Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
 - The number before the period identifies the major release number.
 - The first number after the period identifies the minor release number.
 - The second number after the period represents the minor-minor release number.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition, visit:

<http://h20230.www2.hp.com/selfsolve/manuals>

This site requires that you register for an HP Passport and sign-in. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated and new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

Table 1 indicates changes made to this document for Version 7.90.

Table 1 Document Changes for this Version

Chapter	Version	Change
All	7.90	Rebranded for 7.90.
Chapter 1	7.90	Page 6, Upgrade Instructions , the installation media path is changed from Configuration Server\management_infrastructure\administrator_workstation\ to Media\admin\default\.

Support

You can visit the HP Software support web site at:

www.hp.com/go/hpsoftwaresupport

This Web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online software support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract.

To find more information about access levels, go to:

http://h20230.www2.hp.com/new_access_levels.jsp

To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

1 Upgrading the HP Client Automation Administrator

If you are migrating from a version 7.2x, 7.5x, or 7.8x HPCA Core and Satellite environment, refer to the *HPCA Enterprise Edition Migration Guide* for migration instructions.

Upgrade Instructions

An Agent upgrade will remove a previous version of the Administrator if one is installed on the device.

To upgrade the HPCA Administrator for Windows

- Install the new HPCA Administrator by running `setup.exe` from the `Media\admin\default\win32` directory on the HP Client Automation installation media.

The existing HPCA Administrator files are replaced during the new installation. You do not need to remove these files prior to installation.

However, if you remove the previous Administrator, and then run `setup.exe`, the HPCA Administrator will install to the default directory:

```
SystemDrive:\Program Files\Hewlett-Packard\HPCA\Agent
```

See the "Administrator for Windows" chapter in the *HPCA Administrator User Guide* for detailed information about how to use the installation.

To upgrade the HPCA Administrator for Linux and Macintosh

- Install the new HPCA Administrator using `./install` from the correct operating system-specific directory in the

```
Media/admin/default
```

directory on the HP Client Automation installation media.

For Red Hat Linux, use the installation media located in:

```
Media/admin/default/linux
```

For Mac OS, use the installation media located in:

```
Media/admin/default/macx86
```

The existing HPCA Administrator files are replaced during the new installation. You do not need to remove these files prior to installation.

However, if you remove the previous Administrator, and then run `setup.exe`, the HPCA Administrator will install to the default directory: `/opt/HP/CM/Agent`.

Chapter 1

See the "Administrator for Linux and Macintosh" chapter in the *HPCA Administrator User Guide* for detailed information about how to use the installation.
