM1030175944	Problem exporting to Microsoft Excel when a non-English language version of Microsoft Office is used.
AM117165017	Trap when AssetCenter Database Administrator tries to export the structure and data of a table with more than 255 fields (amRequest , for example).

Bug number	Description
AM108193219	Trap when AssetCenter Database Administrator adds fields to a table that already has more than 255 fields when converting a database.
AM630153459	Error when an action executes another action using the API AmExecuteActionByName and the invoked action references a field populated using a system itemized list (Invalid value).
AM114141354	Values displayed in wizards shifted when the first value of the first column is empty (LIST-BOX type link, values called by the API amd-bGetListEx).
AM1015175139	Problem when deleting the port of an asset when the Targ. port field (TargetPort) is empty (Record number XXX from the 'am-Port' table couldn't be updated because it has already been deleted).
AM1118162930	Error when displaying certain Crystal Reports that worked with the ADBC driver before being imported into the AssetCenter database (Crystal error: Error detected by database DLL).
AM102916817	Value 0 sometimes returned instead of the correct value by the CurrentUser.ImplDept-Id link.
AM1016194045	Error when converting empty dates by the wizards (Cannot convert " (type (empty)) to date and time type (incompatible types)).

History - Version 4.3.1 (Build 3264)

Bug number	Description
AM7716830	General protection fault in the "Import computers from an NT domain" wizard in a case of a domain with a lot of machines.
AM611123748	Adjustments not taken into account in some cases of receipt on overflow tables.
AM730105851	Index uniqueness constraint error on the Feature Class table during the migration process.

Bug number	Description
AM8221507	General protection fault when changing the nature of a model.
AM81210217	Index uniqueness constraint error when changing the model of a portfolio item.
AM829153450	Error when deleting a port associated with a remote asset but not associated with a remote port.
AM829154149	A purchase-request wizard functions incorrectly.
AM82193823	Error when selecting the Assets tab in the Fixed Assets table.

History - Version 4.3.0

Bug number	Description
AM926175729	Connections: In Port tab in the Assets and batches screen, the port number disappears when it is linked to a record.
AM123161137	Procurement: Information regarding returns are not displayed in the Tracking tab.
AM930172631	Error while file opened using a Basic script.
AM121142634	Error when using the AssetCenter API DLL or the Connect-It Asset Management connect- or if the amdb.ini file is read-only.
AM619136	Display: In a screen, following the link of a record and modifying it does not update the record.
AM43010438	Connection: The connection slots are not updated when the maximum authorized number is reached for floating users.
AM48144549	The type of the quantity fields has been changed to Double from Floating .
AM424152932	Description string: Error when referencing a unique string.
AM12161492	Portfolio items: Duplicating an asset does not duplicate its links.
AM92131852	Financials: In the Budgetary classifications screen, the Code field is not accessible

Bug number	Description
AM5111114	Procurement: Purchase order wizards: <ul style="list-style-type: none"> The default catalog reference of the model is not specified by default. Not all suppliers are displayed.
AM112115026	Procurement: Creating a work order including a sub-work order creates two unlinked requests.
AM121595842	Wizards: The [CurrentSelection] function does not work.
AM64175835	Workflow: It is not possible to duplicate a workflow
AM1210147	Display: Certain field labels are masked by icons.
AM12618038	Features: When too many features are used, the application becomes unstable.
AM1813439	Script: The FileExists() function does not work.
AM417161310	Procurement: The ordered quantities were not updated in the Tracking tab.
AM219175437	DB2: tablespace syntax badly supported.
AM1024165921	Wizards: Error when the title of the DBEDIT control is empty.
AM93195141	Index: Multi-column triggers used as unique indexes force uniqueness constraint on the first column.

History - Version 4.2.1

Bug number	Description
AM10717814	The Divide a batch wizard associated with the Divide button in the portfolio items detail failed when the portfolio item was a component part of a batch.
AM83019750	Reports could not be displayed from the Functions and favorites .
AM93017469	The Generate a purchase order wizard used the amDbGetString API instead of the amDbGetStringEx API. An error occurred over a certain number of request lines.
AM103015310	When creating a view, the Visible in menus option could not be activated.

Bug number	Description
AM924171119	<p>After using AssetCenter for an extended period of time, windows became slower or even impossible to display.</p> <p>This was due to the fact that the display parameters were stored after the previous parameters instead of replacing them.</p> <p>This eventually finished by saturating the storage space intended for parameters.</p>
AM1014123330	Receiving contracts from a purchase order was not possible.
AM926195018	The Generate a purchase order wizard (from a request) does not function correctly.

History - Version 4.2.0

Bug number	Description
AM95101534	Incorrect alignment of labels.
AM82819929	Error when creating modules in AssetCenter Server. An error message is displayed when the server is restarted.
AM814104920	Calculated fields are no longer allowed in table description strings (computestring).
AM72516226	DDE error when executing macros in Microsoft Excel.
AM2181771	Problem connecting to the database when AssetCenter Server is restarted.
AM6612112	It was possible to create a portfolio item with zero quantity in stock when removing all of remaining in stock.
AM514195424	Problem with new pages in the Assets table referencing fields in the Portfolio Items table: Cannot update a link.
AM512103935	Modifying a system screen precludes the creation of a custom screen.
AM219183645	Correction to DDE scenarios.
AM41685912	Migration process for Japanese databases corrected.
AM118204422	Uniqueness constraint violated when importing features.
AM123163917	Default value for taxes on request lines improved. This requires a full migration when migrating from version 4.1.x to version 4.3.1.

Bug number	Description
AM91224925	Modifying a password can now trigger workflows or generate history lines.

History - Version 4.1.1

Bug number	Description
AM64165951	Improvement to the Purchase-request-creation wizard.
AM6417657	The Purchase-request-creation wizard must also expose the list of models without its associated brand.
AM6417829	Improvement of the Purchase-request-creation wizard when used from an order.
AM6417944	Improvement of the Receiving wizard: Certain information - such as the receiving slip number - has been added.
AM64171052	Improvement of the Invoice-creating wizard.
AM64171447	The wizard is no longer contextual, and it opens the newly created request.
AM517141713	You cannot create an invoice from a request.
AM6417225	Problems with the syntax of the wizards' language (PARAMS node).
AM6417432	Changing the request screen to creation mode without being able to cancel.
AM6417532	In the Tracking tab (procurement cycle), the orders/estimates in preparation are not displayed.
AM522121958	The contract utilizations do not work.
AM64171259	The accounting code is not displayed in the models screen.
AM527152350	The creation of a new record does not empty all the fields but keeps the values of the previously selected record.
AM51310576	The Portfolio link going from the amAsset table does not work correctly when it is referenced in a script (default value, mandatory, etc.).
160435.a	General tab is empty.
160435.b	Application tab is not visible in the Computers screen.
160435.c	Screen customization: The tabs added to the screen do not appear in the other screens that display the modified screen in the detail (such as amComputer).
AM531191423	Customization: If a 1-n link is added and a page exposes this link's information, an error message is displayed when the table is opened.
AM515134940	Datakit information is not taken into account in the migration process.
AM66121547	Cannot create the detail forms.
AM66135631	Problem creating expense lines.

Bug number	Description
AM6613592	Problem building certain commands (created with a command-building wizard).
AM411134322	Missing access rights for the extension of a web application.
AM6491025	Problems updating a field.
AM619101231	Cannot create a page without a name (screen creation).
AM415173847	Problems in the migration tool interface.
AM5381451	You cannot diagnose or repair a 4.0.0 database in AssetCenter Database Administrator 4.1.1.
AM617143127	When you duplicate a screen, the value of the new screen's functional domain is forced (Portfolio).
AM617144122	Migration failure of tables with hierarchical structures.
AM617143340	Cannot add a link whose users type is "Comment" to a page.
AM61714393	Modification of a table name's letter case during its creation.

History - Version 4.1.0

Bug number	Description
AM4316737	The AssetTag field is not properly propagated.
AM21115280	You cannot add an OwnCopy type link to a tab.
AM61513817	Returned assets have an erroneous acquisition status.
AM64163334	A problem occurs when repairing the database (broken links).
AM21492546	Incomplete data rollback (in AssetCenter Database Administrator) when an error arises during the update.
AM319105316	Default values are not propagated between the table of requests and the table of orders.
AM319141114	General protection fault during operations on products having a unit.
AM37182657	Received quantities do not conform to ordered quantities.
AM31174257	The AmCreateReturnFromReceipt() function does not work correctly.
AM312152116	Cannot create monetary fields when editing the database.
AM9139525	A problem occurs when renewing assets under a lease contract. The rents and the rates are not correctly propagated to the assets under contract.
AM211151036	General protection fault if the Relevance of a system button is set to No .
AM22091349	A problem occurs when creating a new field whose SQL name starts with a number.
AM1123111915	The database-connection screen appears too small in Windows XP.
AM1149443	No log files are saved during the import.
