

HP Data Protector A.06.1x

Disaster recovery support matrix

Version: 1.4

Date: March 2010

The purpose of the disaster recovery feature is to provide Data Protector with a basic runtime environment (disk access, file system access, network access, tape access, Win32 API on 32-bit Windows systems), and partitioning scheme identical to the one extant at the time when the system was backed up.

Note: Microsoft Cluster Server and Microsoft Majority Node Set Cluster can be recovered using any disaster recovery method except for Disk Delivery.

Supported disaster recovery types – Windows					
Disaster recovery type	Operating system				
	Windows 2000	Windows XP (x86)	Windows XP (x64)	Windows Vista (x86)	Windows Vista (x64)
Assisted Manual Disaster Recovery	supported	supported	supported	not supported	not supported
