In This Version

The new features added are as follows:

* Support for HP Operations Manager for Linux 9.01.

Documentation Updates

The first page of this release notes document contains the following identifying information:

* Version number, which indicates the software version.

* Publish date, which changes each time the document is updated.

To check for recent updates or to verify that you are using the most recent edition, visit the following URL:

http://h20230.www2.hp.com/selfsolve/manuals

This site requires that you register for an HP Passport and sign-in. To register for an HP Passport ID, go to:

http://h20229.www2.hp.com/passport-registration.html

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

NOTE: To view files in PDF format (`*.pdf`), Adobe Acrobat Reader must be installed on your system. To download Adobe Acrobat Reader, go to the following web site: **http://www.adobe.com/**

Installation Notes

Installation requirements, as well as instructions for installing the Web Servers SPI are documented in the *HP Operations Smart Plug-ins for Web Servers Installation and Configuration Guide* provided in Adobe Acrobat (.pdf) format.

Verified Environments

This release of Web Servers SPI supports HP Operations Manager on UNIX management server versions 9.0x. Refer to the Support Matrix (SUMA) link **http://support.openview.hp.com/selfsolve/document/KM323488** for the supported operating systems, platforms, and web servers.

For information on the archived obsolescence programs, refer to the Obsolescence Archive link **http://support.openview.hp.com/encore/om_spis_2009.jsp**.

Local Language Support

The SPI installers obtain the HPOM for UNIX locale from the ctrl.env namespace before proceeding with the SPI installation. Verify if the namespace has been set using the following command:

`# /opt/OV/bin/ovconfget ctrl.env LANG`

If the ctrl.env namespace is not set by the HPOM, run the following command on the HPOM Server before starting the SPI installation:

`# ovconfchg -ns ctrl.env -set LANG <HPOM locale>` where *<HPOM locale>* could be C, ja_JP, ko_KR, or zh_CN

Example: **`ovconfchg -ns ctrl.env -set LANG ja_JP`**

Depending on the *<HPOM locale>* value, the LANG variable in the ctrl.env namespace will be set to C.utf8, ja_JP.utf8, ko_KR.utf8, or zh_CN.utf8.

Support

You can visit the HP Software support web site at: **www.hp.com/go/hpsoftwaresupport**

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online software support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services

- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require an active support contract. To find more information about support access levels, go to the following URL:

http://h20230.www2.hp.com/new_access_levels.jsp

To register for an HP Passport ID, go to the following URL:

http://h20229.www2.hp.com/passport-registration.html
