# Chapter 1 Introduction

## 1.1 Prerequisites

Before using this guide, you need to make use you have finish installing the following application on your server.

- a) Java SDK1.5
- b) Oracle Database 10g with UTF-8 Characters configuration.
- c) HP Service Manager7.11 Server with valid license and loaded OOB data.

And you also need to install a HP Service Manager7.11 windows client on your machine and start HP Service Manager7.11 Server.

After that, you need to prepare the following information for the upgrade.

- 1) Incident & Problem Management Extension Data files (There should be four data files:
  - i)Incident\_Management\_Enhancement.unl
  - ii) Intervention\_Management.unl
  - iii) VIP\_Customer\_Self\_Service.unl
  - iv)Telecom\_CI\_Types.unl
- 2) Oracle DB Username and password for Service Manager7.11

**Note: During this guide, we assume the Oracle DB Username and password for Service Manager7.11 is smuser/smuser. We also assume Oracle DB tnsname is SMDB.**

## 1.2 Support Operating System

This installation guide can be applied to the following operating system which already installed HP Service Manager7.11 on it).

- HP UX 11.31 Itanium.
- Linux(Redhat/Novell Linux Enterprise EditionV5).
- Windows 2003/2008 (32 and 64bit)

# Chapter 2

## Installing IPM on Unix Operating System

This chapter explains the how to install HP NGOSS Incident & Problem Management Extension V1.1 on Unix/Linux Operating system. To install IPM successfully, you must follow the steps below in order.

- 1) Creating required tables.
- 2) Install Incident Management Enhancement Module
- 3) Install Intervention Management Module
- 4) Install Telecom CI types kit.
- 5) Install VIP Self Service Module

### 2.1 Creating required Tables

To create tables in Oracle, you need to login Oracle Database via the following command via SQL\*Plus Tools.

```
sqlplus smuser/smuser@SMDB;
```

Then we need to execute the following SQL scripts within SQL\*Plus tools.

```
CREATE TABLE PROBSUMMARYC1
(
  "NUMBER"          VARCHAR2(90),
  RECORD_NUMBER     INTEGER,
  DETAILED_SERVICE_NAME  VARCHAR2(200),
  DETAILED_SERVICE_CRITICAL CHAR(1),
  DETAILED_SERVICE_PRIORITY VARCHAR2(5),
  DETAILED_SERVICE_SUBSCRIBER VARCHAR2(200),
  DETAILED_SERVICE_INFO  VARCHAR2(512)
);

CREATE TABLE PROBSUMMARYB1
(
  "NUMBER"          VARCHAR2(90),
  RECORD_NUMBER     INTEGER,
  FAILED_ITEM       VARCHAR2(200),
```

```
FAILED_REASON VARCHAR2(50)
```

```
);
```

## 2.2 Install Incident Management Enhancement Module

- 1) Log on Service Manager using falcon account.
- 2) Click Tailoring >Database Manager.

Note: Alternatively, you can open Database Manager from the command line, by typing db, and then pressing **Enter** or clicking **Execute Command**.

- 3) Right-click the form and select **Import/Load**.

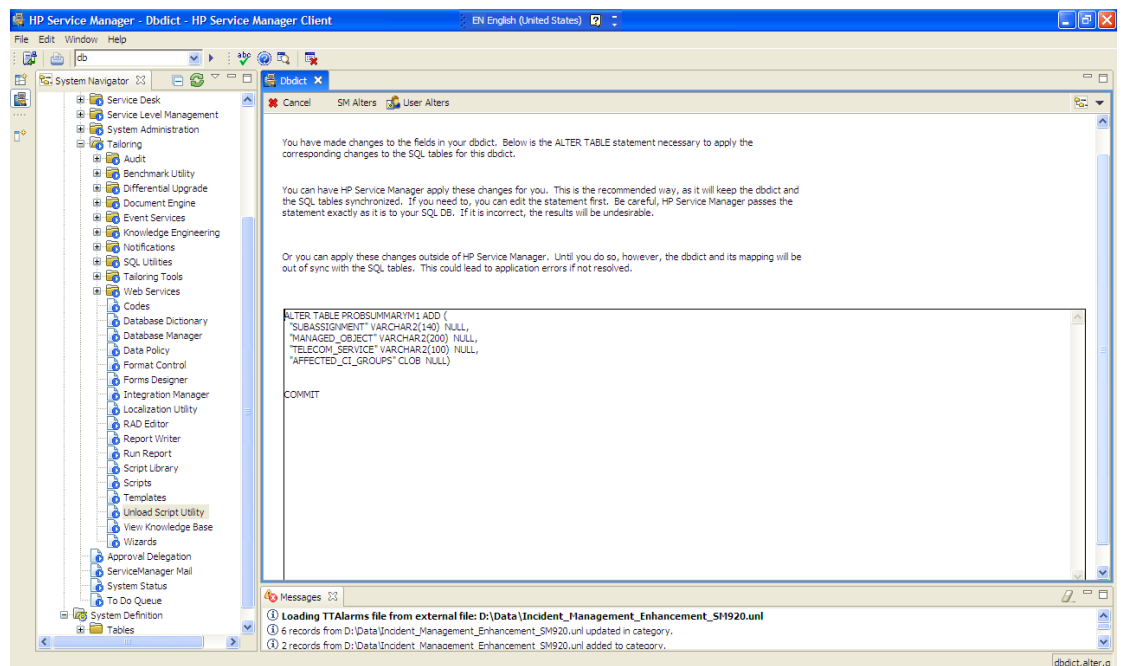

- 4) Type the name and path of the **“Incident\_Management\_Enhancement.unl”** file to load.  
e.g. D:\Data\Incident\_Management\_Enhancement.unl

- 5) Click Load FG. Then Service Manager will load all related information of **Incident Management Enhancement Module** into Service Manager. During the process, Service Manager7.11 will indicate that you will make some changes in the *probsummary* dbdict.

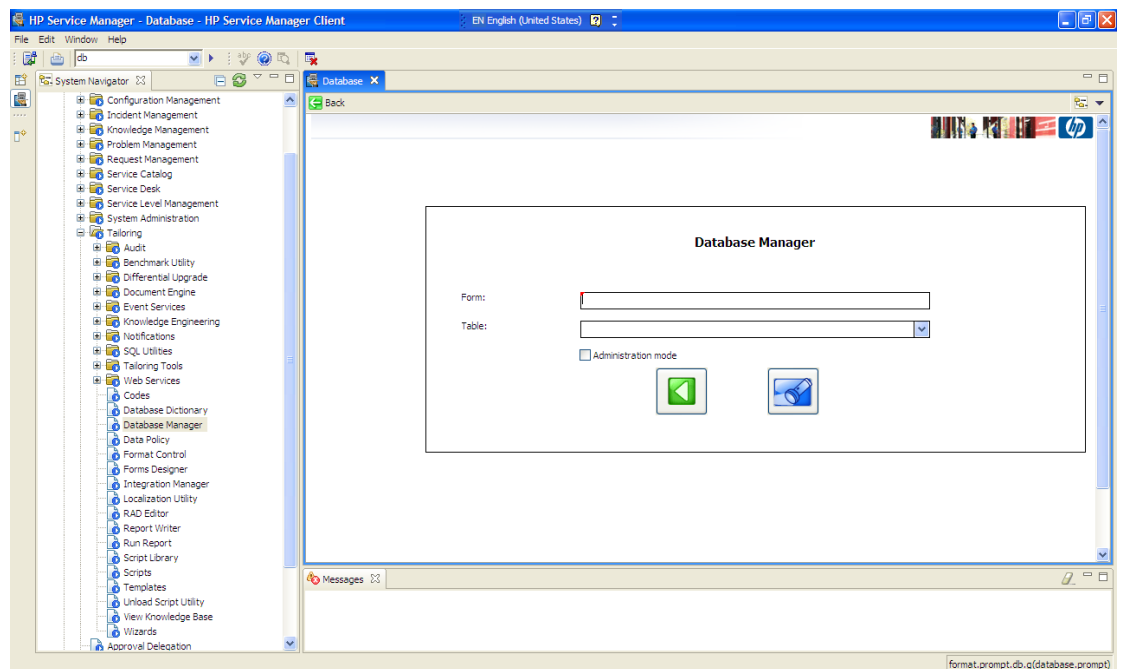

- 6) Click SM Alters, the system will apply the changes to *probsummary* database dictionary and continue loading data. When the following screen shows, it means, all the related information of **Incident Management Enhancement Module** has been loaded into Service Manager successfully.

## 2.3 Install Intervention Management Module

- 1) Log on Service Manager using falcon account.
- 2) Click Tailoring >Database Manager.

Note: Alternatively, you can open Database Manager from the command line, by typing db, and then pressing **Enter** or clicking **Execute Command**.

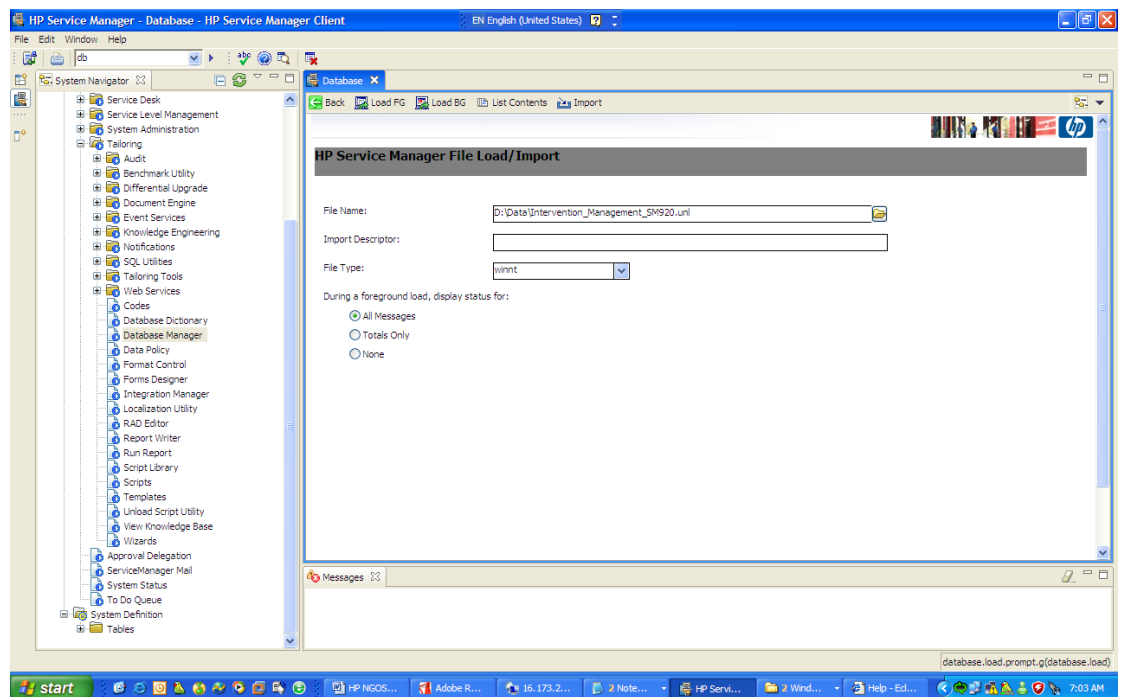

- 3) Right-click the form and select **Import/Load**.

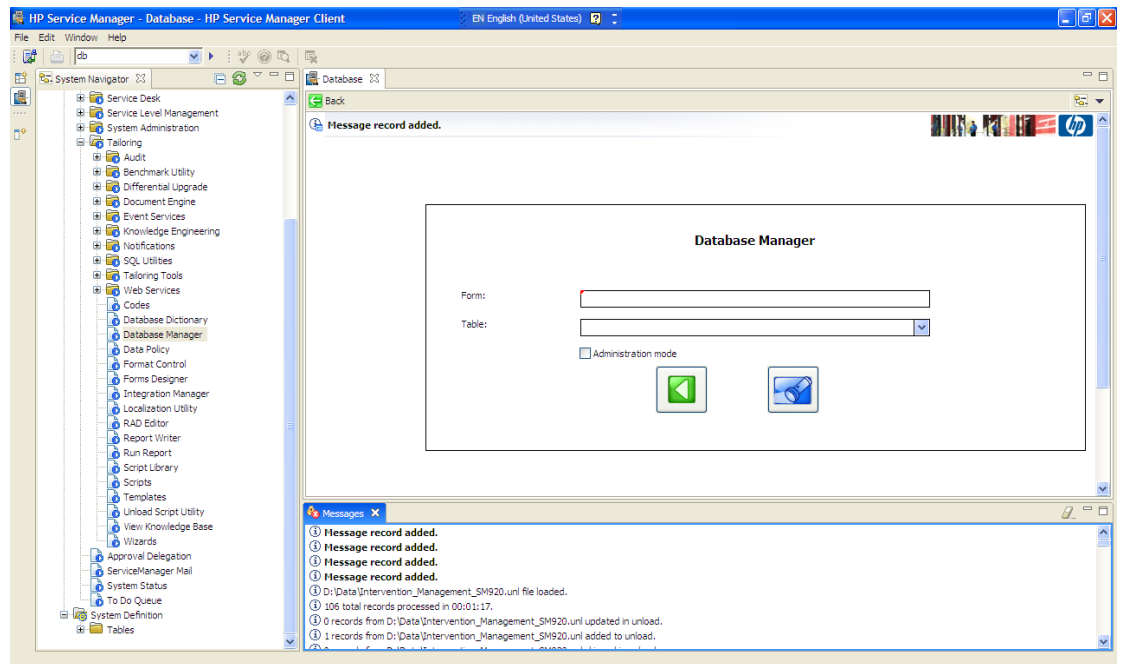

- 4) Type the name and path of the “**Intervention\_Management.unl**” file to load.

e.g. D:\Data\Intervention\_Management.unl

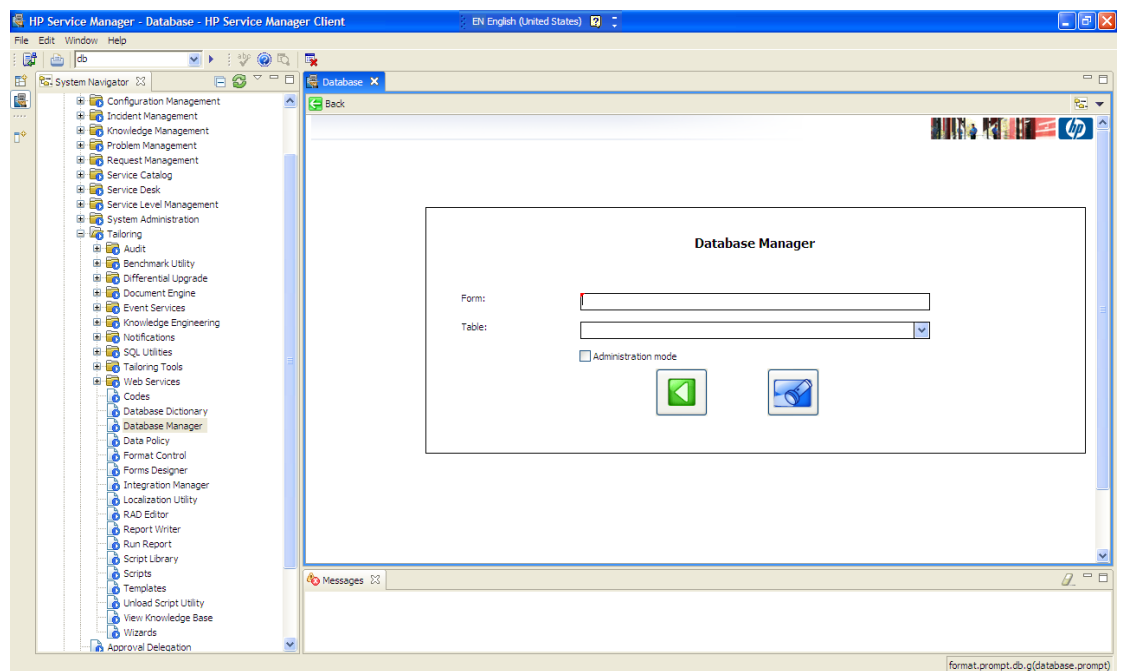

- 5) Click Load FG. Then Service Manager will load all related information of **Intervention Management Module** into Service Manager. When the following screen shows, it means all the related information has been loaded into Service Manager successfully.

## 2.4 Install Telecom CI Types kit

- 1) Log on Service Manager using falcon account.
- 2) Click Tailoring >Database Manager.

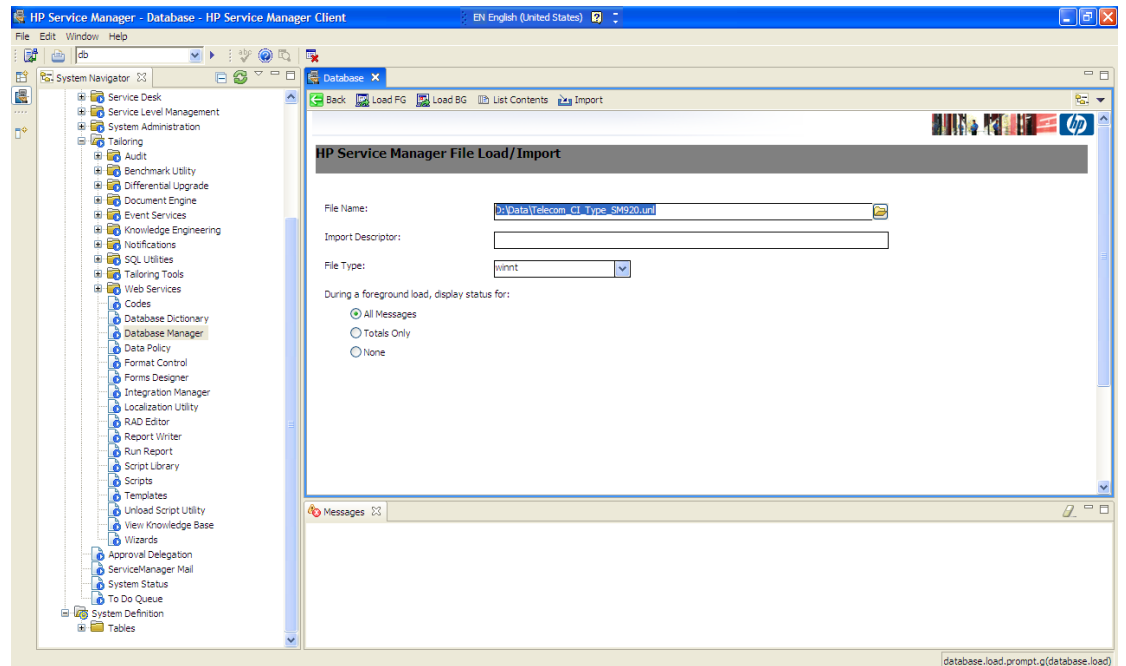

Note: Alternatively, you can open Database Manager from the command line, by typing db, and then pressing **Enter** or clicking **Execute Command**.

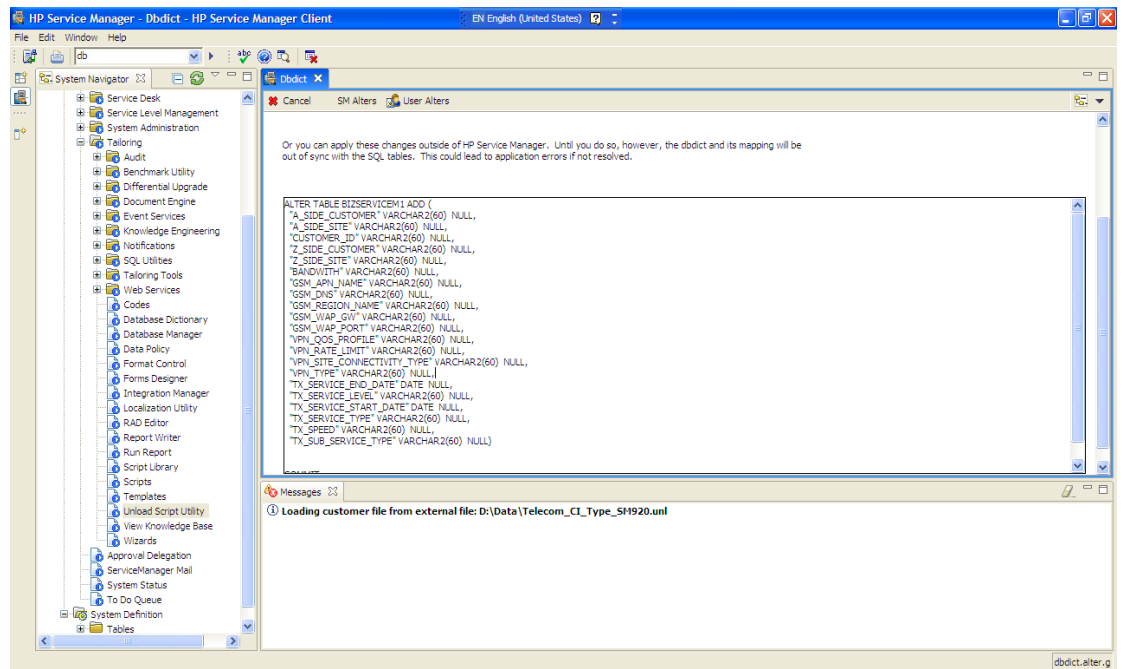

- 3) Right-click the form and select **Import/Load**.

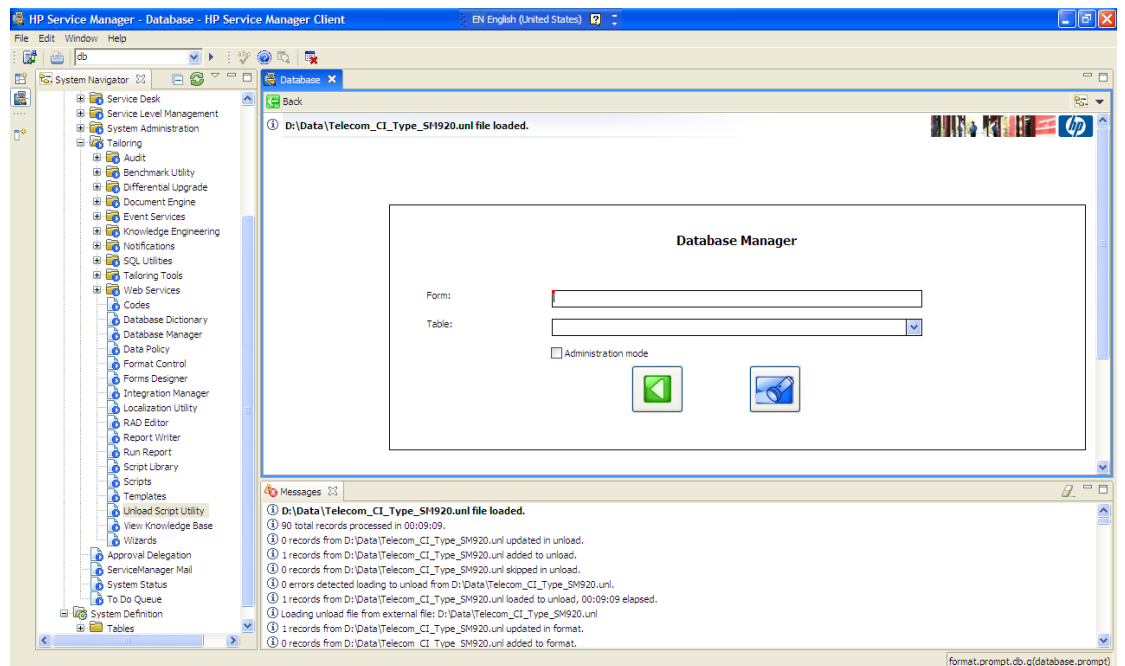

- 4) Type the name and path of the “**Telecom\_CI\_Type.unl**” file to load.  
 e.g. D:\Data\Telecom\_CI\_Type.unl

- 5) Click **Load FG**. Then Service Manager will load all related information of **Telecom CI Types** into Service Manager. During the process, Service Manager7.11 will indicate that you will make some changes in the *bizservice* dbdict.

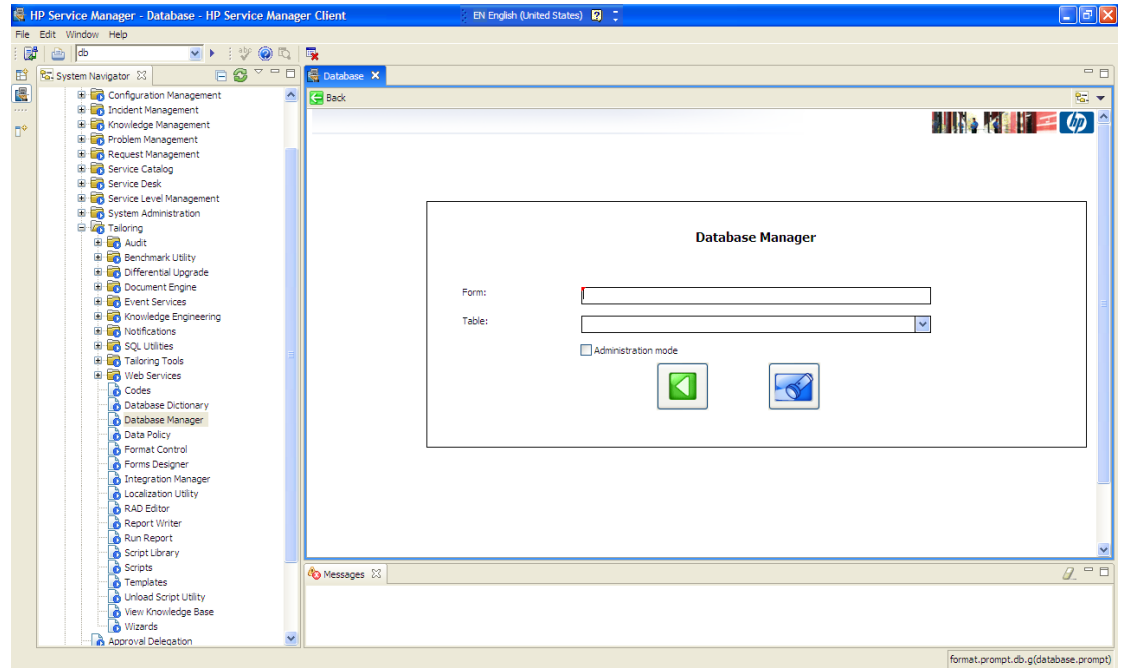

7) Click **SM Alters**, the system will apply the changes to *bizservice* database dictionary and continue loading data. When the following screen shows, it means, all the related information of **Telecom CI Types** has been loaded into Service Manager successfully.

## 2.5 Install VIP Self Service module

- 1) Log on Service Manager using falcon account.
- 2) Click Tailoring > Database Manager.

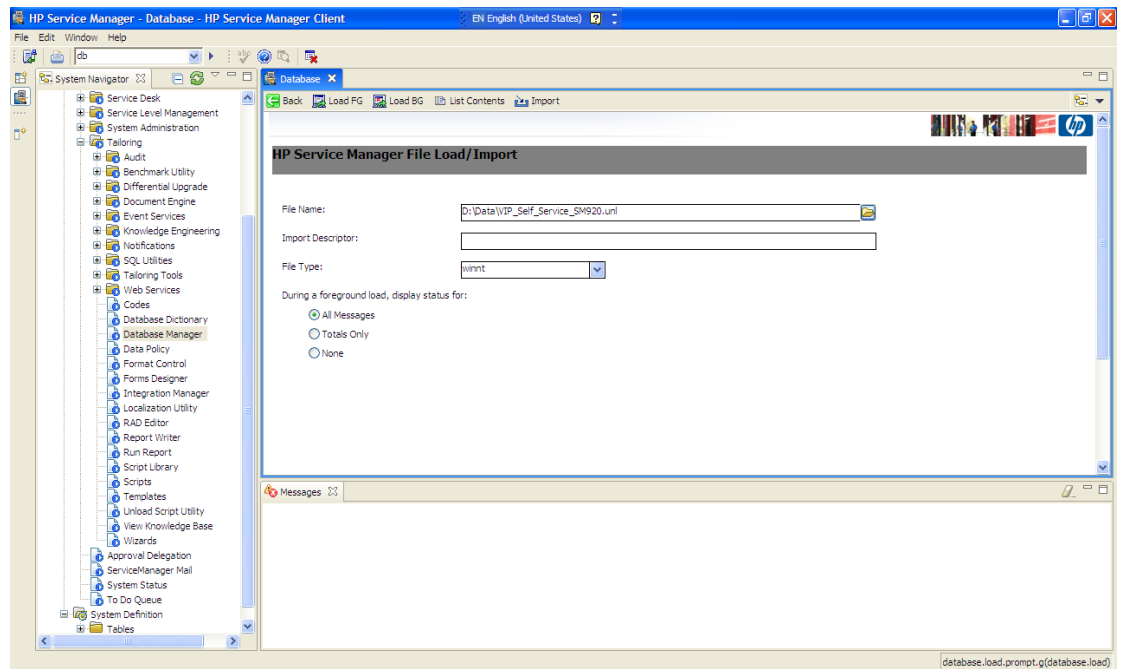

Note: Alternatively, you can open Database Manager from the command line, by typing db, and then pressing **Enter** or clicking **Execute Command**.

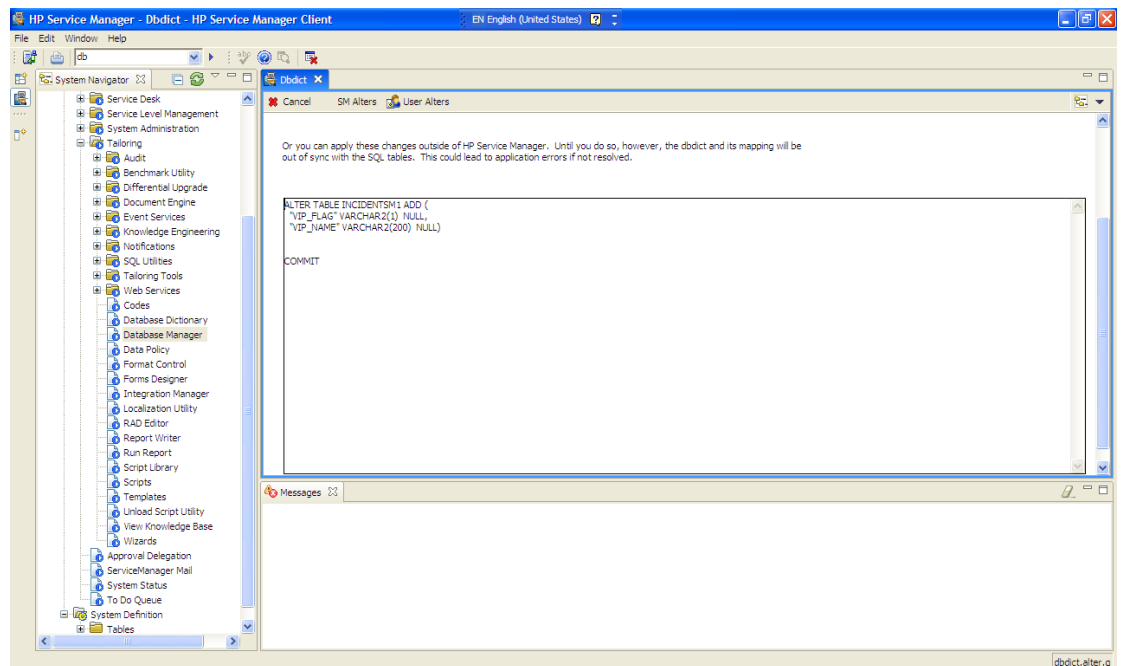

3) Right-click the form and select **Import/Load**.

4) Type the name and path of the “**VIP\_Self\_Service.unl**” file to load.  
e.g. D:\Data\VIP\_Self\_Service.unl

- 5) Click Load FG. Then Service Manager will load all related information of **VIP Self Service Module** into Service Manager. During the process, Service Manager 7.11 will indicate that you will make some changes in the *incidents* dbdict.

- 6) Click **SM Alters**, the system will apply the changes to *incidents* database dictionary and continue loading data. When the following screen shows, it means, all the related information of **VIP Self Service Module** has been loaded into Service Manager successfully.
