Preface

Intended Audience

Prior knowledge of Service Manager and related knowledge is required.

Software Versions

The software versions referred to in this document are as follows:

IPM	Operation system
1.0	Server: Windows2003/2008 Client: Windows XP, Vista, Windows 7

Service Manager version:7.11/9.20

Support

Please visit our HP Software Web site at:
<http://www.hp.com/go/hpsoftwaresupport> for contact information, and details about HP Software products, services and support.

- Troubleshooting information
- Patches and updates
- Problem reporting

- Support program information

Chapter 1 Intervention Management Module

1.1 Install Intervention Management Kit

Install the intervention management kit (for merge customization function),the following will be added to system manage.

Filename	Name	Note
dbdict	probsummarytask	
format	probsummarytask probsummarytask.g probsummarytask.choose probsummarytask.incident.description probsummarytask.incident.log probsummarytask.operator.contact probsummarytask.qbe probsummarytask.related advFind.intervention.search sc.manage.intervention.g	
formactrl	probsummarytask	
link	probsummarytask	
Object	probsummarytask	
States	probsummarytask.view probsummarytask.search	
Process	probsummarytask.view probsummarytask.sort filter.activity.intervention probsummarytask.cancel	
displayscreen	probsummarytask.view probsummarytask.choose apm.search.probsummarytask.display	
displayoption	apm.edit.problem_newintervention apm.search.probsummarytask.display_* probsummarytask.choose_* probsummarytask.view_* scm.advanced_newintervention	
Wizard	Add Intervention Choose	
ToDoMap	probsummarytask	
cascadeupd	probsummarytask	
SearchConfig	probsummarytask	
number	probsummarytask	

scmessage	class="intervention" class="fc" and message.id#"230" class="SearchConfig" and message.id#"probsummarytask" class="tablename" and message.id="probsummarytask"	
Trigger	after.probsummarytask.update

Inbox	Active Interventions My Active Interventions	

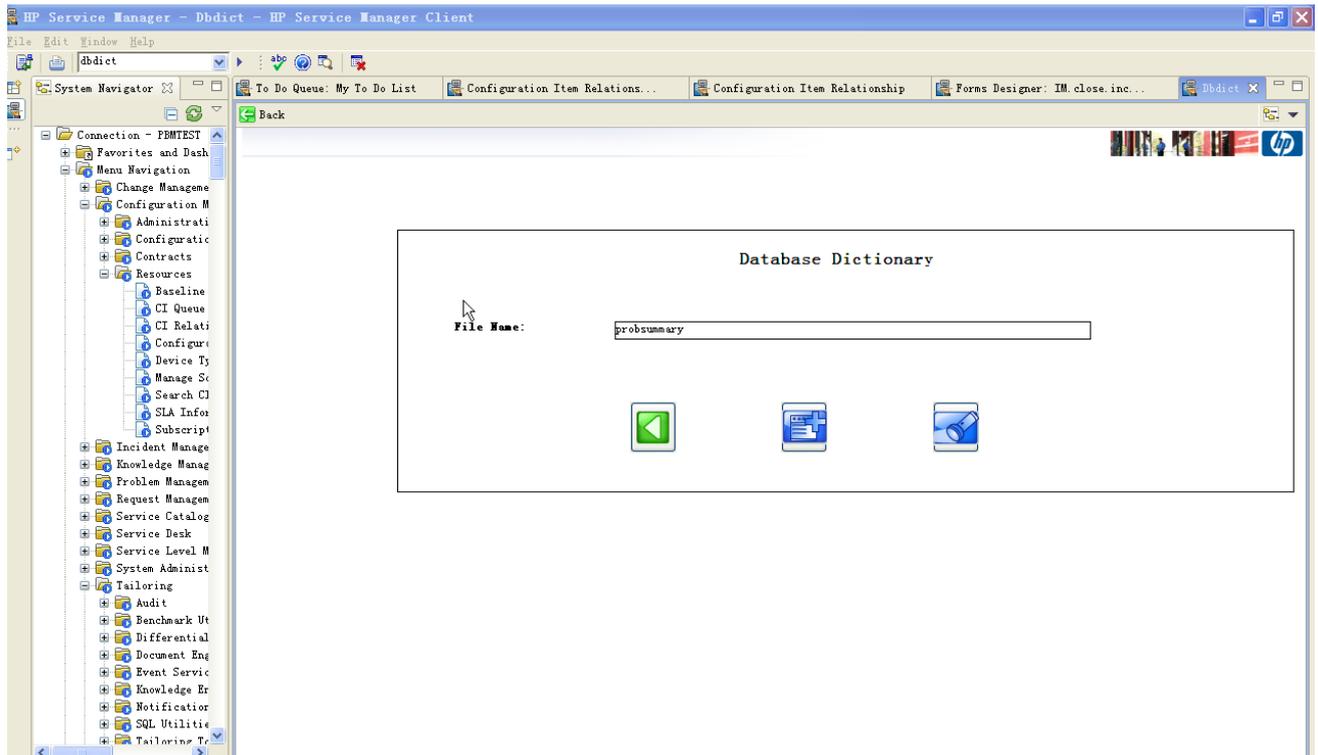

1.2 Customization

The following need to be manually updated in SM.

Filename	Name	Note
dbdict	probsummary	alias number
dbdict	pmenv	Add fields: intervention.cancel intervention.close intervention.contact intervention.external intervention.open intervention.update intervention.page
format	IIM.update.incident IM.close.incident pm.profile.g	Add intervention related form and profile
menu	IM	
pmenv	sysadmin	
link	probsummary	
displayoption	id="apm.edit.problem_close" id="apm.edit.problem_close.bg"	

1.2.1 Update dbdict probsummary

Enter 'dbdict' in command line, input 'probsummary'

Create alias 'number.vj.intervention' for number.

Name	Type	Level	Index	SQL Name	SQL Type	SQL Table
descriptor	structure	0	1			
number	character	1	1	NUMBER	VARCHAR2 (90)	m1
number.attach	character	1	1			
number.vj	character	1	1			
number.vj.alerts	character	1	1			
number.vj.intervention	character	1	1			
number.vj.sla	character	1	1			
number.vj.slo	character	1	1			
vj.number.1	character	1	1			
vj.number.2	character	1	1			
vj.number.3	character	1	1			
vj.number.4	character	1	1			
vj.number.5	character	1	1			
vj.number.6	character	1	1			
vj.number.alarm	character	1	1			
category	character	1	2	CATEGORY	VARCHAR2 (50)	m1
open.time	date/time	1	3	OPEN_TIME	DATE	m1
opened.by	character	1	4	OPENED_BY	VARCHAR2 (50)	m1
priority.code	character	1	5	PRIORITY_CODE	VARCHAR2 (40)	m1
severity	character	1	6	SEVERITY	VARCHAR2 (50)	m1
update.time	date/time	1	7	UPDATE_TIME	DATE	m1
assignment	character	1	8	ASSIGNMENT	VARCHAR2 (50)	m1
referral.time	date/time	1	9	REFERRAL_TIME	DATE	m1
referred.to	character	1	10	REFERRED_TO	VARCHAR2 (140)	m1

1.2.2 Update probsummary link

Enter 'link' in command line, input 'probsummary'

1.2.3 Update IM.update.incident form

Enter 'fd' in command line, and search IM.update.incident, Click Design. You will go to the design form.

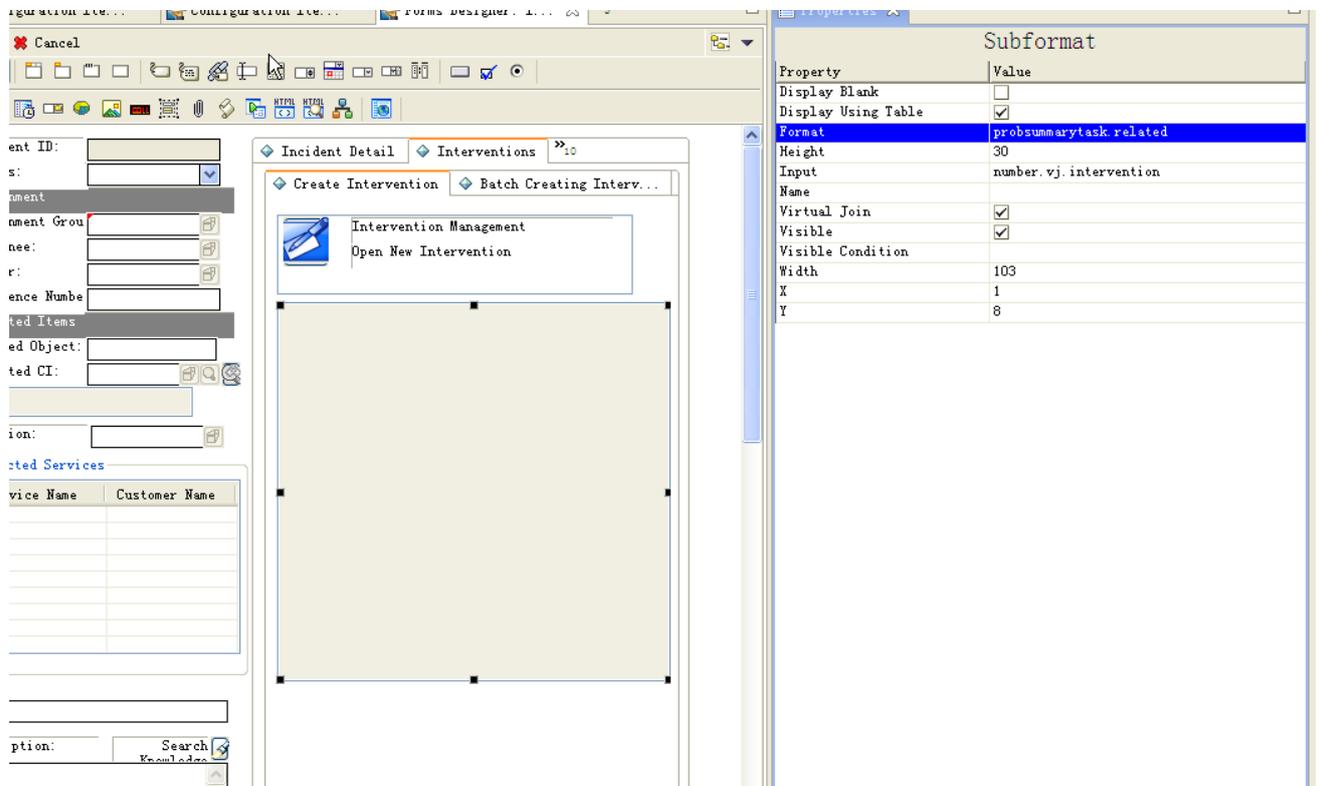

1) Add 'Create Intervention' notebook Tab.

2) Add Open new intervention button with button id 642.

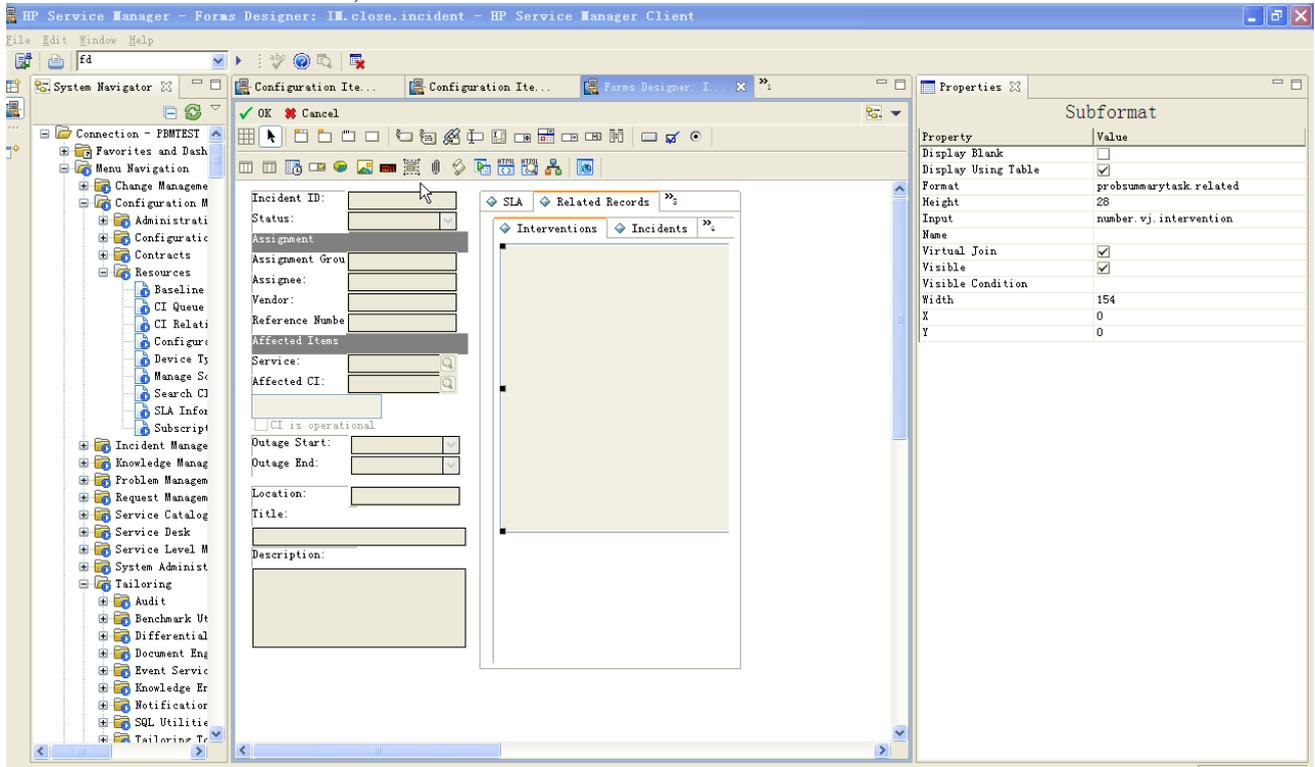

3) Add subform which point to 'probsummarytask.related' input: number.vj.intervention.

1.2.4 Update IM.close.incident form

Enter 'fd' in command line, and search IM.close.incident, Click Design. You will go to the design form.

Go to 'Related Records', Add 'Interventions' notebook Tab.

1.2.5 Update pmenv file

Go to pmenv table, and add the following fields, which data type is logical:

intervention.cancel

intervention.close

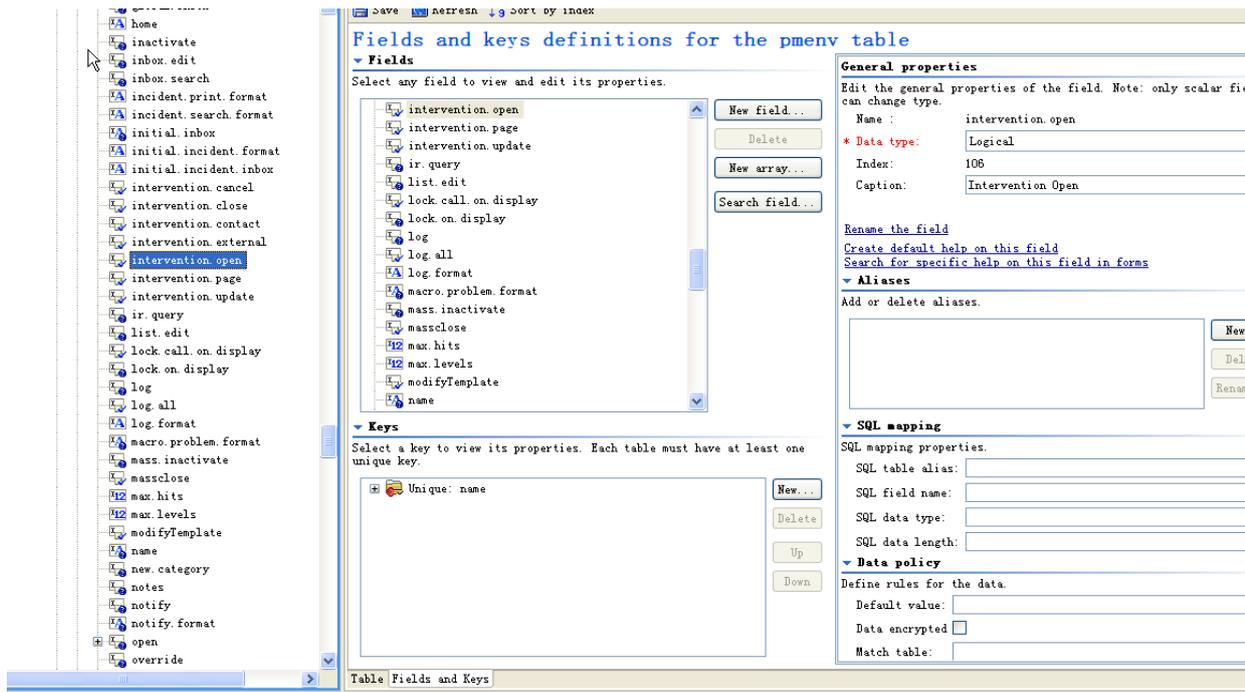

intervention.contact

intervention.external

intervention.open

intervention.update

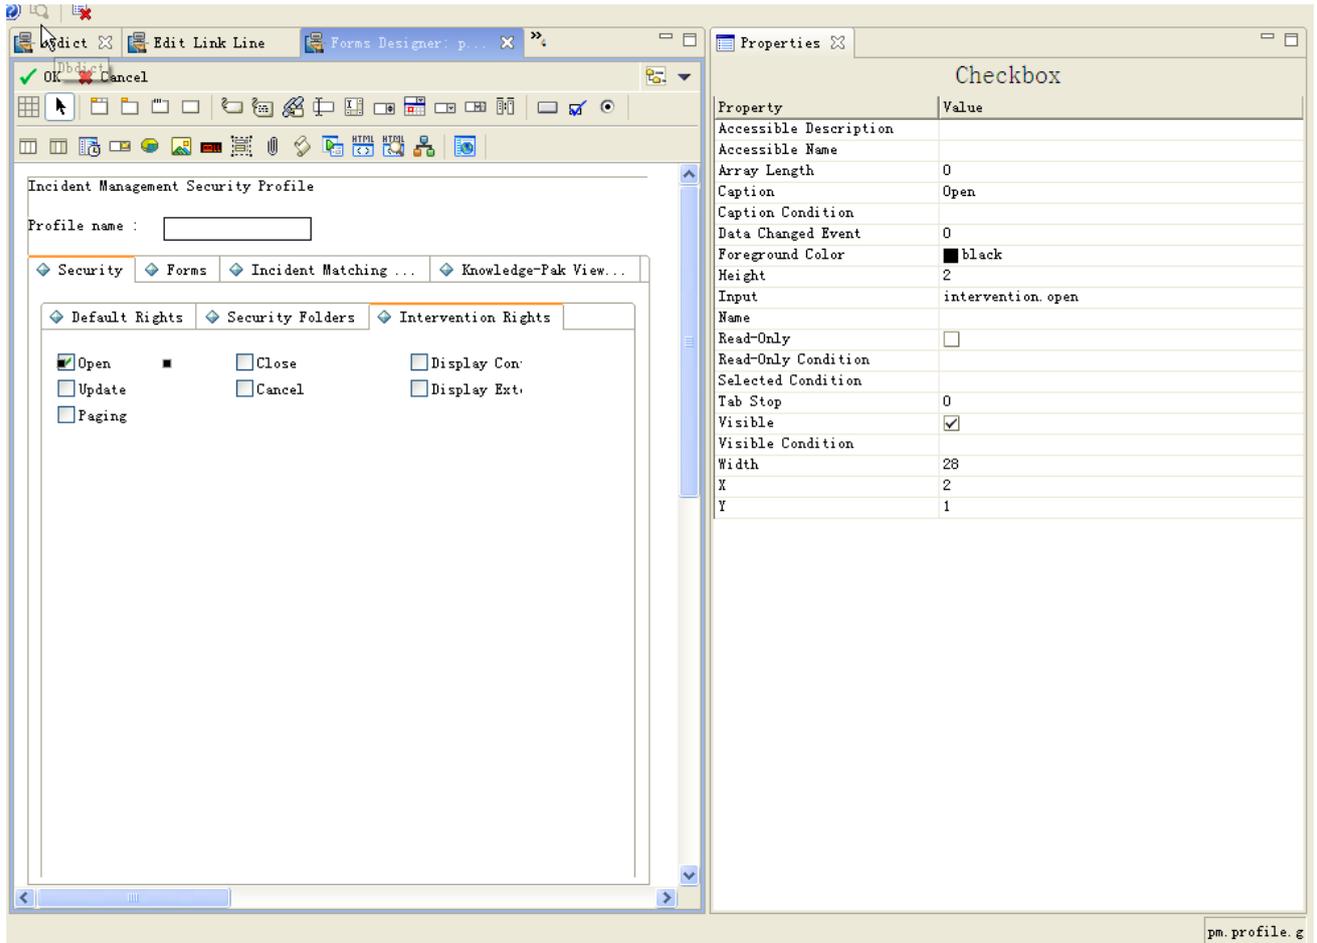

intervention.page

1.2.6 Update pm.profile.g form

Enter 'fd' in command line, and search pm.profile.g, Click Design. You will go to the design form.

Add 'Interventions Rights' notebook Tab, add the following check box with the related input defined in 2-2-5

If you want to give the user intervention privilege, go to System Administration-Profiles-Incident Management Profile, click search, and you can see all roles. Take sysadmin for an example, you can click the check box to give him the related privilege.

HP Service Manager - User Incident Profile: sysadmin - HP Service Manager Client

1.2.7 Update IM menu

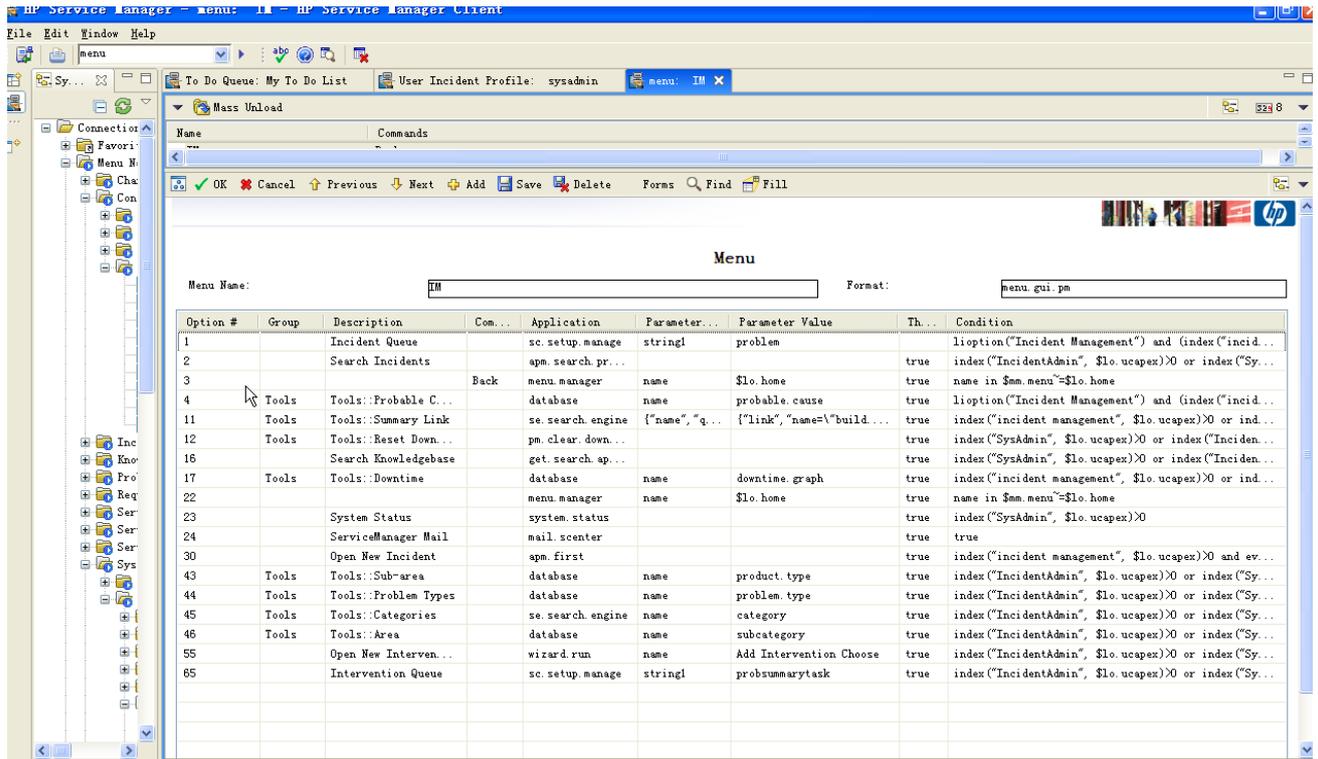

Enter 'menu' in command line, input 'IM', add the bottom two line:

Open New Intervention

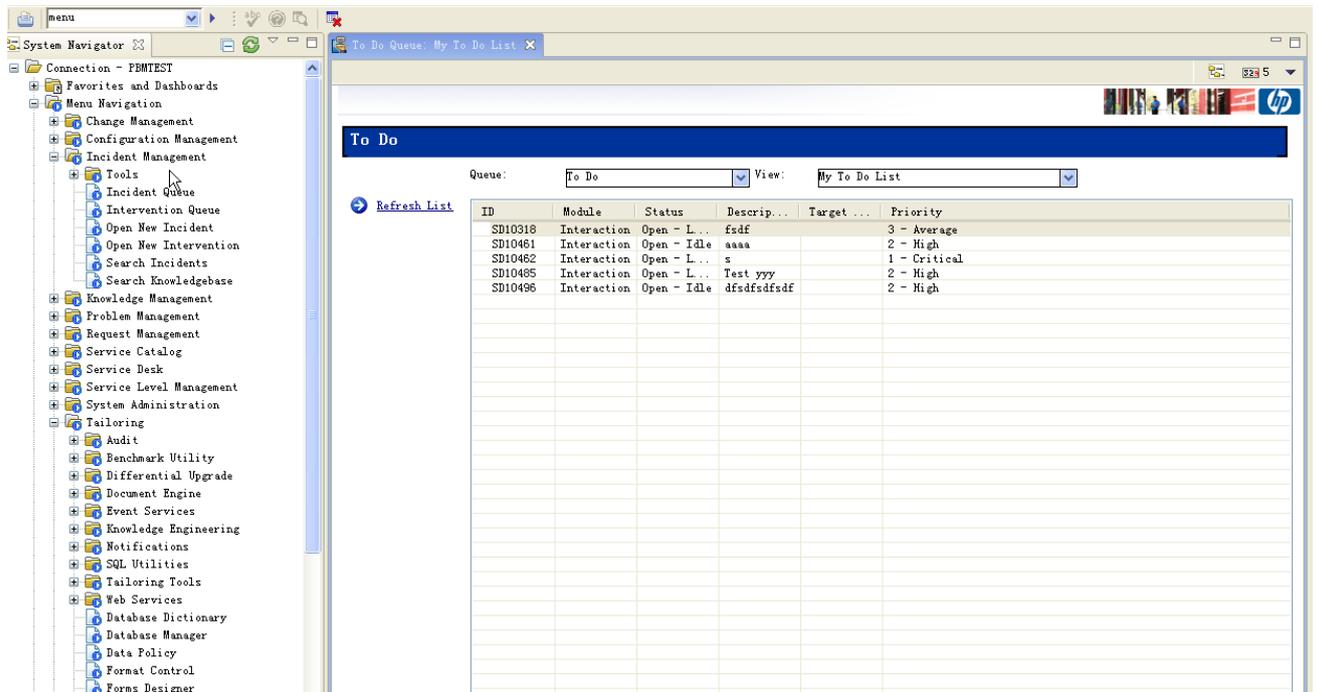

Condition :index("IncidentAdmin", \$lo.ucapex)>0 or index("SysAdmin",
\$lo.ucapex)>0 or index("incident management", \$lo.ucapex)>0

Intervention Queue

Condition: index("IncidentAdmin", \$lo.ucapex)>0 or index("SysAdmin",
\$lo.ucapex)>0 or index("incident management", \$lo.ucapex)>0

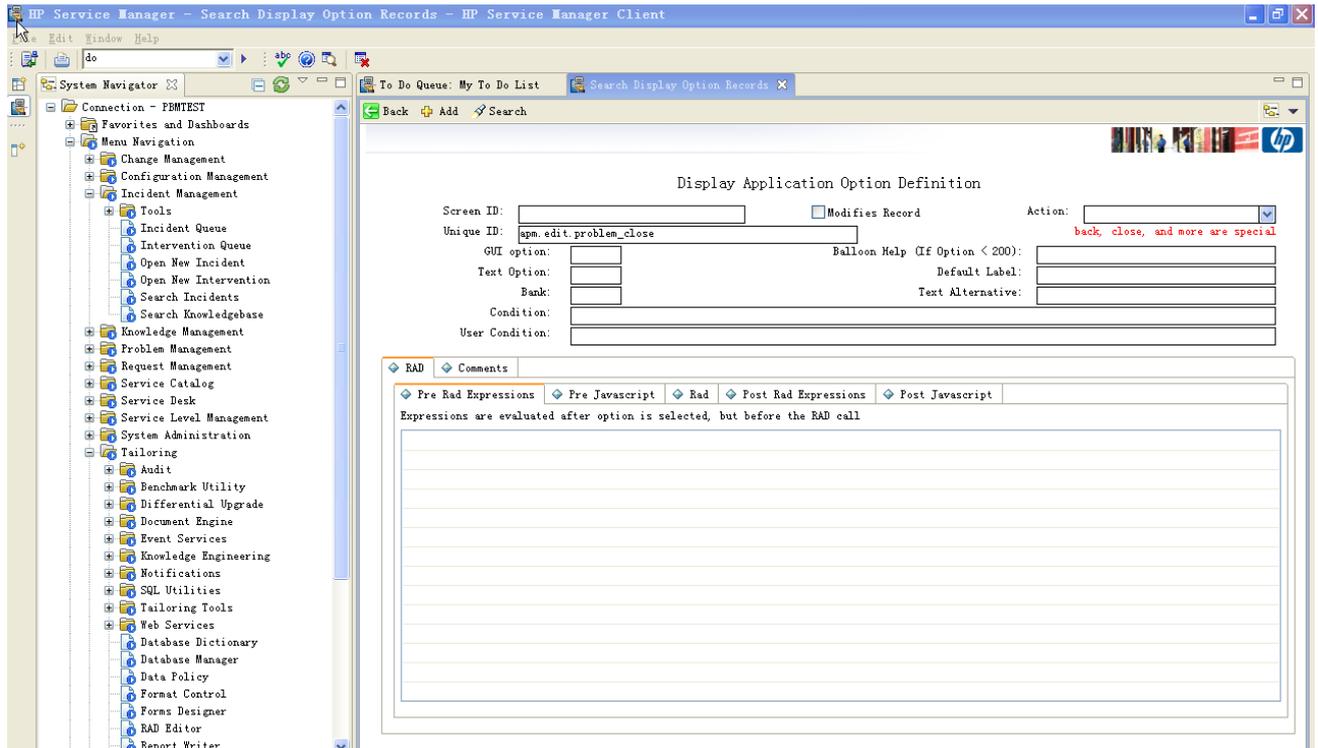

Then you will see the following menu under Incident Management:

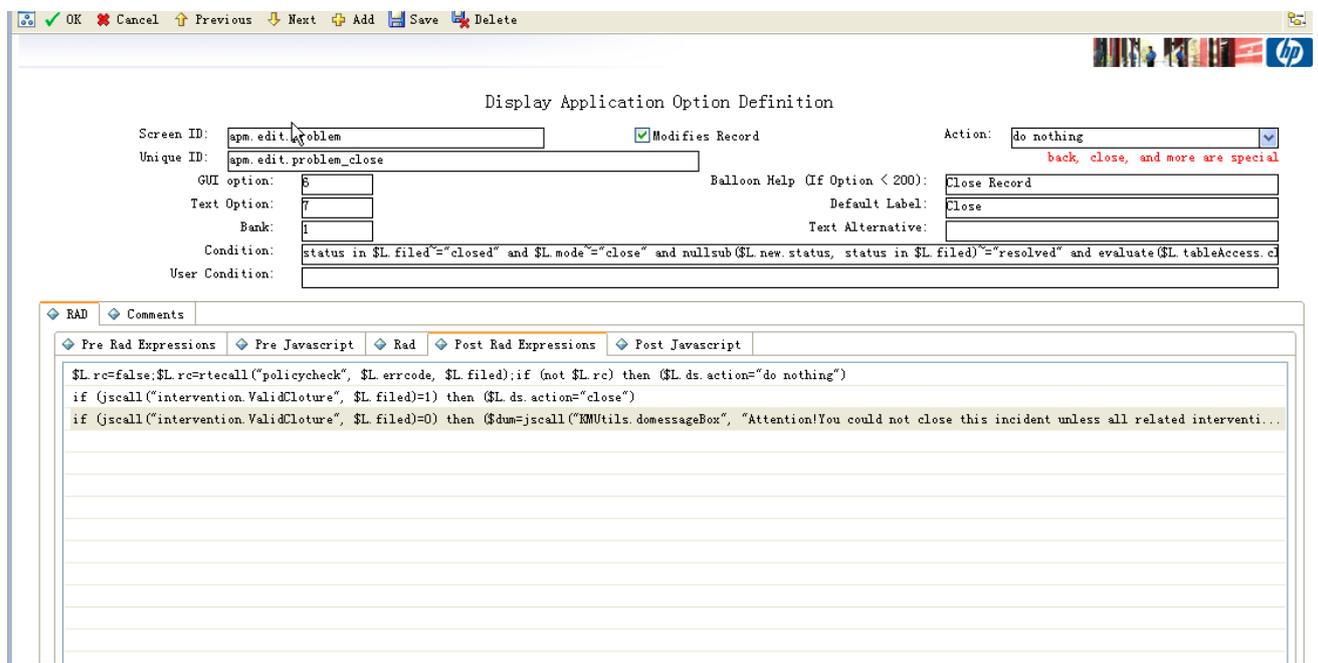

1.2.8 Update display option

Enter 'do' in command line, input :apm.edit.problem_close

Add the following items in Post Rad Expressions

Do the same thing to display option apm.edit.problem_close.bg

Chapter 2

Telecom CI Types Definition

2.1 Install Telecom CI Types Kit

Install the Telecom CI Types kit (for merge customization function),the following will be added to system manage.

Filename	Name	Note
dbdict	customer	
dbdict	network	
dbdict	terminationpoint	
dbdict	telesoftware	
dbdict	equipment	
dbdict	connection	
dbdict	topologicallink	
dbdict	trail	
dbdict	managedelement	
dbdict	mocirl	
dbdict	resservicerelation	
devtype	Customer	
devtype	Network

format	connection	
format	topologicallink	
format	trail	
format	managedelement	
format	mocirl	
format	resservicerelation	
formatctrl	networkservice.browse	
link	networkservice.browse	

2.2 Update configurationItem form

Enter 'fd' in command line, and search configurationItem, Click Design. You will go to the design form.

Add notebook for each CI Type. For example, you can add 'Trail' with related fields, with visible conditions: [type]="trail"

The screenshot displays the HP Service Manager Forms Designer interface. The main window is titled "HP Service Manager - Forms Designer: configurationItem - HP Service Manager Client". The interface is divided into several sections:

- Left Panel:** A navigation tree showing various system components like "System Name", "Incident Management", "Tools", "Knowledge Management", etc.
- Central Canvas:** The design area for the configurationItem form. It features a "Form Designer: configurationItem" tab. The form includes fields for "CI Identifier", "CI Name", "Asset Tag", "Status", "Owner", "Config admin group", "Support Groups", "Part Number", "Model", "Version", "Serial Number", "Title", and "Description". There are also tabs for "Baseline" and "Managed State", and a sub-section for "Trail" with fields like "Trail Name", "Tx A End Name", "Tx Trail Layer", "Tx Z End Name", "Vpn Bandwidth", "Vpn Head", "Vpn Tail", "Vpn Vrf Name", "Vpn Vrf Id", and "Vpn Vrf Edtarget".
- Right Panel:** A "Properties" pane titled "Notebook Tab". It contains a table with the following data:

Property	Value
Accessible Description	
Accessible Name	
Caption	Trail
Caption Condition	
Name	page1271949358526
Visible	<input checked="" type="checkbox"/>
Visible Condition	[type]="trail"

Chapter 3

Incident Management Enhancement

3.1 Install Incident Management Enhancement Kit

Install the incident management enhancement kit (for merge customization function), the following will be added to system manage.

Filename	Name	Note
dbdict	TTAlarms	
format	TTAlarms.list.g	
formatctrl	login.DEFAULT	
displayoption	apm.first_impact apm.edit.problem_impact	
ScriptLibrary	IncidentEnhancement common	
category		
producttype		
subcategory		

3.2 Customization

3.2.1 Update dbdict probsummary

First of all, you should use the following statement to create a table in your SM database.

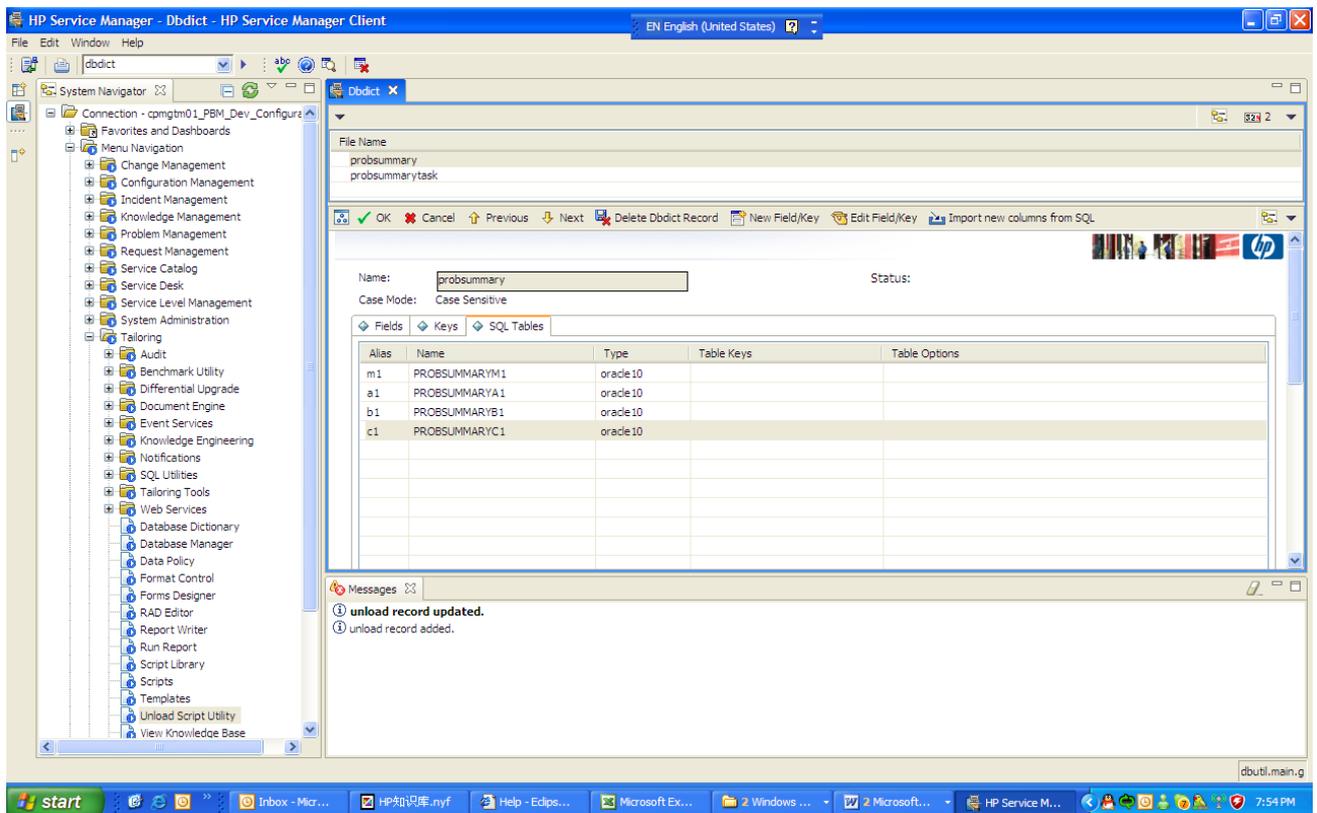

```
create table PROBSUMMARYC1
(
  "NUMBER"          VARCHAR2(90),
  RECORD_NUMBER     INTEGER,
  DETAILED_SERVICE_NAME  VARCHAR2(200),
  DETAILED_SERVICE_CRITICAL CHAR(1),
  DETAILED_SERVICE_PRIORITY  VARCHAR2(5),
  DETAILED_SERVICE_SUBSCRIBER VARCHAR2(200),
  DETAILED_SERVICE_INFO    VARCHAR2(512));

create table PROBSUMMARYB1
(
  "NUMBER"          VARCHAR2(90),
  RECORD_NUMBER     INTEGER,
```

```
FAILED_ITEM VARCHAR2(200),
FAILED_REASON VARCHAR2(50)
);
```

3.2.1.1 Add alias tables to probsummary

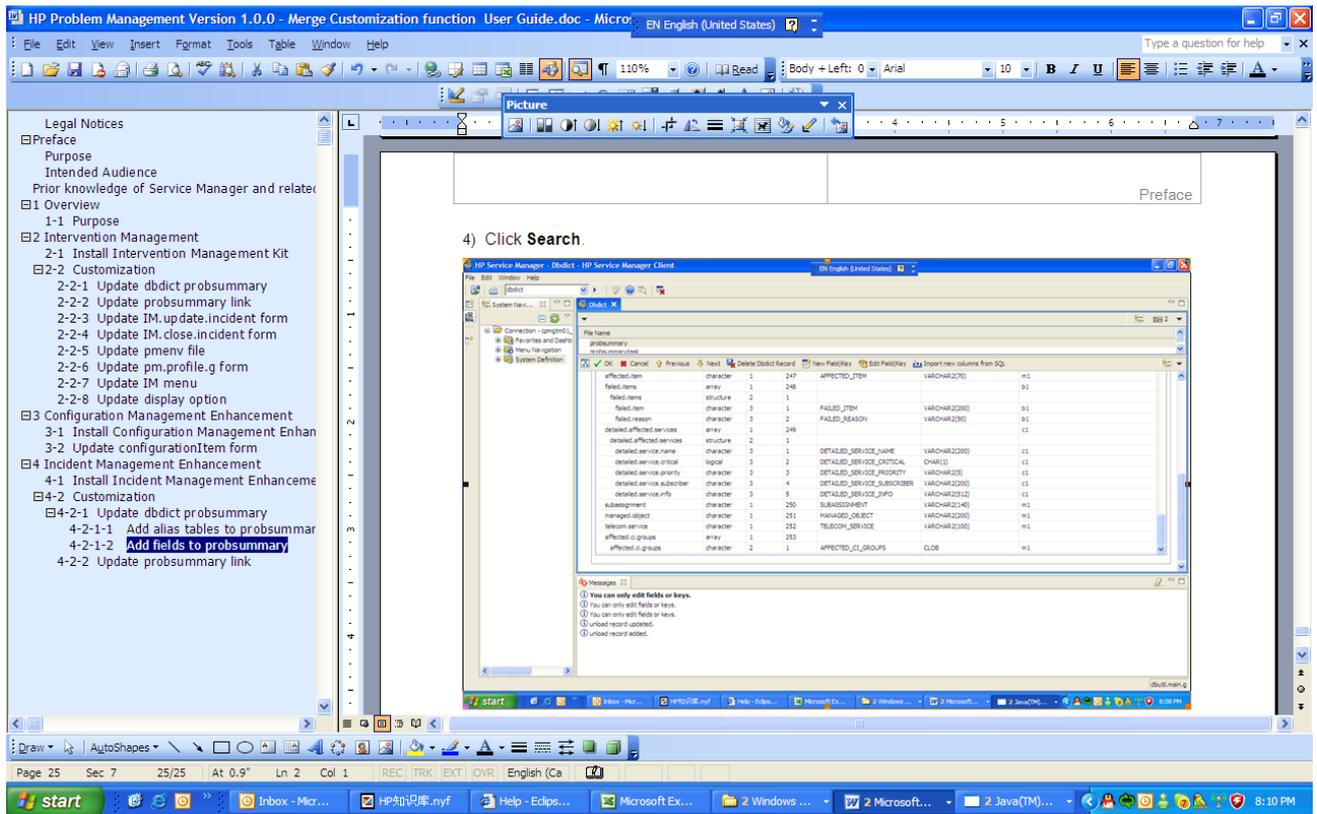

- 1) Log on HP Service manager7.11 via “falcon” account.
- 2) From the Service Manager main menu, Click **Tailoring >Database Dictionary**.
- 3) Type “probsummary” into the **File Name** field.
- 4) Click **Search**.

- 5) Add a Alias named “b1”, “c1”. Table named “PROBSUMMARYB1”, “PROBSUMMARYC1”;

3.2.1.2 Add fields to probsummary

- 1) Log on HP Service manager7.11 via “falcon” account.
- 2) From the Service Manager main menu, Click **Tailoring >Database Dictionary**.
- 3) Type “probsummary” into the **File Name** field.
- 4) Click **Search**.

5) Add two structures named failed.items and detailed.affected.services. The detail information as above picture.

6) Click **Ok** to save the changes.

3.2.1.3 Create alias to the fields of probsummary

Please refer to 2-2-1 to create alias for "NUMBER" field, alias name is vj.number.alarm

3.2.2 Update probsummary link

1) Enter 'link' in command line, input 'probsummary'

Field Name	Field Type	Field Length	Field Format	Field Name	Field Type	Field Length	Field Format
number.vj.sla	slaactive			foreign.key	foreign.filename='probsum...		
number.vj.alerts	Alert			unique.key	alert.type='sla' and file.na...		
logical.name.vj.sloavail	slamonthly			logical.name	avail.type='uptime' and ye...		
logical.name.vj.duration	slamonthly			logical.name	avail.type='duration' and y...		
opened.by	operator	operator.view		name	\$query		
updated.by	operator	operator.view		name	\$query		
closed.by	operator	operator.view		name	\$query		
folder	FolderDef			folder	\$in_query		
affected.services	device			logical.name			
affected.item	device			logical.name	\$query		
number.vj.slo	sloresponse			foreign.key	foreign.filename='probsum...		
number.vj.intervention	probsummarytask			incident.id		VJ ONLY	
number	probsummarytask			number	\$query		(from t...
id	probsummarytask			id	\$query		
contact.name.vj	incidents	ess.SD.my.qbe		contact.name	\$query		VJ ONLY
vj.number.alarm	TTAlarms			TTID	\$query		

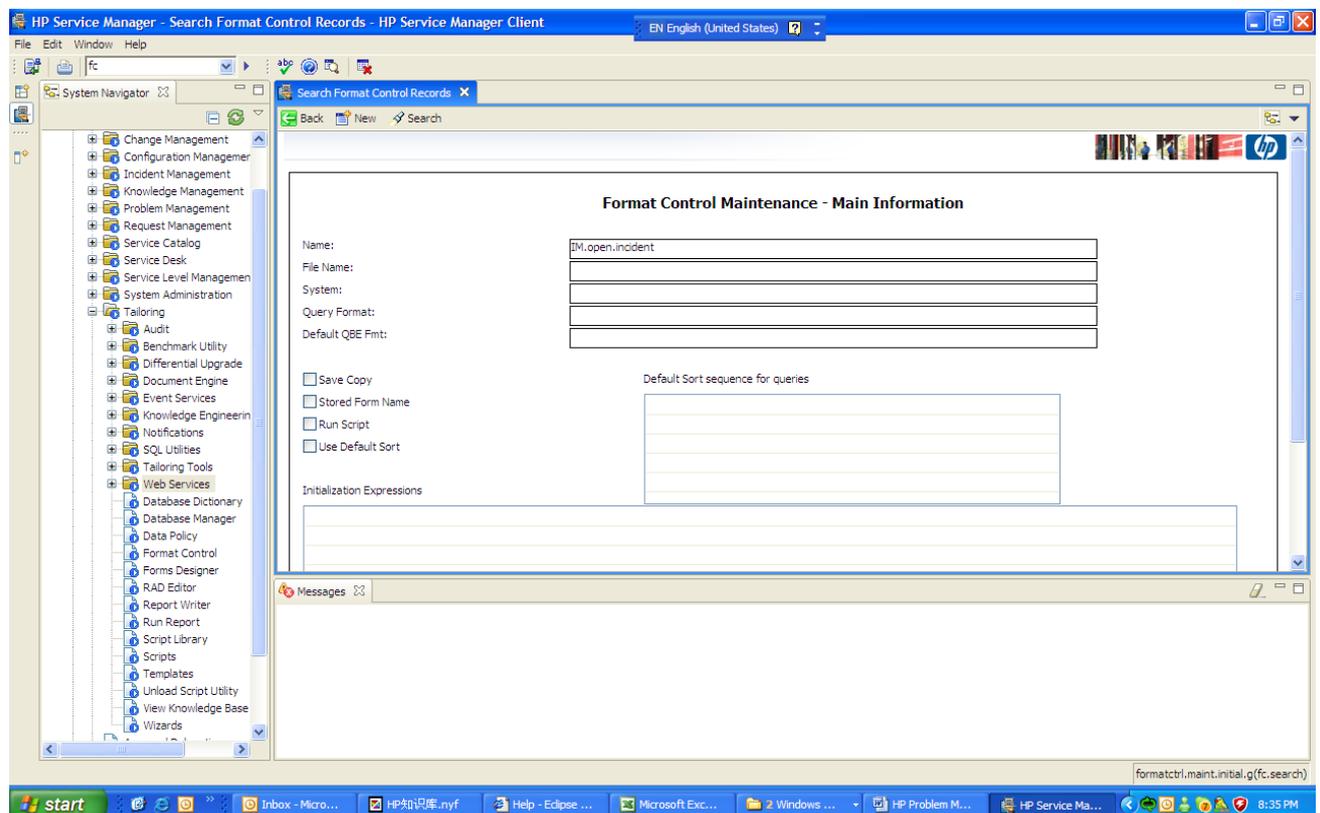

2) Add a line to the end of the line, just like the following information.

Source Field Name	Target File Name	Target Format Name	Target Field Name	Add Query	Comm.
vj.number.alarm	TTAlarms		TTID	\$query	

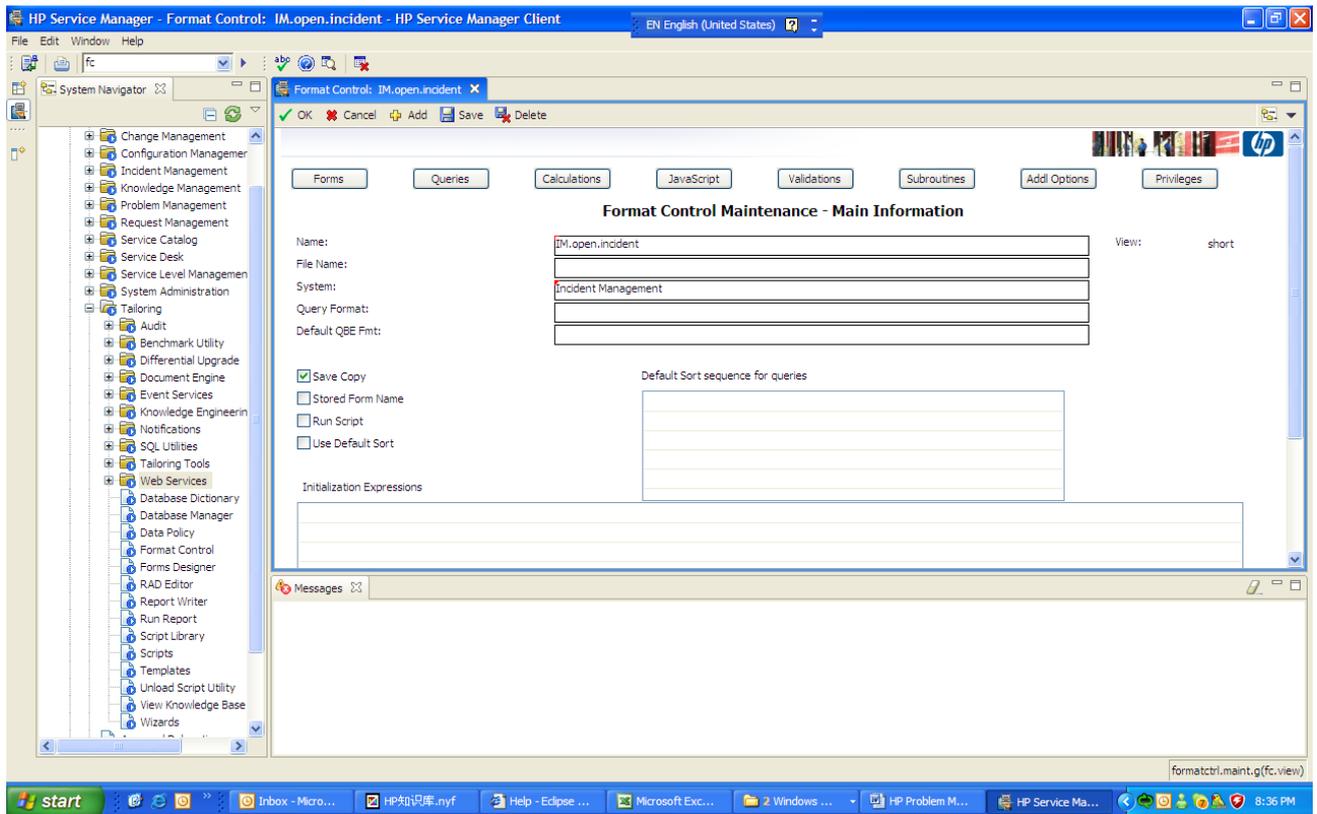

3) Click Ok.

3.2.3 Update IM.open.incident format control

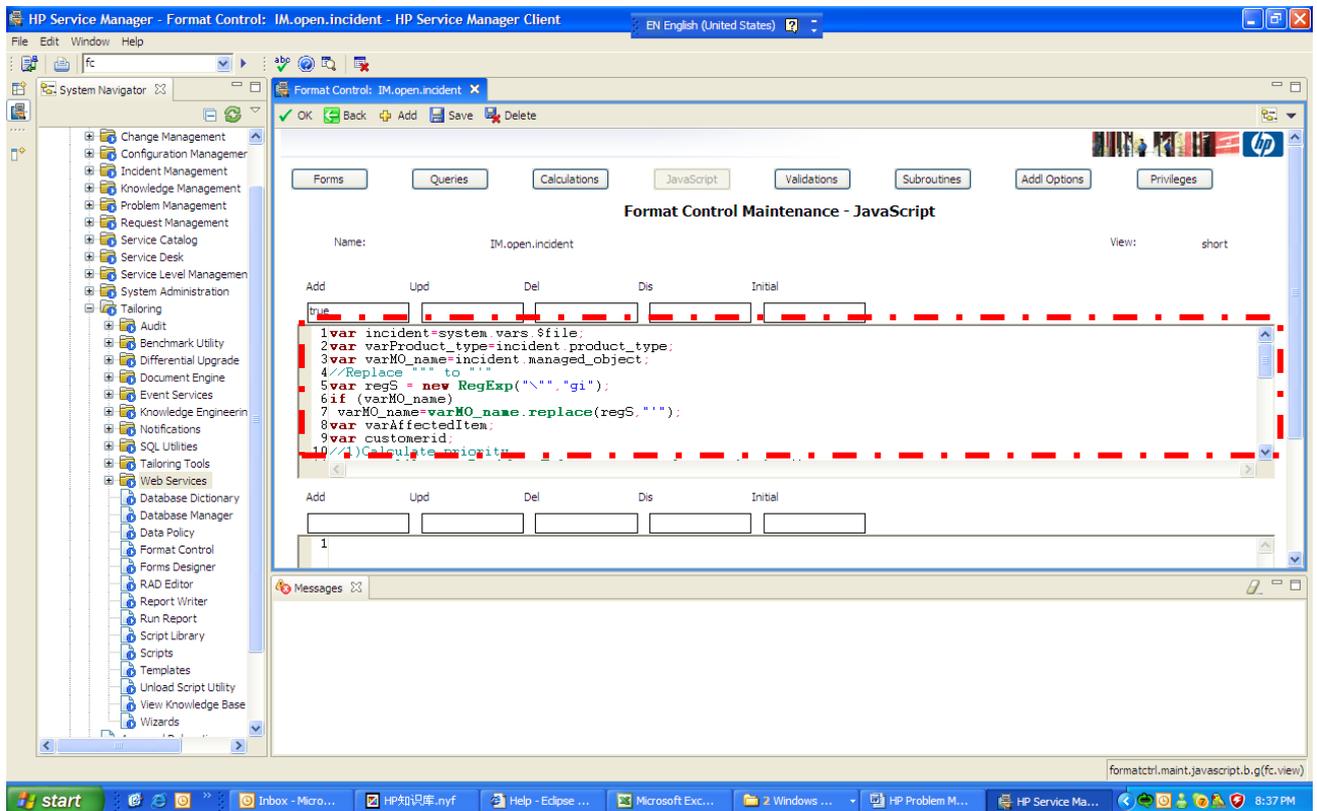

- 1) Log on HP Service manager7.11 via “falcon” account.
- 2) From the Service Manager main menu, Click **Tailoring** > **Format Control**.
- 3) Type “IM.open.incident” into the name field

4) Click **Search**.

5) Click **JavaScript** button.

Set add option equal to "true"

Add the following script into the red quadrangle part.

```
var incident=system.vars.$file;
var varProduct_type=incident.product_type;
var varMO_name=incident.managed_object;
//Replace "" to ""
var regS = new RegExp("\\", "gi");
if (varMO_name)
    varMO_name=varMO_name.replace(regS, "");
var varAffectedItem;
var customerid;
//1)Calculate priority.
system.library.IncidentEnhancement.update_priority();
if (varProduct_type=="TeMIP")
{
    //2)Lookup MO related Service CI
    varAffectedItem =
system.library.TelcoApplication.lookup_affected_ci (varMO_name);
    incident.logical_name=varAffectedItem;

    //Lookup CI type
    var ci_type =
system.library.TelcoApplication.lookup_ci_type (varAffectedItem, incident);
    //if (!ci_type) return;
    if (ci_type=="network")
    {
        //Set related services, customers and incidents.

system.library.TelcoApplication.service_lookup_action (varAffectedItem, incident)
    } else{
        //Set related resource, services, customers and incidents

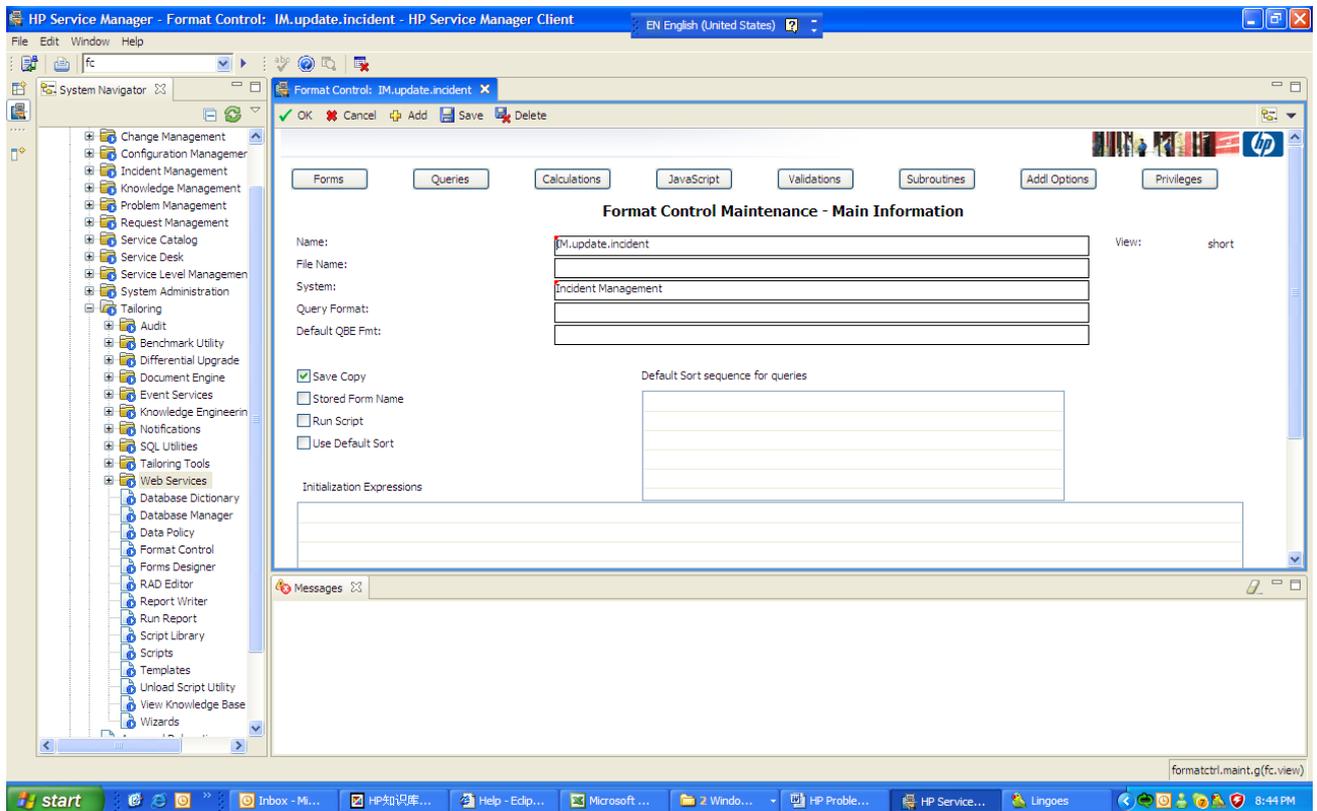

system.library.TelcoApplication.resource_lookup_action (varAffectedItem, incident)
    }
}
```

3.2.4 Update IM.update.incident format control

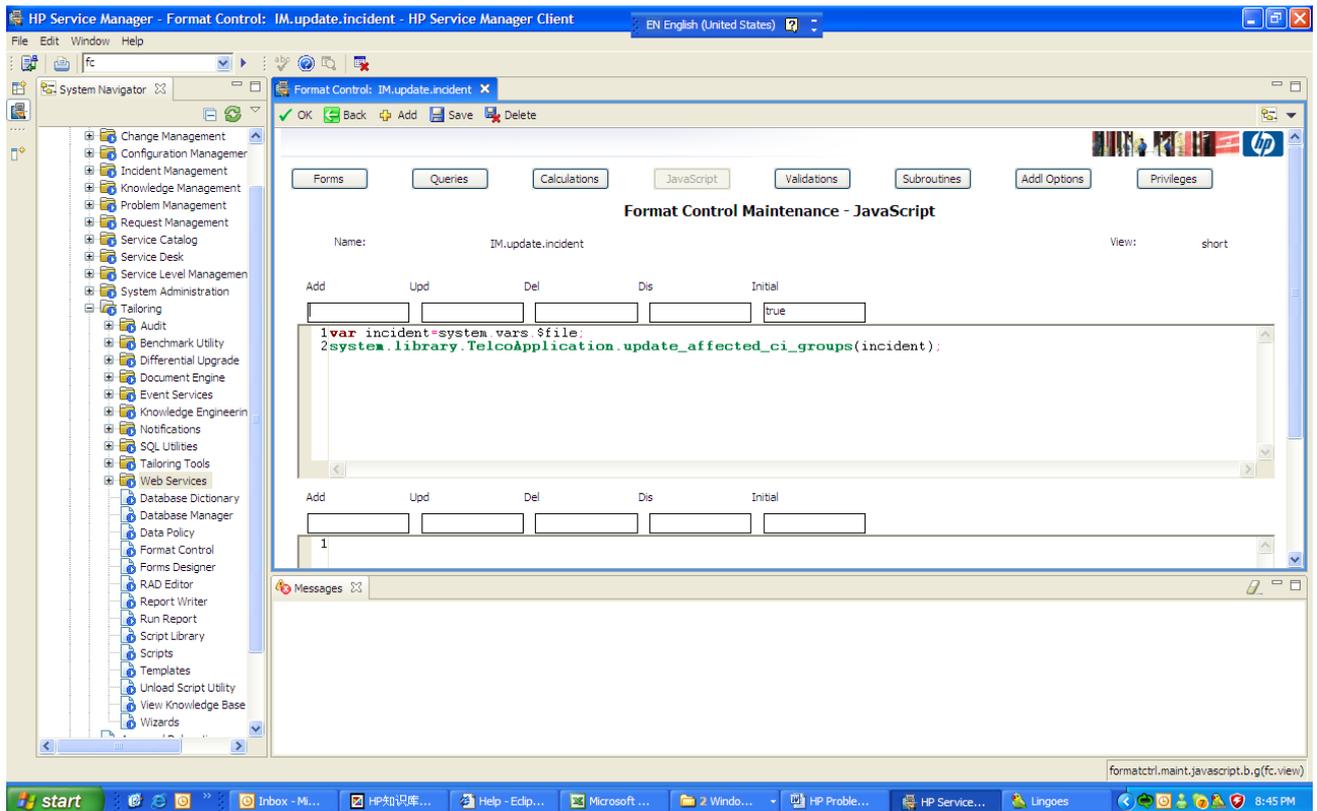

- 1) Log on HP Service manager7.11 via “falcon” account.
- 2) From the Service Manager main menu, Click **Tailoring > Format Control**.
- 3) Type “IM.update.incident” into the name field

4) Click **Search**.

5) Click **Javascript**.

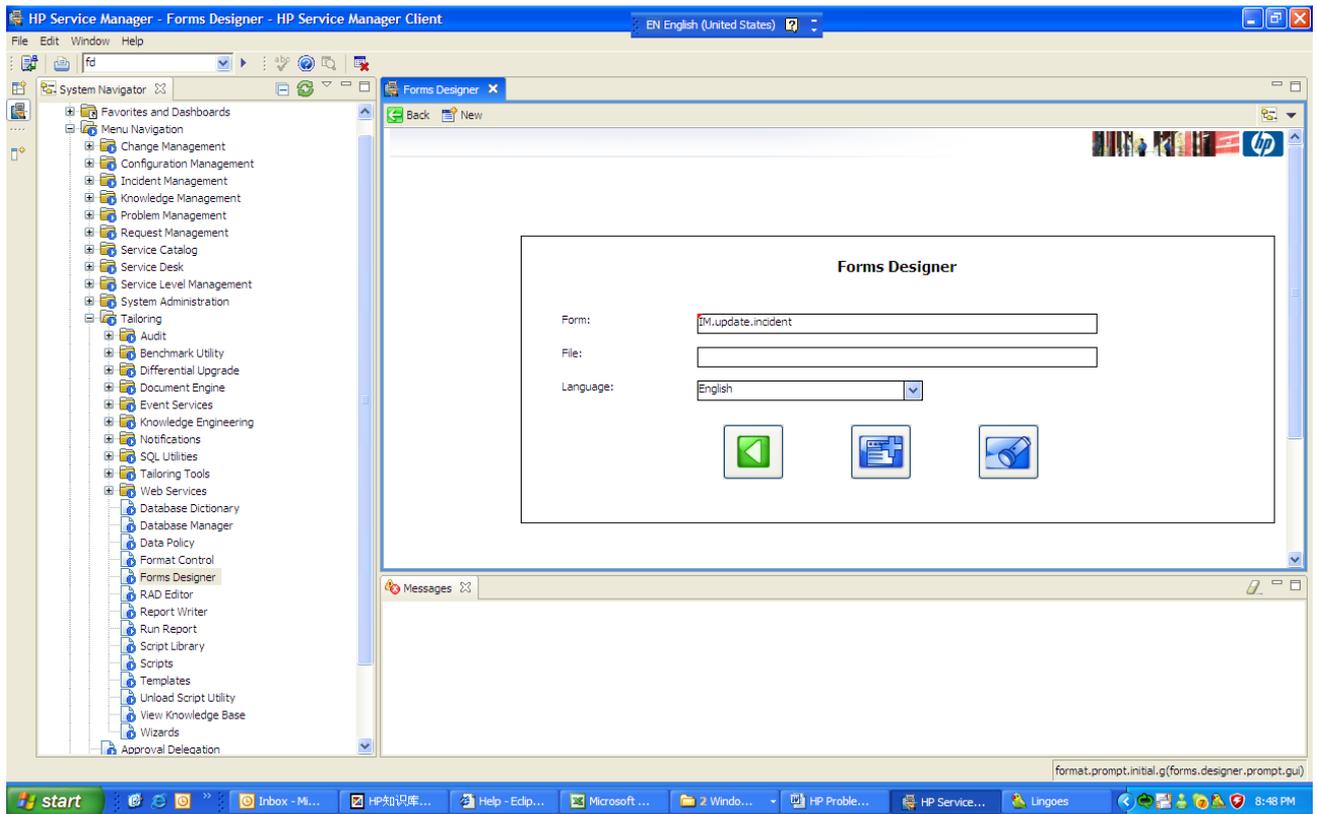

Add above information into your format control.

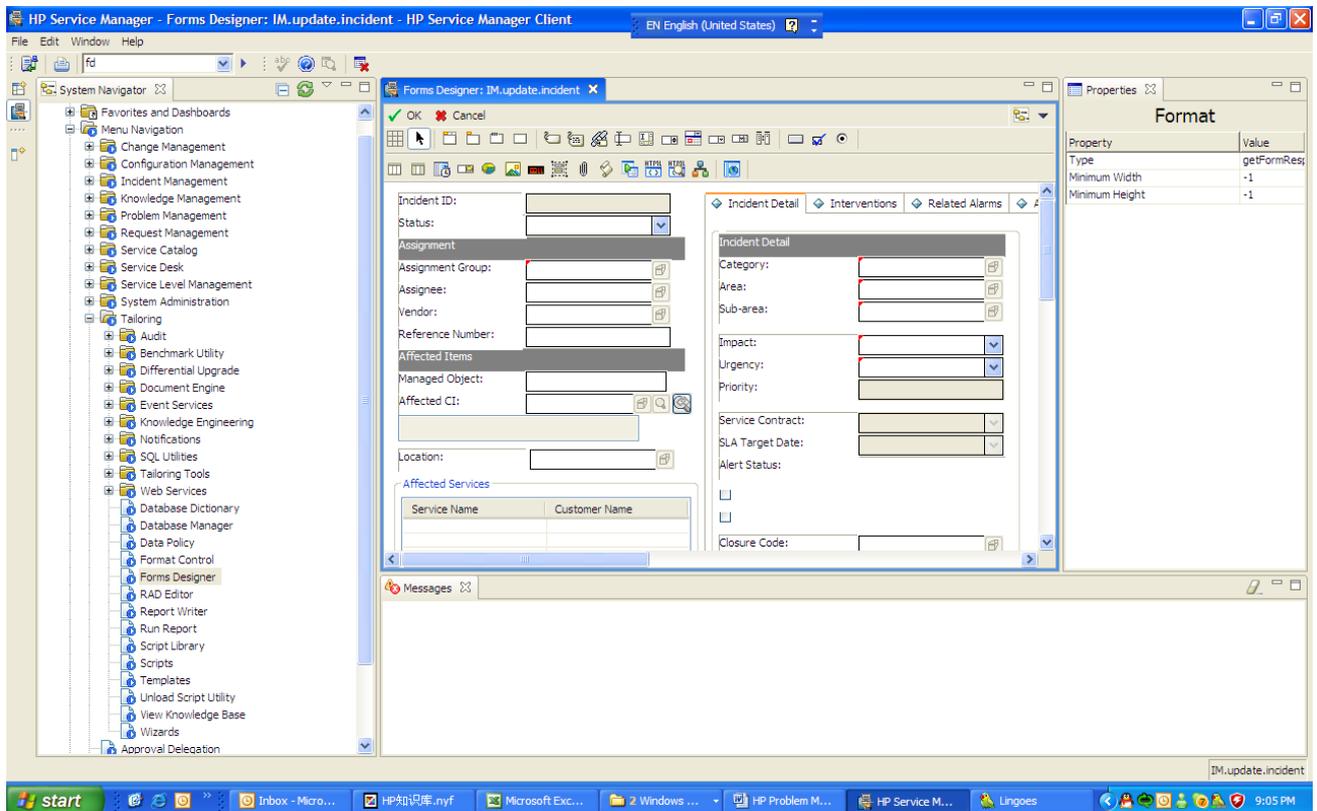

3.2.5 Update IM.update.incident Form

3.2.5.1 Add affected service table

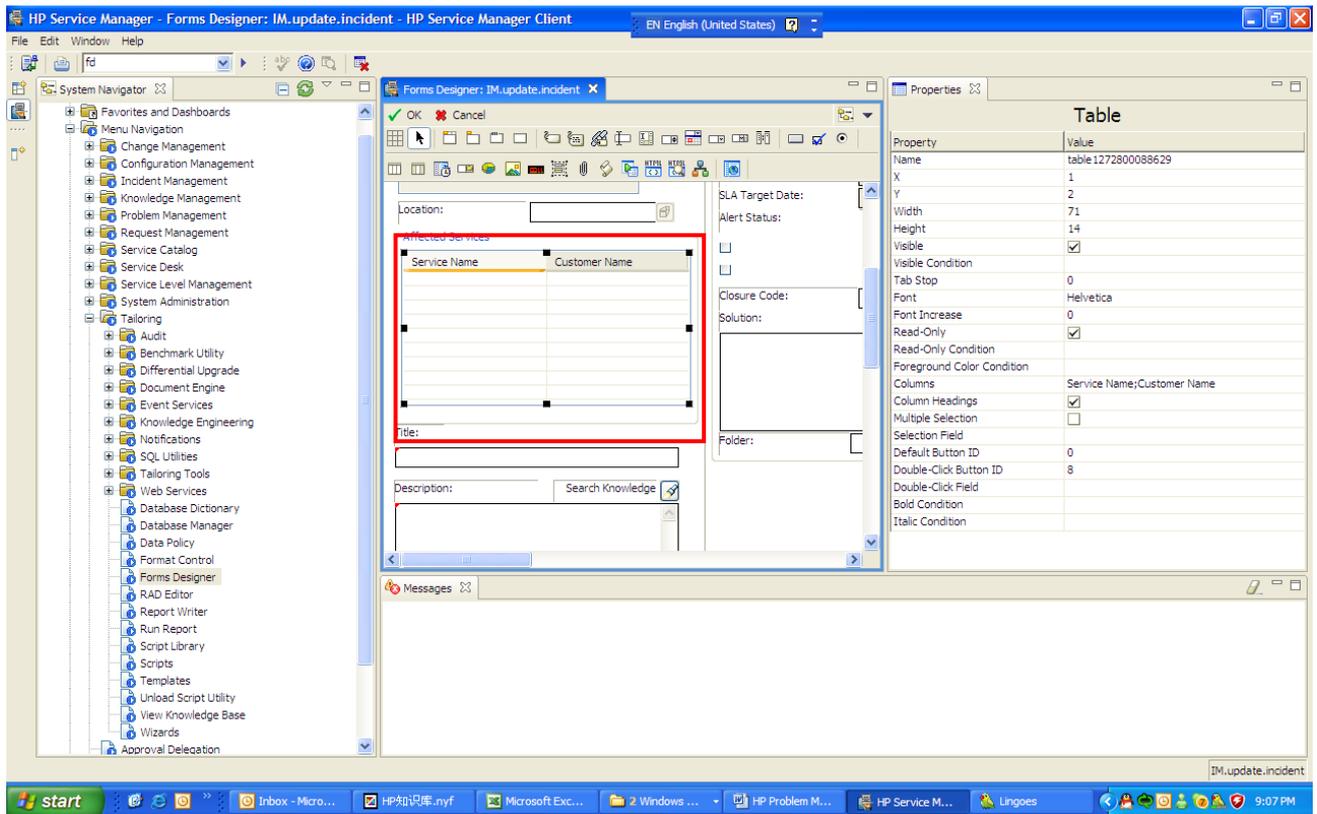

- 1) Log on HP Service manager7.11 via “falcon” account.
- 2) From the Service Manager main menu, Click **Tailoring > Forms Designer**.
- 3) Type “IM.update.incident” into the name field

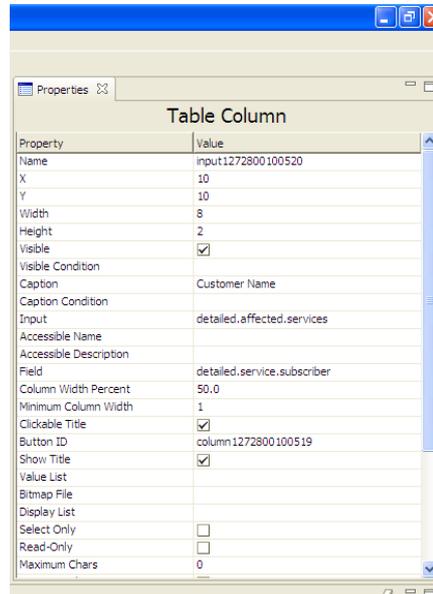

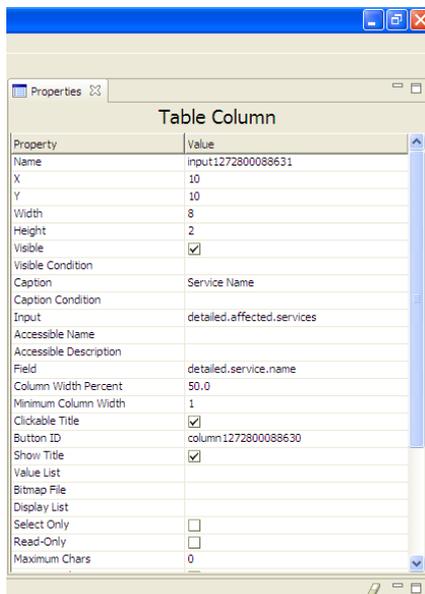

4) Click Search.

5) Add a table to the form. Please refer to the following picture.

The detail information of the column as follows.

6) Click Ok.

3.2.5.2 Add “Related alarms” SubForm

Please refer to 2-2-3 section to add a sub form to IM.update.incident form.

The detail information as follows.
